In the District Court of the United States,
for the Northern District of California,
Southern Division.

26591 S.

In proceedings for the reorganization of a railroad.

In the Matter of THE WESTERN PACIFIC RAILROAD COMPANY,

Debtor.

PETITION [1*]

To the Honorable, the Judges of the District Court of the United States, for the Northern District of California, Southern Division:

The petition of The Western Pacific Railroad Company, a railroad corporation, hereinafter referred to as the debtor, respectfully represents:

First: That the debtor is a railroad corporation organized and existing under the laws of the State of California and is a citizen and resident of the State of California; and is a common carrier by railroad engaged in the transportation of persons and property in interstate and intrastate commerce in the States of California, Nevada and Utah, and is not a street, suburban or interurban electric railway; that during the six months' period immediately preceding the filing of this petition the debtor has had, and now has, its principal operating office in the City of San Francisco, in the State of California, and in the Northern District of California, Southern Division.

*Page numbering appearing at foot of page of original certified Transcript of Record.

Second: That there became due on March 1, 1934, interest in the amount of $1,231,252.50 on $49,290,100. First Mortgage Bonds of the debtor and a like amount of interest thereon on September 1, 1934, payment of which was conditionally deferred until January 1, 1937, pursuant to a deferment plan agreement signed by holders of more than 86% of the outstanding First Mortgage Bonds, but more than 13% of the holders of said outstanding bonds executed no deferment agreement. That it is provided in [2] the said deferment plan agreement between the debtor and holders of said First Mortgage Bonds, parties to such Deferment Plan, that the installments of interest due March 1, 1934, and September 1, 1934, and conditionally deferred until January 1, 1937, shall forthwith become due and payable if any receiver for The Western Pacific Railroad Company shall be appointed by any Court of competent jurisdiction or any proceeding commenced under Section 77 of the Federal Bankruptcy Act, as amended, prior to January 1, 1937.

That there became due on March 1, 1935, interest in the amount of $1,231,252.50 on said First Mortgage Bonds of the debtor and the whole amount thereof remains unpaid and the debtor is without funds to pay and discharge the same.

That there is also due and payable the following amounts of interest on the unfunded debt of the debtor and the debtor is without funds to pay and discharge the same:

Name of Creditor	Principal amount of debt as of June 30, 1935	Interest accrued and unpaid as of June 30, 1935
Reconstruction Finance Corporation	$2,963,000.	$ 204,324.13
The Railroad Credit Corporation	2,538,956.	53,922.73
A. C. James Co.	4,999,800.	374,985.00
The Western Pacific Railroad Corporation	5,739,722.	1,018,852.76

That the debtor is without funds to pay and discharge the aforesaid obligations as they mature and upon information and belief alleges that it has no means of borrowing or otherwise procuring such funds; that it is unable to meet its debts as they mature and desires to effect a Plan of Reorganization, pursuant to Section 77 of Chapter VIII of the Acts of Congress relating to bankruptcy.

Third: That a Plan of Reorganization of debtor, an outline of which is annexed hereto, marked Exhibit A, has been prepared by the debtor after protracted negotiation and conference [3] with representatives of large institutional holders of First Mortgage Bonds and junior creditors, including Reconstruction Finance Corporation.

Fourth: That a copy of this petition is this day being filed with the Interstate Commerce Commission with a request that said Commission fix an early date for a public hearing at which the debtor may present said Plan, as provided in said Section 77.

Fifth: That the filing of this petition by and on behalf of the debtor was duly authorized by resolution of the Board of Directors of the debtor adopted

at a meeting thereof duly held on the 2nd day of August, 1935.

Wherefore, your petitioner prays that an order may be entered approving this petition as properly filed under said Section 77 of said Chapter VIII and that it be granted all other and further relief to which it may be entitled.

THE WESTERN PACIFIC RAILROAD COMPANY

By (original signed) CHARLES ELSEY,
President.

WARREN OLNEY, Jr.,
Balfour Building,
San Francisco, California,

NOTES

Note 1—Bonds to Be Purchased by Reconstruction Finance Corporation:

(a) Reconstruction Finance Corporation is undertaking, subject to approval of the Interstate Commerce Commission, to (1) provide money for rehabilitation up to $10,000,000 by the purchase of 30-year bonds to bear interest at 4% for the first ten years and at such higher rate thereafter as will make an average yield of 4½% from the date money is advanced to the maturity of bonds, or (2) in the alternative, to advance $10,000,000 for twenty or twenty-five years at 4% collaterally secured by 120% of First Mortgage 4% Bonds.

(b) Money will be drawn down over period of about 3 years as required to finance program of work.

Note 2—Income Mortgage Bonds:

(a) Income Mortgage Bonds to be issued in two series, viz:

Approximately	
$19,580,429	Series "A" 5½% Non-Convertible 50-Year Bonds.
19,580,429	Series "B" 5½% 50-Year Bonds convertible into 30 shares of no par value common stock for each $1,000 bond.

(b) Interest to be cumulative against two years' income.

Note 3—Junior Lien Bonds:

ion No. 1 Junior Lien Income Bonds to be non-cumulative as to interest.

Note 4—Common Stock:

(a) Present Preferred and Common Stocks are $100 par value.

(b) Common Stock to have no par value and to be carried at stated value acceptable to Interstate Commerce Commission.

(c) 300,000 shares to be issued on consummation of plan.

(d) 587,412 shares to be reserved for conversion of Series "B" Income Bonds at rate of 30 shares for each $1,000 bond.

(e) As to the 300,000 shares of common stock allocated to the present equity, 150,000 shares to be placed in escrow and in any one year, after a five-year period that full interest is not paid on all of the income mortgage bonds, shares from this 150,000 to be given to the bondholders in the ratio of two shares of common stock for each full interest coupon. Unless there is a reduction for the foregoing reasons in the amount of common stock allocated to the equity (300,000 shares), the present equity would be entitled to any dividends declared on the 300,000 shares.

Note 5—Annual Interest Under Plan:

Annual requirements shown include interest at 4% on full $10,000,000 of bonds which may ultimately be sold to the Reconstruction Finance Corporation. Under circumstances indicated in Note 1(a), this interest rate would be increased after first ten years.

Note 6—Interest Fund:

An interest fund is to be created into which shall be paid a minimum of 10% of net earnings available for the common stock until the fund equals one year's interest on fixed and contingent interest debt. Fund to be invested in Government Bonds.

Note 7—Financial Control:

Provision to be made satisfactory to First Mortgage Bondholders, assuring them financial control of the reorganized company through representation on the Board of Directors and Executive Committee.

[Endorsed]: Filed Aug. 2, 1935.

[Title of District Court and Cause.]

ORDER

Upon due consideration of the petition of The Western Pacific Railroad Company, the above named debtor, verified August 2, 1935, and filed herein this day, stating that such debtor is unable to meet its debts as they mature and that it desires to effect a Plan of Reorganization in accordance with Section 77 of Chapter VIII of the Acts of Congress relating to bankruptcy, and the Court being satisfied that such petition complies with said section and has been filed in good faith, it is Ordered:

(1) That said petition be, and hereby is, approved as properly filed under Section 77 of Chapter VIII of the Acts of Congress relating to bankruptcy.

(2) That the debtor be, and it hereby is, authorized and directed, pending further order of the court in the premises, to run, manage, maintain, operate and keep in proper condition and repair the railroads and property of the debtor, wherever situated, whether in this state, judicial circuit, or elsewhere and to manage and conduct its business as a railroad company, and to this end to exercise its authority and franchises and discharge all public duties obligatory upon it, and to employ and discharge and fix the compensation of all officers, attorneys, managers, superintendents, agents and employees; to collect and [6] receive the incomes, rents, revenues, tolls, issues and profits of said

property; to collect all outstanding accounts and all dividends and interest on securities belonging to it; to exercise such sale, conveyance, exchange and release rights as are reserved to, or available to, the debtor, under outstanding deeds of trust, mortgages, trust indentures and similar instruments, and to use the proceeds of sale of all released property as provided in such instruments; all in the same manner that it would be entitled and bound to do in its own right; and, to the extent necessary to protect and preserve the property of the debtor, to make and pay for additions and betterments to the railroads and property of the debtor; and to make such advances to its subsidiary corporations as are necessary to protect the debtor's interest therein, all in the same manner that it would be entitled and bound to do in its own right; and, to the extent necessary to protect and preserve the property of the debtor, to make and pay for additions and betterments to the railroads and property of the debtor, all of the foregoing powers to be exercised according to law, and subject to such supervision and control by the Court as the Court may exercise by further orders entered herein. The authority given by the foregoing shall not include authority to incur expense, other than such as is necessary in the course of the usual and ordinary maintenance and operation of the debtor's property. Any extraordinary expense and expense incident to the reorganization of the debtor shall be subject to the prior approval of the Court.

(3) That the debtor is authorized, in its discretion from time to time until further order of this Court, out of funds now or hereafter coming into its hands, to pay:

(a) All taxes and assessments due or to become due upon the property of the debtor.

(b) All necessary expenses of operating the railroads and conducting the business of the debtor, including among other expenses the wages, salaries and compensation of all officers, attorneys, counsel, managers, superintendents, agents and employees retained by the [7] debtor; ticket, traffic, car mileage and car per diem balances; interline accounts; freight and overcharge claims; interest on and installments of principal of equipment trust obligations; and amounts for car and equipment repairs now due or that may become due to connecting or other railroad companies or other common carriers, including all sums now due or which may hereafter become due to other persons or corporations for the occupation or use, jointly or otherwise, of buildings, depots, terminals, tracks, side tracks, yards, warehouses, shops, bridges and other railroad facilities, and such sums as may be necessary to comply with the obligations of the debtor under contracts by virtue of which said occupation or use may now or hereafter be enjoyed (but such payments shall not constitute affirmations of said contracts, or of any of them);

(c) The following claims incurred by the debtor within six months preceding the date of this order, in the usual and customary operation of its properties, and the conduct of its current business, to-wit: Wages, salaries, fees, and other charges due and payable for services rendered to the debtor, unpaid material and supply accounts incurred in the operation of said properties; unpaid and outstanding pay checks and wage checks representing labor actually performed for the debtor. The debtor is also authorized in its discretion to adjust compromise and pay claims of shippers, consignees, or others in interest, for overcharges or reparation awards; and for loss, damage or delay to freight and baggage; also to settle and pay on behalf of itself and other carriers and private car owners, claims arising out of rate [8] divisions, interline settlements, per diem accounts, switching reclaims, proportion of reparation awards, and freight charges or adjustments respecting shipments with transit or storage privileges and other charges or adjustments of like character, between carriers in the conduct of their joint business, regardless of when accrued.

(d) Pending further order of this Court in the premises, the debtor hereby is authorized to pay pay checks, and like instruments issued to employees for services rendered to the debtor, whether before or during said six months

period, whenever the same are presented for payment.

(e) The cost of maintaining the corporate existence of the debtor, including the necessary expenses of the preservation of records, and the registration and transfer of its stocks and bonds, and trustees' charges under indenture under which securities of the debtor have been issued.

(f) All monthly payments due from time to time under any existing pension or insurance system of the debtor.

(g) The expense of printing pleadings, motions, petitions and orders now on file or hereafter filed in this case reasonably necessary to be printed, in such quantity as shall provide copies for the use of the Court, the debtor, parties to the cause, and such others as may have a substantial interest therein: such expense to be taxed as costs in this case.

(4) That the debtor shall be allowed until January 1, 1936 (unless the time be extended further by order of this Court), within which to disaffirm any contracts. Such disaffirmance shall be indicated by notice to that effect, in writing, served on the [9] other party or parties to such contract, and filed of record in this proceeding, and continued operation by the debtor under any of said contracts, within said period allowed for disaffirmances, shall not be deemed to conclude the debtor in respect of such election, or to constitute an election.

(5) That, pending further order of the Court in the premises, the debtor is authorized and empowered to institute or prosecute in any Court, or before any tribunal of competent jurisdiction, all such suits and proceedings as may be necessary, in its judgment, for the recovery or proper protection of its property or rights, and to make settlement of any thereof; and likewise to defend or liquidate, by written agreement or consent judgments, any actions, claims, proceedings, or suits, now pending against the debtor, or which may hereafter be asserted, or be brought in any Court, or before any officer, department, commission or tribunal, to which the debtor is, or shall be, a party, but no payments shall be made by the debtor in respect of any such claims accruing prior to the date of this order, in respect of any actions, proceedings, or suits, on such claims, without further order or direction of this Court except as may be provided in other paragraphs of this order and except such as may be permitted by other general orders hereafter entered herein, and such as constitute preferred claims under the Acts of Congress relating to bankruptcy; and no action taken by the debtor in defense or settlement of such claims, actions, proceedings, or suits, shall have the effect of establishing any claim upon, or right in, the property or funds in the possession of the debtor, that otherwise would not exist.

(6) That the debtor shall close its present books of account as of the close of business on July 31, 1935. The debtor shall open new books of account as of the opening of business on August 1, 1935.

and cause to be kept therein due and proper [10] accounts of the earnings, expenses, receipts and disbursements of the debtor, and shall preserve proper vouchers for all payments made on account thereof, and shall deposit the moneys coming into its hands in such of the banks in which funds of the debtor are presently deposited as shall be selected by the debtor, or in such other bank or banks as shall be selected by and approved by this Court.

(7) That within sixty days after the entry of this order, the debtor shall file with the Clerk of this Court a statement of the assets and liabilities of the debtor as of the close of business on July 31, 1935, and within fifty days after the close of each calendar month thereafter shall file with said Clerk a statement of the assets and liabilities of the debtor as of the close of business on the last day of the second preceding calendar month, together with a summary statement of the revenues and expenses of the debtor of the second preceding calendar month. All such statements shall be certified as correct by the chief accounting officer of the debtor.

(8) That all persons, firms and corporations, whatsoever and wheresoever situated, located, or domiciled, hereby are restrained and enjoined from interfering with, attaching, garnisheeing, levying upon, and enforcing liens upon, or in any manner whatsoever disturbing any portion of the assets, goods, money, railroads, properties and premises belonging to, or in the possession of the debtor, or from taking possession of the same, or any part

thereof, or in any way interfering in any manner to prevent the discharge by the debtor of its duties in the operation of said property and business, under the orders of this Court, or from bringing any new suits or actions, accruing prior to this date, in or before any Court from which an appeal or proceedings to review, can be taken only upon the filing of an appeal bond, as a jurisdiction or mandatory requirement. [11]

(9) That all persons and corporations holding collateral heretofore pledged by the debtor as security for its notes or obligations be, and each of them is, hereby restrained and enjoined from selling, converting or otherwise disposing of such collateral, or any part thereof, until further order of this Court.

(10) This Court reserves full power and jurisdiction to make from time to time such orders amplifying, extending, limiting or otherwise modifying this order as to the Court may at any time seem proper.

(Sgd) A. F. ST. SURE
District Judge

Dated: August 2, 1935.

[Endorsed]: Filed Aug. 2, 1935. [12]

The Western Pacific Railroad Company

PLAN OF REORGANIZATION

Effective date January 1, 1936

Presented by
The Western Pacific Railroad Company pursuant to
Section 77 of the Bankruptcy Act.

[119]

The Western Pacific Railroad Company
Office of Chairman of the Executive Committee
37 Wall Street,
New York

T. M. Schumacher,
Chairman.

In the Matter of the Reorganization
of
The Western Pacific Railroad Company

FEBRUARY 7, 1936.

To:

The Honorable, the District Court of the United States for the Northern District of California, Southern Division, and

The Honorable, the Interstate Commerce Commission, Washington, D. C.

There is annexed hereto for filing pursuant to sub-section (d) of § 77 of the Bankruptcy Act,

the Plan of Reorganization of The Western Pacific Railroad Company, an outline of which was submitted as part of this Company's petition filed under said Act on August 2, 1935.

This plan of Reorganization prepared as the result of conferences with the Committee of Bondholders referred to therein and with Reconstruction Finance Corporation and other creditors will be presented by this Company at the public hearing heretofore requested by it under said Section 77.

THE WESTERN PACIFIC
RAILROAD COMPANY,
By T. M. SCHUMACHER,
Chairman of the Executive Committee

[120]

The Western Pacific Railroad Company
(hereinafter called the Railroad Company)

PLAN OF REORGANIZATION
Effective Date January 1, 1936

I.
Procedure

As the means for the execution of the plan with a minimum of delay and expense it is proposed to continue the Railroad Company, with any necessary or appropriate amendments to its Articles of Incorporation and By-Laws, but the right is reserved to create a new Company or to resort to any

procedural methods sanctioned by Section 77 of the Bankruptcy Act, or any amendment thereof, for the issuance of the new securities in substitution for those to be retired under the Plan, and for the protection of any class of creditors or stockholders who may not accept the Plan.

II.

Summary of the Plan

For convenient reference a tabulated summary of the Plan showing the bases of conversion of present securities of the Railroad Company into securities of the reorganized Company appears on the following page. A detailed statement respecting each of the proposed new securities and the terms of issue appears at a subsequent point.

The underlying purpose of the Plan is the creation of a revised capital structure providing for fixed charges believed to be within the probable prospective earnings of the reorganized Company under any conditions reasonably to be expected in the future; also to provide funds for necessary rehabilitation work including deferred maintenance which necessarily accrued during the depression period. *Fixed annual interest is to be reduced from $3,180,053 to $1,027,036,** including in the latter figure interest at 4% on $10,000,000, the maximum of new money to be provided by Reconstruction Finance Corporation. [121]

(A) The First Mortgage Bonds are outstanding under an indenture dated June 26, 1916 executed by the Railroad Company to First Federal Trust Company (now Crocker First National Bank of San Francisco) and Henry E. Cooper, Trustees. Samuel Armstrong was substituted as Co-trustee in place of Henry E. Cooper, effective January 28, 1935.

(B) The Railroad Company has issued as collateral for notes held by Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co., $17,999,500 of General and Refunding Mortgage Bonds which are to be cancelled under the Plan. These Bonds are issued under an indenture dated January 1, 1932 executed by the Railroad Company to The Chase National Bank of the City of New York, Trustee.

†Cancelled under the Plan.

The tabulation on the opposite page shows in Column 1 the present outstanding securities and other Capital Liabilities, and, in Columns 3 to 9, inclusive, what the holders of present securities would receive under the Plan.

As appears in Columns 4, 6 and 7, holders of present First Mortgage 5% Bonds are to receive new fixed interest. First Mortgage 4% Bonds to the extent of 30% of the face value of their present holdings and 35% in Series "A" and 35% in Series "B" Income Bonds on which interest at 5½% will be payable to the extent earned as more fully set forth in Article V of this Plan, and, in addition, Series "A" and Series "B" bonds in equal proportions of face value equal to the full amount of unpaid 1934 and 1935 interest. Series "A" and Series "B" bonds are to be the same in all respects except that Series "A" are to be subject to a Sinking Fund, and Series "B" are to be convertible, under certain conditions in said Article V stated, into Common Stock.

The proposed treatment of other secured and unsecured debt is similarly indicated.

All of the Common and Preferred Stock of The Western Pacific Railroad *Company* is owned by The Western Pacific Railroad *Corporation*, a holding company, and treatment of the Corporation's stock ownership is also shown by the tabulation.

In Article III, which immediately follows, will be found tabulations showing comparisons in convenient form of present and proposed debt structure and present and proposed interest requirements. [123]

III.

Comparisons

As showing that the Plan will be financially advisable and compatible with the public interest, the following comparisons are submitted:

(1)

COMPARISON OF PRESENT AND PROPOSED CAPITALIZATIONS

Description	Present Capitalization Dec. 31, 1935	Proposed Capitalization Assuming No Conversion Series "B" Bonds	Proposed Capitalization Assuming Conversion All Series "B" Bonds
(1)	(2)	(3)	(4)
Equipment Trusts and Baldwin Lease	$ 2,682,598	$ 2,682,598	$ 2,682,598
First Mortgage Bonds	49,290,100	25,675,900	25,675,900
Total	51,972,698	28,358,498	28,358,498
R. F. C.—A. C. James Co.—R. C. C. Secured Debt	10,487,707	—	—
Total Fixed Interest Debt	62,460,405	28,358,498	28,358,498
Other Capital Liabilities—Principal and Unpaid Interest	12,717,039	—	—
Income Mortgage Bonds—Series "A"	—	20,887,398	20,887,398
Income Mortgage Bonds—Series "B"	—	20,887,398	—
Junior Lien Income Bonds	—	8,092,709	8,092,709
Total Debt	75,177,444	78,226,003	57,338,605
Preferred Stock	28,300,000	—	—
Common Stock	47,500,000 (Par $100)	300,000 Sh. (No Par)	926,622 Sh. (No Par)
Grand Total	$159,977,444	$ 78,226,003 plus 300,000 Sh.	$ 57,338,605 plus 926,622 Sh.

Note: Present value, on an Interstate Commerce Commission basis, of The Western Pacific Railroad Company and final or tentative values of owned subsidiaries totals approximately $143,600,000. Estimated capital expenditures incident to the rehabilitation program, for which new money is to be obtained, will increase this value to approximately $146,500,000.

(2)

COMPARISON OF PRESENT FIXED ANNUAL INTEREST REQUIREMENTS WITH PROPOSED FIXED INTEREST REQUIREMENTS AND INTEREST PAYABLE ONLY IF EARNED.

Item of Debt	On Present Debt Structure	Proposed: Assuming No Conversion Series "B" Bonds	Proposed: Assuming Conversion All Series "B" Bonds
(1)	(2)	(3)	(4)
Fixed Annual Interest:			
First Mortgage Bonds	$2,464,505	$ —	$ —
Other Funded and Unfunded Debt (1935)	715,548	—	—
New First Mortgage Bonds at 4% (See Note A)	—	1,027,036	1,027,036
Total	$3,180,053	$1,027,036	$1,027,036
Equipment Trusts and Baldwin Lease (1936) (See Note B)	121,681	121,681	121,681
Interest Payable Only if Earned:			
Income Mortgage Bonds, Series "A" at 5½%	—	1,148,806	1,148,806
Income Mortgage Bonds, Series "B" at 5½%	—	1,148,806	—
Junior Lien Income Bonds at 6%	—	485,563	485,563
Total Payable if Earned	$ —	$2,783,175	$1,634,369
Grand Total	$3,301,734	$3,931,892	$2,783,086

Note A: Proceeds from sale of bonds to Reconstruction Finance Corporation within the maximum of $10,000,000 will be drawn down over a period of about three years as required to finance the program of rehabilitation and for a Contingency Reserve Fund. Interest is shown above on maximum amount of such bonds at the rate of 4% which will prevail for first ten years.

Note B: Equipment Trust principal in the amount of $2,682,598 is reduced annually with corresponding decrease in annual interest.

IV.

New Money From Reconstruction Finance Corporation

An outstanding feature of the Plan is the undertaking of Reconstruction Finance Corporation, subject to approval and authorization of the Interstate Commerce Commission, to provide money for rehabilitation and working capital up to $10,000,000 by the purchase at par of new Thirty-year First Mortgage Bonds which may bear interest at 4% for the first ten years and at such higher rate or rates thereafter as will make an average yield of 4½% from the date the money is advanced to the maturity of the Bonds.

The right, however, is reserved (a) to issue these bonds bearing a 4% interest rate to maturity and to adjust the additional ½% in the purchase price of the Bonds, or (b) to accept an alternative proposal to advance $10,000,000 for 20 or 25 years at 4% collaterally secured by 120% of First Mortgage Bonds of the reorganized Company.

All Bonds issuable on this account may be authenticated forthwith and placed in the treasury of the reorganized Company. They shall be issued against the surplus created as a result of the reorganization, and their proceeds shall be available for such capital and rehabilitation expenditures as the Board of Directors, after providing for a Contingency Reserve Fund, may deem proper. All re-

habilitation expenditures other than those chargeable to Capital Account shall be charged to surplus, and the necessary authorization of such charges by the Interstate Commerce Commission is a part of this Plan. Out of the proceeds of such Bonds there shall be set apart $500,000. as a Contingency Reserve Fund, which shall be available only for the purpose of paying fixed interest charges, principal of and dividends on Equipment Trust obligations and operating expenses which cannot otherwise be provided for without, in the opinion of the Board of Directors, unduly impairing free working capital. As such new Bonds are disposed of from time to time, the proceeds, except such part as may be so set apart, shall be placed in a special fund to be disbursed only to meet expenses of the rehabilitation and improvement or equipment [125] program except that such proceeds (a) may be used for such additions and betterments as the Board of Directors may substitute for any part of such program or authorize after its completion and (b) may be resorted to if necessary to avert a default under the Fixed 4% Mortgage or any Equipment Trust Agreement of the reorganized Company.

It is estimated that the work program will cover a period of not less than three years from January 1, 1936.

This undertaking to advance new money is made by Reconstruction Finance Corporation on condition that its existing claim against the Railroad Company amounting to $2,963,000 represented by

collateral notes junior to the existing First Mortgage Bonds be refunded under the Plan in like securities and in like proportions as those given holders of existing First Mortgage Bonds.

V.

Description of New Securities

A First Mortgage Bonds:

The new First Mortgage shall constitute a first lien upon all the railroads and fixed property, real and personal, and equipment of the reorganized Company now pledged under the First Mortgage of the Railroad Company. The total authorized issue of Bonds thereunder is to be limited to $50,000,000, of which

$15,675,900 are to be distributed under the Plan;

10,000,000 are to be purchased by or used in part to collateralize loans from Reconstruction Finance Corporation,

1,000,000 are to be issued forthwith and placed in the Treasury of the reorganized Company free from restriction; and

23,324,100 are to be reserved to be issued to provide for, or to reimburse the reorganized Company for expenditures made for additions, betterments, [126] improvements or extensions, in a principal amount not exceeding 75% of the actual cost of such additions, betterments, improvements or extensions. If the Board of Directors of

the reorganized Company shall elect to accept the alternative proposal of Reconstruction Finance Corporation described in clause (b) of the second paragraph of Article IV hereof, $2,000,000 of the reserved Bonds may, however, be used as collateral to loans from Reconstruction Finance Corporation, but upon payment of such loans the further issue of said $2,000,000 of reserved Bonds shall be subject to the limitations hereinbefore provided.

The First Mortgage Bonds may be issued in series which may differ as to date of maturity and interest rate but the Bonds immediately issuable under the Plan are to be dated January 1, 1936, are to mature January 1, 1966, and are to bear interest at 4% per annum, except that such of said Bonds as may be sold to Reconstruction Finance Corporation under the alternative proposal described in clause (a) of the second paragraph of Article IV hereof, may bear interest at varying rates not exceeding an average of 4½% from the date of issue to the date of maturity of the Bonds.

The First Mortgage Bonds to be distributed under the Plan and all First Mortgage Bonds sold or pledged to Reconstruction Finance Corporation shall be redeemable in whole or in part on any interest payment date, upon 30 days' notice, at their principal amount and accrued interest.

B. Income Mortgage 5½% Bonds:

1. The Income Mortgage will be a lien upon all of the railroads and property covered by the First Mortgage, subject only to the lien of the First Mortgage. The Bonds issued under the Income Mortgage are to be limited to [127]

$20,887,398 Series "A" 5½% Income Mortgage 50-Year Sinking Fund Bonds (hereinafter called the Series "A" Bonds), and

20,887,398 Series "B" 5½% Income Mortgage 50-Year Convertible Bonds (hereinafter called the Series "B" Bonds).

All of the Series "A" Bonds and the Series "B" Bonds are immediately issuable under the Plan and are to be equally and ratably secured by the Income Mortgage.

The Series "A" Bonds are to be dated January 1, 1936, are to mature January 1, 1986, are to bear interest at the rate of 5½% annually, payable as provided in the Income Mortgage only out of Available Net Income, and are entitled to the benefit of a cumulative Sinking Fund not to exceed in any year one-half of 1% of the largest principal amount of such Bonds theretofore issued.

The Series "B" Bonds are to be dated January 1, 1936, are to mature January 1, 1986, are to bear interest at the rate of 5½% annually payable as provided in the Income Mortgage only out of Available Net Income, are to be convertible into common stock of the reorganized Company at the rate of

thirty shares of such stock for each $1,000 principal amount of such Bonds.

Income Bonds of both Series "A" and Series "B" are to be redeemable, in whole or in part, upon 30 days' notice, on any interest payment date, at their principal amount, together with any interest thereon payable on said date, payable out of Available Net Income for fixed charges as hereinafter provided.

As more fully provided in Section 3 of this subdivision B, interest on the Income Mortgage 5½% Bonds of both Series "A" and "B" shall be cumulative, as against the Available Net Income of the reorganized Company, for the Income Period in respect of which such interest is payable and for the four Income Periods next succeeding the Income Period in respect of which such interest is payable. If on any April 1 or [128] October 1, commencing April 1, 1941, full interest at the rate of 5½% per annum shall not be paid on the Series "A" and the Series "B" Income Mortgage Bonds in respect of the next preceding Income Period, there shall be delivered out of the escrow provided for in Article VI hereof to the holders of such Bonds, Common Stock of the reorganized Company (or Voting Trust Certificates therefor, so long as the Voting Trust hereinafter provided for shall continue) in respect of any deficiency in the payment of such full interest, at the price of $27.50 per share. In respect of fractional shares becoming so deliverable, scrip will be issued, convertible into

Common Stock (or Voting Trust Certificates) in amounts aggregating full shares.

Any such stock remaining in escrow when all Series "A" and Series "B" Bonds shall have been retired, shall be delivered to holders of Escrow Receipts covering such stock.

2. Available Net Income shall be determined for each period of six months ending June 30 or December 31 (hereinafter called Income Periods) beginning with the Income Period of the reorganized Company ending June 30, 1936. Available Net Income for any Income Period shall be determined by deducting from "income of the reorganized Company available for fixed charges" for such Income Period (determined in accordance with accounting rules of the Interstate Commerce Commission or other analogous Federal authority having jurisdiction in the premises, at the time in force):

(a) All fixed charges of the reorganized Company accrued during such Income Period; and

(b) All other charges properly deductible from such income in determining income after fixed charges (under such accounting rules then in force), but excluding contingent interest, or Sinking Fund requirements hereinafter provided for.

3. Available Net Income for each Income Period shall be applied to the following purposes and in the following order: [129]

(a) To the maintenance of the Contingency Reserve Fund at $500,000. provided, however, that the amount applied to this purpose shall not exceed 10% of the Available Net Income for such Income Period.

(b) To the creation of a Capital Fund to be applied to or to provide for or reimburse the treasury of the reorganized Company for Capital *Investments* (as defined by the Interstate Commerce Commission Classification of Income, Profit and Loss and General Balance Sheet Accounts for Steam Roads, Accounts Nos. 701, 702, 705 and 706 then in effect and including therein initial and principal payments on equipment leased under equipment trusts or purchased under conditional sale agreements) to the extent that such Capital Investments have been made during such Income Period, provided, however, that (1) to the extent that expenditures are so provided for or reimbursed out of the Capital Fund, the reorganized Company shall not thereafter have the right to issue any Bonds or other evidence of indebtedness to capitalize or reimburse such expenditures; that (2) the amount set aside in the Capital Fund out of the Available Net Income of any calendar year shall not exceed $500,000. during the years 1936 to 1940, both inclusive, $1,000,000. during the years 1941 to 1945, both inclusive, and in all subsequent years not more than 3% of the gross revenues of the

reorganized Company for the next preceding calendar year and (3) that any unappropriated amount not charged out as of December 31 in any year shall not be carried forward.

(c) To the payment on April 1 and October 1 in each year of interest on the Series "A" Bonds and the Series "B" Bonds, above described accruing during the Income Period ending on the next preceding December 31 and June 30, respectively, and, to the extent unpaid, any interest which shall have accrued on [130] said Bonds in respect of four Income Periods next preceding such Income Period, all without preference in favor of either series as against the other.

(d) To the creation of a cumulative Sinking Fund in an amount not exceeding in any calendar year one-half of 1% of the largest principal amount of Series "A" Bonds theretofore issued. Said Sinking Fund shall be applied to the purchase of Income Bonds, Series "A", at not exceeding their redemption price; and whenever the amount in the Sinking Fund exceeds $100,000 and Income Bonds, Series "A", are not tendered or cannot otherwise be purchased at less than their redemption price, the funds then in the Sinking Fund shall be applied to the redemption of Income Mortgage Bonds, Series "A", on the next succeeding interest payment date. Bonds purchased or redeemed out of the Sinking Fund shall not there-

after be issuable, but the amount of interest which would otherwise have become payable thereon out of Available Net Income shall be added to the Sinking Fund on each April 1 and October 1 so long as any Income Bonds, Series "A" shall be outstanding.

(e) To the payment on April 1 and October 1 in each year of interest on the Junior Lien 6% Income Bonds.

(f) To the creation of an Interest Fund into which shall be paid from time to time 10% of the Available Net Income remaining after the payments provided for in the preceding clauses (a), (b), (c), (d) and (e), provided, however, that such payments shall not be required to be made into said Interest Fund from the Available Net Income of any Income Period at the end of which the amount of said Interest Fund shall aggregate at least one year's interest on all outstanding First Mortgage Bonds, including First Mortgage Bonds pledged as collateral for other obligations of the reorganized Company and 120% of such part of [131] the $10,000,000 provided to be supplied by Reconstruction Finance Corporation which shall not have been supplied at the end of such Income Period. Said Interest Fund shall be available only for the payment of interest upon the First Mortgage Bonds, and, pending such application, shall be invested in such manner as the Board of Directors of

the reorganized Company may in its discretion determine. The obligation to make payments into and to maintain said Interest Fund shall cease whenever for five consecutive years the Net Income of the reorganized Company available for fixed charges shall have equalled three times the amount of such fixed charges, and full interest and Sinking Fund shall have been paid on, and for, the Income Mortgage Bonds.

(g) To general corporate purposes, including dividends on Common Stock.

4. Interest on Income Mortgage Bonds shall be paid only in amounts equal to one-fourth of 1%, or multiples thereof, smaller fractional amounts being carried forward and added to that portion of the Available Net Income for the next succeeding Income Period required to be applied to the payment of interest of such Bonds.

C. Junior Lien 6% Income Bonds.

The Junior Lien Mortgage will be a lien upon all of the railroads and property covered by the First Mortgage, subject to the prior liens of the First Mortgage and the Income Mortgage.

The Bonds issued under and secured by the Junior Lien Mortgage are to be limited to $8,092,709, all of which are issuable forthwith under the Plan.

The Junior Lien 6% Income Bonds are to be dated January 1, 1936, are to mature January 1, 2011, are to bear interest at the rate of 6% per annum payable as provided in the Junior Lien Mort-

gage only out of Available Net Income, and are to be non-cumulative. [132]

D. Common Stock:

The Common Stock is to be without par value and is to be carried in the accounts of the reorganized Company at a value acceptable to the Interstate Commerce Commission. The authorized issue will be 926,622 shares, of which 300,000 will be issuable forthwith under the Plan and 626,622 will be reserved for issue upon conversion of $20,887,398 Series "B" Bonds.

VI.

Participation of Bondholders in the Management of the Reorganized Company

The Board of Directors of the reorganized Company shall consist of seventeen members, a majority of which shall be citizens of the State of California.

For the protection primarily of the holders of the Income Bonds, all of the stock of the reorganized Company shall be placed in a Voting Trust under which three Voting Trustees nominated by the Railroad Company and approved by the Bondholders' Committee hereinafter mentioned at or before the hearing before the Interstate Commerce Commission upon this Plan shall act as Voting Trustees pursuant to a Voting Trust Agreement which shall be acceptable to the Railroad Company

and the said Bondholders' Committee. Voting Trust Certificates shall be delivered in respect of Common Stock deposited under the Voting Trust Agreement. Such Voting Trust shall continue until ten years from the date upon which the Plan shall be finally confirmed by the Court. It is the intention of this provision and the Voting Trust Agreement shall provide that the reorganized Company shall during such period be managed by a board of directors, at least a majority of which shall in the opinion of the Voting Trustees be representatives of holders of Income Bonds. The Voting Trust Agreement shall also provide that, so long as Reconstruction Finance Corporation shall be the holder of more than $500,000, principal amount, of First Mortgage Bonds or of notes of the reorganized Company secured by First Mortgage Bonds, the Voting [133] Trustees shall elect to the board of directors of the reorganized Company a person designated or nominated for that purpose by Reconstruction Finance Corporation. The Voting Trust Agreement shall provide that if any vacancy shall occur among the Voting Trustees, such vacancy shall be filled by a majority of the remaining Voting Trustees. Action of a majority of the persons at the time acting as Voting Trustees, at a meeting or in writing without a meeting, shall constitute the action of the Voting Trustees under the Voting Trust Agreement and under the Plan.

The reorganized Company shall, by By-law or otherwise, create a Finance Committee of not less

than three nor more than five members of its Board of Directors, of whom a majority shall be named from persons representing the Income Mortgage Bondholders, which Committee shall have supervision over all financial matters, including the annual budget of capital expenditures and all other expenditures of the reorganized Company's funds; and the reorganized Company shall covenant for the benefit of the Income Mortgage Bonds, to make only such expenditures as shall be authorized by said Finance Committee, exclusive of emergency expenditures and of capital items not exceeding $25,000 for any item and not exceeding $200,000 in the aggregate in any year.

The By-laws of the reorganized Company shall also provide for an Executive Committee having all the powers of the present Executive Committee of the Railroad Company, except as they may be vested in a Finance Committee as hereinbefore provided.

In respect of the 300,000 shares of Common Stock to be presently issued under the Plan and of any shares of Common Stock which may be issued on conversion of the Income Mortgage Bonds, Series "B", so long as the Voting Trust Agreement shall be in effect, Voting Trust Certificates shall be issued in such form as shall be provided in the Voting Trust Agreement.

Voting Trust Certificates for 150,000 shares of Common Stock shall be placed in escrow with the Trustee of the Income Mortgage for delivery to the

holders of the Income Mortgage Bonds in respect of interest deficiencies, as provided in paragraph 1 of subdivision B of Article V hereof, and to the extent that such delivery is not required prior to payment or retirement of all Income Mortgage Bonds of both Series "A" and Series "B", for delivery, upon [134] such payment or retirement, to holders of Escrow Receipts therefor, which shall be delivered to present holders of the Common Stock of the Railroad Company in lieu of said 150,000 shares of Common Stock (or Voting Trust Certificates therefor).

VII.

Method of Participation in and Consummation of the Plan

No holder of any security of the Railroad Company affected by the Plan shall be requested to accept the Plan until after a public hearing upon the Plan, held as provided in Section 77 of the Bankruptcy Act as it now exists or hereafter may be amended, and a report and order of the Interstate Commerce Commission approving the Plan (in its present form or as it may be modified as hereinafter provided) and after the filing of an opinion and order of the Court approving the Plan and finding that the Plan complies with such Section 77. If and when the Interstate Commerce Commission and the Court shall so approve the Plan (including any modification thereof), such Plan shall be submitted in such manner as the Interstate Commerce

Commission shall direct to the security holders affected thereby for acceptance or rejection.

The Plan shall not be declared operative or carried out until finally approved by the Interstate Commerce Commission and confirmed by the Court after acceptance by the holders of such amount of each class or classes of securities or claims affected by the Plan as shall be sufficient under the provisions of the Bankruptcy Act as now existing or as it may hereafter be amended, to make the Plan binding upon the holders of all classes of securities or claims affected thereby.

The Board of Directors of the Railroad Company may, whether before or after its acceptance by holders of securities, modify the Plan or adopt a Substitute Plan in accordance with and subject to the provisions of Section 77 of the Bankruptcy Act as now existing or as it may hereafter be amended; and the term Plan as used herein shall be deemed to include any such modification or substitute Plan. [135]

Messrs. Frederick H. Ecker, John W. Stedman and Reeve Schley have heretofore acted as a Committee to represent certain large institutional holders of First Mortgage Bonds, being not more than twenty-five *bona-fide* holders thereof, in respect of the extension of the interest maturing during 1934 upon such First Mortgage Bonds, in respect of the performance of the Railroad Company's agreements made in connection with said extension and in the

negotiation of this Plan with the Railroad Company. Said Committee shall continue as a Committee to represent the interest of such holders of the present First Mortgage Bonds in connection with the reorganization, but assumes no representation of any other holders of said Bonds, and shall not represent holders of Income Bonds in the selection of directors for the reorganized Company. The members of such Committee have agreed to serve without commission, but the expenses of said Committee shall be reimbursed as hereinafter provided.

All acceptances or assents to the Plan shall be subject to the condition that the Plan shall have been finally confirmed by the Court, pursuant to Section 77 of the Bankruptcy Act, The Plan may be made effective retroactively to midnight on December 31, 1935, by the terms of the decree of confirmation, or on such later date as may, with the approval of the Interstate Commerce Commission, be fixed by agreement between (1) the Railroad Company, (2) Reconstruction Finance Corporation, and (3) Messrs. Frederick H. Ecker, John W. Stedman and Reeve Schley of their successors as such Committee.

The Board of Directors of the Railroad Company shall have power, subject to the provisions of the Plan and to the approval of said Committee or of their counsel, to determine the form and provisions of the several indentures, bonds, stock certificates, acceptances, assents, and other instruments in connection with carrying out the Plan.

All securities may be issued as of January 1, 1936, notwithstanding that confirmation of the Plan may be delayed beyond that date, and the base figures as set forth in the Plan may be adjusted to any effective date which may be substituted for January 1, 1936. Expenditures made for the rehabilitation program subsequent to January 1, 1936, but prior to confirmation of the [136] Plan, whether made out of current funds or from the proceeds of Trustees' Certificates, shall be reimbursed out of the proceeds of sale of the Fixed 4% First Mortgage Bonds purchased by Reconstruction Finance Corporation.

Unless otherwise provided in Section 77 of the Bankruptcy Act or in any order or orders of the Court or the Interstate Commerce Commission, whenever notice shall be required or permitted to be given under or pursuant to the Plan, such notice shall be given by publishing a copy of such notice once in each week in one newspaper published and of general circulation in the Borough of Manhattan, the City and State of New York, and in one newspaper published and of general circulation in the City of San Francisco, State of California, and also (1) in case of notices to security holders or creditors who have accepted the Plan, by mailing such notice, postage prepaid, to the addresses of such security holders or creditors set forth in the acceptances signed by them; and (2) in case of notices to security holders or creditors who shall not have accepted the Plan, by mailing such notice, postage prepaid,

to such security holders, or creditors whose names and addresses appear on the books of the Railroad Company.

All powers conferred by the Plan upon the Board of Directors of the Railroad Company may also be exercised by its Executive Committee.

VIII.

Provision for Other Claims

The following claims are not affected by the Plan: (a) current liabilities of the Railroad Company incurred in the ordinary conduct of its business prior to the institution of the reorganization proceedings, including claims for personal injury and property damage, (b) current liabilities and obligations of the Railroad Company and of any trustee or trustees of the estate incurred during the reorganization proceedings, and (c) all other claims, liabilities or obligations for which specific provision is not made in the Plan. To the extent that such claims, liabilities or obligations are not paid by the Railroad Company or any trustee or [137] trustees of the estate pursuant to order of the Court in the reorganization proceedings, they are to be paid in cash by the reorganized Company upon the consummation of the Plan, or assumed by the reorganized Company. All such claims, liabilities and obligations, including any claims arising from the disaffirmance of executory leases or other contracts by the Railroad Company or any trustee or trustees

of the estate in the reorganization proceedings pursuant to order of the court, in respect of which claims are filed or evidenced in accordance with orders of the Court, may be adjusted or compromised and dealt with or paid or discharged by the reorganized Company, all as may be determined by the Board of Directors of the reorganized Company and approved by the Court.

The reorganized Company shall be deemed to have assumed such of the contracts of the Railroad Company which are executory in whole or in part, including any executory leases and liabilities under guaranties, as shall have been affirmed by the Railroad Company or any trustee or trustees of the estate in the reorganization proceedings with the approval of the Court in the Reorganization Proceeding and prior to the date of confirmation of the Plan, and also any executory contracts made by the Railroad Company or any trustee or trustees of the estate with the approval of the Court in the reorganization proceedings which, by their terms, do not terminate at the conclusion of the reorganization proceedings.

IX.

Expenses of the Plan

All expenses of carrying out the Plan, and all costs of administration and other allowances made by the Court, shall be paid by the Railroad Company or by the reorganized Company subject to the provisions of Section 77 of the Bankruptcy Act and

shall constitute a charge upon the properties of the Railroad Company and the reorganized Company as a cost of administration prior in lien to all securities affected by the Plan. There shall be included in such expenses such reasonable compensation for necessary services rendered and reimbursement for actual expenses incurred [138] in connection with the proceeding and the Plan by the Trustees under the present First Mortgage, said Committee representing certain First Mortgage Bondholders (including reimbursement for actual expenses incurred in connection with said extension of the interest accruing during 1934 upon the existing First Mortgage Bonds) and by other parties in interest, committees or other representatives of creditors or stockholders, and the attorneys or agents of any thereof (including the Railroad Company), as may be approved by the Interstate Commerce Commission and the Court pursuant to the Bankruptcy Act; but the Plan shall not be construed as an offer or contract for such services independent of the Bankruptcy Act.

X.

Statements Contained in the Plan

All statements and figures herein contained with respect to the capitalization of the Railroad Company have been taken from its books or records, but no estimate, statement, explanation or suggestion contained in the Plan or in any circular issued, or which may hereafter be issued, by the Railroad

Company, or by any of its officers, is intended or is to be accepted as a warranty by the Railroad Company, or any of its directors or officers.

Dated as of January 1, 1936.

[Endorsed]: Filed Feb. 8, 1936. [139]

SUGGESTED PLAN OF REORGANIZATION OF THE WESTERN PACIFIC RAILROAD COMPANY

Effective Date, January 1, 1937.

The Committee which represents certain institutional holders of existing First Mortgage Bonds heretofore accepted the Plan proposed by the Railroad Company in the Reorganization Proceeding, conditioned on the acceptance of the Plan by the principal creditors of other classes. Such other classes of creditors having stated before the Interstate Commerce Commission that the Railroad Company's Plan was unacceptable to them without modifications which the Committee would regard as substantially adversely affecting the interests of the existing First Mortgage Bonds, and in the light of the past and probable future earnings of the Railroad Company's system, the Committee believes that the reorganization of the Railroad Company should follow substantially the lines of this Suggested Plan.

[140]

COMPARISON OF DISTRIBUTION OF ANNUAL INCOME UNDER SUGGESTED PLAN WITH THAT UNDER RAILROAD COMPANY'S PLAN OF JANUARY 1, 1936

Distributees	Suggested Plan (Effective as of January 1, 1937)			Railroad Company Plan (Effective as of January 1, 1936)

Total Interest Charges, plus Capital Fund	2,366,595	2,366,595	2,366,595	4,396,685	3,247,878
To First Mortgage Bondholders for Preferred Dividend	1,675,848	1,675,848	1,675,848	none	none
Sinking Fund for Income Bonds	197,160	197,160	197,160	104,437	104,437
Total before Common Stock	4,239,603	4,239,603	4,239,603	4,501,122	3,352,315
$3 per share on Common Stock (before Preferred participates)	1,019,985	1,169,985	1,469,985***		
	5,259,588	5,409,588	5,709,588		
Excess over this total goes approximately					
To Existing First Mortgage Bondholders	45%	40%	75%	none	64%
To Others	55%	60%	25%	100%	36%

*But earnings must exceed $5,500,000 to warrant conversion.

**Exclusive of interest upon any equipment obligations hereafter issued.

***Of this amount approximately 61% would be paid on new Common Stock purchased by existing First Mortgage Bondholders to furnish new money.

[141]

The Western Pacific Railroad Company

PLAN OF REORGANIZATION

Effective Date, January 1, 1937

I.

Introductory Statement

The Western Pacific Railroad Company, a California corporation (hereinafter called the Railroad Company), prior to the Reorganization Proceeding hereinafter mentioned, owned and operated approximately 926 miles of main line track extending from San Francisco to Salt Lake City and approximately 106 miles of main line track extending from a connection at Keddie, California, with the line first mentioned, northerly to a connection with the lines of the Great Northern Railway Company near Bieber, California. This latter so-called Northern California Extension was constructed at a cost of slightly less than $10,000,000 and put into operation on November 10, 1931. Its operation has materially added to the revenues of the System.

In addition to the foregoing main lines and various branch lines (together aggregating approximately 1,211 miles of road), the Railroad Company owned the entire capital stock and substantially all the outstanding indebtedness of the following subsidiaries:

(1) Sacramento Northern Railway Company, an electrically operated, standard gauge, freight and passenger railroad, serving and con-

necting San Francisco and Oakland with Pittsburgh, Vocaville, Sacramento, Woodland, Marysville, Colusa, Oroville, Chico and other Sacramento Valley points. It also operates a street railway service in Sacramento, Marysville, Yuba City and Chico. Its lines aggregate approximately 276 miles of road. Its stock was acquired by the Railroad Company on November 9, 1925, and that portion of its line between Oakland and Sacramento was acquired as of January 1, 1929. Certain of its branches have been constructed since the latter date. Though its operations have resulted in a deficit before interest during each of the last five years, the Management of the Railroad Company advises that it contributes to the System a volume of traffic sufficient to justify its continued operation as part of the System.

(2) Tidewater Southern Railway Company owns and operates a standard gauge, steam railroad connecting Stockton, California, with Mantesa, Escalon, Modesto and Turlock in the San Joaquin Valley. Passenger service was abandoned in 1932. Its operations have resulted in income available for payment of interest on its indebtedness to the Railroad Company in every one of the last five years and have produced a surplus over all interest in each of those years, except 1931.

(3) Deep Creek Railroad Company owns and operates a standard gauge, steam railroad

from Wendover, Utah, to Cold Hill, Utah, a distance of 46 miles. While its operations during the last five years have shown a small deficit before interest, the Management of the Railroad Company advises that traffic furnished by it to the System justifies its continued operation.

(4). Standard Realty & Development Company handles land purchases and sales in connection with non-operating property, and its operations have resulted in a deficit in each of the last five years, in no case, however, exceeding $10,000.

In addition, the Railroad Company owned jointly and equally with the Atchison, Topeka & Santa Fe Railroad and the Southern Pacific Railroad, the Central California Traction Company (acquired in 1928), an electrically operated railroad of about 53 miles between Stockton and Sacramento, California, with a branch line to Lodi, and jointly and equally with the Atchison, Topeka & Santa Fe, the Alameda Belt Line, (acquired in 1932), a standard gauge steam belt line of about 14 miles in the City of Alameda. As to each of [142] these companies the parent companies share equally operating deficits or profits, as well as advances for bond interest, sinking fund or additions and betterments. The Railroad Company, up to January 1, 1936, had been required to supply an aggregate of $676,431 for those purposes since acquisition of its interests therein.

The Management of the Railroad Company reports that the consolidated net income of the System of the Railroad Company and its above-mentioned railroad subsidiaries, available for interest on funded debt, for the last ten years has been:

1926	$4,759,282.22*
1927	2,647,493.79
1928	2,964,371.04
1929	2,529,946.36
1930	1,552,487.24
1931	186,707.68 Deficit
1932	252,706.16
1933	674,007.18
1934	1,084,243.85
1935	805,589.39

The Management points out, however, that in arriving at the foregoing figures an average of approximately $140,000 per annum has been deducted for amortization of bond discount, and that during 1935 substantial extraordinary amounts were charged to maintenance in connection with laying of new rail, $111,789 deducted from 1934 income under the Railroad Retirement Act was credited back to 1935 income.

The Management, in statements filed with the Interstate Commerce Commission, has estimated that the consolidated net income of the System of the Railroad Company and its subsidiaries, available for interest on funded debt (without however deducting that part of the estimated expense of the re-

*The adequacy of maintenance expenditures in 1926 is questioned by the present management.

habilitation program hereinafter mentioned which, under the accounting rules of the Interstate Commerce Commission, would normally be chargeable to operating expense but which, it is expected, will be charged against surplus created as a result of the reorganization), will be:

Year	Available Income	Rehabilitation Operating Expense Not Deducted
1936	1,521,386**	1,747,284
1937	2,180,586	2,021,312
1938	2,738,886	1,280,074
1939	3,365,836	None
1940	3,769,836	None

The foregoing estimates of income available for interest on funded debt are also before deduction of any amount for the making of those routine additions and betterments (not included in the rehabilitation program) for which the issue of additional debt is of doubtful wisdom. The Management ad-

**During the eight months ended August 31, 1936, the Consolidated Net Income of the System and its subsidiaries, available for interest on funded debt, similarly computed, was $258,844.25. The amount of operating expense attributable to the rehabilitation program not deducted in arriving at this amount was $1,169,880.09, so that the total amount available for interest under the accounting rules of the Interstate Commerce Commission for the first eight months of 1936 was a deficit of $911,035.74. For the first eight months of 1935 the amount available for interest was a deficit of $223,241.54, there being, however, no comparable operating expense attributable to the rehabilitation program during that period.

vises that provision should be made for such capital funds up to a maximum of $500,000 per annum during the years 1936 to 1940, when the rehabilitation program will be in operation, and $1,000,000 per annum during the years 1941 to 1945 inclusive. The necessity for such appropriation must be considered in determining the soundness of any capital structure proposed in the reorganization.

In 1927 the Railroad Company initiated an improvement or rehabilitation program contemplating the expenditure of $18,000,000 over a five-year period. This program was partly carried out, with the following resultant expenditures:

	Maintenance				
	Way and Structures	Equipment	Total	Investment Accounts	Total
1927	$ 324,218	$ 363,386	$ 687,604	$ 707,110	$1,394,714
1928	931,336	374,345	1,305,681	988,123	2,293,804
1929	488,024	587,306	1,075,330	836,575	1,911,905
1930	537,421	174,040	711,462	808,331	1,519,793
1931	110,339	12,396	122,735	534,339	657,074
1932	Cr. 56,246	144	Cr. 56,102	70,073	13,971
	$2,335,092	$1,511,617	$3,846,710	$3,944,551	$7,791,261

Of the originally contemplated $18,000,000 program, $8,000,000 was estimated as Operating Expense.

Because of declining revenues, the rehabilitation program was substantially discontinued in 1931.

[143]

Having failed to pay any interest on its First Mortgage Bonds since September 1, 1933, the Railroad Company on August 2, 1935 filed in the United States District Court for the Northern District of California, Southern Division, its petition for reorganization under Section 77 of the Bankruptcy Act. The proceedings upon said petition are herein called the Reorganization Proceeding.

The Trustees appointed by the Court in the Reorganization Proceeding have obtained authority from the Court to proceed with the rehabilitation program, with a contemplated expenditure of approximately $9,650,000, and have been authorized by the Court and the Interstate Commerce Commission to issue, and have issued, Trustees' Certificates having a lien prior to that of the existing First Mortgage, to provide the first $3,000,000 toward this program. The rehabilitation program has been substantially approved by experts employed by Reconstruction Finance Corporation and by the Committee hereinafter mentioned, for the purpose of making a physical examination of the property and a study of the program. These experts, however, have recommended that in addition to the expenditures contemplated by the Trustees, additional equipment should be purchased at an estimated cost of ap-

proximately $3,750,000. A substantial part of this amount can be financed by equipment obligations and the remainder out of income contemplated to be applied to capital expenditures. Both the management and the representatives of the larger creditors and stockholders are, therefore, in agreement that there should be provided in any reorganization of the Railroad Company $10,000,000 of new money with which to pay the outstanding Trustees' Certificates, to provide for the remainder of the rehabilitation program, and also to provide additional working capital.

Although the system of the Railroad Company has been valued by the Interstate Commerce Commission at approximately $145,000,000, and although, as indicated above, the consolidated net income of the System available for fixed charges reached $4,759,000* in 1926, the more recent record of earnings, and the Management's forecast for the next five years, would seem to indicate the wisdom of keeping fixed interest charges after reorganization within $1,000,000, and total interest charges, both fixed and contingent, within $2,000,000.

As the foregoing amounts are insufficient to provide interest upon the $49,290,100 of First Mortgage Bonds now outstanding, and the $8,214,766 of unpaid interest which will have accrued thereon by January 1, 1937, and in addition interest on the required $10,000,000 of new capital, it would seem

*See footnote p. 2. [See page 54 of this printed record.]

that a sound capital structure can be insured only by allotting stock to the existing First Mortgage Bondholders for a portion of their present claims. Since all other classes of securities of the Railroad Company, other than the equipment obligations, are entirely junior in lien to the First Mortgage, obviously any stock so allotted to the present First Mortgage Bondholders (whether for principal or for accrued interest) should have rights as to both assets and income prior to those of the stock allotted such other creditors and stockholders of the Railroad Company.

This Plan has been prepared by Messrs. Frederick H. Ecker, John W. Stedman and Reeve Schley, as a Committee representing certain institutional holders of First Mortgage Bonds, as an application of the foregoing principles. It is believed that the Plan, if consummated, will result in a sound capital structure and that, in the distribution of the resultant securities, it fairly recognizes the relative rights and priorities of all the existing classes of the Railroad Company's security holders. The Plan contemplates that the opportunity to subscribe to new securities to supply the necessary $10,000,000 of new money, offered, first, to The Western Pacific Railroad Corporation, as the Railroad Company's sole stockholder, second, to its junior creditors, and, third, to the present First Mortgage Bondholders, shall be upon terms sufficiently attractive to insure the raising of the new money.

The statements and figures herein contained with respect to the capitalization of the Railroad Com-

pany have been taken from the books and records furnished by the Management of the Railroad Company, but no estimate, statement, explanation or suggestion contained in the Plan or in any circular issued, or which may hereafter be issued, by the Committee, or by the Railroad Company, or by any of its officers, is intended or is to be accepted as a warranty. **[144]**

*See footnote page 4. [See page 62 of this printed record.]

**Assuming that all such bonds bear interest at the rate of 4% per annum. As hereinafter provided the $10,000,000 thereof to be issued to provide new money may bear interest at a rate not exceeding 5% per annum.

New First Mortgage Bonds

The new First Mortgage shall constitute a first lien upon the railroads and other property, real and personal, acquired by the New Company in the reorganization, including all interests of the Railroad Company, whether by way of stock, bonds or advances, in the other companies mentioned in the introductory statement.

Of the total authorized issue of $50,000,000 new First Mortgage Bonds

$9,858,020 are to be issued to the holders of existing First Mortgage Bonds in the reorganization;

$10,000,000 are to be offered for subscription, with shares of new Common Stock as hereinafter in Article V provided, to provide the new money required in the reorganization;

$1,000,000 are to be authenticated forthwith and placed in the treasury of the New Company for issue for any proper corporate purpose;

$29,141,980 are to be reserved to provide for, or to reimburse the New Company for, expenditures for additions, betterments, improvements or extensions made after January 1, 1937, in a principal amount not exceeding 75% of the actual cost of such additions, betterments, improvements or extensions.

The new First Mortgage Bonds may be issued in series which may differ as to date of maturity and interest rate. The Bonds to be issued under the Plan

shall be dated January 1, 1937, shall mature January 1, 1967, shall bear interest at the rate of 4% per annum, payable semi-annually, and shall be redeemable, in whole or in part, on any interest payment date upon 30 days' notice, at their principal amount and accrued interest except, however, that as hereinafter in Article V provided, the $10,000,000 principal amount of new First Mortgage Bonds to be offered for subscription to provide the new money required in the reorganization may bear interest at a rate not exceeding 5% per annum, payable semi-annually, may mature not earlier than January 1, 1952, and may be redeemable at not exceeding 105% of their principal amount and accrued interest.

New Income Mortgage 5% Bonds

The new Income Mortgage shall constitute a lien, subject only to the lien of the First Mortgage, upon all property from time to time subject to the lien of the First Mortgage.

The entire authorized issue of $19,716,040 new Income Mortgage 5% Bonds is to be issued to holders of existing First Mortgage Bonds in the reorganization.

The new Income Mortgage Bonds shall be dated January 1, 1937, shall mature January 1, 1987, and shall bear interest at the rate of 5% per annum, payable semi-annually, but, as hereinafter in this Article more fully provided, said interest shall be payable on October 1 and April 1 in each year, in respect of Income Periods ending the next pre-

ceding June 30 and December 31, respectively, and only out of Available Net Income of the New Company, and such interest shall be cumulative as against such Available Net In- [146] come for the Income Period in respect of which such interest is payable, and for the six Income Periods next succeeding such Income Period. Said Bonds shall be redeemable on any interest payment date at their principal amount, plus any interest payable thereon on such interest payment date.

As also hereinafter more fully provided there may be paid out of said Available Net Income, before payment of interest on the new Income Mortgage Bonds, certain amounts to provide a Contingency Reserve Fund and a Capital Fund.

As also hereinafter more fully provided the new Income Mortgage Bonds shall be entitled to the benefits of a 1% Cumulative Sinking Fund, payable out of Available Net Income remaining after any dividends paid therefrom on the new Participating 6% Preferred Stock.

New Participating 6% Preferred Stock

There will be authorized 500,000 shares of new Preferred Stock, each of the par value of $100, of which 279,308 shares are to be issued to holders of the existing First Mortgage Bonds in the reorganization.

The new Preferred Stock shall be entitled to receive dividends at the rate of 6% per annum in respect of each calendar year, from January 1, 1937,

before any dividends shall be paid, or declared or set apart for payment, on the Common Stock. Such dividends shall be cumulative to the extent earned in respect of any calendar year but not paid; but such dividends shall otherwise be non-cumulative. After dividends shall have been paid or declared or set apart for payment, on the new Common Stock at the rate of $3 per share in respect of any year, each share of new Preferred Stock shall be entitled to share equally with each share of new Common Stock in any dividends paid, or declared or set apart for payment, in respect of such year.

In any liquidation or winding up of the New Company, whether voluntary or involuntary, the new Preferred Stock shall be entitled to receive, out of the assets of the New Company, its par value, plus any accrued and unpaid cumulative dividends thereon, before any distribution shall be made to the new Common Stock but shall not be entitled to any further participation in such assets.

The new Preferred Stock shall be redeemable, in whole or in part, at any time at its par value plus accrued and unpaid cumulative dividends.

Holders of new Preferred Stock shall be entitled to voting power on all matters in respect of which stockholders of any class shall be entitled to vote, and shall further be entitled, voting separately as a class, to elect a majority of the Board of Directors of the New Company until full 6% dividends shall have been paid upon the new Preferred Stock for 5 successive calendar years, or until the number

of shares thereof outstanding shall have been reduced to less than 100,000 shares. Thereafter each share of new Preferred Stock shall be entitled to vote equally with each share of new Common Stock upon the election of Directors, and such election shall be by cumulative voting.

The New Company shall not, without the vote or consent of the holders of at least two-thirds in par value of the outstanding new Preferred Stock, (1) create or permit to be created any mortgage or other lien upon any of its properties, excepting the new First Mortgage, the new Income Mortgage or purchase money liens (including equipment obligations) upon property hereafter acquired, given for not more than 75% of the purchase price of such property; (2) create or issue any bonds, notes or other evidences of indebtedness maturing more than two years from their date, except purchase money obligations given for not more than 75% of the purchase price of property hereafter acquired; (3) create any stock ranking, either as to assets or dividends, in priority to, or on a parity with, the new Preferred Stock, or (4) permit any subsidiary, all of whose stock except directors' shares, shall be owned by the New Company, to create any mortgage or other lien upon any of its properties or issue any such bonds, notes or other evidences of indebtedness (except purchase money liens or obligations limited as aforesaid), or issue any additional stock of any class, unless the obligations secured by such mortgage or other lien or such other obligations or such stock shall be acquired by the New Company.

New Common Stock

There will be authorized 500,000 shares of new Common Stock, without par value, of which 189,995 shares are to be issued forthwith and deposited in escrow for the benefit of Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Company, as hereinafter in Article IV provided. In addition, as hereinafter in Article V provided, a minimum of 150,000 shares and a maximum of 300,000 shares are to be issued forthwith and offered for subscription in connection with the $10,000,000 of new First Mortgage Bonds to provide the new money required in the reorganization.

Application of Available Net Income

Available Net Income shall be determined for each period of six months ending June 30 or December 31 (hereinafter called Income Periods) beginning with the Income Period ending June 30, 1937.

Available Net Income for each Income Period shall be determined by deducting from the consolidated income of the New Company and its subsidiaries available for fixed charges for such Income Period (determined in accordance with accounting rules of the Interstate Commerce Commission or other analogous Federal authority having jurisdiction in the premises at the time in force, or, to the extent not governed by such accounting rules, in accordance with sound accounting practice):

(1) All fixed charges of the New Company and its subsidiaries accrued during such Income Period; and

(2) All other charges properly deductible from such income in determining income after fixed charges under such accounting rules then in force, but excluding contingent interest and Sinking Fund requirements, hereinafter provided for;

provided, however,

(a) that in determining Available Net Income there shall not be deducted any amounts expended in connection with the rehabilitation program out of the $10,000,000 of new money to be provided in the reorganization (or out of the proceeds of any Trustees' Certificates or other obligations retired out of said new money), notwithstanding that under the accounting rules hereinbefore mentioned such expenditures may be chargeable as operating expenses*; and

(b) if the New Company shall not come into ownership and possession of the properties now operated by the Trustees of the Railroad Company in the Reorganization Proceeding on or before January 1, 1937, Available Net Income

---

*It is intended that the entire $10,000,000 of new First Mortgage Bonds to be issued to provide new money, and the $1,000,000 of new First Mortgage Bonds to be authenticated and placed in the treasury of the New Company, shall be issued against surplus created as a result of the reorganization, and approval by the Interstate Commerce Commission to charging the expenditures above referred to, commencing as of January 1, 1937, to surplus, rather than to operating expense, is to be requested.

for any period after January 1, 1937 until the New Company comes into possession and operation of such properties shall be computed as if the New Company had come into such ownership or possession on January 1, 1937 and had issued, as of that date, the new securities issuable under the Plan, other than the $10,000,000, principal amount, of new First Mortgage Bonds to be issued to provide new money; and in lieu of interest on said Bonds there shall be charged the amount of interest actually accruing during such period upon any Trustees' Certificates or other obligations issued to provide funds for the rehabilitation program.

Available Net Income for each Income Period shall be applied to the following purposes and in the following order:

(1) If and to the extent that the Board of Directors of the New Company shall in its discretion so determine, to the maintenance at $500,000 of the Contingency Reserve Fund (to be initially created out of new money as hereinafter provided), provided, however, that the amount applied to such purpose shall not exceed 10% of the Available Net Income for such Income Period.

(2) Any then remaining Available Net Income may, if the Board of Directors of the New Company in its discretion shall so determine, be applied to the creation of a Capital Fund to be

applied to, or to provide for, or to reimburse the treasury of the New Company for, Capital Investments (as defined by the Interstate Commerce Commission Classification of Income, Profit and Loss and General Balance Sheet Accounts for Steam Roads, Accounts Nos. 701, 702, 705 and 706 or such substituted accounts as may at the time be in effect, and including therein initial and principal payments upon equipment leased under equipment trusts or purchased under conditional sale agreements) to the extent that such Capital Investments have been made during the calendar year in which such Income Period is included, provided, however, that

(a) to the extent that expenditures are so provided for or reimbursed out of the Capital Fund, the New Company shall not thereafter have the right to issue any bonds or other evidences of indebtedness or any stock ranking, as to either assets or dividends, in priority to, or on a parity with, the new Preferred Stock, to capitalize or reimburse such expenditures;

(b) the amount set aside in the Capital Fund out of Available Net Income of any calendar year shall not exceed $500,000 in respect of the calendar years 1937 to 1940, both inclusive; [148] $1,000,000 in respect of the years 1941 to 1945, both inclusive; or, in respect of any subsequent year, more than 3% of the consolidated gross revenues of the

New Company and its subsidiaries for such calendar year; and

(c) Any unappropriated amount not charged out as of December 31 of the year in respect of which it shall have been set aside shall not be carried forward.

(3) Any then remaining Available Net Income shall be applied to the payment on October 1 and April 1 each year, commencing October 1, 1937, of interest on the then outstanding new Income Mortgage 5% Bonds (not including any thereof theretofore purchased or redeemed out of the Sinking Fund hereinafter in clause (5) provided for) accruing during the Income Period ending on the next preceding June 30 or December 31, respectively, and, to the extent unpaid, any interest which shall have accrued on said Bonds in respect of six Income Periods next preceding such Income Period.

(4) Any then remaining Available Net Income shall be applied, if, and to the extent that, such dividends shall be declared by the Board of Directors of the New Company, to the payment on April 1 of each year, commencing April 1, 1938, of dividends at the rate of 6% per annum upon the new Preferred Stock in respect of the two Income Periods ending on the next preceding December 31, to the extent not theretofore paid, and of any accrued and unpaid cumulative dividends on the new Preferred Stock; and, if and to the extent so declared, to the

payment on October 1 in each year, commencing October 1, 1937, of interim dividends on the new Preferred Stock at the rate of 6% per annum in respect of the Income Period ending on the next preceding June 30, and of any such accrued and unpaid cumulative dividends.

(5) Any then remaining Available Net Income shall then be applied to the creation on October 1 and April 1 in each year, commencing October 1, 1937, of a Cumulative Sinking Fund, in an amount up to, but not exceeding, in respect of any calendar year, 1% of the total principal amount of new Income Mortgage Bonds issued in the reorganization plus an amount equal to interest on any Income Mortgage Bonds theretofore purchased or redeemed out of the Sinking Fund calculated at the rate paid (pursuant to the foregoing clause (3)) in respect of such calendar year, including accumulations, upon outstanding Income Mortgage Bonds. Said Sinking Fund shall be applied to the purchase of new Income Mortgage Bonds at not exceeding their redemption price, and whenever the amount in the Sinking Fund exceeds $50,000 and new Income Mortgage Bonds are not tendered or cannot otherwise be purchased at less than their redemption price, the funds then in the Sinking Fund shall be applied to the redemption of the new Income Mortgage Bonds on the next succeeding interest payment date. Bonds purchased or re-

deemed out of the Sinking Fund shall not thereafter be re-issued.

(6) Any then remaining Available Net Income may be applied to any proper corporate purpose of the New Company, including (but only after all accrued and unpaid cumulative dividends on the new Preferred Stock to the next preceding June 30 or December 31, as the case may be, shall have been paid, or declared and set apart for payment) dividends on the New Common Stock and participating dividends on the new Preferred Stock, in accordance with their respective rights as hereinbefore provided.

IV.

Treatment of Existing Securities

1. Existing Equipment Trusts, Baldwin Lease and Pullman Contract, aggregating $2,048,190, shall remain undisturbed and shall be assumed by the New Company.

2. Holders of existing First Mortgage 5% Bonds (with March 1, 1934, and subsequent coupons) shall receive for each $1,000, principal amount, of such Bonds:

(a) $200 of new First Mortgage 4% Bonds;

(b) $400 of new Income Mortgage 5% Bonds;

(c) $400 of new Participating 6% Preferred Stock;

(d) $166.66⅔ of new Participating 6% Preferred Stock (being of par value equal to the

amount of interest on the existing Bonds accrued to January 1, 1937); and

(e) subject to the terms and conditions hereinafter in Article V provided, the contingent right to subscribe for new First Mortgage Bonds and new Common Stock to be issued to provide new money. [149].

3. Notes to Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Company, together with interest accrued thereon to January 1, 1937, shall be dealt with as follows:

189,995 shares of new Common Stock shall be deposited with a Depositary under an Escrow Agreement for the benefit of Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Company, as hereinafter provided, and there shall be issued to said corporations, respectively, registered Escrow Certificates evidencing their respective rights under the Escrow Agreement. Said Certificates shall be in such form as may be determined by the Committee (hereinafter in Article VIII provided for), and shall be transferable upon presentation thereof for transfer at the office of the Escrow Depositary accompanied by appropriate instruments of assignment and transfer duly executed by the registered holder of such surrendered Certificate or Certificates. As hereinafter used, "RFC", "RCC", and "ACJ"

mean the registered holder of the Escrow Certificates issued to Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Company, respectively. If the New Company shall purchase or acquire any of said Escrow Certificates, it may become the registered holder thereof and succeed to all the rights of a registered holder of such Escrow Certificates, and shall thereupon be embraced in said terms as herein used.

RFC shall be entitled to receive, upon surrender of its Escrow Certificate at the office of the Escrow Depositary, on January 1, 1942, either

(1) an amount in cash equal to $3,390,564, plus interest thereon at the rate of 4% per annum from January 1, 1937, less the amount of any cash paid to it as hereinafter in this Article IV provided, or

(2) if such amount be not paid to it on January 1, 1942, as hereinafter provided, 107,500 shares of new Common Stock.

If the amount to be paid to RFC on January 1, 1942, as aforesaid, is not deposited with the Escrow Depositary by the New Company on or before December 1, 1941, it may be so deposited by RCC, and if it is not so deposited by RCC on or before December 15, 1941, it may be so deposited by ACJ on or before January 1, 1942. If such deposit is made by the New Company,

or by RCC, or by ACJ, the amount thereof shall be paid by the Escrow Depositary to RFC on January 1, 1942, and said 107,500 shares of new Common Stock shall continue to be held by the Escrow Depositary for delivery as hereinafter provided. If such deposit is not made on or before January 1, 1942, the Escrow Depositary shall deliver to RFC said 107,500 shares of new Common Stock.

RCC shall be entitled to receive, upon surrender of its Escrow Certificate at the office of the Escrow Depositary on January 1, 1943, either

(1) an amount in cash equal to $2,573,511, plus interest thereon at the rate of 4% per annum from January 1, 1937, less the amount of any cash paid to it, as hereinafter provided, less also any amount paid to RCC on account of the Railroad Company's rights under the Marshalling and Distributing Plan, 1931 (plus any amount deposited by RCC for payment on January 1, 1942, to RFC as aforesaid, with interest thereon at the rate of 4% per annum from the date of such deposit), or

(2) if such amount be not paid to it on January 1, 1943, as hereinafter provided, 40,000 shares of new Common Stock, and if said 107,500 shares of new Common Stock have not been delivered to RFC as hereinbefore provided, said 107,500 shares of new Common Stock.

If the amount to be paid to RCC on January 1, 1943, as aforesaid, is not deposited with the Escrow Depositary by the New Company on or before December 15, 1942, it may be so deposited by ACJ on or before January 1, 1943. If such deposit is made by the New Company or by ACJ, the amount thereof shall be paid by the Escrow Depositary to RCC on January 1, 1943, and said 40,000 shares of new Common Stock (and also said 107,500 shares of new Common Stock if not already delivered to RFC) shall continue to be held by the Escrow Depositary for delivery as hereinafter provided. If such deposit is not made on or before January 1, 1943, the Escrow Depositary shall deliver to RCC said 40,000 shares of new Common Stock, and, if said 107,500 shares of New Common Stock have not been delivered to RFC as hereinbefore provided, also said 107,500 shares of new Common Stock.

ACJ shall be entitled to receive, upon surrender of its Escrow Certificate at the office of the Escrow Depositary on January 1, 1944, either [150]

(1) an amount in cash equal to $5,749,770, plus interest thereon at the rate of 4% per annum from January 1, 1937, less the amount of any cash paid to it, as hereinafter provided (plus any amount deposited by ACJ for payment on January 1, 1942, to RFC as aforesaid, plus any amount deposited by ACJ

for payment on January 1, 1943, to RCC as aforesaid, in each case with interest thereon at the rate of 4% per annum from the date of such deposit), or

(2) if such amount be not paid to it on January 1, 1944, as hereinafter provided, 42,495 shares of new Common Stock, and, if said 107,500 shares of new Common Stock have not been delivered to RFC or RCC, as hereinbefore provided, said 107,500 shares of new Common Stock, and if said 40,000 shares of new Common Stock have not been delivered to RCC, as hereinbefore provided, said 40,000 shares of new Common Stock.

The amount to be paid to ACJ on January 1, 1944, as aforesaid, may be deposited with the Escrow Depositary by the New Company on or before January 1, 1944, and, if so deposited by the New Company, the amount thereof shall be paid by the Escrow Depositary to ACJ on January 1, 1944, and all of the shares of new Common Stock then on deposit with the Escrow Depositary shall be delivered by the Escrow Depositary to or on the order of the New Company. If such deposit is not made on or before January 1, 1944, the Escrow Depositary shall deliver to ACJ said 42,495 shares of new Common Stock, and, if said 107,500 shares of new Common Stock shall not have been delivered to RFC or RCC as hereinbefore provided, also said 107,500 shares of new Common Stock, and,

if said 40,000 shares of new Common Stock shall not have been delivered to RCC as hereinbefore provided, also said 40,000 shares of new Common Stock.

Until payment of cash or delivery of shares of new Common Stock to RFC, RCC and ACJ, the Escrow Depositary shall, from time to time, pay any cash dividends received upon the shares of new Common Stock deposited with it to RFC, RCC and ACJ in the same proportions in which the proceeds of the sale of such shares are required to be distributed, as hereinafter provided.

The New Company may at any time at its option, upon 30 days' notice to the registered holders of Escrow Certificates at the time outstanding, redeem such outstanding Escrow Certificates by depositing with the Escrow Depositary for the account of the registered holders of such outstanding Escrow Certificates an amount in cash equal to the total cash amount at the time represented by such outstanding Escrow Certificates, (including interest at the rate of 4% per annum, and any amount which, at that time may have been deposited by RCC or ACJ, as hereinbefore provided, for payment to RFC or RCC, with interest thereon at the rate of 4% per annum to the date of such deposit, and deducting any cash previously paid thereon as herein provided), and upon such redemption and deposit the Escrow Depositary

shall pay said amounts in cash to the respective holders of outstanding Escrow Certificates and shall deliver all the new Common Stock then on deposit, to or on the order of the New Company.

Purchase Warrants shall be issued (to or on the order of The Western Pacific Railroad Corporation, as hereinafter provided) entitling the holders thereof to purchase on or before December 1, 1941, all or any part of said 189,995 shares of new Common Stock at the price of $62 per share, plus interest thereon at the rate of 4% per annum from January 1, 1937, to a date 10 days after the exercise of such Purchase Warrants. Unless the New Company shall theretofore have deposited with the Escrow Depositary the amount necessary to redeem all the outstanding Escrow Certificates, as hereinbefore provided, the proceeds of the exercise of such Purchase Warrants shall be paid to the Escrow Depositary and the Escrow Depositary shall deliver, out of the new Common Stock deposited with it, as hereinbefore provided, new Common Stock so paid for upon the exercise of such Purchase Warrants and shall, within 10 days thereafter, pay to RFC, RCC and ACJ such cash in the proportions of 56.581% to RFC, 21.053% to RCC and 22.366% to ACJ, until the cash amount payable in respect of RFC Escrow Certificate shall have been paid in full, and there-

after in the proportions of 77.634% to RCC and 22.366% to ACJ, until the cash amount payable in respect of RCC Escrow Certificate shall have been paid in full, and thereafter all such proceeds shall be paid to ACJ until the cash amount payable in respect of ACJ Escrow Certificate shall have been paid in full. Any excess of cash paid upon the exercise of Purchase Warrants shall be paid to the New Company.

The amounts of any new Common Stock deliverable upon the exercise of Purchase Warrants shall be taken from the stock deliverable to RFC, RCC and ACJ, as hereinbefore provided, in the same proportions; and the amount of stock which may thereafter become deliverable to them, as hereinbefore provided, shall be correspondingly reduced. [151]

If the New Company shall have exercised the right to redeem the Escrow Certificates as hereinbefore provided, the proceeds of the exercise of the Purchase Warrants shall be paid to it, and, upon such payment, it shall issue and deliver the new Common Stock issuable in respect of such Purchase Warrants.

Subject to the terms and conditions hereinafter in Article V provided, Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Company shall also have the contingent right to subscribe for new First Mortgage Bonds and new Common Stock to be issued to provide new money.

4. The Western Pacific Railroad Corporation, as the holder of substantially the entire unsecured debt and all the outstanding Preferred and Common Stock of the Railroad Company, shall receive, upon release and surrender of said indebtedness and stock:

(a) Purchase Warrants issued under the Escrow Agreement, as hereinbefore provided, in respect of 189,995 shares of new Common Stock; and

(b) Subscription Warrants for $10,000,000 of new First Mortgage Bonds and 150,000 shares of new Common Stock, to be issued to provide new money, as hereinafter in Article V provided, at the price of $100 and accrued interest on said Bonds, for each unit of $100 of new First Mortgage Bonds and 1½ shares of new Common Stock.

V

Provision for New Money

$10,000,000 of new money is required by the New Company for the following purposes:

$3,000,000 to retire Trustees' Certificates issued to provide for the 1936 expenditures under the rehabilitation program;

$6,500,000 for completion of the rehabilitation program (or to retire any further Trustees' Certificates or other obligations issued to provide therefor), or to the extent that the Board of Directors may so determine, for other addi-

tions and betterments, or to provide for fixed charges for which the New Company cannot, in the opinion of the Board of Directors, provide without unduly impairing working capital;

$500,000 as a Contingency Reserve Fund, to be available only for the purpose of paying fixed interest charges, principal of and dividends on equipment trust obligations, and operating expenses which cannot otherwise be provided for, without, in the opinion of the Board of Directors, unduly impairing working capital.

To provide said $10,000,000 there will be issued to or on the order of The Western Pacific Railroad Corporation Subscription Warrants, in such form as may be determined by the Committee, evidencing the right to subscribe for an aggregate of

$10,000,000 of new First Mortgage Bonds and

150,000 shares of new Common Stock,

at the price of $100, plus accrued interest on said Bonds, for each unit of

$100 of new First Mortgage Bonds and

1½ shares of new Common Stock.

It is contemplated that the bonds to be covered by the Subscription Warrants shall be dated January 1, 1937, shall mature January 1, 1967, shall bear interest at the rate of 4% per annum, payable semi-annually, and shall be redeemable in whole or in part on any interest payment date upon thirty days' no-

tice at their principal amount and accrued interest; but if the Committee shall determine that it is advisable, in order to insure the raising of the new money, and to that end to obtain underwriting of the offerings provided for in this Article V, the Committee may, with the approval of the Interstate Commerce Commission and of the Court in the Reorganization Proceeding, cause the First Mortgage Bonds so to be offered to bear interest at a greater rate, but not exceeding 5% per annum, payable semi-annually, to mature at an earlier date, but not earlier than January 1, 1952, and to be redeemable at a higher price, but not exceeding 105% of their principal amount and accrued interest. [152]

Such subscription Warrants shall entitle the holders thereof to subscribe for said units at said price for a period to be specified therein, and which, as to not less than $7,000,000 principal amount of Bonds represented thereby, shall be not less than 60 nor more than 120 days after the date of final confirmation of the Plan by the Court in the Reorganization Proceeding, and as to any remainder of said $10,000,000 of Bonds may, if the Board of Directors of the New Company shall so determine, be a further period expiring not later than December 31, 1937.

Opportunity to provide such part of the new money as is not provided by the exercise of said Subscription Warrants shall be offered to Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Company in propor-

tion to the General and Refunding Mortgage Bonds now held by them, that is to say, in the proportions of 56.581% to Reconstruction Finance Corporation, 21.053% to The Railroad Credit Corporation, and 22.366% to A. C. James Company. Said corporations shall be entitled to provide their respective portions of such new money, by subscribing for such new First Mortgage Bonds as are covered by the Subscription Warrants expired and not exercised, together with new Common Stock, at the price of $100, plus accrued interest on said Bonds, for each unit of

$100 of new First Mortgage Bonds and
2 shares of new Common Stock;

If any of said corporations shall fail to subscribe for its full proportion as aforesaid, the other or others of said corporations may subscribe for the unsubscribed balance, in the proportion which the existing General and Refunding Mortgage Bonds of the Railroad Company held by them respectively bear to the total amount of General and Refunding Mortgage Bonds held by the corporations so electing to subscribe for their full proportion.

The contingent rights of subscription thus granted to Reconstruction Finance Corporation, the Railroad Credit Corporation and A. C. James Company shall be evidenced by appropriate Warrants in such form as may be determined by the Committee, and such rights shall, in the case of each offering, run concurrently with the rights evidenced by the Subscription Warrants to be issued to, or on the order

of, The Western Pacific Railroad Corporation. Holders of such Warrants will be required to elect prior to the expiration of such Subscription Warrants, in each case, the extent to which they will exercise their subscription rights. Notice of the amount of new First Mortgage Bonds and new Common Stock allotted against such subscriptions will be given by registered mail as promptly as possible after the expiration of the Subscription Warrants in each case, and payments for such allotments will be required to be made at a bank or trust company in New York City, to be specified in such notice, within ten days after the mailing of such notice. Upon failure of any holder of such Warrant to take up and pay for the new First Mortgage Bonds and new Common Stock allotted to it, at the price hereinbefore provided, the holder of such Warrant shall cease to have any rights in respect of such new First Mortgage Bonds and new Common Stock.

Should holders of the Subscription Warrants fail to exercise any thereof and Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Company provide the entire $10,000,000 of required new money, there would thus be issued, to provide said new money, an aggregate of

$10,000,000 of new First Mortgage Bonds and
200,000 shares of new Common Stock.

If holders of the Subscription Warrants, Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Company fail to pro-

vide all or any part of said $10,000,000 of new money, as aforesaid, holders of the existing First Mortgage Bonds of the Railroad Company shall be entitled to provide the same by subscribing for new First Mortgage Bonds and new Common Stock at the price of $100, plus accrued interest on said Bonds, for each unit of

$100 of new First Mortgage Bonds and
3 shares of new Common Stock.

The contingent rights of subscription thus granted to holders of existing First Mortgage Bonds shall be evidenced by appropriate Warrants in such form as may be determined by the Committee and such rights shall, in the case of each offering, run concurrently with the rights evidenced by the Subscription Warrants to be issued to, or on the order of, The Western Pacific Railroad Corporation. Holders of such Warrants shall be [153] entitled, upon each offering, to subscribe for as many of said units as they may elect, but if there shall be an oversubscription by the holders of such Warrants, the Committee shall allot the new First Mortgage Bonds and new Common Stock in the proportion which the respective holdings of First Mortgage Bonds of the Railroad Company held by the respective original issues of the exercised Warrants bear to the total amount of such Bonds held by the original issuees of all the Warrants so exercised. Notice of the amount of new First Mortgage Bonds and new Common Stock allotted against such subscriptions

will be given, in respect of each offering, by registered mail as promptly as possible after the expiration of the rights of Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Company to take up and pay for their allotments as hereinbefore provided; and payments for the allotments against such subscriptions will be required to be made at a bank or trust company in New York City, to be specified in such notice within ten days after the mailing of such notice. Upon failure of any holder of such Warrant to take up and pay for the new First Mortgage Bonds and new Common Stock allotted to it, at the price hereinbefore provided, the holder of such Warrant shall cease to have any rights in respect of such new First Mortgage Bonds and new Common Stock.

Should holders of the Subscription Warrants, Reconstruction Finance Corporation, The Railroad Credit Corporation, and A. C. James Company provide none of the $10,000,000 of required new money, there would thus be issued, to provide said new money, an aggregate of

$10,000,000 of new First Mortgage Bonds and
300,000 shares of new Common Stock.

New First Mortgage Bonds issued to provide new money will be issued and allotted in multiples of $100 and no subscription for fractional amounts of $100 will be received.

The Committee or the New Company may in their discretion effect such arrangements for underwrit-

ing the exercise of all or any part of the foregoing subscription rights upon such terms and conditions as they may determine, with the approval of the Interstate Commerce Commission and of the Court in the Reorganization Proceeding. If such arrangements for underwriting shall be made with Reconstruction Finance Corporation, the compensation for such underwriting may be, or include, the exchange by the New Company of new Income Mortgage Bonds and new Participating Preferred Stock, in such proportions as the Committee with like approval shall determine, in exchange for the RFC Escrow Certificate, to be issued to Reconstruction Finance Corporation as provided in Article IV hereof. Such exchange, however, shall not constitute a cancelation of said RFC Escrow Certificate, or be deemed equivalent to a deposit by the New Company of cash against said RFC Escrow Certificate, as contemplated by said Article IV; but the New Company shall succeed to all the rights of Reconstruction Finance Corporation in respect of the RFC Escrow Certificate under said Article IV. [154]

VI

Table of Distribution of New Securities

Present Liabilities as of July 1, 1936	Amount	Undisturbed	New First Mortgage Bonds	New Income Mortgage 5% Bonds	New Participating 6% Preferred Stock	New Common Stock
Equipment Trusts, Baldwin Lease and Pullman Contracts	$ 2,048,190	$2,048,190				
First Mortgage 5% Bonds due 1946	49,290,108		$ 9,858,020 (20%)	$19,716,040 (40%)	$19,716,040 (40%)	
First Mortgage Bond Interest (Unpaid)	8,214,766				8,214,766	
New Money			$10,000,000			Not less than 150,000 nor more than 300,000 shares (See Article V)
General & Refunding Bonds. RFC for $2,963,000 Note) 426,753 Int.)	$3,389,753	750,000				Escrow Ctfs. for 107,500 shares (See Article IV)
RCC for $2,482,218 Note) 114,156 Int.)	$2,596,374	4,000,000				Escrow Ctfs. for 40,000 shares (See Article IV)
ACJ for $4,999,800 Note) 749,870 Int.)	$5,749,670	4,249,500				Escrow Ctfs. for 42,495 shares (See Article IV)
The Western Pacific R. R. Corporation, for						
Advances (including Realty Co.)	7,245,274		Subscription Warrants for above mentioned $10,000,000 (See Article V)			Purchase Warrants for above mentioned 189,995 shares (See Article IV)
Preferred Stock	28,300,000					
Common Stock	47,500,000					Subscription Warrants for above mentioned 150,000 shares (See Article V)
Aggregate principal	$161,597,830	$2,048,190	$19,858,020	$19,716,040	$27,930,806	Not less than 339,995 shares Not more than 489,995 shares
Annual fixed charges	$ 3,348,314*	$ 86,473	$794,320**			
Annual contingent interest				$ 985,802		
Annual Preferred 6% dividend					$ 1,675,848	

*Without interest on interest accrued and unpaid on First Mortgage Bonds, or on RFC, RCC or ACJ Notes; and computing interest on said Notes rather than on their collateral, interest on the RCC Note being computed at 1½% per annum, the N. Y. Federal Reserve Bank rediscount as of April 20, 1936.

**Assuming that all such Bonds bear interest at the rate of 4% per annum. As hereinbefore in Articles III and V provided the $10,000,000 thereof to be issued to provide new money may bear interest at a rate not exceeding 5% per annum.

VII.

Claims Not Affected by the Plan

The following claims are not affected by the Plan: (a) current liabilities of the Railroad Company incurred in the ordinary conduct of its business prior to the institution of the Reorganization Proceeding, including claims for personal injury and property damage, (b) current liabilities and obligations of the Railroad Company and of any trustee or trustees of the estate incurred during the Reorganization Proceeding, and (c) all other claims, liabilities or obligations for which specific provision is not made in the Plan. To the extent that such claims, liabilities or obligations are not paid by the Railroad Company or any trustee or trustees of the estate pursuant to order of the Court in the Reorganization Proceeding, they are to be paid in cash or assumed by the New Company. All such claims, liabilities, and obligations, including any claims arising from the disaffirmance of executory leases or other contracts of the Railroad Company or any trustee or trustees of the estate in the Reorganization Proceeding pursuant to order of the Court, in respect of which claims are filed or evidenced in accordance with orders of the Court, may be adjusted or compromised and dealt with or paid or discharged by the New Company, all as may be justed or compromised and dealt with or paid or discharged by the New Company, all as may be determined by the Board of Directors of the New Company and approved by the Court.

The New Company shall be deemed to have assumed such of the contracts of the Railroad Company which are executory in whole or in part, including any executory leases and liabilities under guaranties, as shall have been affirmed by the Railroad Company or any trustee or trustees of the estate in the Reorganization Proceeding with the approval of the Court in the Reorganization Proceeding and prior to the date of confirmation of the Plan, and also any executory contracts made by the Railroad Company or any trustee or trustees of the estate with the approval of the Court in the Reorganization Proceeding which, by their terms, do not terminate at the conclusion of the Reorganization Proceeding.

VIII.

Method of Participation in, and Consummation of, the Plan

No holder of any security of the Railroad Company affected by the Plan shall be requested to accept the Plan until after a public hearing upon the Plan, held as provided by Section 77 of the Bankruptcy Act as it now exists or may hereafter be amended (hereinafter called Section 77), and a report and order of the Interstate Commerce Commission approving the Plan (in its present form or as it may be modified as hereinafter provided) and finding that the Plan complies with said Section 77, or until the Court in the Reorganization Proceeding shall have taken such action as may be

required by Section 77 prior to the submission of a plan thereunder to the security holders of the Railroad Company. Thereafter the Plan shall be submitted to the security holders of the Railroad Company in accordance with the provisions of said Section 77.

The Plan shall not be carried out until it shall have been accepted by or on behalf of the holders of at least two-thirds in principal amount of the outstanding existing First Mortgage 5% Bonds of the Railroad Company, nor unless either (1) the Plan shall have been accepted by or on behalf of the creditors of each class, as the same may be classified by the Court in the Reorganization Proceeding, holding at least two-thirds in principal amount of the total allowed claims of such class, and by or on behalf of the stockholders of each class holding at least two-thirds of the stock of such class, or (2) provision shall have been made for protecting the interests of such non-assenting classes of creditors and stockholders as hereinafter in Article IX provided.

Messrs. Frederick H. Ecker, John W. Stedman and Reeve Schley have heretofore acted as a Committee to represent certain large institutional holders of existing First Mortgage Bonds, being not more than 25 bona fide holders thereof, in respect of the extension of interest maturing during 1934 upon such First Mortgage Bonds, in respect of the performance of the Railroad Company's agreements made in connection with said extension, in

the negotiation of the plan of reorganization heretofore submitted by the Railroad Company in the Reorganization Proceeding, and in the preparation of this Plan. If, and when, this Plan shall be submitted to [156] the security holders of the Railroad Company for their acceptance or rejection, as hereinbefore provided, said Committee shall comply with the provisions of said Section 77 to qualify it to act as the representative of all holders of existing First Mortgage 5% Bonds of the Railroad Company assenting to the Plan, and otherwise to perform the duties and exercise the rights provided in the Plan.

The Plan may be carried out either by re-vesting the properties formerly of the Railroad Company in the Railroad Company or by transferring said properties to a new corporation organized for the purpose, and the execution by the corporation in which such properties are vested of the new mortgages and the issue by it of the new securities contemplated by the Plan. The corporation so acquiring said properties and issuing the new securities is herein referred to as the New Company.

The method of carrying out the Plan shall be determined by the Committee in its discretion, and the Committee shall also determine the form, and, except as herein otherwise expressly provided, the provisions, of all mortgages, bonds, coupons, charters, by-laws, stock certificates, purchase warrants, subscription warrants, acceptances, assents, and all other instruments in the judgment of the Committee

necessary or desirable in connection with carrying out the Plan.

The Committee may from time to time add to its members, and any vacancy from time to time occurring in the Committee may be filled by the remaining members of the Committee. The Committee may act by a majority of its members as from time to time constituted, at a meeting or in writing without a meeting. The Committee may employ such agents, attorneys and others as it may deem desirable for the purposes of the Plan. The Committee may from time to time delegate to others any power or discretion conferred upon it by the Plan; and the members of the Committee shall not be liable for any action taken by them in good faith or by any person employed by the Committee in good faith, or otherwise, except for their respective individual malfeasance or neglect.

The Committee may from time to time, whether before or after acceptance of the Plan by the holders of securities, modify the Plan or adopt a substitute plan, in accordance with, and subject to, the provisions of said Section 77; and the term "Plan" as used herein shall be deemed to include any such modification or substitute plan.

The members of the Committee have agreed to serve without compensation, but the expenses of the Committee shall be reimbursed as hereinafter provided.

Unless otherwise provided in said Section 77 or any order or orders of the Court in the Reorgani-

zation Proceeding or of the Interstate Commerce Commission, whenever notice shall be required or permitted to be given under or pursuant to the Plan, such notice shall be given by publishing a copy of such notice once in each week in one newspaper published and of general circulation in the Borough of Manhattan, the City and State of New York, and in one newspaper published and of general circulation in the City of San Francisco, State of California, and also (1) in case of notices to security holders who have accepted the Plan, by mailing such notice, postage prepaid, to the addresses of such security holders set forth in the acceptances signed by them; and (2) in case of notices to security holders who shall not have accepted the Plan, by mailing such notice, postage prepaid, to such security holders whose names and addresses appear on the books of the Railroad Company or of the New Company, as the case may be.

IX.

Provision for Dissenting Creditors and Stockholders

If the holders of more than one-third in principal amount of any class of creditors of the Railroad Company, as they may be classified by the Court in the Reorganization Proceeding, or the holders of more than one-third of the shares of stock of any class of the Railroad Company shall not have accepted the Plan within such period as the Com-

mittee, with the approval of the Commission and the Court, may determine after holders of at least two-thirds in principal amount of the existing First Mortgage 5% Bonds of the Railroad Company shall have accepted the Plan, the property of the Railroad Company shall be sold at public auction at a fair upset price as determined by the Court in the Reorganization Proceeding, and the non- [157] assenting creditors of such class or the non-assenting stockholders of such class, as the case may be, shall be entitled to receive their aliquot portion of the proceeds of the sale of such property, after deducting therefrom all expenses of such sale and the amount which would be required to pay in full, principal and interest to the date of such sale, all creditors whose claims are prior in lien or superior in equity to the claims of such non-assenting creditors or the rights of such non-assenting stockholders.

Upon any such sale, the property shall be purchased for the benefit of the New Company in the reorganization by the Committee, or by a purchaser nominated by the Committee, and there shall be applied on account of the purchase price the distributive share of the proceeds of sale of all securities the holders of which have assented to the Plan, and the securities, though not assenting to the Plan, of all classes two-thirds or more in amount of which have assented to the Plan.

X.

Expenses of the Reorganization

All expenses in connection with the Plan and its consummation, and all costs of administration and other allowances made by the Court in the Reorganization Proceeding, shall be paid by the New Company, subject to the provisions of Section 77 of the Bankruptcy Act, and shall constitute a charge upon the properties of the New Company as a cost of administration prior in lien to all new securities issued under the Plan.

There shall be included in such expenses such reasonable compensation for necessary services rendered and reimbursement for actual expenses incurred in connection with the Reorganization Proceeding and the Plan by the Trustees under the present First Mortgage and the present General and Refunding Mortgage of the Railroad Company, the Committee (including reimbursement for actual expenses incurred by the Committee in connection with the extension of interest on the existing First Mortgage 5% Bonds accruing during 1934, in respect of the performance of the Railroad Company's agreements made in connection with said extension, in the negotiation of the plan heretofore proposed by the Railroad Company in the Reorganization Proceeding, and in connection with this Plan), and by other parties in interest, committees or other representatives of creditors and security holders of the Railroad Company, and the

attorneys or agents of any thereof (including the Railroad Company), as may be approved by the Interstate Commerce Commission and the Court in the Reorganization Proceeding pursuant to said Section 77.

Dated as of January 1, 1937.

[Endorsed]: Filed with Interstate Commerce Commission Sep. 28, 1936. Filed with Clerk May 26, 1937. [158]

Before the
Interstate Commerce Commission
Finance Docket No. 10913

In the Matter of

The Western Pacific Railroad Company,
Debtor,

PLAN OF REORGANIZATION FOR THE WESTERN PACIFIC RAILROAD COMPANY, PROPOSED BY A. C. JAMES CO., A JUNIOR CREDITOR.

The following outline Plan of Reorganization for The Western Pacific Railroad Company is submitted by A. C. James Co., an intervening junior creditor, to the Interstate Commerce Commission for consideration by the Commission.

A. Basic principles upon which proposed Plan of Reorganization is constructed.

It is submitted that a sound plan for the readjustment of the capital structure of The Western Pacific Railroad Company (hereinafter called the "Railroad Company"), should meet the following standards:

(1) It should provide for the securing of new money, presently required, on the most economical basis; [161]

(2) It should furnish vehicles for financing future capital requirements on a sound basis;

(3) It should preserve, so far as possible, the simplicity of the present capital structure of the Railroad Company;

(4) In view of the favorable ratio of property valuation to present debt,* it should preserve present debt as debt;

(5) It should refrain from capitalizing unearned and unpaid interest, as a permanent part of the capital structure; and

(6) Necessarily, it should so reduce fixed charges as to render unlikely the recurrence of the present difficulties of the Railroad Company, even though we again pass through a pe-

*Interstate Commerce Commission valuation of the physical property of the Western Pacific System, plus additions at cost to present time, is approximately $145,000,000 and total funded debt of Railroad Company (exclusive of holding company open account advances and accrued interest) is approximately $63,000,000, or less than 44% of the property valuation.

riod in which business conditions are comparable with those of the past seven years.

B. General comments as to proposed Plan of Reorganization.

It is recommended that no new corporation be substituted for the Railroad Company, to effect the proposed capital readjustments, as it is believed the powers vested in the Interstate Commerce Commission and the Courts under Section 77 of the Bankruptcy Law are adequate to accomplish the necessary changes in capital structure without substitution of a new corporation.

The amounts of existing indebtedness are stated as of July 1, 1936, and in no case is reference made to interest accrued and unpaid thereon, as it is definitely proposed [162] that such unearned and unpaid interest be not capitalized in any form. Current liabilities of the Railroad Company or the Trustees, and executory leases and other similar contracts are not mentioned, and it is assumed they will be preserved as current obligations of the enterprise.

It is proposed that the Plan be put into effect on January 1, 1937.

C. Proposed provision for new money and necessary modifications in existing capital structure.

1. New Money required by enterprise $10,000,000

Upon the record heretofore presented to the Commission in this proceeding, it appears that the

Railroad Company presently requires approximately $10,000,000 of new money for capital purposes (aside from equipment needs, to be financed under equipment trusts, and minor capital requirements for which provision can be made from current earnings). The Trustees of the Railroad Company, appointed in the Section 77 proceeding, have already secured temporarily $3,000,000 of such new money upon their Trustees' Certificates, and propose shortly to secure an additional $3,700,000 in like manner.

It is here proposed that the entire $10,000,000 of required new money be represented by First Mortgage 4% Bonds, secured by a new mortgage which shall be a direct first lien on the railroad.

This new mortgage is intended to furnish the vehicle for future senior financing.

The $10,000,000 of First Mortgage 4% Bonds, presently to be sold, shall first be offered directly to the stockholders of The Western Pacific Railroad Corporation (the Delaware holding company, which, at present, [168] holds all the preferred and common stock of the Railroad Company) with a bonus at the rate of 15 shares of Common Stock, of $100 par value, of the Railroad Company for each $1,000 First Mortgage Bond purchased.

It is proposed that the entire $10,000,000 of new money so raised shall be used for the rehabilitation program now under way, or for subsequent additions and betterments, and no part of it is to be

set aside as a reserve fund to provide for fixed charges or operating expenses.

2. Existing Equipment Trusts, Baldwin lease and Pullman contracts $2,048,190.

These are to remain undisturbed. It should be borne in mind that additional equipment trust obligations will probably be created in the near future to provide the necessary motive power and rolling stock.

3. Present First Mortgage Bonds $49,290,100.

These bonds are to be refunded into a like principal amount of General Mortgage 4% Income Bonds, having a lien junior to the First Mortgage Bonds described under Subdivision 1 above. Each present First Mortgage bondholder is to receive for each $1,000 bond now held, $1,000 principal amount of General Mortgage 4% Income Bonds, together with a bonus of five shares of Common Stock of the Railroad Company, of $100 par value.

4. Secured Notes of Junior Creditors $10,450,263

These obligations represent advances made by Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Co., during the depression, and accrued to the benefit of the First Mortgage bondholders, either by (1) paying charges which were liens prior to the First Mortgage lien, or (2) paying un- [164] earned interest on the First Mortgage bonds, or (3) being directly applied to the construction of income producing property, which is an essential part of the railroad.

These Secured Notes are supported by the pledge of General and Refunding Bonds of the Railroad Company in the principal amount of $18,999,500. These bonds are all the bonds issued under the General and Refunding Mortgage of January 1, 1932. These bonds are held, as between the three junior creditors, in varying ratios, to the amounts of the actual advances, but in each case solely as collateral.

It is proposed that the Secured Notes be refunded into Four Percent. Convertible Debentures, in like principal amount, together with a bonus of five shares of Common Stock of the Railroad Company, for each $1,000 of Secured Notes so refunded, and the collateral held by the junior creditors surrendered and cancelled.

5. Advances on Open Account $5,807,650

These advances, made by The Western Pacific Railroad Corporation, the Delaware holding company, as to $5,757,650.30 principal amount, and by Western Realty Company, a subsidiary of The Western Pacific Railroad Corporation, as to $50,000, are to be refunded into 6% Preferred Stock of the Railroad Company, on a dollar for dollar basis.

6. Present 6% Preferred Stock $28,300,000

All of this is now held by The Western Pacific Railroad Corporation, the present Delaware holding company. Under this Plan, the Preferred Stock is to be delivered to the Railroad Company, and,

to the extent of $5,807,650 used to refund the Advances on Open Account referred to in Subdivision 5 above; to the ex- [165] tent of $15,675,395 held in the Treasury of the Railroad Company against the possible exercise of conversion rights by the holders of the Four Percent. Convertible Debentures mentioned under Subdivision 4 above; and the balance $6,816,955 used, from time to time, with the approval of the Commission, to provide a vehicle for junior financing of future capital needs of the Railroad Company.

7. Common Stock $47,500,000

All of this Common Stock is now held by The Western Pacific Railroad Corporation, the present Delaware holding company. Of this total, $24,645,050 will be given to the present First Mortgage bondholders as a bonus with the General Mortgage 4% Income Bonds, which they are to receive in exchange for their present debt, and $5,225,132 as a like bonus, to the junior creditors, with the Four Percent. Convertible Debentures, which they are to receive in exchange for their present debt. Of the balance, $15,000,000 will be given as a bonus with the new First Mortgage 4% Bonds, to be issued for the new money, and offered to the existing stockholders of the Delaware holding company. The balance of $2,629,818 is to be delivered to the Reorganization Committee, constituted as hereinafter provided, and to be used by the Reorganization Committee, with the approval of the Commission,

for (a) compensation of underwriters of the First Mortgage 4% Bonds, if such underwriting shall be deemed necessary, (b) compensation of the Reorganization Committee, and (c) to the extent not so used, cancelled. [166]

D. Description of new securities.

1. First Mortgage 4% Bonds

The new First Mortgage is to be a direct first lien upon the railroad and other fixed property and equipment (subject, of course, to equipment trust priorities), of the Railroad Company, and to be further secured by a pledge of the entire interest of the Railroad Company in its subsidiary feeders.

It is proposed that the new First Mortgage shall be an open end mortgage, under which additional series, differing as to date of maturity and interest rate, but with equal lien, may be issued from time to time with the approval of the Commission, to provide for additions, betterments, improvements or extensions, in principal amounts, from time to time, not in excess of 75% of the actual cost of the specific additions, betterments, improvements or extensions which are the basis of the particular issue.

In the event it is deemed advisable by the Reorganization Committee, with the approval of the Commission, to limit the principal amount of said First Mortgage 4% Bonds which may ultimately be issued, then it is suggested that such limitation be fixed at $50,000,000.

The $10,000,000 principal amount of First Mortgage 4% Bonds, presently to be issued under this Plan, are to be dated January 1, 1937, to mature January 1, 1967, and to bear 4% interest, unless, in the opinion of the Reorganization Committee, approved by the Commission, a higher rate of interest shall be required, at the time of such issue, to insure the raising of the necessary new money.

The First Mortgage 4% Bonds, presently to be issued, and subsequent series of bonds to be issued from time to time, under the First Mortgage, shall contain ap- [167] propriate provisions for redemption, in whole or part, prior to maturity, at their principal amount and accrued interest, with such premium or premiums as may be determined from time to time, and approved by the Commission.

2. General Mortgage 4% Income Bonds

The General Mortgage shall be a lien on all the property covered by the First Mortgage, subject only to the lien of the First Mortgage. The bonds to be issued under the General Mortgage are to be limited to $49,290,100 and are to be exchanged, dollar for dollar, for the present First Mortgage Bonds of the Railroad Company.

The General Mortgage Income Bonds are to be dated January 1, 1937, are to mature January 1, 1987, and are to bear interest at the rate of 4% per annum, payable only out of Available Net Income, as herein defined.

Under the terms of said General Mortgage, Available Net Income shall be determined for each

period of six months ending June 30 or December 31 (hereinafter called "Income Period"), beginning with the Income Period ending June 30, 1937. Available Net Income for any Income Period shall be determined by deducting from income of the Railroad Company available for fixed charges for such Income Period (determined in accordance with accounting rules of the Interstate Commerce Commission), all interest charges on equipment trusts and equipment leases, and all interest charges on the First Mortgage 4% Bonds.

Interest on General Mortgage 4% Income Bonds shall be paid only in amounts equal to one-fourth of 1% or multiples thereof; smaller fractional amounts being carried forward and added to that portion of the Available Net Income for the next succeeding income period re- [168] quired to be applied to the payment of interest on such bonds. Except insofar as such smaller fractional amounts are carried forward, as hereinabove provided, such interest payments are to be non-cumulative.

General Mortgage 4% Income Bonds are to be redeemable in whole or part, upon thirty days' notice on any interest payment date, at their principal amount, together with any interest thereon payable on said date, out of Available Net Income, as hereinabove defined.

3. Four Percent. Convertible Debentures

The Four Percent. Convertible Debentures are to be issued in the amount of $10,450,263 to the pres-

ent junior creditors of the Railroad Company in exchange for the Secured Notes now held by those creditors dollar for dollar (the collateral held by the junior creditors being surrendered and cancelled at the time of such exchange) and such debentures are to be limited to the amount necessary for such exchange with the junior creditors.

These Four Percent. Convertible Debentures are to be dated January 1, 1937, and to mature January 1, 1957, and are to bear interest at the rate of 4% per annum, payable only out of Available Net Income, after interest payments at the rate of 4% per annum shall have been made, or provided for, on the General Mortgage 4% Income Bonds. Interest on these Four Percent. Convertible Debentures is to be non-cumulative.

The Four Percent. Convertible Debentures are by their terms, to be convertible, at any time before the actual call and retirement of such debentures into 15 shares of 6% Preferred Stock of the Railroad Company, at $100 par value for each $1,000 principal amount of convertible debentures. [169]

E. Formation of Reorganization Committee.

To facilitate the definitive formulation and submission to security holders of this Plan, if it shall be approved by the Commission, it is proposed that there be organized a Reorganization Committee, consisting of five members. Subject to the approval of the Commission, one member of this Reorganization Committee shall be nominated by the Institu-

tional Bondholders' Committee, one by the Commission, to represent other First Mortgage bondholders, one by the junior creditors as a group, one by The Western Pacific Railroad Corporation, to represent the present equity owners, and one by the United States District Court for the Northern District of California, Southern Division, to represent the public served by the Railroad Company.

Subject to the approval of the Commission, said Reorganization Committee shall, in its discretion, determine the method of carrying out the Plan, the form, and except as herein otherwise expressly provided, the terms and provisions of all mortgages, debenture agreements, bonds, debentures, coupons, purchase warrants, subscription warrants, acceptances, assents, and all other instruments necessary or convenient for the carrying out of the Plan.

The Committee may act by a majority of its members as from time to time constituted, at a meeting or in writing without a meeting. The Committee may employ such agents, attorneys and others as it may deem desirable for the purposes of the Plan. The Committee may from time to time delegate to others any power or discretion conferred upon it by the Plan; and the members of the Committee shall not be liable for any action taken by them in good faith or by any person employed by the Committee in good faith, or for other acts or [170] omissions, except for their respective individual malfeasance or neglect.

The Committee may from time to time, whether before or after acceptance of the Plan by the holders of securities, modify the Plan, in accordance with, and subject to, the provisions of said Section 77; and the term "Plan" as used herein shall be deemed to include any such modification.

All the expenses of the Committee, when and as approved by the Commission, are to be paid by the Railroad Company. The members of the Reorganization Committee shall be compensated for their services, to the extent the Commission shall approve, in Common Stock of the Railroad Company provided for the purpose as hereinabove set forth.

The Reorganization Committee shall, in its discretion, but subject to the approval of the Commission, make such agreement or agreements for the underwriting of the First Mortgage 4% Bonds of the Railroad Company, presently to be issued under this Plan, as it may deem necessary and advisable, but compensation for such underwriter or underwriters shall be paid solely in Common Stock of the Railroad Company, provided for the purpose as hereinabove set forth.

F. Method of participation in, and consummation of, the Plan.

The Plan shall not be carried out until it shall have been approved by the Commission and the Court in the Reorganization Proceeding, pursuant to the requirements of Section 77 of the Bankruptcy Act, and until it shall have been accepted by two-thirds of the creditors of each class, as the

same may be classified by the Court in the Reorganization Proceeding, and by two-thirds of the stock of each class. [171]

G. Expenses of the Plan.

Subject to the approval of the Commission, all expenses of the Plan, and all costs of administration and other allowances made by the Court in the Reorganization Proceeding, shall be paid by the Railroad Company, from its current cash balances, at the time the Plan is made effective.

Dated October 26, 1936. [172]

SCHEDULE A

PRESENT CAPITAL LIABILITIES

(Stated as of July 1, 1936, and exclusive of unpaid interest)

		Principal	Fixed Charges
Equipment Trusts, Baldwin Lease and Pullman Contract		$ 2,048,190	$ 86,473
First Mortgage 5% Bonds, due 1946		48,290,100	2,464,505

Interstate Commerce Commission

Finance Docket No. 10913

The Western Pacific Railroad Company

Reorganization

Submitted Decided

Plan of reorganization of the Western Pacific Railroad Company, pursuant to section 77 of the Bankruptcy Act, as amended, recommended.

Frank C. Nicodemus, Jr., for The Western Pacific Railroad Company.

Robert E. Coulson for A. C. James Company.

James B. Alley, C. C. McChord, and C. M. Clay for Reconstruction Finance Corporation.

Daniel Willard, Jr., for Railroad Credit Corporation.

Robert T. Swaine for Institutional Bondholders' Committee.

Orville W. Wood for Crocker First National Bank of San Francisco and Samuel Armstrong.

H. C. McCollom and Orrin G. Judd for Irving Trust Company.

PROPOSED REPORT OF THE BUREAU OF FINANCE

The Western Pacific Railroad Company, hereinafter called the debtor, on August 2, 1935, filed a petition in the District Court of the United States for the Northern District of California, Southern

Division, stating that it was unable to meet its debts as they matured and that it desired to effect a plan of reorganization under the provisions of section 77 of the act of July 1, 1898, entitled "An Act to Establish a Uniform System of Bankruptcy Throughout the United States," as amended. The court, on the same day, made and entered an order approving the petition as properly filed and, among other things, authorizing and directing the debtor, pending further order of the court, to operate and maintain the railroad and property of the debtor and to manage and conduct the debtor's business as a railroad company. Trustees were appointed on September 23, 1935, and their appointments were ratified by the Commission on October 30, 1935. Copies of the debtor's petition and the order thereon have [175] been transmitted to the Commission by the clerk of the court; and in like manner the Commission has received lists of all known creditors and stockholders of the debtor, and copies of the orders of the court determining the time within which the claim of creditors might be filed or evidenced and dividing the creditors and stockholders into classes. These documents and other documents similarly received are now of record in the proceeding before the Commission.

The debtor, on February 8, 1936, filed a plan of reorganization with the court and the Commission. Pursuant to the provisions of section 77(d) of the Bankruptcy Act, the Commission, after due notice, began public hearings upon the debtor's plan of re-

organization on March 23, 1936. Two other plans for the reorganization of the debtor were filed during the proceedings; one, on behalf of certain institutional bondholders, on September 28, 1936, and the other, on behalf of A. C. James Company, a secured creditor of the debtor, on October 26, 1936. These parties intervened in the proceeding and were represented by counsel at the hearing. Other interveners, similarly represented, included the trustees under the mortgages, the Reconstruction Finance Corporation and the Railroad Credit Corporation, secured creditors. Hearings in this proceeding were completed on December 9, 1936, and briefs were filed on January 11, 1937.

Location and General Description of Property

The debtor owns or operates a total of 1207.51 miles of standard-gage, steam railroad. The main lines extend 924.17 miles eastward from Oakland, Calif., to Salt Lake City, Utah, and northward 111.81 miles from Keddie to Bieber, Calif., (with operating rights over the Great Northern Railway 46.38 miles from Bieber to Hambone, Calif.). The debtor also operates 4.2 miles of ferry service from Oakland to San Francisco and 185.30 miles of second [176] main track, of which 182.91 miles between Wiso and Alazon, Nevada, are owned by the Southern Pacific. This territory is known as the "Paired Track" district since the two lines are used as a double-track railroad by both companies. Various

branch lines springing from the Oakland-Salt Lake City line are as follows:

Niles to San Jose, Calif.	23.07 miles
Calpine Junction to Calpine, Calif.	12.62 "
Hawley to Loyalton, Calif.	12.79 "
Reno Junction to Reno, Nevada	33.11 "
Burmester to Warner, Utah	15.52 "
Miscellaneous	21.79 "
Total	118.90 miles

Owned or Controlled and Jointly Affiliated Railroad Companies

The debtor owns all the outstanding capital stock of Sacramento Northern Railway, an electrically operated standard-gage, freight and passenger railroad aggregating 276.2 miles of road serving and connecting San Francisco and Oakland with various Sacramento Valley cities, principally Pittsburg, Vacaville, Sacramento, Woodland, Marysville, Colusa and Oroville, all in California.

By ownership of more than 99 per cent of the outstanding capital stock, the debtor controls the Tidewater Southern Railway which operates a standard-gage, steam freight line aggregating 61.38 miles of road connecting Stockton with Manteca, Escalon, Modesto and Turlock in the San Joaquin Valley of California.

The debtor owns all the outstanding capital stock of the Deep Creek Railroad Company, which owns and operates a standard-gage, steam railroad from Wendover to Gold Hill, Nevada, a distance of 44.6 miles. In addition it owns 50 per cent of the capital

stock of The Salt Lake City Union Depot and Railroad Company; 33⅓ per cent of the capital stock of the Central California Traction Company, operating an electrically operated freight railroad from Stockton to Sacramento, Calif., with a road mileage of 53.78 miles; and 50 per cent of the capital stock of the Alameda Belt Line, [177] operating 15.86 miles of terminal switching line in the city of Alameda on the San Francisco Bay.

None of the above subsidiary or affiliated companies have filed a petition under Section 77 of the Bankruptcy Act.

Corporate and Financial History

The debtor was incorporated under California laws on June 16, 1916, and as of July 14, 1916, succeeded to the railroads, properties, etc., of The Western Pacific Railway Company sold at foreclosure on June 28, 1916. Upon incorporation, the debtor had an authorized capital stock of $75,000,000 consisting of 475,000 shares of common and 275,000 shares of preferred stock of the par value of $100 each.

The debtor by its first mortgage dated June 26, 1916, to the First Federal Trust Company and Henry E. Cooper, trustees, (Crocker First National Bank, of San Francisco, and Samuel Armstrong, now successor trustees) authorized a maximum of $50,000,000 of first mortgage bonds at any one time outstanding. A principal amount of $20,000,000 thereof was issued and sold after its organization

and as a part of the plan of reorganization. These bonds were sold at 90 and realized $18,000,000 in cash. Of this amount, approximately $2,000,000, together with cash from receivers, was applied in defraying expenses of incorporation, expenses incurred in connection with foreclosure and reorganization proceedings, payment of distributive shares of non-participating first mortgage bondholders of the old company; and $1,000,000 was retained as working capital. The balance of approximately $15,000,000 was deposited under the debtor's first mortgage and applied to capital purposes as provided in the mortgage.

The debtor thus commenced operations with $75,000,000 par value of capital stock issued and outstanding, and $20,000,000 of [178] its first mortgage bonds outstanding. Additional bonds were not issued by the debtor until 1921, in which year $4,180,000 of its first mortgage bonds were sold at 85 and the $3,553,000 realized was used to purchase properties of the Sacramento Northern Railroad through the Sacramento Northern Railway. As of September 30, 1936, a total of $19,290,100 face amount of the debtor's first mortgage bonds were outstanding, the additional bonds having been issued for the following purposes: $3,000,000 in 1922 to retire outstanding equipment trust certificates; $4,000,000 in 1925 for general capital purposes; $2,600,000 in 1926 for general capital purposes; $2,950,000 in 1927 in substitution of the $3,000,000 issued in 1922 then outstanding in the aggregate

amount of $2,950,000; $5,000,000 in 1929 for general capital purposes; $572,800 in 1930 for purchase of San Francisco & Railroad Company properties through Sacramento Northern Railway; $5,000,000 in 1930 for general capital purposes of debtor and of subsidiary, Sacramento Northern Railway; $5,000,000 in 1931 and 1932 to finance in part construction and/or acquisition of Northern California Extension; and $645,000 in 1931 for general capital purposes. Interest on the bonds was paid on the semi-annual interest payment dates until March 1, 1934. The interest payment due on that date was not paid, and no interest payment has since been made.

Since its organization the debtor has created equipment trust obligations in the total amount of $13,400,000; there being $1,930,000 face amount of such obligations outstanding as of September 30, 1936, and on that date there also remained unpaid on a conditional sale lease of locomotives $314,665. All interest and principal payments on equipment trusts and conditional sale lease have been met. [179]

The debtor, in addition to the $5,000,000 of its first mortgage bonds, issued in 1931 and 1932, $5,000,000 of gold debentures to finance the cost of its Northern California Extension. These debentures were retired in 1932 through the issue of notes payable to A. C. James Co., for $4,999,800 ($200 being paid in cash), which notes were secured by $6,249,-

500 face amount of the debtor's general and refunding mortgage, series "A", 5 per cent gold bonds. The latter bonds were issued under the debtor's general and refunding mortgage, dated January 1, 1932, The Chase National Bank of the City of New York, trustee, authorizing a maximum of $100,000,000 of general and refunding bonds to be at any one time outstanding, but reserving $49,292,300 principal amount thereof for the purpose of refunding, paying, purchasing, redeeming or otherwise acquiring the first mortgage bonds then outstanding in that amount, and reserved $5,000,000 principal amount thereof against the outstanding debentures. The reserved bonds were issuable upon the retirement of the securities against which they were reserved.

None of the debtor's general and refunding bonds have been sold; but $18,999,500 principal amount have been nominally issued and are nominally outstanding solely as collateral to secure certain of the debtor's promissory notes. In November, 1936, The Chase National Bank resigned as trustee of the mortgage and the Irving Trust Company of New York City, was appointed successor trustee.

Present Financial Structure

The trustees' balance sheet as of November 30, 1916, shows total assets of $171,096,992.80. Investments included therein total $160,868,348.32. Of total investments, road and equipment amounts to $139,371,768.08; sinking fund and deposits, $124,-

155.96; and miscellaneous physical property $3,670,041.32. Investments in affiliated companies pledged under the debtor's first mortgage [180] amount to $10,224,421.66 and consist of $99,500.40 for capital stock of The Salt Lake City Union Depot and Railroad Co., $999,500.00 for capital stock of Sacramento Northern Railway, $450,000.00 for capital stock of Deep Creek Railroad Company, $175,220.75 for capital stock of Standard Realty and Development Company, $3,975,456.13 for Sacramento Northern Railroad 5 per cent twenty year gold bonds, and $4,524,744.38 notes receivable from Sacramento Northern Railway. Investments in affiliated companies pledged under the debtor's general and refunding mortgage amount to $3,159,061.78, and consist of $1,223,848.94 capital stock of Tidewater Southern Railway Company, $128,651.56 common stock, $264,715.47 preferred stock and $270,375.50 first mortgage 5 per cent gold bonds of Central California Traction Company, $1,318.63 capital stock of other companies, and $804,551.68 notes receivable from Tidewater Southern Railway Company, Standard Realty and Development Company, and Deep Creek Railroad Company. Investments in affiliated companies unpledged amount to $4,240,257.27, and consist of $3,405,356.42 advances to Sacramento Northern Railway, $770,834.73 advances to other affiliated companies, $5,500.00 capital stock of Alameda Belt Line, and $58,566.12 due from The Railroad Credit Corporation. Other investments amount to $78,678.25, and consist principally of

$74,472.88 advances to Railway Equipment and Realty Co. Ltd.

Current assets are shown in the amount of $7,653,809.28, and comprise $3,290,601.55 cash, $4,722.28 special deposits, $176,241.25 traffic and car service balances receivable, $189,208.77 net balances receivable from agents and conductors, $814,321.64 miscellaneous accounts receivable, $2,113,166.60 materials and supplies, $1,054,447.57 interest receivable from affiliated companies, and other current assets of $10,099.62. Of the $1,054,447.57 interest receivable, $369,287.81 is accrued interest [181] on Sacramento Northern Railroad bonds, $420,729.87 is accrued interest on Sacramento Northern Railway notes receivable, $224,453.74 is accrued interest on Sacramento Northern Railway advances, and the remainder accrued interest on advances to other affiliates and notes receivable.

Deferred assets are shown in the amount of $141,222.55 and unadjusted debits in the amount of $2,433,612.65. The latter item consists of $24,516.77 rents and insurance premiums paid in advance, $1,266,699.29 discount on funded debt, and other unadjusted debits $1,142,396.59.

Liabilities shown on the balance sheet of the same date are capital stock, $75,800,000.00 consisting of $47,500,000.00 common and $28,300,000.00 preferred stock. Total long-term debt is shown in the amount of $69,476,379.26. Included therein is $59,504,805.56 funded debt unmatured, consisting of $49,290,100.00 first mortgage 5 per cent gold bonds, $4,999,800.00

notes payable to A. C. James Company, $2,963,000.00 notes payable to Reconstruction Finance Corporation, $314,665.00 Baldwin Locomotive Works locomotive lease, $80,240.56 The Pullman Company —purchase of lounge cars, and $1,857,000.00 equipment trust certificates. There is also included in long-term debt $3,000,000.00 trustee's certificates, and $6,971,573.70 non-negotiable debt to affiliated companies, of which latter amount $6,915,115.37 is due The Western Pacific Railroad Corporation.

Total current liabilities are shown in the amount of $14,288,810.44. Included therein are $2,452,875.24 loans and bills payable, consisting of notes payable to the Railroad Credit Corporation, $849,649.23 traffic and car service balances payable, $1,159,297.40 audited accounts and wages payable, $278,729.95 miscellaneous accounts payable, of which $203,450.09 are United States [182] Federal Retirement tax employees deduction, and $8,606,565.43 interest matured unpaid. The latter amount consists of $97,069.29 interest on The Railroad Credit Corporation notes, $406,988.88 interest on Reconstruction Finance Corporation notes, $687,472.50 interest on A. C. James Co. notes, $18,590.00 interest on equipment trust certificates, and $7,396,444.78 interest on first mortgage 5 per cent gold bonds. There are also included in the total current liabilities $761,834.34 accrued unmatured interest, $2,079.16 accrued unmatured rents, and $177,749.69 other current liabilities.

Total deferred liabilities are shown in the amount of $1,153.68, and total unadjusted credits in the amount of $11,643,121.37. The latter amount is comprised of $479,026.00 tax liability, $11,053,713.23 accrued depreciation on equipment, and $110,382.14 other unadjusted credits.

The liabilities above mentioned amount to a total of $171,209,464.75. Two additional items totaling $7,171,169.07, described as surplus-investment in road equipment and cash materials and other property purchased, representing value of Western Pacific Railway property purchased in excess of cash paid and for value of capital stock issued in exchange for same, are shown also on the liability side of the balance sheet. This amount added to the figure of $171,209,464.75 produces an amount of $178,380,633.82.

The balance sheet shows a deficit of $7,283,641.02 in corporate surplus. This consists of appropriated surplus amounting to $12,072,584.18, represented principally by additions to property through income and surplus and an accumulated debit balance in profit and loss of $19,356,225.20.

Rehabilitation Program

By reports and orders of March 5, and October 15, 1936, and January 25, 1937, the Commission granted authority to the debtor's [183] trustees to issue not exceeding $6,700,000 of trustee's certificates and to assume obligation and liability in respect of not exceeding $2,320,000 of equipment-trust

certificates: 212 I.C.C. 356, 217 I.C.C. 393, 217 I.C.C. 395, 217 I.C.C. 777. The proceeds from the sale of those securities were to be used in the rehabilitation and improvement of the debtor's fixed plan and existing motive power and cars, and the acquisition of additional equipment. Studies by the debtor, the Reconstruction Finance Corporation and the bondholders' committee show the necessity of expending approximately $13,375,906 over a period of three years for such purposes in order to place the debtor in proper physical condition to meet the reasonable requirements of existing and future traffic. Under authority of the court, the trustees have initiated the rehabilitation program and it is well under way.

The debtor estimates that $9,500,000 of new money, exclusive of the $2,320,000 of equipment-trust certificates, will be required by the reorganized company for the purpose of retiring outstanding trustees' certificates and completing the rehabilitation of the debtor's property. The necessary new money is to be raised by the sale of bonds by the reorganized company.

Under the Commission's accounting rules a part of the rehabilitation expenditures is chargeable to operating expenses. The trustee's report that $1,585,530 of the rehabilitation expenditures were included in the debtor's operating expenses for 1936. The inclusion of these extraordinary expenses with the debtor's normal expenses obviously reduces the showing of net income available for interest and other charges in that year.

Traffic and Revenue

The main line of the debtor's railroad extending from Oakland, Calif., to Salt Lake City, Utah, forms an important part of a through [184] route from the Pacific Coast to Chicago, Illinois, and other important Middle Western points. Fast through schedules are maintained by the debtor and the Denver & Rio Grande Western Railroad and Missouri Pacific Railroad Company, with which companies the debtor has close affiliations. Its line also connects with the Atchison, Topeka & Santa Fe Railroad at Stockton, Calif., and with the Great Northern Railroad Company at Bieber, Calif., thus forming a link in a north and south route on the Pacific Coast. The latter route is comparatively new, having been established by the extension of the debtor's line northward from Keddie to Bieber, known as the Northern California Extension, and the extension of the line of the Great Northern southward from Klamath Falls, Oregon, to Bieber in the latter part of 1931.

Although operations over the debtor's Northern California Extension commenced in the depth of the depression considerable traffic has moved over it from the start. Traffic over this extension and revenue derived therefrom is, therefore, considered separately from the debtor's other traffic and revenues. During the years 1924 to 1929, inclusive, the debtor and its subsidiary, Sacramento Northern Railway, had an agreement with the Southern Pacific Company for the transportation for the South-

ern Pacific of Certain carload traffic between Chico, Calif., and Weso, Nevada, for $60 per car, of which the debtor received $54 per car. This agreement was terminated at the end of 1929, and since the tonnage moved under this agreement and the revenue therefrom was quite large, the statistical data shown below relating to the debtor's traffic have been adjusted by excluding the freight moved under that agreement.

Freight traffic handled and freight revenue received by the [185] debtor for the years 1923 to 1935, inclusive, excluding traffic and revenue under the Chico-Weso Bridge agreement and via Northern California Extension, was as follows:

Year	Cars	Tons	Revenue	Revenue Per Ton	Percent of Increase or Decrease Over or Under Preceding Year	
					Tons	Revenue
1923	96,531	2,875,108	$10,513,455	$3.66	—	—
1924	98,297	2,854,602	10,562,340	3.69	—0.7	—0.5
1925	113,633	3,198,214	11,736,434	3.67	+12.0	+11.1
1926	120,545	3,326,637	12,252,189	3.68	+4.0	+4.4
1927	121,071	3,486,668	12,697,985	3.64	+4.8	+3.6
1928	124,110	3,567,798	13,887,953	3.89	+2.3	+9.4
1929	124,181	3,616,927	14,287,250	3.95	+1.4	+2.9
1930	131,242	3,776,046	13,796,125	3.65	+4.4	—3.4
1931	106,321	3,070,577	11,078,891	3.61	—18.7	—19.7
1932	83,549	2,330,505	8,558,209	3.67	—24.1	—22.8
1933	83,957	2,359,810	8,520,315	3.61	+1.3	—0.4
1934	93,115	2,616,182	9,173,115	3.51	+10.9	+7.7
1935	92,902	2,489,273	9,910,386	3.98	—4.9	+8.0

Agricultural and manufactured and miscellaneous products comprised the greater part of the traffic moving over the debtor's line from Salt Like City

to Oakland. In the period 1928 to 1935, inclusive, for example, of the total carloads of commodities carried, manufactured and miscellaneous products constituted 33⅓ percent, and agricultural products 33⅓ percent. Forest products accounted for 7½ percent, mineral products 19⅔ percent, and animal products 6 percent. Of the total freight revenue received from the transportation of this freight, approximately 40 percent was derived from manufactured products, 28 percent from agricultural products, 5 percent from forest products, 13½ percent from mineral products, 5⅔ percent from animal products, and the remainder from L.C.L. freight.

The above tabulation shows that the debtor's freight traffic for 1930, amounting to 3,776,946 tons, was the greatest for any of the years. It moved an average of 2,573,269 tons in the following five years, 1931-1935, inclusive, a decrease of 32 percent as [186] compared with 1930. During the same period, agricultural products transported declined an average of 20 percent, animal products 16.7 percent, mineral products 42.2 percent, forest products 44.4 percent, manufactured products 28 percent, and L.C.L. freight 29.7 percent as compared with 1930.

Freight carried in 1935 amounted to 2,489,273 tons, a decrease of 35-percent under 1930. In 1935, traffic in agricultural products declined 25.1 percent, animal products 27.9 percent, mineral products 51.4 percent, forest products 45.6 percent, manufactured products 20.6 percent, and L.C.L. freight 20.8 percent under 1930.

Revenue from freight in 1930 amounted to $13,796,125. During the period 1931-1935, inclusive, freight revenue averaged $9,448,183, a decline of 32.3 percent as compared with 1930. In the same period revenue from agricultural products declined an average of 29.3 percent, animal products 20.8 percent, mineral products 60.9 percent, manufactured products 31.1 percent, and L.C.L. freight 28.2 percent.

Freight revenue amounted to $9,910,386 in 1935, a decrease of 28.9 percent as compared with 1930. In 1935, revenue received from agricultural products decreased 28 percent, animal products 34.7 percent, mineral products 43.4 percent, forest products 40.3 percent, manufactured products 19.6 percent, and L.C.L. freight 37.2 percent under 1930.

Forty-three percent or 1,637,984 tons of the debtor's freight traffic in 1930 consisted of traffic interchanged with the Denver & Rio Grande Western, Oregon Short Line and Union Pacific. During the period 1931-1935, inclusive, traffic interchanged with those lines averaged 1,196,971 tons, or a decrease of 20 percent under 1930. For the year 1935, traffic interchanged with the same lines amounted to 1,381,186 tons, or a decrease of 15 percent under 1930. [187] It should be noted also that for many years the debtor was dependent upon connections for the greater part of its traffic, and although to a less degree than formerly, it still receives more than one-half of its total freight from connecting car-

riers, and approximately one-third of it is received from and delivered to connections.

The debtor estimates that revenue from freight moving over its line from Oakland to Salt Lake City will amount to $10,084,951 in 1936, $10,857,252 in 1937, $11,629,553 in 1938, $12,518,672 in 1939, and $13,747,996 in 1940. The latter amount is an increase of $3,837,610, or 38.7 percent, over 1935 revenue, and approximately equals that received in 1930.

Freight moved over the Northern California extension in 1932 amounted to 340,107 tons, and $1,098,016 revenue was derived therefrom. For the year 1933, tonnage and revenue amounted to 396,862 tons and $1,491,466 revenue, in 1934, to 596,378 tons and $2,119,427 revenue and in 1935 to 639,980 tons and $2,289,858 revenue. The principal commodities carried consisted of forest, manufactured and agricultural products. The debtor estimates that revenue from freight moved over this line will amount to $2,550,524 in 1936, $2,973,750 in 1937, $3,406,978 in 1938, $3,819,559 in 1939, and $4,171,625 in 1940. The latter amount is an increase of $1,881,767 or 82 percent over 1935 revenue.

Total revenue to be derived from freight in the period 1936 to 1940, inclusive, is estimated by the debtor to amount to $12,635,475 in 1936, $13,831,002 in 1937, $15,036,531 in 1938, $16,338,231 in 1939, and $17,919,621 in 1940. This would be an increase of 3.5 percent in 1936 over 1935, 13.3 percent in 1937, 23.3 percent in 1938, 33.9 percent in 1939, and 46.8 percent in 1940.

A witness for the debtor testified that the increased revenues estimated for the future were based on expected increases in traffic [188] and freight rates. The drastic decline in revenues recently suffered by the debtor, in the opinion of this witness, resulted not only from the past depression but, also, to intense competition from water and motor carriers.

The debtor and other lines with which it has a joint freight rate arrangement have water competition on transcontinental traffic via the Panama Canal between the Pacific Coast and Atlantic and Gulf ports, and in connection with canal lines and inland waterways. There is also strong competition coastwise between California and Washington. It was the opinion of the debtor's witness that increased operating expenses would compel water carriers to increase rates and thereby would divert traffic to railroads. The witness also was of the opinion that railroad freight rates as a whole are as low today as they will be for a number of years, and the tendency in the immediate future will be towards a higher level of rates.

This witness stated that prior to the advent of motor truck competition, practically all the debtor's traffic between California and Utah moved under class rates, which for the first four classes were $2.16½, $1.84½, $1.62½ and $1.35 per 100 pounds between San Francisco and Utah common points. Motor truck competition made it necessary for the debtor to publish pick-up and delivery rates of $1.00

and $1.25 per 100 pounds, on a great many commodities, and today at least 90 percent of such traffic of the debtor moves under the reduced rates. It was his opinion that effective regulation of motor carriers would tend to divert traffic to the railroads.

Passenger, mail, express and other related revenues received by the debtor for the years 1923 to 1935, inclusive were as follows:

Year	Revenues	Year	Revenues
1923	$3,250,677	1929	$2,135,828
1924	2,891,137	1930	1,738,881
1925	2,697,899	1931	1,288,093
1926	2,515,900	1932	645,760
1927	2,350,320	1933	433,959
1928	2,217,421	1934	457,481
		1935	559,816

[189]

It thus appears that such revenues steadily declined from 1923 to 1934, the decrease amounting to 79.7 percent in 1933 under 1923. In 1935 such revenues had increased 22.5 percent over 1933, but were still 73.8 percent below those for 1923. The debtor estimates that revenues from these sources will amount to $654,710 in 1936, $1,063,058 in 1937, $1,299,060 in 1938, $1,860,815 in 1939, and $1,535,372 in 1940. A witness for the debtor testified that the debtor expected to inaugurate additional passenger service between San Francisco and Salt Lake City in May, 1937, only one passenger train daily

between those points having been operated since April 24, 1932. He stated that by reason of shortening of schedules and greater advertising of the improved service of the Denver & Rio Grande Western via the Dotsero Cut-Off, which road with the debtor provides one of the most scenic trips between California and the East, passenger revenues should be materially increased.

The debtor filed a forecast that total railway operating revenues would amount to $13,438,342 in 1936, $15,053,934 in 1937, $16,507,579 in 1938, $18,383,490 in 1939, and $19,654,935 in 1940.

As a bridge line to and from the Pacific Coast the debtor's railroad may as a result of the completion of the Dotsero Cut-off in 1934, come into still greater use. The railroad distance between Denver and Salt Lake City and points east of the former and west of the latter is greatly shortened by use of this Dotsero Cut-off and the Denver and Salt Lake's Moffet Tunnel. The rehabilitation program of the debtor's road now in progress and the betterment of its equipment should enable it to give improved service. As a consequence the debtor and the lines with which it is closely affiliated should be in better position to compete with the Southern Pacific and Union Pacific for transcontinental traffic. Increased traffic over its Northern California Extension reasonably may be expected. Greater through and local traffic should result from a further revival in general business conditions. Whether revenues in the future will reach the level estimated by the

debtor in 1940, is open to doubt. To the extent that the debtor relies upon increased freight rates, and a recovery of the traffic lost to competing forms of transportation under present state and federal regulatory conditions, its estimates rest upon [190] uncertainties.

Traffic and revenue of subsidiaries

The main line of the Sacramento Northern Railway extends from Oakland to Chico, Calif., and both freight and passenger services are rendered over it. Its freight traffic consists largely of agricultural, manufactured and miscellaneous and mineral products.

Freight traffic and revenue derived therefrom for the years 1930 to 1935, inclusive, were as follows:

Year	Tons	Revenue
1930	840,306	$1,234,696
1931	743,220	971,482
1932	629,792	769,412
1933	649,554	717,435
1934	704,472	760,033
1935	697,464	760,528

A witness for the debtor testified that the decline in traffic was occasioned primarily by competition of motor trucks, depressed economic conditions, and the displacement of coal by oil and natural gas. It was his opinion, however, that the Sacramento Northern's freight earnings in the future should increase quite materially since it was reasonable to expect an improvement in the market demand for

California fruits and vegetables, and that improved facilities recently had been made available to the carrier's shippers. He further testified that general business conditions were improving and that the carrier was in a better position to meet truck competition. The witness was of the opinion that the carrier's gross revenues from transportation and other railway operations would amount to $1,322,676 in 1936, $1,417,458 in 1937, $1,528,492 in 1938, $1,616,891 in 1939, and $1,689,038 in 1940. The latter amount is a 38.3 percent increase over gross revenues [191] for 1935, and is approximately $40,775 greater than the actual gross revenue for 1931, but is approximately $394,000 less than the actual for 1930.

The main line of the Tidewater Southern Railway extends from Stockton to Hillmar, Calif., serving a territory predominantly agricultural. The carrier's freight traffic consisted principally of agricultural products and manufactured and miscellaneous commodities.

Freight traffic and revenue derived therefrom for the years 1930 to 1935, inclusive, were as follows:

Year	Tons	Revenue
1930	199,607	$425,506
1931	227,856	264,796
1932	249,820	230,450
1933	255,833	202,434
1934	266,274	271,519
1935	211,264	272,299

A witness for the debtor testified that the Tidewater Southern's total railway operating revenues would amount to $287,136 in 1936, slightly higher than those in 1935, but that since the small area served by the line does not afford much opportunity for increased acreage production, earnings are not expected to increase materially in the future.

The Deep Creek Railroad Company operates 44.6 miles south from Wendover, Utah, serving a territory devoted principally to mining. Its freight revenues are dependent largely on mining activities in the Gold Hill District at the southerly terminus of the line, although some revenue is derived from the movement of sheep to winter ranges in the fall and out in the spring. [192]

A witness for the debtor testified that the revenues of this line have in the past few years been nominal, but with a revival in mining it is possible for a traffic to develop that would increase materially the revenue. For example, in 1923 revenues were $42,385, in 1924, $71,670, and in 1925, $40,268. In 1934 and 1935, however, they were only $7,383 and $5,355, respectively. For the next several years revenues are not expected to increase.

Earnings Available for Charges

The reported consolidated net income of the debtor's system available for payment of interest on funded debt for the years 1926-1935, inclusive, was $4,759,282 in 1926, $2,674,494 in 1927, $2,964,371 in 1928, $2,529,846 in 1929, $1,552,487 in 1930, $486,-

708 deficit in 1931, $252,706 in 1932, $674,007 in 1933, $1,084,244 in 1934, and $805,589 in 1935. Operating ratio percentages for the same years were, respectively, 70.3, 79.2, 80.3, 83.2, 84, 91, 85.8, 83, 81.1, and 83.7.

It would appear, however, that before the foregoing amounts may be considered indicative of future earnings they are subject to adjustment. It was testified, for example, that a substantial amount of deferred maintenance had been permitted to accrue in debtor's property by 1927. Beginning in that year and continuing into 1931, considerable sums were expended yearly in an effort to overcome existing deferred maintenance. It was stated that $687,605 was so expended in 1927, $1,305,681 in 1928, $1,075,330 in 1929, $711,462 in 1930, and $122,735 in 1931. This program of rehabilitation was discontinued in 1931 by reason of drastically declining revenues, and it was testified that approximately $5,000,000 of deferred maintenance still existed in the debtor's property at the end of 1935. Witnesses for the debtor were unable [193] to allocate any specific amount for undermaintenance to any of the years shows above.

It was further pointed out that in arriving at the foregoing figures an average of approximately $140,000 per annum had been deducted for amortization of bond discount and that deduction would not be required following reorganization.

There also are reflected in the above earnings for the years 1926-1929, inclusive, substantial amounts received by the debtor under the Chico-Weso agreement with the Southern Pacific for movement of Southern Pacific cars, which was terminated at the close of 1929. On the other hand revenues from traffic over the debtor's Northern California Extension are not reflected in the net income available for interest shown for the years 1926-1931, inclusive, and future earnings from that source are not reasonably reflected in the amounts shows for the years 1932 and 1933.

The above amounts do not reflect the effect on future income of taxes under the Social Security Act, approved August 14, 1935, and the Railroad Retirement Act and related Excise Tax Act, approved August 29, 1935, which impose additional taxes upon carriers. It is estimated by the Commission's Bureau of Accounts that the debtor's proportion of such taxes would have amounted to approximately $537,653 in 1930, $488,633 in 1931, $365,498 in 1932, $331,149 in 1933, and $257,345 in 1934. While data of record are insufficient to permit accurate mathematical adjustments of the amounts reported available for interest in the years 1926-1935, inclusive, in the light of the above-mentioned factors, it is apparent that such amounts should be considered in determining the debtor's probable future earnings available for interest and dividends.

For the year ended December 31, 1936, total operating revenues of the debtor's system were reported as $16,547,344 and total [194] operating expenses as $14,449,275, of which $1,585,530 was attributed to the debtor's current program of rehabilitation. If these extraordinary expenditures were eliminated, the consolidated net income of the system available for interest on funded debt for the year would be $1,766,632, instead of $181,102. For the year 1935 (when no substantial amount of expenditures was made on account of the rehabilitation program) net income available for interest was $805,589.

In statements filed in this proceeding the debtor has estimated that total operating revenues of its system for the years 1936-1940, inclusive, will be, respectively, $15,050,200, $16,761,200, $18,325,200, $20,288,200, and $21,632,200. Excluding operating charges incident to its rehabilitation program, the estimated consolidated income available for interest on funded debt for the same years is respectively, $1,524,086, $2,342,586, $2,929,586, $3,652,486, and $4,056,486, or an average of $2,901,040. Operating ratios estimated for the same years are, respectively, 77.3 per cent, 75.1 per cent, 72.4 per cent, 70.8 per cent, and 69.6 per cent. Expenditures incident to the debtor's rehabilitation program and which normally are chargeable to operating expense under the Commission's accounting rules, are estimated by the debtor at $1,747,384 in 1936, $2,021,312 in 1937, and $1,280,074 in 1938, which sums are included in the foregoing estimates.

These estimates are based on assumed revenues, previously analyzed; and assumed operating ratios, which, of course, are influenced greatly by operating revenues. Future expenditures for both maintenance and transportation should be affected favorably by the debtor's current rehabilitation program. It should be noted, however, that the estimates, according to the testimony of witnesses [195] for the debtor, are based not only upon the assumption that there will be increases in rates but that there will be no increase in operating costs, either through prices of materials or wages. Furthermore, the estimates of income available for interest on funded debt omit deductions of any amount for the creation and maintenance of the various funds proposed under the debtor's plan.

Although the net income available for interest of the debtor for the year 1936 exceeded its estimate for 1936, the debtor's estimates of net income available for interest for the future, when considered in the light of its past earning experience, appear unduly optimistic. It is reasonably certain that some traffic diverted in recent years to motor carriers will not be regained. Strenuous competition must be expected not only from those carriers but from water carriers and, especially, from other strong railroads serving the same territory as the debtor. This latter competition compels the movement of trains on schedule regardless of the load. Long stretches of the territory through which the debtor's road extends is sparsely populated and productive of little

or no traffic. The debtor's volume of traffic is subject to wide fluctuations, and the topography of the country entails expensive helper service over sharp summits. These factors have and necessarily will have considerable effect on the debtor's income.

Value for Rate-making Purposes

Under section 19a of the Interstate Commerce Act, the Commission, by division 1, in Western Pacific Ry. Co., 29 Val. Rep. 239, reported the value for rate-making purposes of the property owned by the debtor to be $63,321,000 as of June 30, 1914. In similar proceedings, the Commission, by division 1, reported the value for rate-making purposes of the properties of the debtor's wholly owned [196] subsidiaries, Sacramento Northern Railway, Tidewater Southern Railway Company and Deep Creek Railroad Company in the total amount of $18,336,529 as of their respective valuation dates. If there be added to the above amounts capital expenditures between valuation dates and December 31, 1935, the total would be $144,619,851.

Classes of Creditors and Stockholders

Pursuant to the provisions of the Bankruptcy Act, the district court entered an order, on August 20, 1935, dividing creditors and stockholders for the purposes of the plan and its acceptance, into the following classes: Class 1, first mortgage bonds; Class 2, general and refunding bonds; Class 3, debtor's secured promissory notes to A. C. James Co.; Class 4, debtor's secured promissory notes to Reconstruction Finance Corporation; Class 5, debtor's

secured promissory notes to the Railroad Credit Corporation; Class 6, equipment obligations to Baldwin Locomotive Works (assigned to Fidelity-Philadelphia Trust Co., trustees); Class 7, equipment trust certificates under agreement March 1, 1923; Class 8, equipment trust certificates under agreement dated March 15, 1924; Class 9, equipment trust certificates under agreement dated May 1, 1929; Class 10, debtor's obligations as to advances made on open account by the Western Pacific Railroad Corporation; Class 11; debtor's obligations as to advances made on open account by The Western Realty Company; Class 12, debtor's preferred stock; Class 13, debtor's common stock; Class 14, all other claims, obligations and liabilities not hereinbefore specifically described.

As of December 31, 1936, Class 1 items consisted of $49,290,100 principal amount of first mortgage 5 percent bonds, on which unpaid interest amounted to $8,214,766; Class 2 items consisted of $18,999,500 principal amount of general and refunding mortgage 5 percent bonds, entirely pledged as collateral for certain of the [197] debtor's notes; Class 3 items consisted of $4,999,800 face amount of notes to A. C. James Company, on which unpaid interest amounted to $749,970, and which are secured by $4,249,500 principal amount of debtor's general and refunding bonds, and a second lien upon $2,000,000 principal amount of the same issue of bonds held by the Railroad Credit Corporation; Class 4 items consisted of $2,963,000 face amount of notes

to the Reconstruction Finance Corporation, on which that corporation claims unpaid interest of $544,310, the notes being secured by $10,750,000 principal amount of debtor's general and refunding bonds, and voting trust certificates for half of the voting stock of The Denver and Rio Grande Western Railroad Company, and a second lien upon $2,000,000 principal amount of the same issue of bonds held by the Railroad Credit Corporation; Class 5 items consisted of $2,482,218 face amount of notes to the Railroad Credit Corporation, on which that corporation claims unpaid interest of $114,156; which notes are secured by $4,000,000 principal amount of debtor's general and refunding bonds, and a second lien upon the security held by the Reconstruction Finance Corporation, and an assignment of certain advances by The Western Pacific Railroad Corporation, and an assignment of the distributive share of the debtor under the Marshalling and Distributing Plan, 1931; Class 6, 7, 8 and 9 items consisted of various equipment obligations aggregating $2,048,190; Class 10 items consisted of $5,757,650 principal amount of advances to the debtor by The Western Pacific Railroad Corporation, on which unpaid interest amounted to $1,430,957; Class 11 item consisted of $50,000 principal amount of advances to the debtor by the Western Realty Company, on which unpaid interest amounted to $6,667; Class 12 items consisted of $28,300,000 par value of the debtor's preferred stock; Class 13 items consisted of [198] $47,500,000 par value of

the debtor's common stock; and Class 14 items consisted of various other claims not specifically described by the court.

Proposed Plans of Reorganization.

The capital structures proposed for the reorganized company in the three plans filed and which would result if modified in accordance with suggestions of the debtor during the hearing and on brief, the distribution of the new securities to be issued under the plans, and the main features thereof, are summarized below.

Existing equipment obligations would not be disturbed under any of the plans. As filed, the debtor's plan would become effective as of January 1, 1936. The debtor later suggested January 1, 1937, as the effective date the same as in the other plans.

The plan of reorganization originally submitted by the debtor contemplated the initial issue of $25,675,900 principal amount of new first mortgage 4 percent bonds, $41,774,796 principal amount of new 5½ percent income mortgage bonds (cumulative for the income period in which such interest is payable and for the 4 income periods next succeeding the income period in respect of which such interest is payable), of which $20,887,398 would be series A bonds, and $20,887,398 would be series B bonds, $8,092,709 principal amount of new non-cumulative junior lien 6 percent income bonds, or a total of $75,543,405 principal amount of bonds. The plan further provides that 926,622 shares of new no-

par common stock be authorized, of which 300,000 shares would be issued forthwith, and 626,622 shares would be reserved for issue upon conversion of $20,887,398 of the new income bonds.

Under the debtor's plan, its existing first mortgage 5 percent bonds would be exchanged for 30 percent of the new first mortgage 4 percent bonds, and 70 percent of new income mortgage 5½ percent [199] bonds plus additional income bonds equal in face amount to the unpaid interest. Ten million dollars of the new first mortgage 4 percent bonds would be sold at par to the Reconstruction Finance Corporation to provide new money for the reorganized company. In consideration of that purchase, the Reconstruction Finance Corporation would be given for its claim against the debtor treatment equivalent to that given to the holders of the existing first mortgage bonds.

The new junior lien income 4 percent bonds would be issued to the Railroad Credit Corporation and A. C. James Company in settlement of their claims, each to receive new bonds equal in fact amount to the principal of their claims plus unpaid interest.

All the new stock would be placed in a voting trust under which 3 voting trustees nominated by the debtor and approved by the bondholders' committee would act pursuant to a voting trust agreement which would be acceptable to the debtor and the bondholders' committee. The voting trust would continue until 10 years from the date of confirma-

tion of the plan. A majority of the debtor's board of directors would be nominees of the holders of income bonds, and as long as the Reconstruction Finance Corporation holds more than $500,000 of the first mortgage bonds, the voting trustees would elect to the board of directors a person designated or nominated by that corporation. In respect of the 300,000 shares of common stock immediately issuable under the plan and of the shares which may be issued on conversion of the income bonds, voting trust certificates would be issued. The certificates for 150,000 shares of the common stock would be placed in escrow with the trustee of the income mortgage and would be given to the holders of income mortgage bonds if, commencing April 1, 1941, full interest was not paid on the income bonds in respect of the next preceding income period for any [200] deficiency in payment of full interest at the price of $27.50 per share.

The debtor's plan further provided that there be created a contingency reserve fund of $500,000 to be available for the purpose of paying fixed interest charges, principal of and dividends on equipment obligations and operating expenses which could not otherwise be provided for without, in the opinion of the board of directors, unduly impairing free working capital. The fund would be created initially from the proceeds of the $10,000,000 of new first mortgage bonds to be sold in the reorganization, and thereafter maintained out of the net income remaining after the payment of fixed charges.

There would be created also out of available net income before the payment of interest on income bonds a capital fund to be applied for capital investments made in the calendar year in which the fund is set aside, and no additional securities would be issued against such expenditures. The amount set aside in the capital fund for any calendar year would not exceed $500,000 during the years 1936 to 1940, inclusive, $1,000,000 during the years 1941 to 1945, inclusive, and in all subsequent years not more than 3 percent of gross revenues.

Provision for a sinking fund in an amount not exceeding in any calendar year one-half of 1 percent of the principal amount of the new income bonds, Series A, also is made in the plan. The fund would be created and maintained out of net income remaining after payment of fixed charges, maintenance of the reserve fund, capital fund, and interest payments on income bonds, and would be applied to the redemption of the series A income bonds.

The debtor's plan also provides for an additional interest fund to be created and maintained out of net income remaining after [204] payment of fixed charges, payments in respect of the reserve fund and the capital fund, interest on income mortgage bonds and junior lien bonds. The fund would not exceed one year's interest on all outstanding first mortgage bonds and would be available only for the payment of interest on such bonds.

During the hearing and on brief, counsel for the debtor suggested that the debtor's plan be modified by providing that, (1) the rate of interest on all bonds be 4 percent per annum, (2) there be created sinking funds of not less than ½ percent or more than 1 percent for the redemption of all bonds, (3) the escrow agreement in respect of the 150,000 shares of common stock be modified so that there would not be a peremptory forfeiture on the due date of interest, because such interest may be paid in cash out of the available net income of the next four income periods, and be further modified so that there would be no forfeiture at all if the failure to earn interest was caused by excessive maintenance or undue capital expenditures, (4) the voting trust be eliminated from the plan, and (5) there be issued $7,245,274 par value of 4 percent noncumulative preferred stock to the Western Pacific Railroad Corporation and the Western Realty Company.

With the effective date of the plan as of January 1, 1937, and modified as suggested, the plan would provide for the initial issue of $25,675,900 principal amount of new first mortgage 4 percent bonds, $45,219,530 principal amount of new income mortgage 4 percent bonds, $8,386,040 principal amount of new junior lien income 4 percent bonds, or a total of $79,281,470 principal amount of bonds, $7,245,274 par value of new 4 percent preferred stock, and 300,000 shares of no par common stock.

Under the bondholders' plan, the reorganized company would issue initially $19,858,020, principal amount, of new first mortgage [202] 4 percent bonds, $19,716,040 principal amount of new income mortgage 5 percent bonds (cumulative against only 3 years income); or a total of $39,574,060 principal amount of new bonds. The plan further proposes the issue of $27,930,800 par value of new participating 6 percent preferred stock (cumulative only to the extent that dividends are earned), and not less than 339,995 shares nor more than 489,995 shares of new no par common stock.

The existing first mortgage 5 percent bonds would be exchanged 20 percent for new first mortgage 4 percent bonds, 40 percent for new income mortgage 5 percent bonds, and 40 percent for new participating 6 percent preferred stock, accrued interest also being commuted into the latter stock. As provided in the debtor's plan, $10,000,000 of the new first mortgage 4 percent bonds would be sold to provide new money for the reorganized company.

The claims of the Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company would be converted into the new common stock (taken at $100 per share) on the basis of the collateral pledged under the debtor's notes to those creditors. Such stock, amounting to 189,995 shares, would be deposited under an escrow agreement subjecting the stock to purchase warrants.

The Western Pacific Railroad Corporation would be allotted purchase warrants, entitling the holders thereof to purchase on or before December 1, 1941, all or any part of the 189,995 shares of the new common stock at the price of $62 per share, plus interest thereon at the rate of 4 percent per annum from January 1, 1937. In addition to its option under the escrow agreement the Western Pacific Railroad Corporation would be granted, through issue to it of subscription warrants, the first opportunity to provide the $10,000,000 of required new money, receiving therefor the $10,000,000 [203] new first mortgage 4 percent bonds and 150,000 shares of the new common stock.

To the extent that the Western Pacific Railroad Corporation should fail to exercise the subscription warrants, the bondholder's plan provides that the new money be provided upon less favorable terms to the debtor by the Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company; and to the extent that they in turn should fail to provide it, the plan provides that it be supplied upon still less favorable terms by the present first mortgage bondholders.

The bondholders' plan further provides that control of a majority of the board of directors of the reorganized company be vested in the new preferred stock until the reorganized company shall have demonstrated its capacity to pay a continuous return on that stock. A contingency reserve fund and a capital fund, similar in all respects to those proposed

by the debtor also are provided for in the bondholders' plan. It also provides for a one-half percent sinking fund for the redemption of the new income bonds, but only after payment of fixed and other contingent charges and the payment of dividends on preferred stock.

The plan submitted by the A. C. James Company proposes that the reorganized company issue initially $10,000,000 principal amount of new first mortgage 4 percent bonds, $49,290,100 principal amount of new general mortgage 4 percent income bonds (cumulative only to the extent that interest is earned), and $10,450,263 principal amount of new noncumulative 4 percent debentures (convertible into 150 percent of their principal amount in 6 percent preferred stock), or a total of $69,740,363 principal amount of new bonds and debentures. The preferred stock of the debtor, of which $28,300,000 par value is now outstanding, would be delivered to the debtor under this plan [204] and $5,807,650 par value of such stock would be reissued. The common stock of the debtor, now outstanding of the par value of $47,500,000, would be delivered to the debtor and be reissued.

The existing first mortgage 5 percent bonds would be exchanged for the new general mortgage 4 percent income bonds, with a bonus of $500 par value of common stock for each $1,000 bond. The new noncumulative 4 percent debentures would be allotted to the Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Com-

pany, and those creditors would be given also a bonus of $500 par value of common stock for each $1,000 of the debtor's notes owned by them. The $5,807,650 par value of preferred stock would be issued to the Western Pacific Railroad Corporation and the Western Realty Company in settlement of the principal amount of their claims against the debtor.

Under this plan all accrued interest upon all outstanding debt would be canceled.

The $10,000,000 principal amount of new first mortgage bonds would be sold to provide new money for the reorganized company and the Western Railroad Corporation would be given the right first to purchase such bonds, with a bonus at the rate of 15 shares of the common stock for each $1,000 first mortgage bond purchased.

No reserve capital or sinking funds are provided for under the James plan.

Each of the three plans sets forth in more or less detail the proposed manner of participation of the stockholders and creditors in the plan and the method of consummation. The debtor's plan provides that it shall not be declared operative or carried out until finally approved by the Commission and confirmed by the court after acceptance by the holders of each class or classes of securities or claims affected by the plan as shall be sufficient under the [205] provisions of the Bankruptcy Act. The James plan provides that it shall not be carried out until it shall have been approved by the

Commission and the court, pursuant to the requirements of the Bankruptcy Act, and until it shall have been accepted by two-thirds of the creditors of each class, and by two-thirds of the stock of each class. The bondholders' committee plan provides that the plan shall not be carried out until it shall have been accepted by the holders of at least two-thirds in principal amount of the debtor's outstanding first mortgage bonds, nor unless either (1) the plan shall have been accepted by creditors holding at least two-thirds in principal amount of the total allowed claims of such class, and by the holders of at least two-thirds of the stock of each class, or (2) provision shall have been made for the sale of the debtor's property at public auction at a fair upset price as determined by the court, and the payment to the non-assenting creditors of such class or the non-assenting stockholders of such class, of their aliquot portion of the proceeds of the sale of such property.

None of the proposed plans is agreed to by all the parties to the proceeding.

The debtor's plan is objected to by the bondholders' committee on the grounds that it proposes an unsound capital structure in that the ratio of debt to capital stock is disproportionate, and that the total of fixed and contingent interest charges proposed is excessive in the light of the debtor's past earning experience and probable future earnings. The James plan is objected to for the same reasons. The bondholders further contend that the debtor's

plan discriminates unfairly in favor of the Reconstruction Finance Corporation and against the first mortgage bondholders and the Railroad Credit Corporation in that it proposes to place the Reconstruction Finance Corporation on a parity with the present first mortgage [206] bondholders as compensation for furnishing the $10,000,000 of new money by the Finance Corporation. In proposing to give the A. C. James Company and the Railroad Credit Corporation securities on the basis of the principal amount of their notes, irrespective of the amount of their collateral security, the bondholders allege that the Railroad Credit Corporation is discriminated against. By granting all the new common stock of the reorganized company to the Western Pacific Railroad Corporation without requiring any contribution or sacrifice by that corporation to or in the reorganization, the bondholders allege that undue preference is proposed.

The James plan is further protested by the bondholders' committee on the grounds that it is discriminatory in that it does not provide any fixed interest obligations for the present first mortgage bonds; it proposes the issue of new securities having the sole first lien upon the property of the reorganized company exclusively to the Western Pacific Railroad Corporation along with a bonus of $150 par value of new common stock for each $100 bond; proposes the waiving of all accrued interest without any compensation therefor; disregards the relative priorities of the various creditors by giv-

ing the same bonus of new common stock; proposes no sinking funds for retirement of debt; makes the new bonds proposed to be given the present first mortgage bondholders mature in 1987 as against a maturity in 1977 for the obligations which are proposed to be given to the so-called junior creditors; and proposes to treat the claims of the Reconstruction Finance Corporation, the Railroad Credit Corporation and the A. C. James Company on the basis of the principal amounts of the notes rather than upon the basis of the collateral held. The bondholders' committee also objects to the James' plan proposal to give the Reconstruction Finance Corporation, the [207] Railroad Credit Corporation and the A. C. James Company the principal amount of their notes in new 4 percent debentures, convertible into 150 percent in principal amount of 6 percent preferred stock. The bondholders' committee points out that if the debentures are converted, the new preferred stock would rank in the scale of distribution of the reorganized company's earnings substantially at the same point at which interest would be paid upon the debentures, and that this would result in a 9 percent annual return upon the present claims; and also would operate to depress the value of the common stock of the reorganized company.

The bondholders' plan is objected to by the A. C. James Company on the grounds that it proposes an unsound capital structure in that it does not furnish appropriate vehicles for senior and junior

financing of future capital requirements; proposes an unduly complicated capital structure; does not preserve debt as debt; capitalizes unearned and unpaid interest as a permanent part of the capital structure; proposes for certain of the new securities to be issued excessive interest rates; and proposes excessive fixed charges. Certain of those objections also are advanced by that company to the debtor's plan. It further alleges that the bondholders' plan discriminates unfairly against the other creditors and in favor of the bondholders, and does not accord sufficient recognition to the debtor's equity. [208]

Conclusions

By the provision of subsection (b) of section 77 of the Bankruptcy Act, as amended, a plan of reorganization shall include provisions modifying or altering the rights of creditors generally, or any class of them, secured or unsecured, either through the issue of new securities of any character or otherwise; shall provide for fixed charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent for leased railroads) in such an amount that, after due consideration of the probable prospective earnings of the property in the light of its earnings experience and all other relevant facts, there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof; and shall provide adequate means for the execution of the plan. Subsection

(c) of section 77 provides that the judge shall approve the plan certified to the court by the Commission if satisfied, after hearing, and without hearing if no objections are filed, that the plan complies with the provisions of subsection (b), is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; that the approximate amounts to be paid by the debtor, or by any corporation or corporations acquiring the debtor's assets, for expenses and fees incident to the reorganization, have been fully disclosed so far as they can be ascertained at the date of the hearing, are reasonable, are within such maximum limits as are fixed by the Commission, and are within such maximum limits to be subject to the approval of the judge; that the plan provides for the payment of all costs of administration and all other allowances made or to be made by the judge, except that allowances for the actual and reasonable expenses (including reasonable attorney's fees) incurred in connection with the proceedings and plan by parties in [209] interest and by reorganization managers and committees or other representatives of creditors and stockholders, and the actual and reasonable expenses incurred in connection with the proceedings and plan and reasonable compensation for services in connection there-

with by trustees under indentures, depositaries, and such assistants as the Commission with the approval of the judge may especially employ, may be paid in securities provided for in the plan if those entitled thereto will accept such payment. The plan approved by the Commission must meet with these requirements of subsections (b) and (e) and be compatible with the public interest.

It will be observed that in so far as the capitalization of a reorganized company is concerned, section 77 contains no limitations other than that the fixed charges of the company shall be adequately covered by the probable earnings available therefor, and the plan as a whole shall be compatible with the public interest. The public interest is not defined, but it would seem obvious that to be compatible with the public interest, the plan must provide a capital structure for the reorganized company which will give it a reasonable opportunity to function efficiently and continuously as a going concern. This requires that the capitalization should not exceed a conservative valuation of the assets to be taken over by the reorganized company, and that proposed charges are within its probable earning power. It is of primary importance, therefore, to ascertain whether the capital structures proposed in the various plans are properly related to assets and earning power.

The aggregate capitalization, exclusive of no-par value stock, under the debtor's plan, if modified as suggested by its counsel, would amount to $88,-

574,934, or a reduction of $65,876,850 under its present debt and capitalization. Treating the proposed no-par value stock at $100 per share, the aggregate capitalization would amount to $118,574,934, or a reduction of $35,876,850. Fixed [210] interest bearing obligations would amount to $27,724,090, but total fixed and contingent interest bearing obligations would amount to $81,329,660, or an actual increase of $2,677,876 over present debt. The ratio of debt to total capitalization would be 68.6 percent. The fixed interest charges would be $1,113,509 per annum, or a decrease of $2,264,736 under present fixed charges, but total fixed and contingent charges, excluding charges on the so-called interest fund, would amount to $4,654,139 per annum, or an increase of $1,275,894 over present interest charges. With $289,811 dividends on preferred stock, a total of $4,943,950 would be required before payment of any dividends on common stock.

It is thus seen that under the debtor's plan existing debt is preserved as debt although a larger amount of interest and other charges are made dependent upon earnings. While such provisions might afford temporary relief, the debtor still would be faced with debt maturities which, if they occurred in a period of low earning power or if the debtor had consistently failed to earn the interest charges on the principal, would be difficult or impossible to refund. A capital structure proposing an increase of $1,275,894 in charges when for several years past present charges have not been met,

cannot be considered as sound or in the public interest.

The bondholders' plan, exclusive of no-par value stock, contemplates an aggregate capitalization of $69,553,056, or a reduction of $84,898,728 under the debtor's present debt and capitalization. Treating the proposed no-par value stock at $100 per share, the aggregate capitalization would be a minimum of $103,552,556, and a maximum of $118,552,556, or a reduction of $50,899,228 or $35,899,228 respectively under present debt and capitalization. Fixed interest bearing obligations would amount to $21,906,210, and the total of fixed and contingent interest bearing obligations would [211] be $41,622,250, or a reduction of $37,029,534 under present debt. The ratio of debt to total capitalization would be 41 percent or 35 percent. Fixed interest charges would be $880,793 per annum, or a reduction of $2,497,452, and total fixed and contingent charges $3,063,755 or a reduction of $314,490 below present interest charges. Including dividends of $1,675,848 on preferred stock, a total of $4,739,603 would be required before any dividends could be paid on common stock. Total charges of $4,542,443 would have to be met before any amount could be applied to the proposed sinking fund for income bonds.

Under the James plan, the total capitalization would be $125,096,203, or a reduction of $29,355,581 under present debt and capitalization. Fixed interest bearing obligations would amount to $12,048,190, or a reduction of $66,603,594, but total fixed

and contingent debt would amount to $71,788,553, or a reduction of only $6,863,131 under present debt. The ratio of debt to total capitalization would be 57 percent. While fixed interest charges of only $486,473, or a reduction of $2,891,772, are proposed, total fixed and contingent interest would amount to $2,876,088, exclusive of any provisions for capital sinking funds. It is thus seen that the James plan proposes a debt structure quite similar to that proposed by the debtor.

Considering the past and present earning power of the debtor on the basis of the facts heretofore recited with respect to traffic and earnings, the Commission should find that none of the debt structures, as proposed in the plans before it, should be approved as compatible with sound financing and the public interest.

From a consideration of the data herein set out, it is clear that the effect of adjusting the earnings of the debtor's system available for interest during the period 1931 to 1935, inclusive, to reflect normal maintenance, social security and retirement legislation [212] now in effect, and by elimination of amortization of bond discount included in the accounts, would be to show deficits in earnings available for interest amounting to approximately $850,000 in 1931 and $400,000 in 1932, and practically no earnings would be available in 1933, $500,000 in 1934, and $250,000 in 1935. But limitation of the fixed charges of the reorganized company on the basis of such hypothetical adjustments can hardly

be justified, since other factors, now unknown, tending to increase net earnings may later affect the situation. Further, limitation of fixed charges in this case on the basis of the minimum of earnings shown to have been available would appear too severe and an average of the available earnings over a period in which the company might be expected to finance its need through short term borrowing seems reasonable. It is observed that after substantial earnings in 1930 and with deficits in earnings available in 1931 and 1932, the debtor earned in 1933 the sum of $674,007 for fixed charges. And the adjusted earnings would show after substantial earnings in 1930, deficits or no earnings in the next three years, and available earnings of close to $500,000 in 1934. These data cover the critical period through which the debtor has recently passed, and indicate that fixed charges of $500,000 could have been paid with reasonable support from the banks. They show equally clearly that no fixed charges in excess of that approximate sum should be carried, since actual earnings were insufficient for three consecutive years, to pay substantially more than $500,000, and the adjusted earnings would have been insufficient for four years in succession.

With annual interest charges on existing equipment obligations amounting to $86,473 per annum, it is recommended that the plan approved by the Commission provide for the immediate issue of not to exceed $10,000,000, principal amount, of new

first mortgage bonds, [213] and that no other fixed interest obligations be permitted. These bonds should be secured by a new first mortgage which should be a first lien upon all property, real and personal, and equipment of the reorganized company now pledged under existing mortgages of the debtor. To facilitate future capital financing, the total authorized issue of bonds thereunder should be limited to $50,000,000, of which $10,000,000 should be sold to provide the new money required in the reorganization, and the remainder reserved to be issued to provide for, or to reimburse the reorganized company for expenditures for additions, betterments, improvements or extensions made after the effective date of the reorganization, in a principal amount not exceeding 75 percent of the actual cost of such additions, betterments, improvements or extensions. The bonds should mature in 30 years, bear interest at the rate of 4 percent per annum payable semi-annually, and be redeemable, in whole or in part, on any interest payment date upon 30 days notice, at their principal amount and accrued interest.

Considering the limited amount of fixed interest bonds recommended herein, there would seem to be no real reason for the creation and maintenance of the so-called contingency reserve fund of $500,000 to be available for the payment of interest on the new first mortgage bonds as proposed in the debtor's and bondholders' plans. It is recommended,

therefore, that no provision be made for such a fund.

Since new first mortgage bonds would not be issued in principal amount to exceed 75 percent of future capital expenditures, the balance of such expenditures must be financed through the issue of junior securities or from earnings. Under both the debtor's plan and the bondholders' plan funds for such expenditures would be secured from the hereinbefore described capital fund contemplated by their plans. While the A. C. James Company opposes the creation [214] of such a fund, as well as a sinking fund for the redemption of bonds, it does not contend such funds are not in accordance with the principles of sound financing, but that the Revenue Act of 1936 places too great a penalty on the retention of earnings for such purposes. It is essential, however, that the reorganized company should not be embarrassed in securing funds for future capital expenditures. It also is believed to be desirable that provision be made at least for the retirement of the income bonds. It is recommended, therefore, that the plan approved by the Commission provide for the creation of a capital fund out of available net income remaining after payment of fixed interest. To avoid too heavy a sacrifice by present security holders, payments into the fund should not exceed $500,000 in any one year, nor, in any event, the sum needed to raise the totals of the fund to $1,000,000 at any time, and payment

into the fund should be dependent upon earnings and non-cumulative.

Available net income should be determined for each period of six months ending June 30 or December 31, (called income periods) beginning with the income period ending June 30, 1937. Available net income for each income period should be determined by deducting from the consolidated income of the reorganized company and its subsidiaries available for fixed charges for such income period, determined in accordance with accounting rules of the Commission, all fixed charges of the reorganized company and its subsidiaries accrued during such income period; provided, however, that in determining available net income there shall not be deducted any amounts expended in connection with the rehabilitation program out of the $10,000,000 of new money to be provided in the reorganization (or out of the proceeds of any trustees' certificate or other obligations retired out of said money), notwithstanding that under the accounting rules [215] hereinbefore mentioned certain of such expenditure may be chargeable as operating expenses.

With respect to sinking funds, the debtor suggests that such a fund should be provided for all bonds, while the bondholders propose that it apply to income bonds only. The debtor also proposes that such a fund should be created and maintained out of available net income remaining after payment of interest and provision for the capital fund, while the bondholders propose that payments into

the fund should not be made until after payment of dividends on preferred stock. The latter provision, however, would not only delay but possibly preclude the retirement of such bonds. On the other hand with such a limited amount of fixed interest bonds as recommended herein, it would not seem essential to provide for their retirements through a sinking fund. It is recommended, therefore, that provision should be made in the plan approved by the Commission for the creation and maintenance of a sinking fund of one-half of 1 per cent to be used for the retirement of income bonds hereafter recommended out of available net income remaining after the payment of fixed charges, payment into the capital fund, and interest on income bonds.

In order that the contingent interest bonds issued in the reorganization should be a saleable security easily refundable at maturity, their interest charges should be well within the apparent earning power of the company under reasonably favorable business conditions. The marked increase in the net earnings of the debtor in 1936 over 1935 indicates a substantial recovery of traffic. Forecasts of higher earnings in 1937 may be supported by the record, but at this time the period during which such higher earnings may continue is problematical. It appears that the period of marked low earning power of the debtor embraces the years 1931 to 1935, inclusive. The total of the fixed and

contingent interest charges plus sinking [216] fund requirements and the capital fund of the reorganized company should be not more than the earnings of the debtor available for interest in 1936. The last year prior to 1936 in which the debtor's earnings were sufficient to pay such charges was 1929.

If the above recommendations are approved, charges on equipment obligations, new first mortgage bonds and proposed capital fund, would require $986,473 per annum. Since the amount available for interest in 1936, the most recent full calendar year, after eliminating the extraordinary expenditures for rehabilitation, amounted to $1,766,632, it is recommended that the new income bonds to be issued should not exceed $19,716,040 in principal amount, and should bear interest at the rate of 4 percent per annum. Interest on such bonds would amount to $788,642, and including charges for the sinking fund, the total of the fixed and contingent charges recommended would amount to $1,873,695.

The new income bonds should be secured by a mortgage, such mortgage to constitute a lien, subject only to the lien of the first mortgage, upon all property from time to time subject to the lien of the first mortgage. The total authorized issue of bonds thereunder should be limited to $19,716,040. The bonds should be dated as of the effective date of the reorganization and should mature in 50 years, bearing interest payable semi-annually only out of the available net income, such interest to be cumu-

lative only as against such available net income for the income period in respect of which such interest is payable. The bonds should be redeemable on any interest payment date at their principal amount plus any interest payable thereon on such interest payment date. The available net income out of which such interest is payable should be that remaining after the payment of fixed charges and such amounts [217] as may be required to maintain the capital fund. Such bonds also should be entitled to the benefit of a one-half of 1 percent cumulative sinking fund, payable out of available net income remaining after the payment of all prior charges hereinbefore recommended.

The debtor's assets consisting of real and personal property have been described, and its investment in such property has been stated. While these data alone would seem to support the total capitalization proposed in each of the three plans, yet when considered in connection with its record of earnings, it appears that the total capitalization of the reorganized company should be less than that proposed in any of the plans if any material return in the future on the reorganized company's capital stock is to be expected.

The maximum of earnings available for interest forecast by the debtor is approximately $4,000,000 for 1940, based on assumed revenues of $21,632,200, 7.5 percent in excess of the maximum of the debtor's revenues in any year since 1922. Prior charges heretofore provided for amount to $1,873,695 which

deducted from $4,000,000 leaves $2,126,305 of possible additional annual earnings under the debtor's estimate, to be capitalized, if there is to be a reasonable prospect of a return on the securities to be issued. This sum would pay preferred stock dividends of 5 percent and common stock dividends of 3 percent on slightly less than $60,000,000 par value of stock divided equally between preferred and common. The Commission should approve the issue under the plan of 295,740 3/5 shares of preferred stock, $100 par value, and 300,682 1/5 shares of $100 par value common stock, and in view of the data of record relating to past earnings and the forecasts of future earnings, should find that such issue, together with the securities hereinbefore approved, constitute the maximum amount of capitalization which may be issued under the plan. [218]

The new preferred stock, which should be authorized in the total amount of 500,000 shares, should be entitled to receive dividends at the rate of 5 percent per annum in respect of each calendar year before any dividends be paid or declared upon the common stock. Such dividends should be cumulative to the extent earned in respect of any calendar year but not paid; but such dividends should otherwise be noncumulative. After dividends shall have been paid or declared on any new common stock at the rate of $3 per share in respect of any year, each share of new preferred stock should be entitled to share equally with each share of any new common stock in any dividends paid or declared in re-

spect of such year. In event of liquidation the new preferred stock should be entitled to receive out of the assets of the reorganized company its par value before any distribution is made to any new common stock but should not be entitled to any further participation in such assets. The new preferred stock should be redeemable, in whole or in part, at any time at its par value plus accrued and unpaid cumulative dividends.

The plan should provide further that the reorganized company should not, without the vote or consent of the holders of at least two-thirds in par value outstanding new preferred stock (1) create or permit to be created any mortgage or other lien upon any of its properties, excepting the new first mortgage and new income mortgage or purchase money liens (including equipment obligations) upon property hereafter acquired, given for not more than 75 percent of the purchase price of such property; (2) create or issue any bonds, notes or other evidences of indebtedness maturing more than 2 years from their date, except purchase money obligations [219] given for not more than 75 percent of the purchase price of property hereafter acquired; (3) create any stock ranking, either as to assets or dividends, in priority to or on a parity with, the new preferred stock, or (4) permit any subsidiary, all of whose stock except directors' shares, shall be owned by the reorganized company, to create any mortgage or other lien upon any of its properties or issue any such bonds, notes or

other evidences of indebtedness (except purchase money liens or obligations as aforesaid), or issue any additional stock of any class, unless the obligations secured by such mortgage or other lien or such other obligations or such stock shall be acquired by the reorganized company. Each share of the new preferred stock should have equal voting rights and privileges with any new common stock.

The total authorization of the common stock should be 500,000 shares. Including the above charges, an amount of $4,254,445 would be required before the reorganized debtor could pay a 3 percent dividend on an issue of $30,068,220 par value of common stock.

Under the above recommendations, the total capitalization would be $91,406,510, consisting of $2,048,190 equipment obligations, $10,000,000 first mortgage 4 percent bonds, $19,716,040 non-cumulative income mortgage 4 percent bonds, $29,574,060 noncumulative 5 percent preferred stock, and $30,068,220 common stock. Total fixed interest charges would be $486,473, total fixed and contingent charges including capital and sinking funds, would be $1,873,695, total preferred dividends would be $1,478,703 or a grand total of $3,352,398.

The allocation of the new securities of the reorganized company must comply with the provisions of subsection (e) of section 77, hereinbefore stated. The language comprising those provisions has long had a settled meaning in equity reorganizations.

[226] Briefly stated it is to the effect that no plan of reorganization will be fair and equitable if it attempts to secure the rights and interests of stockholders at the expense of the prior rights of secured or unsecured creditors. Subsection (e) specifically commands that the rights of each class of creditors and stockholders be accorded due consideration.

All three plans before the Commission are predicated on the priority of the first mortgage over the general mortgage, and all parties admit that the first mortgage is a first lien on the main line of the debtors' railroad and the securities physically pledged under that mortgage. The trustee under the first mortgage and the holders of bonds secured by that mortgage contend that the first mortgage is a first lien on substantially all the debtor's property, except equipment subject to existing leases, conditional sale agreements or equipment trust agreements. The general mortgage trustee and those creditors with whom are pledged general mortgage bonds contend, however, that the first mortgage is not a lien, or is a lien only to the extent of the proceeds of first mortgage bonds expended thereon, on cash and collateral held by the trustees under the general mortgage, or the Northern California extension, on the debtor's equity in rolling stock subject to leases, conditional sale agreements or equipment trust agreements, and on property, in general, purchased either in whole or in part from free funds. Those parties contend further

that most of the property just described is not only free from the lien of the first mortgage but is subject to the lien of the general mortgage, and that its value is sufficient for the full payment of all the debts secured under the general mortgage, with interest. With the exception of the A. C. James Company, they assert that the first mortgage bondholders are not entitled to preferential treatment.

[221]

While final adjudication of this and similar questions must be made by the court, in the absence of such adjudications, it becomes the duty of the Commission to preliminarily determine them for the purposes of consideration of any of the plans before it. Since most of the property which is in dispute was acquired after the date of the first mortgage, the primary question involved is whether such property is covered by the after-acquired property clause contained in the granting clauses of the first mortgage.

Clause First of the granting clauses covers both in detail and by a general statement all property which had been owned by the debtor's predecessor, except only cash items.

Granting Clause Third covers "any and all property and facilities of any and every kind and description * * * which may from time to time hereafter be acquired or constructed by or belong to" the debtor if such after-acquired property falls within one of four specified categories:

(1) If any "First Mortgage Bonds or proceeds thereof or cash deposited" under the first mortgage have been authenticated or paid out "on account of the purchase, acquisition or construction thereof or work therein;" or

(2) If the property constitutes "an integral part or parts of lines of railroad, extensions, branches or other property subject to the lien" of the first mortgage; or

(3) If the property is "used or acquired for use in or for the maintenance or operation of or pertaining to" any of the property subject to the lien of the first mortgage; or

(4) If the property consists of shares of stock or of other securities of the Salt Lake City Union Depot and Railroad Company or Standard Realty and Development Company or any subsidiary as defined. [222]

Granting Clause Fifth covers almost every kind of property and facility used or useful in the operation of a railroad (including additional tracks, spurs, equipment, material and supplies, land) ending with the generality "all other property of every description and all rights and interests in or with respect to the use of property * * * whether now owned * * * or at any time hereafter acquired," if "appurtenant to or used or held for use as, or as a part of or as parts of, or to facilitate or safe-

guard the maintenance or operation of, any lines of railroad, extensions, branches * * * or other properties now or at any time hereafter subject to the lien" of the first mortgage.

Following granting Clause Sixth is a proviso permitting the debtor by the use of free funds to acquire property free of the lien of the first mortgage if such property is not of the character described in the four subdivisions of granting Clause Third.

The Northern California extension, various branches and spurs, and equipment used under leases, or contracts or equipment trust agreements are the principal items of property in dispute. With respect to the first two classes of property we are satisfied from the record that substantial amounts of the proceeds of first mortgage bonds were used in their acquisition or construction or at least "on account of the purchase, acquisition or construction thereof or work thereon." We construe the latter language to mean that the lien of the first mortgage attaches to after acquired extensions if the purchase, acquisition or construction thereof, or any work thereon, be financed in any part with first mortgage bonds or cash deposited under that mortgage.

While the construction of the Northern California extension was financed in part with the proceeds of certain debentures which were subsequently exchanged for general and refunding bonds, it is [223] not contended that the debentures were secured by

a lien on the extension. Moreover the record is clear that there was no intent to create a purchase money lien on the extension in favor of the debentures. The same is true with respect to the advances from the Reconstruction Finance Corporation; and the general and refunding mortgage was not executed and delivered until several months after the completion of the extension.

The Commission should conclude, that, in determining the equitability of plans of reorganization for the debtor, the lien of the general mortgage on the Northern California extension and various branches and spurs in question should be considered subject to the lien of the first mortgage.

The debtor's equity in rolling stock subject to leases, conditional sale agreements or equipment trust agreements, would seem to be covered by the after-acquired property clause in the third paragraph, as well as by the fifth paragraph, of the granting clauses unless the proviso at the end of the granting clauses negatives such a construction. The proviso reads as follows:

> * * *; and the company may, unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same, purchase and acquire equipment free from the lien hereof, by lease, conditional sale agreement or under any form of equipment trust, or purchase such equipment and issue obligations therefor

secured by mortgage or pledge of such equipment superior to the lien of this indenture.

The latter provision, however, should be construed both in the light of the language which precedes it in the same paragraph [224] and in the light of the paragraph which follows the habendum clause. The latter paragraph reads as follows:

> "Subject, however, as to all equipment now owned to the equipment trust or conditional sale agreements secured thereon, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby * * *"

If all equipment acquired under equipment trusts was to be entirely free of the lien of the first mortgage, it is not understood why the words "equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby" were made part of the last quoted provision. The Commission should consider, for the purposes of a plan of reorganization, that since the equipment in question was acquired for use, and was actually used, on the mortgage lines, the debtor's equity in that equipment is subject to the lien of the first mortgage.

The Commission also should consider that the property characterized as non-carrier real estate which was owned by the predecessor of the debtor and which the general and refunding mortgage trustee contends did not become subject to the lien

of the first mortgage because the reorganization plan, pursuant to which the present first mortgage bonds were issued, contemplated that they should have a lien only upon railway properties, is covered by the first mortgage. No such distinction as urged by the general mortgage trustee, appears in the language of the mortgage itself, and it is not clear that the use of the words "railway properties" in the plan of reorganization was intended to exclude property which was classified as non-carrier for valuation purposes by the Commission many years thereafter. [225]

With the exception of the notes of the Deep Creek Railroad Company and the Standard Realty & Development Company, there is no contention that the cash and collateral held by the trustee under the general and refunding mortgage are not free from the lien of the first mortgage. While due recognition must be accorded to the rights of the creditors with whom are pledged general mortgage bonds, those creditors are not entitled to the same treatment as first mortgage bond holders; who should be considered as having a first lien upon practically all of the assets of the debtor. It follows that holders of the debtor's first mortgage bonds should receive securities of a higher rank than other creditors, at least to the extent that existing conditions will permit.

Proceeding to the allocation of the new securities, it has been seen that it is imperative that $10,-

000,000 of new money be raised for the purpose of retiring trustees' certificates and completing the rehabilitation program. Provision should be made in the plan for the immediate sale of the $10,000,000 principal amount of the new first mortgage 4 percent bonds hereinbefore recommended. To facilitate the sale of the bonds at par, it is recommended that the plan provide that 10 shares of the new common stock be given to the purchaser of each $1,000 principal amount of the new bonds.

Existing first mortgage bonds are outstanding in the principal amount of $49,290,100. Unpaid interest thereon as of January 1, 1937, amounted to $8,214,766. In this connection the A. C. James Company proposes that all unpaid interest should be waived. It is not contended by that company that such interest is not equally secured with the principal but it is urged that it is improper in a proceeding, such as this to capitalize unearned and unpaid interest. But the Commission should base the capitalization of the [226] reorganized company upon a consideration of assets and earning power rather than on the amount of existing claims, leaving the matter of unpaid interest for consideration in determining the relative rights of the creditors. Circumstances may be such as to render inequitable the allotment of securities to cover unpaid interest but the rights represented by unpaid interest should be recognized with the principal of the debt.

It is recommended, in view of the priority of the existing first mortgage bonds, that all of the new income bonds, $19,716,040 principal amount, all of the new preferred stock, $29,574,060 par value, and $8,214,766 par value of the new common stock hereinbefore recommended be allotted to the holders of existing first mortgage bonds. On this basis the holders of first mortgage bonds would receive 40 percent of the principal of their debt in income bonds, 60 percent in preferred stock, and the unpaid interest thereon in common stock.

Of the total of new securities hereinbefore recommended there thus remains only $11,853,454 par value of common stock for allocation among the debtor's other creditors and stockholders. That equals the total of the claims of the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company. Since their claims are secured by $18,999,500 principal amount of general mortgage bonds pledged by the debtor, they are clearly entitled to priority over the unsecured claims of the Western Pacific Railroad Corporation and over the claim of the Western Realty Company, a subsidiary of the Western Pacific Railroad Corporation, the latter being also the owner of all of the debtor's capital stock. Obviously, if due recognition is to be given the rights of these secured creditors, the entire amount [227] of common stock remaining for distribution should be allotted to them.

While, as stated, the par value of the stock available for distribution equals the principal and unpaid interest on the secured creditors' notes, the collateral pledged by the debtor as security for the notes is of varying amounts. For instance, the total of the Reconstruction Finance Corporation's claim is $3,507,310 although it holds as pledgee 56.6 percent of the debtor's general mortgage bonds. The total claim of the Railroad Credit Corporation amounts to $2,596,374 and 21.1 percent of the general mortgage bonds are pledged thereunder. The total of the A. C. James Company's claim amounts to $5,749,770 and only 22.3 percent of the general mortgage bonds are pledged thereunder. Under these circumstances it is recommended that the allotment of th common stock to these secured creditors be made on the basis of the collateral held rather than on the amount of the claims. Such allotment would result in the Reconstruction Finance Corporation receiving $6,709,055 par value, the Railroad Credit Corporation $2,501,079 par value, and the A. C. James Company $2,643,320 par value of new common stock.

Since all of the securities that the reorganized company would be justified in issuing are required for the adjustment of the claims of secured creditors and the securing of necessary new capital, the only provision by which the Western Pacific Railroad Corporation, as an unsecured claimant and owner of the debtor's outstanding capital stock,

may properly participate in the reorganization, is by the issue to it of rights to subscribe to the new first mortgage bonds to be sold by the reorganized company. It is recommended therefore that there be issued to that corporation subscription warrants entitling it to purchase at par within, but not [228] later than sixty days after the effective date of the reorganization, all or any part of the $10,000,000 principal amount of new first mortgage bonds. The Commission should find that the equity of the preferred and common stockholders of the debtor has no value. The claim of the Western Realty Company should be canceled.

The plan should provide further that opportunity to provide such part of the new money as is not provided by the exercise of the subscription warrants allotted to the Western Pacific Railroad Corporation be offered to the Reconstruction Finance Corporation, the Railroad Credit Corporation and A. C. James Company in proportion to the general mortgage bonds now held by them, upon the same terms as offered to the Western Pacific Railroad Corporation. If any of those secured creditors should fail to subscribe for its full proportion, the other or others of such creditors should be permitted to subscribe for the unsubscribed balance, in the proportion which the existing general mortgage bonds held by them respectively bear to the total amount of general mortgage bonds held by the corporations so electing to subscribe for their

full proportion. The contingent rights of subscription granted to those secured creditors should be evidenced by appropriate warrants, and such rights should, in the case of each offering, run concurrently with the rights evidenced by the warrants to be issued to, or on the order of, the Western Pacific Railroad Corporation. Holders of such warrants should be required to elect prior to the expiration of such warrants, in each case, the extent to which they will exercise their subscription rights. Should the Western Pacific Railroad Corporation, or the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company fail to provide the new money in accordance with the above terms, holders of first mortgage bonds should be entitled to provide the same upon the same terms and conditions as those parties, and [229] warrants evidencing such rights should be granted to such bondholders.

If the new securities are allocated as recommended above, it would result in preserving the priority of the first mortgage bondholders as to the principal amount of their bonds over all other existing creditors and stockholders in so far as new securities are available. The holders would receive securities bearing a rate of interest 1 percent lower for 40 percent of the principal of their bonds, and the payment of interest and dividends would be contingent on earnings. On the other hand, present stockholders, both preferred and common, as such,

would receive nothing, and the stock allocated to other secured creditors would be subordinate to the securities received by the first mortgage bondholders for the principal of their bonds. The provision for the participation of the unsecured creditor would not discriminate against either the first mortgage bondholders or the other secured creditors because such unsecured creditor must contribute $1,000 in cash for each new $1,000 bond and 10 shares of new common stock received.

Under both the debtor's plan and the bondholders' committee plan current liabilities of the debtor incurred in the ordinary conduct of its business prior to the institution of this proceeding, current liabilities and obligations of the debtor and of its trustees incurred during this proceeding, and all other claims, liabilities or obligations for which specific provision is not made in those plans are not to be affected by the plans, but to the extent that such claims, liabilities, or obligations are not paid by the debtor or its trustees pursuant to order of the court, they are to be paid in cash or assumed by the reorganized company. According to the record current liabilities incurred in the ordinary conduct of the debtor's business prior to this proceeding were of a nominal amount. The Commission should approve such provisions. [230]

Each of the three plans before the Commission propose different conditions under which a plan shall be consummated. The James plan affirma-

tively provides that its plan shall not be consummated until accepted by two-thirds of each class of creditors and two-thirds in amount of each class of stock. Reorganizations under section 77 are primarily premised upon the acceptance of plans by two-thirds or more of each class of creditors and stockholders. Congress recognized, however, that the public interest might, under certain circumstances, require the confirmation of a plan of reorganization even though it was not accepted by all classes of creditors and stockholders, and provisions to this effect are included in section 77. To approve a provision in a plan of reorganization by which a minority of a class of creditors or stockholders could effectively block the reorganization although the plan conformed to the requirements of the statute in all respects would, in our opinion, give such a minority a right not contemplated by the law, and, also, would be contrary to the intent if not the letter thereof.

The provision in the bondholders' committee plan to the effect that its plan shall not be confirmed until at least two-thirds of the holders of the debtor's first mortgage bonds accepted it, would seem to be in the same category as the provision in the James plan. With respect to the bondholders' proposal that the plan provide for the sale of the debtor's property in the event of the refusal of more than one-third of any other class of the debtor's creditors and stockholders to accept the plan, we are unable to accept the bondholders' argument that the

provision contained in clause (5) in the first paragraph of subsection (b) of the act to the effect that a plan may provide for the sale of all or any part of the property of the debtor, contemplates the equivalent of a foreclosure and judicial sale. In our opinion the provisions of subsection (e) [231] of the act, outlining the procedure to be followed in the event of a failure of confirmation of a plan, clearly shows that the Congress intended that reorganization should be accomplished through confirmation of a plan, or that the proceeding should be dismissed. The Commission should not approve the provision for sale of the debtor's property upon failure of acceptance of the plan. The plan approved by the Commission should provide that the plan shall be accepted and confirmed in accordance with the provisions of section 77.

Both the bondholders' plan and the James plan contemplates the formation of a reorganization committee with broad powers. No provision for such a committee is made in the debtor's plan, although it does provide that representatives of the bondholders' committee shall represent the members of that committee in the reorganization, and that the form and provision of the several indentures, bonds, stock certificates and other instruments in connection with the reorganization shall be first approved by the bondholders' committee.

It is recognized that it is impracticable to specify in detail the form and provisions of the various indentures, bonds, stock certificates and other in-

struments which must necessarily be executed in consummating the reorganization proceeding although the terms and provisions thereof, are of great importance to those participating in the proceeding. For this reason the Commission should recommend that the plan provide for the formation of a committee, after approval of the plan by the Commission and the court, with power to determine, subject to the approval of the Commission, the form and provisions of the indentures, bonds, stock certificates and other instruments in connection with the carrying out of the plan. The committee also should have power, but only such power as necessary, to carry out the plan in accordance with [232] its provisions. The committee should consist of three members, one member of which should be nominated by the bondholders' committee, one by the Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company as a group, and one by the Western Pacific Railroad Corporation.

Under the foregoing recommendations, the plan of reorganization would provide as follows:

1. The immediate issue by the reorganized company of $10,000,000 principal amount of 30-year first mortgage 4 percent bonds, $19,716,040 principal amount of 50-year income mortgage 4 percent bonds, $29,574,060 par value of noncumulative 5 percent preferred stock ($100 par value a share), and $30,068,220 par value of common stock, ($100 par value a share). The debtor's existing equip-

ment obligation would be assumed by the reorganized company.

2. The sale of the $10,000,000 principal amount of new first mortgage bonds, the purchasers to receive 10 shares of the new common stock for each $1,000 principal amount of first mortgage bonds purchased.

3. The creation and maintenance of a capital fund of not to exceed $500,000 in any one year or $1,000,000 at any time, to be accumulated out of available net income remaining after payment of fixed charges.

4. The creation and maintenance of a one-half of 1 percent sinking fund for the retirement of the new income bonds out of available net income remaining after the payment of fixed charges, payments into the capital fund, and payment of interest on the new income bonds.

5. The holders of the debtor's existing first mortgage bonds to receive in exchange therefor and for accrued unpaid interest thereon all of the new income bonds and preferred stock, and $8,214,766 par value of the new common stock; and contingent rights [233] to subscribe for the purchase of the new first mortgage bonds.

6. The Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company, holders of the debtor's notes which are secured by the pledge of the debtor's general mortgage bonds, to receive in exchange therefor and for accrued unpaid interest thereon, $11,853,454 par

value of new common stock, the stock to be distributed among them on the basis of the general mortgage bonds held by each creditor, and contingent rights to subscribe for the purchase of the new first mortgage bonds.

7. The Western Pacific Railroad Corporation, an unsecured creditor to receive in exchange therefor subscription warrants for the purchase at par of the new first mortgage bonds to be sold.

8. The formation of a committee with such power as may be necessary to carry out the plan, and to determine, subject to the approval of the Commission, the form and provisions of the indentures, bonds, stock certificates and other instruments in connection with the carrying out of the plan; the committee to consist of three members, one member to be named by the bondholders' committee, one by the Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company as a group, and one by the Western Pacific Railroad Corporation.

9. The plan to be accepted and carried out in accordance with its terms and the provisions of section 77 of the Bankruptcy Act.

10. The obligations of the debtor not specifically provided for to be paid by the debtor or the reorganized company or *the* assumed by the reorganized company.

11. The plan should be effective as of January 1, 1937.

Prior to the approval of the plan by the court, the Commission should fix maximum limits of allowances for fees and expenses which [234] are to be paid by the debtor or the reorganized debtor with the approval of the court, as incidental to the reorganization, upon the basis of representations theretofore made to it, and pursuant to appropriate petition of interested parties to the court, transmitted to the Commission in accordance with the provisions of paragraph 2(1) of the General Orders in Bankruptcy XLIX of the United States Supreme Court.

In view of the provisions of subsection (f) of section 77, the Commission, when a plan is finally adopted, should give consideration to the granting of such authorization for the issue of such securities as may be required and appropriate for the execution of the plan.

The Bureau of Finance recommends that the Commission find that the plan as recommended herein will meet with the requirements of subsections (b) and (e) of section 77 of the Bankruptcy Act, and will be compatible with the public interest.

The journal entries covering the necessary accounting adjustments should be submitted to the Commission for approval before they are recorded on the books of the debtor or of the reorganized company.

An appropriate certificate should be issued.

[Endorsed on first page]: Exceptions must be filed with Commission and copies served so as to reach all parties or their attorneys who appeared at the hearing or on brief on or before Aug. 23, 1937.

[Endorsed]: Filed Aug. 6, 1937. [235]

Interstate Commerce Commission

Finance Docket No. 10913

THE WESTERN PACIFIC RAILROAD COMPANY REORGANIZATION.

REPORT AND ORDER OF INTERSTATE COMMERCE COMMISSION IN PROCEEDING UNDER SECTION 77 OF THE BANKRUPTCY ACT.

Submitted, November 17, 1937.

Decided, October 10, 1938. [236]

Plan of reorganization of the Western Pacific Railroad Company, pursuant to section 77 of the Bankruptcy Act, as amended, approved.*

Frank C. Nicodemus, Jr., for Western Pacific Railroad Company.

---

*Previous report in this proceeding, 207 I.C.C. 793.

Robert E. Coulson, James B. Alley, C. C. McChord, C. M. Clay, W. Meade Fletcher, Jr., Daniel Willard, Jr., Robert T. Swaine, Orville W. Wood, H. C. McCollom, and Orrin G. Judd for interveners.

REPORT OF THE COMMISSION

By the Commission:

Exceptions to the report proposed by our Bureau of Finance were filed by The Western Pacific Railroad Company, hereinafter called the debtor, by a committee for certain institutional bondholders, the A. C. James Company, the Railroad Credit Corporation, the Reconstruction Finance Corporation, and the Irving Trust Company, trustee under the debtor's general and refunding mortgage. The proceeding has been argued orally before us. Our conclusions differ somewhat from those of the Bureau.

The debtor, on August 2, 1935, filed a petition in the District Court of the United States for the Northern District of California, [237] Southern Division, stating that it was unable to meet its debts as they matured and that it desired to effect a plan of reorganization under the provisions of section 77 of the act of July 1, 1898, entitled "An Act to Establish a Uniform System of Bankruptcy Throughout the United States", as amended. The court, on the same day, made and entered an order approving the petition as properly filed, and among other things, authorizing and directing the debtor, pending further order of the court, to operate and

maintain the railroad and property of the debtor and to manage and conduct the debtor's business as a railroad company. Trustees were appointed on September 23, 1935, and their appointments were ratified by division 4 on October 30, 1935. 207 I.C.C. 793. Copies of the debtor's petition and the order thereon have been transmitted to us by the clerk of the court; and in like manner we have received lists of all known creditors and stockholders of the debtor, and copies of the orders of the court determining the time within which the claims of creditors might be filed or evidenced and dividing the creditors and stockholders into classes. These documents and other documents similarly received are now of record in the proceeding before us.

On February 8, 1936, the debtor filed a plan of reorganization with the court and us. Pursuant to the provisions of section 77(d) of the Bankruptcy Act, after due notice, we began public hearings upon the debtor's plan of reorganization on March 23, 1936. Two other plans for the reorganization of the debtor were filed during the proceeding; one on behalf of certain institutional bondholders on September 28, 1936, and the other on behalf of the A. C. James Company, a secured creditor of the debtor, on October 26, 1936. These parties intervened in the proceeding and were represented by counsel at the hearing. Other interveners, similarly represented, included the trustees under the mortgages, the Reconstruction Finance Corporation, and the Railroad Credit Corporation, secured creditors.

Hearings in this proceeding were closed on December 9, 1936, and briefs were filed on January 11, 1937.

Location and General Description of the Property.

The debtor owns or operates a total of 1,207.51 miles of standard-gage, steam railroad. The main lines extend 924.17 miles eastward from Oakland, Calif., to Salt Lake City, Utah, and north- [238] ward 111.81 miles from Keddie to Bieber, Calif., with operating rights over the Great Northern Railway, 46.38 miles, from Bieber to Hambone, Calif. The debtor also operates 4.2 miles of ferry service from Oakland to San Francisco, and 185.3 miles of second main track, of which 182.91 miles between Weso and Alazon, Nev., are owned by the Southern Pacific. This territory is known as the "Paired Track" district since the two lines are used as a double-track railroad by both companies. Various branch lines springing from the Oakland-Salt Lake City line are as follows:

Niles to San Jose, Calif.	23.07 miles
Calpine Junction to Calpine, Calif.	12.62 "
Hawley to Loyalton, Calif.	12.79 "
Reno Junction to Reno, Nev.	33.11 "
Burmester to Warner, Utah	15.52 "
Miscellaneous	21.79 "
Total	118.90 miles

Owned or Controlled and Jointly Affiliated Railroad Companies.

The debtor owns all the outstanding capital stock of the Sacramento Northern Railway, an electrically operated standard-gage, freight and passenger railroad, consisting of 276.2 miles of road serving and connecting San Francisco and Oakland with various Sacramento Valley cities, principally Pittsburg, Vacaville, Sacramento, Woodland, Marysville, Colusa, and Oroville, all in California.

By ownership of more than 99 percent of the outstanding capital stock, the debtor controls the Tidewater Southern Railway, which operates a standard-gage, steam freight line 61.38 miles in length, connecting Stockton with Manteca, Escalon, Modesto, and Turlock in the San Joaquin Valley of California.

The debtor owns all the outstanding capital stock of the Deep Creek Railroad Company, which owns and operates a standard-gage, steam railroad extending from Wendover to Gold Hill, Nev., a distance of 44.6 miles. In addition it owns 50 percent of the capital stock of the Salt Lake City Union Depot & Railroad Company; 33⅓ percent of the capital stock of the Central California Traction Company, operating an electrically operated freight railroad extending from Stockton to Sacramento, Calif., with a road mileage of 53.78 miles; and 50 percent of the capital stock of the [239] Alameda Belt Line, operating 15.86 miles of terminal switch-

ing line in the city of Alameda on San Francisco Bay.

None of the above subsidiary or affiliated companies has filed a petition under section 77 of the Bankruptcy Act, as amended.

Corporate and Financial History.

The debtor was incorporated under California laws on June 16, 1916, and as of July 14, 1916, acquired the railroads and all other properties of the Western Pacific Railroad Company sold at foreclosure on June 28, 1916. Upon incorporation, the debtor had an authorized capital stock of $75,000,000, consisting of 475,000 shares of common and 275,000 shares of preferred stock of the par value of $100 each.

The debtor, by its first mortgage dated June 26, 1916, to the First Federal Trust Company and Henry E. Cooper, trustees (Crocker First National Bank of San Francisco and Samuel Armstrong, now successor trustees), authorized a maximum of $50,000,000 of first-mortgage bonds to be at any time outstanding. A principal amount of $20,000,000 thereof was issued and sold as a part of the 1916 plan of reorganization, at 90, producing $18,000,000 in cash. Of this amount, approximately $2,000,000, together with cash from receivers, was applied in defraying the expenses of incorporation, expenses incurred in connection with foreclosure and reorganization proceedings, and payment of the distributive shares of non-participating first-mort-

gage bondholders of the old company; and $1,000,000 was retained as working capital. The balance of approximately $15,000,000 was deposited under the debtor's first mortgage and applied to capital purposes as provided in the mortgage.

The debtor thus commenced operations with $75,000,000, par value, of capital stock, and $20,000,000 of its first-mortgage bonds outstanding. Additional bonds were not issued by the debtor until 1921, in which year $4,180,000 of its first-mortgage bonds were sold at 85 and the $3,553,000 realized was used to purchase the properties of the Sacramento Northern Railroad through the Sacramento Northern Railway. As of September 30, 1936, a total of $49,290,100, face amount, of the debtor's first-mortgage bonds were outstanding, the additional bonds having been issued for the following purposes: $3,000,000 in 1922 to retire outstanding equip- [240] ment-trust certificates; $4,000,000 in 1925 for general capital purposes; $2,600,000 in 1926 for general capital purposes; $2,950,000 in 1927 in substitution of the $3,000,000 issued in 1922 then outstanding in the aggregate amount of $2,950,000; $5,090,000 in 1929 for general capital purposes; $572,800 in 1930 for purchase of San Francisco-Sacramento Railroad Company properties through the Sacramento Northern Railway; $5,000,000 in 1930 for general capital purposes of the debtor and its subsidiary, the Sacramento Northern Railway; $5,000,000 in 1931 and 1932 to finance in part construction and acquisition of the Northern

California extension; and $645,000 in 1931 for general capital purposes. Interest on the bonds was paid as due until March 1, 1934. The interest payment due on that date was not paid, and no interest payment has since been made.

The debtor issued in 1931 and 1932, in addition to the above-mentioned $5,000,000 of its first-mortgage bonds, $5,000,000 of gold debentures, to finance the cost of its Northern California extension. These debentures were retired in 1932 through the issue of notes payable to the A. C. James Company for $4,999,800 ($200 being paid in cash), which notes were secured by $6,249,500, face amount, of the debtor's general and refunding mortgage, series A, 5-percent gold bonds. The latter bonds were issued under the debtor's general and refunding mortgage, dated January 1, 1932, authorizing a maximum of $100,000,000 of general and refunding bonds to be at any one time outstanding, but reserving $49,292,300, principal amount, thereof for the purpose of refunding, paying, purchasing, redeeming, or otherwise acquiring the first-mortgage bonds then outstanding in that amount, and reserved $5,000,000, principal amount, thereof against the outstanding debentures. The reserved bonds were issuable upon the retirement of the securities against which they were reserved. None of the debtor's general and refunding bonds have been sold, but $18,999,500, principal amount, of such bonds have been nominally issued and are nominally outstanding solely as collateral to secure certain of the debtor's promissory

notes. Of these pledged bonds, $10,750,000 are now pledged as part security for the debtor's promissory notes to the Reconstruction Finance Corporation, $4,000,000 are pledged under its promissory notes to the Railroad Credit Corporation, and the remaining $4,249,500 are still pledged under the A. C. James [241] Company note. The indebtedness to the Reconstruction Finance Corporation and the Railroad Credit Corporation was contracted in 1932 and 1933.

Prior to the date of trusteeship, the debtor created equipment-trust obligations in the total amount of $13,400,000, of which $637,000 was outstanding as of June 30, 1938. On that date there also remained unpaid $220,265.50 on a conditional sale and lease of locomotives. All interest and principal payments on equipment trusts and the conditional sale lease have been met when due.

Subsequent to the date of trusteeship, by reports and orders of March 5 and October 15, 1936, January 25, 1937, and November 4, 1937, and by order of February 12, 1937, division 4 granted authority to the debtor's trustees to issue not exceeding $13,000,000 of trustees' certificates, and to assume obligation and liability in respect to not exceeding $2,320,000 of equipment-trust certificates. 212 I.C.C. 356; 217 I.C.C. 393, 395, and 777; and 224 I.C.C. 150. (The $3,000,000 trustees' certificates authorized by the order of October 15, 1936, were for the purpose of refunding the $3,000,000 trustees' certificates authorized by the order of March 5, 1936.)

The proceeds from the sale of those securities were to be used in the rehabilitation and improvement of the debtor's fixed plant and existing motive power and cars, and the acquisition of additional equipment. Under authority of the court, the trustees have initiated the rehabilitation program and it is now practically complete. Under our accounting rules such expenditures are chargeable in part to operating expenses. The inclusion of large amounts of normal operating expenses obviously reduces the amount of income available for interest and other fixed charges, and consideration should be given to this fact in studying the debtor's income accounts during periods when extraordinary expenditures were being incurred.

Present Financial Structure.

The trustees' balance sheet as of June 30, 1938, shows total assets of $173,650,980.19. Investments included therein total $165,785,843.99, including road and equipment $143,447,447.51, sinking fund and deposits $207,387.09, and miscellaneous physical property $4,650,137.02. Investments in affiliated com- [242] panies pledged under the debtor's first mortgage amount to $10,224,421.66, and consist of $99,500.40 of capital stock of the Salt Lake City Union Depot & Railroad Company, $999,500 of capital stock of the Sacramento Northern Railway, $450,000 of capital stock of the Deep Creek Railroad Company, $175,220.75 of capital stock of the Standard Realty & Development Company, $3,-

975,456.13 of Sacramento Northern Railroad 5-percent 20-year gold bonds, and $4,524,744.38 of notes receivable from the Sacramento Northern Railway. Investments in affiliated companies pledged under the debtor's general and refunding mortgage total $3,159,061.78, and consist of $1,223,848.94 of capital stock of the Tidewater Southern Railway Company, $128,651.56 of common stock, $264,715.47 of preferred stock, and $270,375.50 of first-mortgage 5-percent gold bonds of the Central California Traction Company; $465,600 of capital stock of the Alameda Belt Line, $1,318.63 of capital stock of other companies, and $804,551.68 of notes receivable from the Tidewater Southern Railway Company, Standard Realty & Development Company, and Deep Creek Railroad Company. Investments in affiliated companies unpledged amount to $5,019,210.68, of which $4,175,356.42 represent advances to the Sacramento Northern Railway, $798,422.82 advances to other affiliated companies, $5,500 represents capital stock of the Alameda Belt Line, and $39,931.44 due from the Railroad Credit Corporation. Other investments amount to $78,178.25 and consist principally of $74,472.88 of advances to the Railway Equipment & Realty Company, Limited.

Current assets are shown in the amount of $5,481,640.99, and comprise $1,108,785.85 in cash, $171,976.04 in special deposits, $1[illegible],057.66 of traffic and car service balances receivable, $156,068.64 of net balances receivable from agents and con-

ductors, $548,913.37 of miscellaneous accounts receivable, $3,140,625.85 of material and supplies, $14,377.91 of interest receivable from affiliated companies, $181,337.70 rents receivable, and other current assets of $23,497.97.

Deferred assets are shown in the amount of $317,418.69 and unadjusted debits in the amount of $2,066,076.52. The latter item consists of $5,541.17 of rents and insurance premiums paid in advance, $1,051,067.23 of discount on funded debt, and $1,009,468.12 of other unadjusted debits. [243]

Liabilities shown on the balance sheet of the same date are capital stock, $75,800,000, consisting of $47,500,000 of common and $28,300,000 of preferred stock. Government grants are shown at $169,281.11, and total long-term debt is shown as $68,926,004.44. Included in the latter item is $50,147,365.50 of funded debt unmatured, consisting of $49,290,100 of first-mortgage 5-percent gold bonds, $637,000 of equipment-trust certificates, and $220,265.50 due under the Baldwin Locomotive Works lease. The long-term debt includes also $11,108,851.83 of receivers' and trustees' certificates, and $7,669,787.11 of nonnegotiable debt to affiliated companies. Of this last item, $7,609,370.43 is due the Western Pacific Railroad Corporation.

Total current liabilities are shown as $26,316,674.89. They include $2,445,609.88 of notes payable to the Railroad Credit Corporation, $461,787.30 of traffic and car service balances payable, $1,175,129.61 of audited accounts and wages payable, $112,-

639.10 of miscellaneous accounts payable, and $12,989,714.34 of interest matured unpaid. The latter amount consists of $131,779.15 of interest on Railroad Credit Corporation notes, $639,217.91 of interest on Reconstruction Finance Corporation notes, $1,124,955 of interest on A. C. James Company notes, $440 of interest on equipment-trust certificates, $11,093,019.78 of interest on first-mortgage 5-percent gold bonds, and $302 of interest on trustees' certificates. There also are included in the total current liabilities $894,935 accrued unmatured interest, $8,987.48 accrued unmatured rents, $4,999,800 of notes payable to A. C. James Company, $2,963,000 of notes payable to the Reconstruction Finance Corporation, $3,000 trust certificates, and $262,322.18 other current liabilities.

Total deferred liabilities are shown as $19,521.96, and total unadjusted credits as $11,334,893.42. The latter comprises $433,529.54 of tax liability, $6,890.25 of premium on equipment-trust certificates, $10,811,559.91 of accrued depreciation on equipment, and $82,913.72 of other unadjusted credits.

The above-mentioned liabilities total $182,566,375.82. Two additional items totaling $7,171,169.07, are described as a surplus-investment in road equipment and cash materials, and other property purchases, representing the value of Western Pacific Railway property purchased in excess of cash paid, and for value of capital [244] stock issued in exchange for same. This amount, added to the figure of $182,566,375.82, produces the sum of $189,737,544.89.

The balance sheet shows a deficit of $16,086,564.70 in corporate surplus. This consists of appropriated surplus amounting to $10,871,559.44 represented principally by additions to property through income and surplus, and an accumulated debit balance in profit and loss of $26,958,124.14.

Traffic and Revenue.

The main line of the debtor's railroad extending from Oakland, Calif., to Salt Lake City, Utah, forms an important part of a through route from the Pacific coast to Chicago, Ill., and other important Middle Western points. Fast through schedules are maintained by the debtor and the Denver & Rio Grande Western Railroad and Missouri Pacific Railroad Company, with which companies the debtor has close affiliations. Its line also connects with that of the Atchison, Topeka & Santa Fe Railway Company at Stockton, Calif., and with that of the Great Northern Railroad Company at Bieber, Calif., thus forming a link in a north and south route on the Pacific coast. The latter route is comparatively new, having been established in the latter part of 1931 by the construction of the debtor's line northward from Keddie to Bieber, known as the Northern California extension, and the extension of the line of the Great Northern southward from Klamath Falls, Oreg., to Bieber.

Although operations over the debtor's Northern California extension began in the depth of the depression, considerable traffic has moved over it from

the start. Traffic over this extension and revenue derived therefrom are considered separately from the debtor's other traffic and revenues. During the years 1924 to 1929, inclusive, the debtor and its subsidiary, the Sacramento Northern Railway, had an agreement with the Southern Pacific Company for the transportation for the Southern Pacific of certain carload traffic between Chico, Calif., and Weso, Nev., at the rate of $60 per car, of which the debtor received $54 per car. This agreement was terminated at the end of 1929, and since the tonnage moved under agreement and the revenue therefrom were large, the statistical data shown below relating to the debtor's traffic have been adjusted by excluding the freight moved under that agreement. [245]

The freight traffic handled and the freight revenue received by the debtor in the years 1923 to 1935, inclusive (traffic and revenue of subsidiaries will be discussed hereinafter), excluding traffic and revenue under the Chico-Weso Bridge agreement and that handled via the Northern California extension, were as follows:

Year	Cars	Tons	Revenue	Revenue per ton	Percent of increase or decrease over or under preceding year. Tons	Revenue
1923	96,531	2,875,108	$10,513,355	$3.66	—	—
1924	98,297	2,854,602	10,562,340	3.69	—0.7	—0.5
1925	113,633	3,198,214	11,736,434	3.67	+12.0	+11.1
1926	120,545	3,326,637	12,252,189	3.68	+ 4.0	+ 4.4

1935	92,902	2,489,273	9,910,386	3.98	— 4.9	+ 8.0

Agricultural and manufactured and miscellaneous products comprised the greater part of the traffic moving over the debtor's line from Salt Lake City to Oakland. In the period 1928 to 1935, inclusive, for example, of the total carloads of commodities carried, manufactured and miscellaneous products constituted 33⅓ percent, and agricultural products 33⅓ percent. Forest products accounted for 7.5 percent, mineral products 19⅔ percent, and animal products 6 percent. Of the total freight revenue received from the transportation of this freight, approximately 40 percent was derived from manufactured products, 28 percent from agricultural products, 5 percent from forest products, 13.5 percent from mineral products, 5⅔ percent from animal

products, and the remainder from less-than-carload freight.

The above tabulation shows that the debtor's freight traffic in 1930, amounting to 3,776,046 tons, was the greatest for any of the years. There was moved an average of 2,573,269 tons in the following five years, 1931-35, inclusive, a decrease of 32 percent as compared with 1930. During the same period, agricultural products transported declined 20 percent, animal products 16.7 percent, mineral products 42.2 percent, forest products 44.4 percent, manu- [246] factured products 28 percent, and less-than-carload freight 29.7 percent, as compared with 1930.

Freight carried in 1935 amounted to 2,489,273 tons, a decrease of 35 percent under 1930. In 1935, traffic in agricultural products declined 25.1 percent, animal products 27.9 percent, mineral products 51.4 percent, forest products 45.6 percent, manufactured products 20.6 percent, and less-than-carload freight 20.8 percent under 1930.

Revenue from freight in 1930 amounted to $13,796,125. During the period 1931-35, inclusive, freight revenue averaged $9,448,183, a decline of 32.3 percent as compared with 1930. In the same period revenue from agricultural products declined 29.3 percent, animal products 20.8 percent, mineral products 60.9 percent, manufactured products 31.1 percent, and less-than-carload freight 28.2 percent.

Freight revenue amounted to $9,910,386 in 1935, a decrease of 28.9 percent as compared with 1930.

In 1935, revenue received from agricultural products decreased 28 percent, animal products 34.7 percent, mineral products 43.4 percent, forest products 40.3 percent, manufactured products 19.6 percent, and less-than-carload freight 37.2 percent under 1930.

Forty-three percent, or 1,637,984 tons, of the debtor's freight traffic in 1930 consisted of traffic interchanged with the Denver & Rio Grande Western, Oregon Short Line, and Union Pacific. During the period 1931-35, inclusive, traffic interchanged with those lines averaged 1,196,971 tons, or a decrease of 20 percent under 1930. For the year 1935, traffic interchanged with the same lines amounted to 1,381,186 tons, or a decrease of 15 percent under 1930. It should be noted also that for many years the debtor was dependent upon connections for the greater part of its traffic, and, although to a less degree than formerly, it still receives more than one-half of its total freight from connecting carriers, and approximately one-third of it is received from and delivered to connections.

The debtor estimates that the revenue from freight moving over its line from Oakland to Salt Lake City will amount to $10,084,951 in 1936, $10,857,252 in 1937, $11,629,553 in 1938, $12,518,672 in 1939, and $13,747,996 in 1940. The latter amount is an increase of $3,837,610, or 38.7 percent, over 1935 revenue, and approximately equals that received in 1930. [247]

Freight moved over the Northern California extension in 1932 amounted to 340,107 tons, and $1,098,016 in revenue was derived therefrom. In the year 1933, tonnage and revenue amounted to 396,862 tons and $1,491,466 revenue, in 1934 to 596,378 tons and $2,119,427 revenue, and in 1935 to 639,980 tons and $2,289,858 revenue. The principal commodities carried consisted of forest, manufactured, and agricultural products. The debtor estimates that revenue from freight moved over this line will amount to $2,550,524 in 1936, $2,973,750 in 1937, $3,406,978 in 1938, $3,819,559 in 1939, and $4,171,625 in 1940. The latter amount is an increase of $1,881,767, or 82 percent, over 1935 revenue.

Total revenue to be derived from freight in the period 1936 to 1940, inclusive, is estimated by the debtor to amount to $12,635,475 in 1936, $13,831,002 in 1937, $15,036,531 in 1938, $16,338,231 in 1939, and $17,919,621 in 1940. Compared with 1935, these amounts represent an increase of 3.5 percent in 1936, 13.3 percent in 1937, 23.3 percent in 1938, 33.9 percent in 1939, and 46.8 percent in 1940.

A witness for the debtor testified that the increased revenues estimated for the future were based on expected increases in traffic and freight rates. He further testified that the drastic decline in revenues recently suffered by the debtor resulted not only from the business depression but also from intense competition from water and motor carriers.

The debtor and other lines with which it has joint freight rate arrangements have water competition

via the Panama Canal between the Pacific coast and Atlantic and Gulf ports, as well as in connection with canal lines and inland waterways. There is also strong competition coastwise between California and Washington. It was the opinion of the debtor's witness that increased operating expenses would compel water carriers to increase rates and thereby would divert traffic to railroads. The witness also was of the opinion that railroad freight rates, as a whole, are as low as they will be for a number of years, and the tendency in the immediate future will be towards a higher level of rates.

This witness stated that prior to the advent of motor truck competition, practically all the debtor's traffic between California and Utah moved under class rates, which for the first four classes were $2.165, $1.845, $1.625, and $1.35 per 100 pounds between San Francisco and Utah common points. Motor truck competition [248] made it necessary for the debtor to publish pick-up and delivery rates of $1 and $1.25 per 100 pounds on a great many commodities, and today at least 90 percent of such traffic of the debtor moves under the reduced rates. It was his opinion that effective regulation of motor carriers would tend to divert traffic to the railroads.

Passenger, mail, express, and other related revenues received by the debtor in the years 1923 to 1935, inclusive, were as follows:

Year	Revenues	Year	Revenues
1923	$3,250,677	1930	$1,738,884
1924	2,891,137	1931	1,288,093
1925	2,697,899	1932	645,760
1926	2,515,900	1933	433,959
1927	2,350,320	1934	457,481
1928	2,217,421	1935	559,816
1929	2,135,828		

It thus appears that such revenues steadily declined from 1923 to 1934, the decrease amounting to 79.7 percent between 1923 and 1933. In 1935 such revenues had increased 22.5 percent over 1933, but were still 73.8 percent below those for 1923. The debtor estimates that revenues from these sources will amount to $654,710 in 1936, $1,063,058 in 1937, $1,299,060 in 1938, $1,860,815 in 1939, and $1,535,372 in 1940. At the time of the hearing the debtor expected to inaugurate additional passenger service between San Francisco and Salt Lake City in May, 1937, only one passenger train daily between those points having been operated since April 24, 1932. By shortening of schedules and with greater advertising of the improved service of the Denver & Rio Grande Western via the Dotsero Cut-off, one of the most scenic routes between California and the East, passenger revenues should be increased materially.

The debtor filed a forecast showing that total railway operating revenues would amount to $13,438,342 in 1936, $15,053,934 in 1937, $16,507,579 in 1938, $18,383,490 in 1939, and $19,654,935 in 1940.

As a bridge line to and from the Pacific coast the debtor's railroad may, as a result of the completion of the Dotsero Cut-off in 1934, come into greater use. The railroad distance between Denver and Salt Lake City and points east of the former and west of the latter is greatly shortened by use of this Cut-off and the Moffat Tunnel. The rehabilitation program of the debtor's road now in [249] progress and the betterment of its equipment should enable it to give improved service. As a consequence, the debtor and the lines with which it is closely affiliated should be in better position to compete with the Southern Pacific and Union Pacific for transcontinental traffic. Increased traffic over its Northern California extension reasonably may be expected. Greater through and local traffic should result from a further revival in general business conditions. Whether revenues in the future will reach the level estimated by the debtor for 1940, is open to doubt. To the extent that the debtor relies upon increased freight rates, and a recovery of the traffic lost to competing forms of transportation under present State and Federal regulatory conditions, its estimates rest upon uncertainties.

Traffic and Revenue of Subsidiaries.

The main line of the Sacramento Northern Railway, separately operated, extends from Oakland to Chico, Calif., and both freight and passenger services are rendered over it. Its freight traffic consists

largely of agricultural, manufactured and miscellaneous, and mineral products.

Freight traffic and revenue derived therefrom for the years 1930 to 1935, inclusive, were as follows:

Year	Tons	Revenue
1930	840,306	$1,234,696
1931	743,220	971,482
1932	629,792	769,412
1933	649,554	717,435
1934	704,472	760,033
1935	697,464	760,528

A witness for the debtor testified that the decline in traffic was occasioned by competition of motor trucks, depressed economic conditions, and the displacement of coal by oil and natural gas. It was his opinion, however, that the Sacramento Northern's freight earnings in the future should increase materially from an improvement in the market demand for California fruits and vegetables, and that improved facilities recently had been made available to the carrier's shippers. He further testified that general business conditions were improving and that the carrier was in a better position to meet truck competition. The witness was of the opinion that the carrier's [250] gross revenues from transportation and other railway operations would amount to $1,322,676 in 1936, $1,417,458 in 1937, $1,528,492 in 1938, $1,616,891 in 1939, and $1,689,038 in 1940. The latter amount is a 38.3 percent increase over gross revenues for 1935, and is approximately

$40,775 greater than the actual gross revenue for 1931, but is approximately $394,000 less than the actual for 1930.

The main line of the Tidewater Southern Railway extends from Stockton to Hillmar, Calif., serving a territory predominantly agricultural. The carrier's freight traffic consisted principally of agricultural products and manufactured and miscellaneous commodities.

Freight traffic and revenue derived therefrom for the years 1930 to 1935, inclusive, were as follows:

Year	Tons	Revenue
1930	199,607	$425,506
1931	227,856	264,796
1932	249,820	230,450
1933	255,833	202,434
1934	266,274	271,519
1935	211,264	272,299

A witness for the debtor testified that the Tidewater Southern's total railway operating revenues would amount to $287,136 in 1936, slightly higher than those in 1935, but that since the small area served by the line does not afford much opportunity for increased acreage production, earnings are not expected to increase materially in the future.

The Deep Creek Railroad Company operates 44.6 miles of line south from Wendover, Utah, serving a territory devoted principally to mining. Its freight revenues are dependent largely on mining activities in the Gold Hill District at the southerly terminus

of the line, although some revenue is derived from the movement of sheep to winter ranges in the fall and out in the spring.

A witness for the debtor testified that the revenues of this line have in the past few years been nominal, but with a revival in mining it is possible for a traffic to develop which would increase materially the revenue. For example, in 1923 revenues were $42,385, in 1924 $71,670, and in 1925 $40,268. In 1934 and 1935, however, they were only $7,383 and $5,355, respectively. For the next several years revenues are not expected to increase. [251]

Earnings Available for Charges.

The reported consolidated net income of the debtor's system available for payment of interest on funded debt for the years 1926-35, inclusive, was $4,759,282 in 1926, $2,674,494 in 1927, $2,964,371 in 1928, $2,529,846 in 1929, $1,552,487 in 1930, $186,708 deficit in 1931, $252,706 in 1932, $674,007 in 1933, $1,084,244 in 1934, and $805,589 in 1935. Operating ratio percentages for the same years were, respectively, 70.3, 79.2, 80.3, 83.2, 84, 91, 85.8, 83, 81.1, and 83.7.

It would appear from the record, however, that before the foregoing amounts may be considered indicative of future earnings, certain factors should be taken into consideration. It was testified, for example, that a substantial amount of deferred maintenance had been permitted to accrue on the debtor's property by 1927. Beginning in that year

and continuing into 1931, considerable sums were expended yearly in an effort to overcome existing deferred maintenance. This program of rehabilitation was discontinued in 1931 by reason of drastically declining revenues, and it was testified that approximately $5,000,000 of deferred maintenance existed in the debtor's property at the end of 1935. Although the witnesses were unable to allocate any specific amount for undermaintenance to particular years, it is reasonably certain that maintenance was deficient during the years 1930 to 1935, inclusive. Total system maintenance expenditures for the years 1922 to 1935, inclusive, were $73,673,799, and total system operating revenues were $219,808,043. By dividing total maintenance expenditures, plus the $5,000,000 of deferred maintenance, by total operating revenues, a ratio of 35.79 percent results which may, for the purposes of this proceeding, be considered as normal for the period. If this ratio is applied to the operating revenues for the years 1931 to 1935, inclusive, and the resulting amounts are substituted for the amounts reported for maintenance expenditures in those years, the deficit in income reported available for interest for 1931 would be increased $263,231, and the amounts reported for 1932 would be decreased $692,282, for 1933 $408,488, for 1934 $843,627, and for 1935 $585,633. If such adjustments are made, however, the results should be further adjusted by adding $122,735 for 1931, $161,286 for 1934, and [252] $436,036 for 1935, since those amounts were re-

ported expended in those years for rehabilitation and improvements.

To be indicative of probable future earnings, further adjustments should also be made. The amounts reported as income available for interest reflect amortization of discount on funded debt of $139,698 in 1931, $144,911 in 1932, $146,878 in 1933, $144,063 in 1934, and $143,433 in 1935. Since the reorganized company's income would not be affected by such items, those amounts should be credited to the income reported in those years. The income reported for 1934 and 1935 should also be adjusted for the $97,683 accrued by the debtor for railroad retirement in 1934 and credited in 1935. The report of our Bureau of Accounts also shows that deductions of $279,946 in 1931, $98,696 in 1932, and $333,408 in 1933, and a credit of $17,057 in 1934, should be made for improper accounting.

If the foregoing adjustments were made, the consolidated system income available for interest for the years 1931 to 1935, inclusive, would be $467,000 deficit in 1931, $393,000 for deficit in 1932, $80,000 in 1933, $661,000 in 1934, and $702,000 in 1935, or an average of $116,600 per annum for the period. It is true that such amounts would not reflect probable increased earnings from the debtor's Northern California extension, calculated by the debtor at $500,000 per annum if operations over the line had become seasoned. On the other hand, they do not reflect present social security and railroad retirement

taxes on a retroactive basis, nor increases in wages or prices since the hearing.

For the year ended December 31, 1936, the debtor reported total system operating revenue of $16,547,344 and total system operating expenses of $14,449,275, of which $1,585,530 was attributed to the current rehabilitation program. If the latter expenses, as well as $135,401 for amortization of discount on funded debt, be eliminated, the income available for interest would be $1,902,033, as compared to the $181,102 actually reported. For the year ended December 31, 1937, the debtor reported total system operating revenue of $17,918,485, and total system operating expenses of $16,987,490, of which $1,837,495 was attributed to the current rehabilitation program. Eliminating the latter and the item of $135,401 reported for amortization of discount on funded debt; the income available for interest for the period would be $1,069,785 instead of the reported deficit of $903,112. [253]

In statements filed in this proceeding the debtor estimated that total operating revenues of its system for the years 1936-40, inclusive, would be $15,050,200, $16,761,200, $18,325,200, $20,288,200 and $21,632,000, respectively. Excluding operating charges incident to its current rehabilitation program, it estimated that consolidated income available for interest would be $1,521,386 in 1936, $2,180,585 in 1937, $2,738,886 in 1938, $3,365,836 in 1939, and $3,769,836 in 1940, or an average of $2,715,306 for the period. Operating ratios estimated for the same years were, respectively, 79.28, 76.01, 73.56,

72.28, and 75.6, and expenditures incident to its current rehabilitation program were estimated at $1,747,384 in 1936, $2,021,312 in 1937, and $1,280,071 in 1938.

These estimates were based on assumed revenues, previously analyzed, and assumed operating ratios, which are influenced greatly by operating revenues. It is significant that the estimates were based, among other things, upon the assumption that there would be increases in rates but that there would be no increases in operating costs, either through prices of material or wages. The estimates also ignored necessary deductions for the creation and maintenance of the various funds proposed under the debtor's plan. It is reasonably certain that some traffic diverted to motor carriers in recent years will not be regained. Strenuous competition must be expected not only from those carriers, but from water carriers and, especially, from other strong railroads serving the same territory as the debtor. This latter competition compels the movement of trains on schedule regardless of the load. Long stretches of the territory through which the debtor's road extends are sparsely populated and productive of little or no traffic. The debtor's volume of traffic is subject to wide fluctuations, and the topography of the country entails expensive helper service over high summits.

Although the 1936 adjusted income available for interest exceeded the debtor's estimate, it is significant to note that the amount reported for 1937,

when adjusted, was $832,248 less than the adjusted amount reported for 1936, and $1,110,801 less than the debtor's estimate for 1937. The decrease in income available for interest occurred despite the large increase in operating revenues in the 1937 period over the 1936 period. The decreased income is undoubtedly accounted for by reason of increased costs. [254] We have heretofore stated that the debtor's forecast of future earnings was based on assumed increases in rates but no increases in costs. The results for 1937 clearly demonstrate the fallacy of the latter assumption. The results of operation reported for the first six months of 1938 cast further doubt upon the accuracy or trustworthiness of the debtor's estimate of future earnings. For those months there was a deficit of $1,120,403, in available income, after adjustment similar to that made in 1936 and 1937, in the system's consolidated income available for interest. It is true that ordinarily the debtor's earnings are much greater in the last six months than the first six months of the calendar year. However, the results for the 12 months, July, 1937, to June, 1938, show a deficit of $264,000 in the system's consolidated income available for interest. A consideration of these recent data (reported subsequent to the preparation of the debtor's estimate), together with other data of record, convinces us that too great reliance may not be placed upon the debtor's estimate of future earnings, and that the capital structure of the reorganized company must be conservative.

Value for Rate-making Purposes.

Under section 19a of the Interstate Commerce Act, this Commission, by division 1, in Western Pacific Ry. Co., 29 Val. Rep. 239, reported the value for rate-making purposes of the property owned by the debtor to be $63,321,000 as of June 30, 1914, excluding working capital. In other proceedings, we reported the value for rate-making purposes of the properties of the debtor's wholly owned subsidiaries, Sacramento Northern Railway, Tidewater Southern Railway Company, and Deep Creek Railroad Company, in the total amount of $18,123,283, as of their respective valuation dates. If there be added to the above amounts the net costs of additions and retirements between valuation dates and December 31, 1935, the total would be $139,600,455.

Classes of Creditors and Stockholders.

Pursuant to section 77(g)(7) of the Bankruptcy Act, the district court entered an order, on August 20, 1935, dividing creditors and stockholders, for the purposes of the plan and its [255] acceptance, into the following classes: Class 1, first-mortgage bonds; class 2, general and refunding bonds; class 3, debtor's secured promissory notes to the A. C. James Company; class 4, debtor's secured promissory notes to the Reconstruction Finance Corporation; class 5, debtor's secured promissory notes to the Railroad Credit Corporation; class 6, equipment obligations to the Baldwin Locomotive Works (assigned to Fidelity-Philadelphia Trust Company, trustee); class 7, equipment-trust certificates un-

der agreement of March 1, 1923; class 8, equipment-trust certificates under agreement dated March 15, 1924; class 9, equipment-trust certificates under agreement dated May 1, 1929; class 10, debtor's obligations as to advances made on open account by the Western Pacific Railroad Corporation; class 11, debtor's obligations as to advances made on open account by the Western Realty Company; class 12, debtor's preferred stock; class 13, debtor's common stock; class 14, all other claims, obligations, and liabilities not hereinbefore specifically described.

As recorded on the trustees' balance sheet of June 30, 1938, class 1 items consisted of $49,290,100, principal amount, of first-mortgage 5-percent bonds, on which accrued and unpaid interest amounted to $11,914,521; class 2 items consisted of $18,999,500, principal amount, of general and refunding mortgage 5-percent bonds, entirely pledged as collateral for certain of the debtor's notes; class 3 items consisted of $4,999,800, face amount, of notes to the A. C. James Company, on which accrued and unpaid interest amounted to $1,124,955, and which are secured by $4,249,500, principal amount, of the debtor's general and refunding bonds, and a second lien upon $2,000,000, principal amount, of the same issue of bonds held by the Railroad Credit Corporation; class 4 items consisted of $2,963,000, face amount, of notes to the Reconstruction Finance Corporation, on which accrued and unpaid interest amounted to $649,181, the notes being secured by $10,750,000, principal amount, of the debtor's gen-

eral and refunding bonds, and voting trust certificates for half of the voting stock of the Denver & Rio Grande Western Railroad Company; and a second lien upon $2,000,000, principal amount, of the same issue of bonds held by the Railroad Credit Corporation; class 5 items consisted of $2,445,610, face amount, of notes to the Railroad Credit Corporation, on which accrued and unpaid interest amounted to [256] $135,296, which notes are secured by $4,000,000, principal amount, of the debtor's general and refunding bonds, and a second lien upon the security held by the Reconstruction Finance Corporation, an assignment of certain advances by the Western Pacific Railroad Corporation, and an assignment of the distributive share of the debtor under the marshaling and distributing plan, 1931; class 6, 7, 8, and 9 items consisted of various equipment obligations aggregating $857,265; class 10 items consisted of $5,766,309, principal amount, of advances to the debtor by the Western Pacific Railroad Corporation, on which accrued and unpaid interest amounted to $1,843,061; class 11 items consisted of $50,000, principal amount, of advances to the debtor by the Western Realty Company, on which unpaid interest amounted to $10,417; class 12 items consisted of $28,300,000, par value, of the debtor's preferred stock; class 13 items consisted of $47,500,000, par value, of the debtor's common stock; and class 14 items consisted of various other claims not specifically described by the court.

The proceeds from the loans comprising class 3, 4, and 5 items were applied by the debtor in partial

payment of the cost of constructing its Northern California extension, for payment of interest on its first-mortgage bonds and equipment obligations, miscellaneous capital expenditures, payment of taxes, and for advances to subsidiary railroad operating companies.

Proposed Plans of Reorganization.

The capital structures proposed for the reorganized company in the three plans filed, in the debtor's plan, if modified in accordance with the debtor's suggestions during the hearing and on brief, the distribution of the new securities to be issued under the plans, and the main features thereof, are summarized below.

Existing equipment obligations would not be disturbed under any of the plans. As filed, the debtor's plan would become effective as of January 1, 1936. The debtor later suggested January 1, 1937, as the effective date, that being the effective date of the other plans.

The plan of reorganization originally submitted by the debtor contemplated an initial issue of $25,675,900 of new first-mortgage 4-percent bonds, $41,774,796 of new 5½-percent income mortgage [257] bonds (cumulative for the income period in which such interest is payable and for the four income periods next succeeding the income period in respect to which such interest is payable), of which $20,887,398 would be series-A bonds, and $20,887,398 would be series-B bonds, $8,092,709 of new noncumulative junior lien 6-percent income bonds, or a

total of $75,543,405, principal amount, of bonds. The plan further provides that 926,622 shares of new no-par common stock be authorized, of which 300,000 shares would be issued forthwith, and 626,622 shares would be reserved for issue upon conversion of $20,887,398 of the new income bonds.

Under the debtor's plan, its existing first-mortgage 5-percent bonds would be exchanged on the basis of 30 percent in the new first-mortgage 4-percent bonds, and 70 percent in new income mortgage 5½-percent bonds plus additional income bonds equal in face amount to the unpaid interest. Ten million dollars of the new first-mortgage 4-percent bonds would be sold at par to the Reconstruction Finance Corporation to provide new money for the reorganized company. In consideration of that purchase, the Reconstruction Finance Corporation would receive for its claim against the debtor treatment equivalent to that given to the holders of the existing first-mortgage bonds.

The new junior lien income 4-percent bonds would be issued to the Railroad Credit Corporation and A. C. James Company in settlement of their claims, each to receive new bonds equal in face amount to the principal of the claim plus unpaid interest.

All the new stock would be placed in a voting trust under which three voting trustees nominated by the debtor and approved by the bondholders' committee would act pursuant to a voting trust agreement which would be acceptable to the debtor and the bondholders' committee. The voting trust would con-

tinue until 10 years from the date of confirmation of the plan. A majority of the debtor's board of directors would be nominees of the holders of income bonds, and as long as the Reconstruction Finance Corporation holds more than $500,000 of the first-mortgage bonds, the voting trustees would elect to the board of directors a person designated or nominated by that corporation. In respect to the 300,000 shares of common stock immediately issuable under the plan and to the shares which may be issued on conversion of the income bonds [258] voting trust certificates would be issued. The certificates for 150,000 shares of the common stock would be placed in escrow with the trustee of the income mortgage and would be transferred to the holders of income mortgage bonds at $27.50 per share if, commencing April 1, 1941, full interest was not paid on the income bonds in respect to the next preceding income period.

The debtor's plan further provided that there be created a contingency reserve fund of $500,000 to be made available for the purpose of paying fixed interest charges, principal of and dividends on equipment obligations and operating expenses which could not otherwise be provided for without, in the opinion of the board of directors, unduly impairing free working capital. The fund would be created initially from the proceeds of the $10,000,000 of new first-mortgage bonds to be sold in the reorganization, and thereafter maintained out of the net income remaining after the payment of fixed charges.

There would be created also out of available net

income before the payment of interest on income bonds a capital fund to be applied for capital investments made in the calendar year in which the fund is set aside, and no additional securities would be issued against such expenditures. The amount set aside in the capital fund for any calendar year would not exceed $500,000 per year during the years 1936 to 1940, inclusive, $1,000,000 per year during the years 1941 to 1945, inclusive, and in all subsequent years not more than 3 percent of gross revenues.

Provision for a sinking fund in an amount not exceeding in any calendar year one-half of 1 percent of the principal amount of the new income bonds, series A, also is made in the plan. The fund would be created and maintained out of net income remaining after payment of fixed charges, maintenance of the reserve fund, capital fund, and interest payments on income bonds, and would be applied to the redemption of the series-A income bonds.

The debtor's plan also provides for an additional interest fund to be created and maintained out of net income remaining after payment of fixed charges, payments in respect to the reserve fund and the capital fund, and interest on income mortgage bonds and junior lien bonds. The fund would not exceed one year's interest on all outstanding first-mortgage bonds and would be available only for the payment of interest on such bonds. [259]

During the hearing and on brief, counsel for the debtor suggested that the debtor's plan be modified

by providing that (1) the rate of interest on all bonds be 4 percent per annum, (2) there be created sinking funds of not less than one-half of 1 percent or more than 1 percent for the redemption of all bonds, (3) the escrow agreement with respect to the 150,000 shares of common stock be modified so that there would not be a peremptory forfeiture on the due date of interest, because such interest may be paid in cash out of the available net income of the next four income periods, and be further modified so that there would be no forfeiture at all if the failure to earn interest were caused by excessive maintenance or undue capital expenditures, (4) the voting trust be eliminated from the plan, and (5) there be issued $7,245,274, par value, of 4-percent noncumulative preferred stock to the Western Pacific Railroad Corporation and the Western Realty Company.

With the effective date of the plan as of January 1, 1937, the plan, modified as suggested, would provide for the initial issue of $25,675,900, principal amount, of new first-mortgage 4-percent bonds, $45,219,530, principal amount, of new income mortgage 4-percent bonds, $8,386,040, principal amount, of new junior lien income 4-percent bonds, or a total of $79,281,470 principal amount, of bonds $7,245,274, par value, of new 4-percent preferred stock, and 300,000 shares of no-par common stock.

Subsequent to the issue of the report proposed by our Bureau of Finance, counsel for the debtor suggested on brief in support of exceptions to the report that the debtor's plan be modified further by

providing that the reorganized company issue $19,858,020, principal amount, of new first-mortgage 4-percent bonds, $39,432,100, principal amount, of new income 4-percent bonds, $10,487,707, principal amount, of 15-year income notes to be secured by $18,999,500, par value, of new prior-lien 4-percent preferred stock, $9,503,664, par value, of new 4-percent participating preferred stock, $7,188,607, par value, of new junior 4-percent convertible preferred stock, and 300,000 shares of new no-par-value common stock. Under the proposed modifications, existing first-mortgage bondholders would receive new first-mortgage bonds for 20 percent of the principal of their bonds, new income bonds for the remaining 80 percent, and new prior-lien preferred stock for accrued interest. The present holders of secured notes would receive new 15-year [260] notes for the face value of their notes and presumably new prior-lien preferred stock for accrued interest. The unsecured creditors would receive new junior convertible preferred stock in settlement of their claims, and the holders of present capital stock would receive in exchange therefor all the new no-par-value common stock.

Under the bondholders' plan, the reorganized company would issue initially $19,858,020, principal amount, of new first-mortgage 4-percent bonds, $19,716,040, principal amount, of new income mortgage 5-percent bonds (cumulative against only 3 years' income), or a total of $39,574,060, principal amount, of new bonds. The plan further proposes the issue of $27,930,800, par value, of new participating 6-

percent preferred stock (cumulative only to the extent that dividends are earned), and not less than 339,995 shares, nor more than 489,995 shares, of new no-par common stock.

The existing first-mortgage 5-percent bonds would be exchanged on the basis of 20 percent in new first-mortgage 4-percent bonds, 40 percent in new income mortgage 5-percent bonds, and 40 percent in new participating 6-percent preferred stock, accrued interest also being commuted into the latter stock. As provided in the debtor's plan, $10,000,000 of the new first-mortgage 4-percent bonds would be sold in order to provide new money for the reorganized company.

The claims of the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company would be converted into the new common stock (taken at $100 per share) on the basis of the collateral pledged under the debtor's notes to those creditors. Such stock, amounting to 189,995 shares, would be deposited under an escrow agreement subjecting the stock to purchase warrants. The reorganized company would be entitled to purchase any of the certificates to be issued under the escrow agreement under certain terms. The certificates to be issued to the Reconstruction Finance Corporation could be purchased by the other two secured creditors, and those of the Railroad Credit Corporation by the A. C. James Company.

The Western Pacific Railroad Corporation would be allotted purchase warrants, entitling the holders

thereof to purchase on or before December 1, 1941, all or any part of the 189,995 shares of the new common stock at the price of $62 per share, plus interest thereon at the rate of 4 percent per annum from January 1, [261] 1937. In addition to its option under the escrow agreement the Western Pacific Railroad Corporation would be granted, through issue to it of subscription warrants, the first opportunity to provide the $10,000,000 of required new money, receiving therefor the $10,000,000 new first-mortgage 4-percent bonds and 150,000 shares of the new common stock.

To the extent that the Western Pacific Railroad Corporation should fail to exercise the subscription warrants, the bondholders' plan provides that the new money be provided upon less favorable terms to the debtor by the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company; and to the extent that they, in turn, should fail to provide it, the plan provides that it be supplied upon still less favorable terms by the present first-mortgage bondholders.

The bondholders' plan further provides that control of a majority of the board of directors of the reorganized company be vested in the new preferred stock until the reorganized company shall have demonstrated its capacity to pay a continuous return on that stock. A contingency reserve fund and a capital fund similar in all respects to those proposed by the debtor are provided for in the bondholders' plan. It also provides for a one-half of 1 percent sinking

fund for the redemption of the new income bonds, but only after payment of fixed and other contingent charges and the payment of dividends on preferred stock.

On briefs in support of exceptions to the proposed report of our Bureau of Finance, the bondholders' committee proposed that its plan be modified (1) by eliminating the provision for the contingency reserve fund, (2) to make the sinking fund payable out of available net income before preferred dividends, but reduce it to an annual one-half of 1 percent fund instead of a 1-percent fund, (3) to clarify the provisions respecting the offering of new securities to provide new money, by providing that it be made to the unsecured creditors or their assignees proportionately to the amounts of their respective claims, (4) to include in the escrow certificates to be delivered to the Reconstruction Finance Corporation and the Railroad Credit Corporation for their notes, express provisions that their acceptance shall not prejudice the rights of the Reconstruction Finance Corporation or the Railroad Credit Corporation against collateral which has been delivered by third persons to [262] secure the obligations of the debtor and which does not itself constitute a claim against the debtor or the debtor-property, (5) to provide that the reorganization committee shall be constituted of such number of members, not more than five, as we may determine, but that a majority of whom shall be elected by the bondholders in any manner which we may prescribe, and (6) to elim-

inate the provisions requiring the consent of two-thirds of the bondholders to the confirmation of the plan, but extend the provision for protecting a dissenting class through a judicial sale at a fair upset price to include the bondholders as a class.

The plan submitted by the A. C. James Company proposes that the reorganized company issue initially $10,000,000, principal amount, of new first-mortgage 4-percent bonds, $49,290,100, principal amount, of new general-mortgage 4 percent income bonds (cumulative only to the extent that interest is earned), and $10,450,263, principal amount, of new noncumulative 4-percent debentures (convertible into 150 percent of their principal amount in 6 percent preferred stock), or a total of $69,740,363, principal amount, of new bonds and debentures. The preferred stock of the debtor, of which $28,300,000, par value, is now outstanding, would be delivered to the debtor under this plan, and $5,807,650, par value, of such stock would be reissued. The common stock of the debtor, now outstanding of the par value of $47,500,000, would be delivered to the debtor and be reissued.

The existing first-mortgage 5-percent bonds would be exchanged for the new general-mortgage 4-percent income bonds, with a bonus of $500, par value, of common stock for each $1,000 bond. The new noncumulative 4-percent debentures would be allotted to the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company, and those creditors would be given also a

bonus of $500, par value, of common stock for each $1,000 of the debtor's notes owned by them. The $5,807,650, par value, of preferred stock would be issued to the Western Pacific Railroad Corporation and the Western Realty Company in settlement of the principal amount of their claims against the debtor.

Under this plan all accrued interest upon all outstanding debt would be canceled. [263]

The $10,000,000, principal amount, of new first-mortgage bonds would be sold to provide new money for the reorganized company and the Western Pacific Railroad Corporation would be given the first right to purchase such bonds, with a bonus at the rate of 15 shares of the common stock for each $1,000 first-mortgage bond purchased.

No reserve capital or sinking funds are provided for under the James plan.

The A. C. James Company also proposed modifications of its plan on brief in support of exceptions to the report proposed by our Bureau of Finance. Under the proposed modifications, the reorganized company would issue $9,623,202, par value, of noncumulative 5-percent preferred stock for unpaid interest on the present first-mortgage bonds, and on the claims of the Reconstruction Finance Corporation, the Railroad Credit Corporation, and the A. C. James Company; $5,807,650, par value, of common stock to the unsecured creditors in satisfaction of the principal amount of their claims; $10,000,000, par value, of common stock as a pro rata bonus with

the new first-mortgage bonds; $14,260,570, par value, of common stock to the Western Pacific Railroad Corporation in recognition of the interest which it has as sole stockholder in the debtor.

Each of the three plans sets forth in more or less detail the proposed manner of participation of the stockholders and creditors in the plan and the method of consummation. The debtor's plan provides that it shall not be declared operative or carried out until finally approved by the Commission and confirmed by the court after acceptance by the holders of each class or classes of securities or claims affected by the plan as shall be sufficient under the provisions of section 77. The James plan provides that it shall not be carried out until it shall have been approved by the Commission and the court, pursuant to the requirements of section 77, and until it shall have been accepted by two-thirds of the creditors of each class, and by two-thirds of the stock of each class. The bondholders' committee plan provides that it shall not be carried out until it shall have been accepted by the holders of at least two-thirds in principal amount of the debtor's outstanding first-mortgage bonds, nor unless either (1) the plan shall have been accepted by creditors holding at least two-thirds in prin- [264] cipal amount of the total allowed claims of such class, and by the holders of at least two-thirds of the stock of each class, or (2) provision shall have been made for the sale of the debtor's property at public auction at a fair upset price as determined by the court, and

the payment to the nonassenting creditors of such class or the nonassenting stockholders of such class of their aliquot portion of the proceeds of the sale of such property.

None of the proposed plans is agreed to by all the parties to the proceeding.

The debtor's plan is objected to by the bondholders' committee on the grounds that it proposes an unsound capital structure in that the ratio of debt to capital stock is disproportionate, and that the total of fixed and contingent interest charges proposed is excessive in the light of the debtor's past earning experience and probable future earnings. The James plan is objected to for the same reasons. The bondholders further contend that the debtor's plan discriminates unfairly in favor of the Reconstruction Finance Corporation, and against the first-mortgage bondholders and the Railroad Credit Corporation in that it proposes to place the Reconstruction Finance Corporation on a parity with the present first-mortgage bondholders as compensation for furnishing the $10,000,000 of new money. In proposing to give the A. C. James Company and the Railroad Credit Corporation securities on the basis of the principal amount of their notes, irrespective of the amount of their collateral security, the bondholders allege that the Railroad Credit Corporation is discriminated against. By granting all the new common stock of the reorganized company to the Western Pacific Railroad Corporation without requiring any contribution or sacrifice by that cor-

poration to or in the reorganization, the bondholders allege that undue preference is proposed.

The James plan is further protested by the bondholders' committee on the grounds that it is discriminatory in that it does not provide any fixed interest obligations for the present first-mortgage bonds; that it proposes the issue of new securities having the sole first lien upon the property of the reorganized company exclusively to the Western Pacific Railroad Corporation along with a bonus of $150 of new common stock for each $100 bond; proposes the waiving of all accrued interest without any compensation therefor; disregards the relative priorities of the various creditors by [265] giving the same bonus of new common stock; proposes no sinking funds for retirement of debt; makes the new bonds alloted to the present first-mortgage bondholders mature in 1987 as against a maturity in 1957 for the obligations which are proposed to be given to the so-called junior creditors; and proposes to treat the claims of the Reconstruction Finance Corporation, the Railroad Credit Corporation, and the A. C. James Company on the basis of the principal amounts of the notes rather than upon the basis of the collateral held. The bondholders' committee also objects to the James plan proposal to give the Reconstruction Finance Corporation, the Railroad Credit Corporation, and the A. C. James Company the principal amount of their notes in new 4-percent debentures, convertible into 150 percent in principal amount of 6-percent pre-

ferred stock. The bondholders' committee points out that if the debentures are converted, the new preferred stock would rank in the scale of distribution of the reorganized company's earnings substantially at the same point as the debentures; that this would result in a 9 percent annual return upon the present claims and also would operate to depress the value of the common stock of the reorganized company.

The bondholders' plan is objected to by the A. C. James Company on the grounds that it proposes an unsound and complicated capital structure, does not furnish appropriate vehicles for senior and junior financing of future capital requirements; does not preserve debt as debt; capitalizes unearned and unpaid interest as a permanent part of the capital structure; proposes excessive interest rates for certain new securities; and proposes excessive fixed charges. Certain of those objections also are advanced in regard to the debtor's plan. It is further alleged that the bondholders' plan discriminates unfairly against the other creditors and in favor of the bondholders, and does not accord sufficient recognition to the debtor's equity.

Conclusions

By the provision of section 77(b) of the Bankruptcy Act, as amended, a plan of reorganization shall include provisions modifying or altering the rights of creditors generally, or any class of them, secured or unsecured, either through the issue of new securities of any character or otherwise; shall

provide for fixed [266] charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent for leased railroads) in such an amount that, after due consideration of the probable prospective earnings of the property in the light of its earnings experience and all other relevant facts, there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof; and shall provide adequate means for the execution of the plan. Subsection (e) of section 77 provides that the judge shall approve the plan certified to the court by us, if satisfied, after hearing, and without hearing if no objections are filed, that the plan complies with the provisions of subsection (b), is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; that the approximate amounts to be paid by the debtor, or by any corporation or corporations acquiring the debtor's assets, for expenses and fees incident to the reorganization, have been fully disclosed so far as they can be ascertained at the date of the hearing, are reasonable, are within such maximum limits as are fixed by us, and are within such maximum limits to be subject to the approval of the judge; that the plan provides for the payment of all costs of administration and all other allowances made or to be made by the judge,

except that allowances for the actual and reasonable expenses (including reasonable attorney's fees) incurred in connection with the proceedings and plan by parties in interest and by reorganization managers and committees or other representatives of creditors and stockholders, and the actual and reasonable expenses incurred in connection with the proceedings and plan and reasonable compensation for services in connection therewith by trustees under indentures, depositaries, and such assistants as we, with the approval of the judge, may especially employ, may be paid in securities provided for in the plan if those entitled thereto will accept such payment. By the provisions of subsection (d) of section 77, the plan approved by us must meet with these requirements of subsections (b) and (e) and be compatible with the public interest, but such plan may be different from any which has been proposed. [267]

It will be observed that insofar as the capitalization of a reorganized company is concerned, section 77 contains no limitations other than that the fixed charges of the company shall be adequately covered by the probable earnings available therefor, and the plan as a whole shall be compatible with the public interest. The public interest is not defined, but it would seem obvious that to be compatible with the public interest, the plan must provide a capital structure for the reorganized company which will give it a reasonable opportunity to function efficiently and continuously as a going concern. This requires that the capitalization should not exceed

a conservative appraisal of the assets to be taken over by the reorganized company, and that proposed charges, whether fixed or contingent, be within its probable earning power.

The present reorganization of the debtor is the second since it began complete operations in 1911. A review of its financial history shows that due to an inherent lack of earning power its past operations have resulted in financial failure, and that the investment in its property has not been justified by its earnings. In Denver & Rio Grande Investigation, 113 I.C.C. 75, we pointed out that economically the original construction of the debtor was an ill-advised undertaking. If this reorganization is to be successful, the capital structure of the reorganized company must be realistically related to its actual earning power, and consideration given to the investment in its property only to the extent that such investment is justified by the probable earnings reasonably forseeable for the future.

As will have been noted, January 1, 1937 is proposed as the effective date of reorganization in each of the filed plans. The obligations of the debtor, including accrued and unpaid interest, have increased considerably since that date, however, and the approval plan should provide that July 1, 1938 shall be the effective date of reorganization. Under the provisions of the debtor's plan, if modified as suggested by its counsel, the total capitalization of the reorganized company, as of that date, exclusive of no-par-value stock, would be $94,258,367. Treating the proposed no-par-value stock at $100 per

share, the total capitalization would be $124,258,367. Fixed interest charges would be $905,321, contingent interest charges $1,993,620 (assuming interest at 4 percent on proposed collateral income notes), and total fixed and contin- [268] gent interest, together with capital and sinking funds requirements, would be $3,695,391 per annum.

Under the bondholders' plan, computed as of July 1, 1938, the total capitalization, excluding no-par-value stock, would be $74,270,738. Treating the proposed no-par-value stock at $100 per share, the total minimum capitalization would be $108,270,238, and the maximum $123,270,238. Fixed interest would be $905,322, contingent interest would be $985,802, and total fixed and contingent interest, plus capital and sinking funds requirements, would be $2,489,704 per annum.

Under the James plan, computed as of July 1, 1938, the total capitalization would be $116,665,459. Fixed interest would be $511,001, contingent interest $2,387,940, and total fixed and contingent interest would be $2,898,941 per annum. It will be noted that this plan does not provide for any capital fund or sinking fund.

The fixed interest charges proposed in each of these plans are substantially lower than the debtor's present fixed charges. From data hereinbefore set out it is apparent that the reported consolidated income of the debtor's system available for interest would have been insufficient to have met the fixed charges proposed under the James plan in 1931 and

1932, and under the debtor's and bondholders' plan in 1931, 1932, and 1933. During the 5-year period 1931-35 the debtor's average reported consolidated income available for interest was $525,967, and if adjusted as hereinbefore suggested, it would be much less. While the earnings of the debtor showed improvement in 1936 and 1937 over those for the period 1931-35, inclusive, being $1,902,033 in 1936 and $1,069,785 in 1937, after eliminating extraordinary expenditures for rehabilitation and amortization for discount of funded debt, and assuming that reported expenditures for maintenance were sufficient normally to maintain the property, the decline in earnings in 1937 from 1936, and the lack of any earnings in the first six months of 1938, there having been a deficit of $1,120,403 in those months, show conclusively, if these data are not to be ignored, that the fixed interest charges of the reorganized company should not initially and substantially exceed $500,000, if the reorganized company is to maintain its property properly and secure necessary new capital in the future. In this latter connection, it is essential that provision be made to raise $10,000,000 of new money for the purpose of retiring outstanding trustees' certificates. [269]

Interest at 4 percent on $10,000,000 of new bonds would be $400,000, and, including charges of $111,001 on present equipment obligations of the debtor and its trustees which are to be assumed by the reorganized company, the reorganized company would be immediately faced with fixed interest charges of $511,001 per year. We conclude, there-

fore, after a consideration of the debtor's past, present, and probable future earnings, that the plan of reorganization should provide for the immediate issue and sale of not to exceed $10,000,000 of new first-mortgage bonds, the proceeds of which should be used to retire outstanding trustees' certificates. In the event the new bonds are not salable at par, it may be necessary for the reorganized company to obtain a loan of $10,000,000 from the Reconstruction Finance Corporation. The approved plan should provide, therefore, that if no commitment for the purchase of such bonds is deposited with us within 60 days after approval of the plan by the court, the $10,000,000 of bonds authorized to be issued, together with such additional bonds as may be required by us and the Reconstruction Finance Corporation in proceedings under section 5 of the Reconstruction Finance Corporation Act, shall be deposited as security for a loan of $10,000,000 to the reorganized company. The purchase of any of the bonds by the Reconstruction Finance Corporation, or any loan by that corporation upon such bonds as collateral, will be subject to our approval under the provisions of the Reconstruction Finance Corporation Act. In view of the present unsatisfactory earnings of the debtor, and in order to provide against financial embarrassment should conditions not improve, the payment of interest on such bonds should be made only at such time as earnings are available therefor for a period of five years from the effective date of reorganization.

These bonds should be secured by a new first mortgage which should be a first lien upon all property, real and personal, and equipment now subject to existing mortgages of the debtor or at any time acquired by the reorganized company, subject, however, to the lien of obligations issued for equipment purchased or outstanding on equipment acquired in the reorganization. To facilitate future capital financing, the total authorized issue of bonds thereunder should be limited to $50,000,000, of which $10,000,000, and such additional amount as may be necessary, should be sold or [270] pledged to provide the new money required in the reorganization, and the remainder should be available for issue, with our approval, to provide for expenditures for additions, betterments, improvements or extensions made after the effective date of the reorganization, in a principal amount not exceeding 75 percent of the actual cost of such additions, betterments, improvements, or extensions. The bonds should be dated as of the effective date of reorganization, should mature in 50 years, and should bear interest at the rate of 4 percent per annum, payable semiannually. It should be provided, however, that interest accruing for a period not exceeding five years from the effective date of reorganization, or any portion thereof, on such bonds should accumulate, if not currently earned, and the payment thereof should be made only at such time as earnings are available therefor, but interest on such bonds accruing subsequent to a period not exceeding five years from the effective date of reorganization

should be a fixed charge. The bonds should be redeemable in whole or in part on any interest payment date upon 30 days' notice, at not to exceed 105 and accrued interest.

Suggestions have been made by parties to this proceeding that the authorized issue of the new bonds should not materially exceed those to be issued immediately or that restrictions against the issuance of additional bonds, when there is insufficient earnings coverage, should be provided. The latter restriction is not an unusual one, and while it may at times prove embarrassing to the reorganized company in the future, we find that the mortgage indenture of the new first-mortgage bonds should provide that new bonds in excess of the $10,000,000 to be immediately issued for sale, or such additional amount as may be necessary for pledge in order to secure a loan of $10,000,000, should not be issued on the basis of additional property of any kind or additions and betterments, unless the income of the reorganized company available for fixed charges in a period of 12 consecutive calendar months within the 18 calendar months immediately preceding the date of authentication and delivery of the bonds equals or exceeds 1.5 times the fixed charges, including interest on the bonds then applied for.

Considering the limited amount of fixed interest bonds approved herein, there would seem to be no real reason for the creation and maintenance of the so-called contingency reserve fund of [271] $500,000 to be available for the payment of interest on the new first-mortgage bonds as proposed in the debt-

or's plan and the bondholders' original plan. We find, therefore, that no provision should be made for such a fund.

Since new first-mortgage bonds would not be issued in principal amount to exceed 75 percent of future capital expenditures, the balance of such expenditures must be financed through the issue of junior securities or from earnings. Under both the debtor's plan and the bondholder's plan, funds for routine expenditures for additions and betterments would be secured from the hereinbefore described capital fund contemplated under their plans. The A. C. James Company opposes the creation of such a fund, as well as sinking funds for the redemption of bonds, contending that such funds are not in accordance with the principle of sound financing, and that the Revenue Act of 1936 imposed too great a penalty on the retention of earnings for such purposes. However, the reorganized company, like other railroad companies, must secure funds for future capital expenditures. To avoid embarrassment in the securing of funds, especially for future routine additions and betterments, which are estimated by the debtor at $500,000 annually, we find that the plan should provide for the creation of a capital fund out of the available net income remaining after payment of fixed charges. To prevent too heavy a sacrifice by present security holders, payments into the fund should not exceed $500,000 in in any one year, nor, in any event, should the total fund exceed $1,000,000 at any time. Annual payments into the fund should be $500,000 or such lesser

sum as may be required together with unappropriated accumulations in the fund as of the close of the calendar year prior to that for which the payment is to be computed, less charges for additions and betterments during the latter year, to bring the total in the fund to $1,000,000. Capital expenditures reimbursed out of the capital fund should not be capitalized through the issue of additional fixed or contingent interest-bearing bonds.

The debtor proposes that sinking funds be provided for all bonds, and the bondholders propose that they apply to income bonds only. The debtor also proposes that payments into sinking funds should not be made until payment of all interest charges and payments to the capital fund have been made. The bondholders originally proposed that payment into both funds should not be made until after [272] payment of dividends on the preferred stock. The latter proposal is not now urged. In view of the relatively small issue of fixed interest bonds which we have herein found should be issuable immediately, we do not believe that provision for their retirement through a sinking fund is required. We are of the opinion, however, that provision should be made for the creation of a sinking fund for the retirement of such bonds when and if $20,000,000, principal amount thereof, shall have been issued. Immediate provision should be made for the retirement of income bonds hereinafter approved under the plan. We find, therefore, that the plan should provide for the immediate creation, out of available net income remaining after the pay-

ment into the capital fund and interest on income bonds, of a cumulative sinking fund, in an amount up to, but not exceeding, in respect to any calendar year, one-half of 1 percent of the total principal amount of income bonds hereinafter approved for issue in the reorganization. This sinking fund should be applied to the purchase of income bonds at not exceeding their redemption price, and whenever the amount in the sinking fund exceeds $50,000 and income bonds are not tendered or can not otherwise be purchased at less than their redemption price, the funds then in the sinking fund should be applied to the redemption of income bonds on the next succeeding interest payment date. Bonds purchased or redeemed out of the sinking fund should not thereafter be reissued.

As hereinbefore stated, the debtor's plan, modified as suggested by counsel, contemplates the issue of $39,432,100 of 4-percent income bonds. Under the bondholders' plan, $19,716,040 of 5-percent income bonds should be issued, and under the James plan, $49,290,100 of 4-percent income bonds would be issued. Including the interest on fixed debt, and the requirements of the capital and sinking funds herein approved, the charges of the reorganized company under the debtor's proposal would be $2,785,445, under the bondholders' proposal $2,095,383, and under the James proposal, $3,229,055. In order that any income bonds issued in the reorganization and remaining outstanding at maturity should be easily refundable, their interest charges should be well within the apparent earning power of the company

under reasonably favorable business conditions. Forecasts of higher earnings than those of the present and recent past may be supported by the record, and the annual [273] earnings of the debtor may not again descend to the lows reached in the depression, but the total of the fixed and contingent charges of the reorganized company should be limited by a consideration of the actual experience of the debtor rather than future possibilities if financial embarrassment is to be avoided. The record shows that the last year in which the debtor's unadjusted system earnings were sufficient to pay such charges as would accrue under the debtor's proposal was in 1928, under the bondholders' proposal was in 1929, and under the James proposal was in 1926. The average earnings forecast by the debtor for the period 1936 to 1940, inclusive, would be insufficient to meet the charges proposed by the debtor and the A. C. James Company. Even though interest is made dependent on earnings, the principal of any income bonds issued is debt and must be met at maturity. On the basis of the facts heretofore recited with respect to traffic and earnings, we find that the total annual fixed and contingent interest charges of the reorganized company, plus requirements for the capital and sinking funds should not exceed $2,000,000 per annum. With fixed charges and the requirements of the capital fund herein approved amounting to $1,011,001, interest charges and sinking fund requirements on new income bonds should be less than $989,000, these two sums equaling $2,000,001.

The bondholders urge that the rate of interest on the new income bonds should be 5 percent. With limited income, it is axiomatic that the higher the rate of interest the smaller the principal of bonds that may be issued. In order to allot as large an amount of new bonds as possible to present creditors, we find that the new income bonds should bear interest at the rate of 4 percent per annum. We further find that the principal amount of such bonds should not exceed $19,716,040. Interest at 4 percent thereon would be $788,642, and including annual requirements for a sinking fund of one-half of 1 percent for such bonds, the total of the fixed and contingent charges herein approved would amount to $1,898,223.

The bondholders also urge that contingent interest on the income bonds be made cumulative for three years, maintaining that though low earnings might be more than offset in a subsequent period by high earnings, the benefit of those high earnings, without such accumulation, could not recoup the losses of income bondholders but would inure progressively downward to the lower classes of securi- [274] ties. In our opinion such provision for accumulation of contingent interest is fair.

The plan should provide that the new income bonds be secured by a mortgage constituting a lien, subject only to the lien of the first mortgage, upon all property from time to time subject to the lien of the first mortgage. The total authorized issue of bonds thereunder should be limited to approxi-

mately $19,716,040. The bonds should be dated as of the effective date of the reorganization and mature in 75 years, bear interest at the rate of 4 percent per annum, payable annually, only out of the available net income of the reorganized company, and such interest should be cumulative whether earned or not, up to a maximum of 12 percent at any time. Provision should be made, however, that such interest shall not be cumulative if and as long as any deficit exists in the payment of interest on the first-mortgage bonds herein approved. The bonds should be redeemable on any interest payment date at their principal amount, plus any interest payable thereon on such interest payment date. They should be entitled to the benefit of a one-half of 1 percent sinking fund, payable out of available net income remaining after the payment of all prior charges herein approved.

The debtor's plan, if modified as suggested by counsel, and adjusted to June 30, 1938, would also provide for the issue of $10,408,410 of collateral notes to mature in 15 years, secured by $18,999,500 of prior-lien 4-percent preferred stock. No definite rate of interest for the notes is suggested. The James plan, also adjusted, would provide for the issue of $10,408,410 of convertible 4-percent debentures to mature in 60 years. The proposed note issue, unless provisions were made for its extension, would, of course, impose on the reorganized company the burden of the payment of the principal amount of the notes in 15 years, that is, prior to

the maturity of the new first-mortgage and income bonds. On the other hand, the collateral consisting of stock would be junior to the obligation which it secured, and thus would be of doubtful value. We can not approve this proposal, nor the James proposal, for the reasons hereinbefore stated with respect to the limitation of interest charges which may be incurred by the reorganized company.

Issues of capital stock in varying amounts are contemplated under the debtor's, the bondholders', and the James plans. The [275] amounts and the character of the stock proposed were undoubtedly influenced by the debtor's existing obligations and by the amount of debt proposed for the reorganized company under the various plans. If these plans were adjusted by providing for the issue of stock for the difference between the debt herein approved and the total capitalization (treating no-par-value stock at $100 per share), proposed under each of them, the debtor's plan would provide for the issue of $91,476,210 of stock, the bondholders' plan a minimum of $75,488,081, and a maximum of $90,488,081 of stock, and the James plan $83,883,302 of stock. In order to meet the prior charges herein approved and to pay dividends at the rate of 5 per cent on $91,476,210 of stock, the reorganized company's income available for interest would have to be $6,472,034; on $75,488,081 an amount of $5,672,627; on $90,488,081 an amount of $6,422,627; and on $83,883,302 an amount of $6,092,388.

As hereinbefore stated, the debtor's estimate of income available for interest averaged $2,715,306 per year for the period 1936-40, inclusive, the maximum amount for any one year in the period (1940) being $3,769,836. That amount, with prior charges of $1,898,223, would permit the payment of dividends at the rate of 5 percent on only $37,432,000 of stock. It is obvious, therefore, that based on the most optimistic estimate of earnings of record, the capitalization of the reorganized company must be maintained within strict limits if any material return on its capital stock is to be expected and the shares of its stock are not to become mere tokens for stock market speculation. It is true that considered alone, the data pertaining to the rate-making value of the debtor's property, and its investment, would support capitalizations approximating those proposed in the three plans. We have hereinbefore stated, however; the reasons why, in our opinion, those factors can not be of controlling importance in a determination of the capital structure for the reorganized company. Considering all relevant data of record, we find that the approved plan should provide for the immediate issue by the reorganized company of not to exceed 295,740-3/10 shares of preferred stock of the par value of $100 per share, and not more than 313,703 shares of no-par-value common stock.

The new preferred stock, which should be authorized in the total amount of 500,000 shares, should be entitled to receive dividends at [276] the rate of 5 percent per annum in respect to each cal-

endar year before any dividends should be paid or declared upon the common stock. Such dividends should be cumulative to the extent earned in respect to any income period, but not paid; but such dividends should otherwise be non-cumulative. In event of liquidation the new preferred stock should be entitled to receive out of the assets of the reorganized company its par value plus accumulated unpaid dividends before any distribution is made to any new common stock, but should not be entitled to any further participation in such assets. The new preferred stock should be redeemable, in whole or in part, at any time at its par value plus accrued and unpaid cumulative dividends.

The plan should provide that the reorganized company shall not, without the vote or consent of the holders of at least two-thirds in par value of outstanding new preferred stock, (1) create or permit to be created any mortgage or other lien upon any of its properties, excepting the new first mortgage and new income mortgage or purchase money liens (including equipment obligations) upon property hereafter acquired, given for not more than 75 percent of the purchase price of such property; (2) create or issue any bonds, notes, or other evidences of indebtedness maturing more than two years from their date, except purchase money obligations, given for not more than 75 percent of the purchase price of property hereafter acquired; (3) create any stock, other than that authorized herein, ranking either as to assets or dividends, in priority to or on a parity with the new preferred stock; or

(4) permit any subsidiary, substantially all of whose stock shall be owned by the reorganized company, to create any mortgage or other lien upon any of the properties of the subsidiaries or issue any such bonds, notes, or other evidences of indebtedness (except purchase money liens or obligations as aforesaid), or issue any additional stock of any class, unless the obligations secured by such mortgage or other lien or such other obligations or such stock shall first be offered for acquisition by the reorganized company. Each share of the new preferred stock should have equal voting rights and privileges with any new common stock.

The total authorization of common stock should be 500,000 shares, without par value, of which about 313,703 shares may be issued forthwith. [277]

Upon the issue of the securities above approved, and assuming the sale of the new bonds, the total capitalization, excluding 313,703 shares of no-par-value common stock, would be $62,356,217, consisting of $3,066,117 of equipment obligations, $10,000,000 of first-mortgage 4-percent bonds, $19,716,040 of income mortgage 4-percent bonds, and $29,574,060 of 5-percent preferred stock. Treating the no-par-value common stock at $100 per share, the total capitalization would be $93,726,517. Total fixed interest charges would be $511,001, total fixed and contingent interest charges, plus the payments into the capital fund and sinking fund, would be $1,898,223, and preferred dividends would be $1,478,703, a grand total of $3,376,926 per annum.

The available net income of the new company should be determined for the six-months' period ending December 31, 1938, and thereafter for each calendar year ending December 31 (hereinafter called income period, except that the six-month period ending December 31, 1938, also should be considered an income period) as promptly as possible after the termination thereof. The available net income for each income period should be determined by deducting from the consolidated income of the reorganized company and its subsidiaries available for fixed charges for such income period (determined in accordance with this Commission's accounting rules) all fixed charges of the reorganized company and its subsidiaries accrued during such income period, together with an amount representing any deficit in fixed charges, including any deficit in interest payments on the reorganized company's first-mortgage bonds which may have accrued in previous periods. The plan should provide, however, (1) that in determining available net income there should not be deducted any amounts expended from the proceeds of the trustees' certificates issued for rehabilitation purposes, notwithstanding that under our accounting rules such expenditures may be chargeable to operating expenses; and (2) notwithstanding that the reorganized company should not have come into ownership and possession of the properties now operated by the trustees of the debtor on or before July 1, 1938, available net income for any period after July 1, 1938, until the

reorganized company comes into possession and operation of such properties, should be computed as if the reorganized company had come into such ownership or possession on July 1, 1938, and had issued, as [278] of that date, the new securities issuable under the plan, other than the $10,000,000 of new first-mortgage bonds, and in lieu of interest on such bonds there should be charged the amount of interest actually accruing during such period upon any trustees' certificates or other obligations issued to provide funds for the rehabilitation program.

All three plans before us are predicated on the priority of the existing first mortgage over the general mortgage, and all parties admit that the first mortgage is a first lien on the main line of the debtor's railroad and the securities physically pledged under that mortgage. The trustee under the first mortgage and the holders of bonds issued under that mortgage contend that the first mortgage is a first lien on substantially all the debtor's property, except equipment subject to existing leases, conditional-sale agreements, or equipment-trust agreements. The general mortgage trustee and those creditors with whom general-mortgage bonds are pledged contend, however, that the first mortgage is not a lien, or is a lien only to the extent of the proceeds of first-mortgaged bonds expended thereon, on cash and collateral held by the trustees under the general mortgage, on the Northern California extension, on the debtor's equity in rolling stock subject to leases, conditional sale agreements,

or equipment trust agreements, and on property, in general, purchased either in whole or in part from free funds. Those parties contend further that most of the property just described is not only free from the lien of the first mortgage but is subject to the lien of the general mortgage, and that its value is sufficient for the full payment of all the debts secured under the general mortgage, with interest. With the exception of the A. C. James Company, they assert that the first-mortgage bondholders are not entitled to preferential treatment.

While final adjudication of this and similar questions must be made by the court, it becomes our duty, in the absence of such adjudications, to determine them preliminarily for the purposes of consideration of the plans before us.

Since most of the property which is in dispute was acquired after the date of the first mortgage, the primary question involved is whether such property is covered by the after-acquired clause contained in the granting clauses of the first mortgage.

[279]

Clause first of the granting clauses covers in detail and by a general statement all property which had been owned by the debtor's predecessor, except only cash items. Granting clause third covers "any and all property and facilities of any and every kind and description * * * which may from time to time hereafter be acquired or constructed by or belong to" the debtor, if such after-acquired property falls within one of the four following categories:

(1) If any "First mortgage bonds or proceeds thereof or cash deposited" under the first mortgage have been authenticated or paid out "on account of the purchase, acquisition or construction thereof or work therein"; or

(2) If the property constitutes "an integral part or parts of lines of railroad, extensions, branches or other property subject to the lien" of the first mortgage; or

(3) If the property is "used or acquired for use in or for the maintenance or operation of or pertaining to" any of the property subject to the lien of the first mortgage; or

(4) If the property consists of shares of stock or of other securities of the Salt Lake City Union Depot & Railroad Company or Standard Realty & Development Company, or any subsidiary as defined.

Granting clause fifth covers almost every kind of property and facility used or useful in the operation of a railroad (including additional tracks, spurs, equipment, material and supplies, and land), ending with the generality "all other property of every description and all rights and interests in or with respect to the use of property * * * whether now owned * * * or at any time hereafter acquired", if "appurtenant to or used or held for use as, or as a part of or as parts of, or to facilitate or safeguard the maintenance or operation of, any lines of railroad, extensions, branches * * * or other prop-

erties now or at any time hereafter subject to the lien" of the first mortgage.

Following granting clause sixth is a proviso permitting the debtor by the use of free funds to acquire property free of the lien of the first mortgage if such property is not of the character described in the four subdivisions of granting clause third. [280]

The Northern California extension, various branches and spurs, and equipment used under leases, contracts, or equipment-trust agreements, are the principal items of property in dispute. With respect to the first two classes of property we are satisfied from the record that substantial amounts of the proceeds of first-mortgage bonds were used in their acquisition or construction, or at least "on account of the purchase, acquisition or construction thereof or work thereon". We construe the latter language to mean that the lien of the first mortgage attaches to after-acquired extensions if the purchase, acquisition, or construction thereof, or any work thereon, be financed in any part with first-mortgage bonds or cash deposited under that mortgage.

While the construction of the Northern California extension was financed in part with the proceeds of certain debentures which were subsequently exchanged for general and refunding bonds, it is not contended that the debentures were secured by a lien on the extension. Moreover, the record is clear that there was no intent to create a purchase money

lien on the extension in favor of the debentures. The same is true with respect to the advances from the Reconstruction Finance Corporation.

We conclude that, for the purpose of determining the equity of plans of reorganization for the debtor, the lien of the general mortgage on the Northern California extension and various branches and spurs in question should be considered subject to the lien of the first mortgage.

The debtor's equity in rolling stock subject to leases, conditional-sale agreements, or equipment-trust agreements, would seem to be covered by the after-acquired property clause in the third paragraph, as well as by the fifth paragraph, of the granting clauses unless the proviso at the end of the granting clauses negatives such a construction. The proviso reads as follows:

> * * *; and the company may, unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same, purchase and acquire equipment free from the lien hereof, by lease, conditional sale agreement or under any form of equipment trust, or purchase such equipment and issue obligations therefor secured by mortgage or pledge of such equipment superior to the lien of this indenture. [281]

The latter provision, however, should be construed both in the light of the language which precedes it in the same paragraph and in the light of the paragraph which follows the habendum clause. The latter paragraph reads as follows:

> Subject, however, as to all equipment now owned to the equipment trust or conditional sale agreements secured thereon, and to equipment hereafter acquired, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby * * *.

If all equipment acquired under equipment trusts was to be entirely free of the lien of the first mortgage, it is not apparent why the words "equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby", were made part of the last quoted provision. We consider, for the purposes of a plan of reorganization, that since the equipment in question was acquired for use, and was actually used, on the mortgaged lines, the debtor's equity in that equipment is subject to the lien of the first mortgage.

We consider that the property characterized as non-carrier real estate is also covered by the lien of the first mortgage. This property was owned by the predecessor of the debtor, and the general and refunding trustee contends that it did not become subject to the lien of the first mortgage because the reorganization plan, pursuant to which the present first-mortgage bonds were issued, contemplated that

such bonds should constitute a lien upon only railway properties. No such distinction as urged by the general-mortgage trustee appears in the language of the mortgage itself, and it is not clear that the use of the words "railway properties" in the previous plan of reorganization was intended to relate only to property used in carrier service.

With the exception of the notes of the Deep Creek Railroad Company and the Standard Realty & Development Company, there is no contention that the cash and collateral held by the trustee under the general and refunding mortgage are not free from the lien of the first mortgage. While due recognition must be accorded to the rights of the creditors with whom are pledged general-mortgage bonds, those creditors are not entitled to the same treatment as first-mortgage bondholders, who should be considered as having a first lien upon practically all the assets of the debtor. It follows [282] that holders of the debtor's first-mortgage bonds should receive securities of a higher rank than those allotted to other creditors, at least to the extent that existing conditions will permit.

Since the notes held by the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company are secured by the pledge of the debtor's general-mortgage bonds, they clearly are entitled to priority over the unsecured claims of the Western Pacific Railroad Corporation and the Western Realty Company. In turn, the claims of

the latter are entitled to priority over the existing stockholders.

According to the trustees' balance sheet of June 30, 1938, existing first-mortgage bonds were outstanding in the principal amount of $49,290,100 and accrued and unpaid interest thereon amounted to $11,914,521, a total of $61,204,621; the indebtedness of the debtor to the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company, including accrued and unpaid interest, totaled $12,317,842; the indebtedness of the debtor to the Western Pacific Railroad Corporation, including accrued and unpaid interest, was $7,609,370; the debtor's indebtedness to the Western Realty Company, including accrued and unpaid interest, was $60,417; a grand total of $81,192,250. Under the capital structure herein approved, there will be available for distribution to these creditors in the order of their priority $19,716,040 of new income mortgage bonds, $29,574,060 of new preferred stock, and 313,703 shares of no-par-value common stock. Treating the no-par-value common stock at $100 per share, a total par value of $80,660,400 of securities will thus be available for distribution. Obviously, if the creditors' claims are to be accorded priority over the stockholders, there will remain no securities available for distribution to stockholders under the capital structure herein approved.

Under the provisions of section 77 stockholders are not entitled to participate in the plan if we find,

and the judge affirms the finding, that at the time of the finding the equity of such stockholders has no value. Section 77 also contains a similar provision with respect to creditors whose claims have been found to have no value. We have hereinbefore found that considering the past, present, and probable future earnings of the debtor, its investment, the data of record pertaining to its rate-making value, and all other relevant data of record, we can not approve the issue of [283] new securities in a greater amount than that hereinbefore approved. On the same basis and for the same reasons we find, therefore, that there is no equity over and above the securities hereinbefore approved; that the equity of the existing stock has no value, and hence holders of such stock are not entitled to participate in the plan. Further, considering that the reorganized company's income available for interest and dividends must total $4,318,035, plus any undistributed profits tax that will be payable, before dividends of $3 per share may be paid on the new common stock, it is clear that even though all the securities remaining available for distribution after satisfying the claims of the first-mortgage bondholders are allotted to the other secured creditors, such securities will be inadequate in value to satisfy their claims. For this reason, and for the reasons stated with respect to the finding that the equity of the existing stock has no value, we find that the claims of the unsecured creditors, of the Western Pacific Railroad Corporation, and of the Western Realty Company,

have no value, and hence no securities or cash should be distributed under the plan in respect to those claims.

Proceeding to the allocation of the available securities, the plan should provide that all of the new income bonds, $19,716,040, principal amount, all of the new preferred stock, $29,574,060, par value, and 154,241 shares of the new no-par-value common stock, should be allotted to the holders of existing first-mortgage bonds. The remaining 159,462 shares of the no-par-value common should be allotted to the secured noteholders on the basis indicated below. The holders of the first-mortgage bonds (with March 1, 1934, and subsequent coupons) should receive for each $1,000, principal amount, of such bonds and accrued and unpaid interest thereon approximately (a) $400 of new income 4-percent bonds, (b) $600 of new 5-percent preferred stock, and (c) 3.13 shares of new no-par-value common stock.

While each of the notes held by the A. C. James Company, Reconstruction Finance Corporation, and Railroad Credit Corporation is secured by the pledge of the debtor's general and refunding bonds, the bonds pledged thereunder are of varying amounts. Thus, the debtor's total indebtedness to the Reconstruction Finance Corporation, according to the trustees' balance sheet, is $3,612,181, although that corporation holds as pledgee 56.6 per- [284] cent of that amount of such bonds. The debtor's indebtedness to the Railroad Credit Corporation

amounts to $2,580,906, and 21.1 percent of that amount is represented by the bonds pledged. The total indebtedness to the A. C. James Company amounts to $6,124,755, and 22.3 percent of that amount is represented by bonds pledged. Having found that 159,462 shares of common stock available for distribution are inadequate in value to satisfy the aggregate claims of these parties, it follows that it would be inequitable to distribute such stock in the proportion that each claim bears to the total amount of such stock. The value of each of the claims is proportionate to the collateral securing it, and we find that the allotment of the stock should be made on the basis of the collateral held rather than on the amount of the claims. This would result in the Reconstruction Finance Corporation receiving 90,255½ shares, the Railroad Credit Corporation 33,646½ shares, and the A. C. James Company 35,560 shares of common stock.

The plan should provide, however, that its approval and confirmation in no wise disturbs or alters the rights of the Reconstruction Finance Corporation and the Railroad Credit Corporation in collateral pledged with them by parties other than the debtor.

The plan should further provide that subscription warrants, entitling the holders thereof to purchase the new first-mortgage bonds at par not later than 45 days after the confirmation of the plan, should be issued to the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C.

James Company, in proportion to the amounts of general-mortgage bonds now held by them respectively. If any of these creditors should fail to subscribe for its full proportion, the other or others of such creditors should be permitted to subscribe for such unsubscribed balance, in the proportion which the existing general-mortgage bonds held by them, respectively, bear to the total amount of general-mortgage bonds held by those electing to subscribe for their full proportion. Should the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company fail to subscribe for the new bonds in accordance with the above terms, holders of first-mortgage bonds should be entitled to subscribe for them upon the same terms and conditions as those parties within a period of 60 [285] days after confirmation of the plan, and the contingent rights of subscription granted to the first-mortgage bondholders should be evidenced by appropriate warrants. Holders of warrants should be required to elect prior to the expiration of the warrants, in each case, the extent to which they will exercise their subscription rights.

Under both the debtor's plan and the bondholders' committee plan current liabilities of the debtor incurred in the ordinary conduct of its business prior to the institution of this proceeding, current liabilities and obligations of the debtor and of its trustees incurred during this proceeding, and all other claims, liabilities, or obligations for which specific provision is not made in those plans, are

not to be affected by the plans, but to the extent that such claims, liabilities, or obligations are not paid by the debtor or its trustees pursuant to order of the court, they are to be paid in cash or assumed by the reorganized company. According to the record, current liabilities incurred in the ordinary conduct of the debtor's business prior to this proceeding were of a nominal amount. We approve such provisions.

Each of the three plans before us propose different conditions under which the plan shall be consummated. The James plan affirmatively provides that it shall not be consummated until accepted by two-thirds of each class of creditors and two-thirds in amount of each class of stock. Reorganizations under section 77 are primarily premised upon the acceptance of plans by two-thirds or more of each class of creditors and stockholders voting thereon. Congress recognized, however, that the public interest might, under certain conditions, require the confirmation of a plan of reorganization even though it were not accepted by all classes of creditors and stockholders, and provisions of this effect are included in section 77. To approve a provision in a plan of reorganization by which a minority of a class of creditors or stockholders effectively could block the reorganization, although the plan conformed to the requirements of the statute in all respects would, in our opinion, give such a minority a right not contemplated by the law, and,

also, would be contrary to the intent, if not the letter, thereof.

The provision in the bondholders' committee plan to the effect that its plan shall not be confirmed until at least two-thirds of the [286] holders of the debtor's first-mortgage bonds accepted it, would seem to be objectionable for the same reason as that applying to the provision in the James plan. The bondholders' proposal that the plan provide for the sale of the debtor's property at an upset price as determined by the court in the event the holders of more than one-third in principal amount of any class of creditors, or the holders of more than one-third of the shares of stock of any class, shall not have accepted the plan, after the holders of at least two-thirds in principal amount of the existing first-mortgage bonds shall have accepted the plan, is, in our opinion, an unnecessary and objectionable provision, at least insofar as the instant proceeding is concerned. Section 77(e) provides that the submission of the plan to any class of stockholders and any class of creditors shall not be necessary if we have found, and the judge shall have affirmed the finding, that the equity of such class of stockholders and the interests of such class of creditors have no value. Under our previous findings herein, and if the judge approves the plan, it will be necessary to submit the plan only to the holders of the debtor's first mortgage bonds and to the holders of its secured notes. To require the submission of the plan to unsecured creditors and to stockholders, as would

be necessary under the bondholders' proposal, would be the requiring of an act not called for by the statute, if not contrary thereto, and unnecessary for the execution of the plan. Considering the first mortgage bondholders and the secured creditors alone, the effect of the proposal would be possibly, if not probably, to influence the secured note holders to accept the plan even though such holders would not voluntarily accept the plan were it not for such a provision. We see no necessity for the possible coercion of the secured note holders to accept the plan, and, therefore, do not approve the proposal. The plan should provide that it shall be accepted and confirmed, or confirmed without acceptance, in accordance with the provisions of section 77.

Both the bondholders' plan and the James plan contemplate the formation of a reorganization committee with broad powers. No provision for such a committee is made in the debtor's plan, although it does provide that representatives of the bondholders' committee shall represent the members of that committee in the [287] reorganization, and that the form and provisions of the several indentures, bonds, stock certificates, and other instruments in connection with the reorganization shall be approved by the bondholders' committee.

We recognize that it is impracticable to specify in detail the form and provisions of the various indentures, bonds, stock certificates, and other instruments which must be executed in consummating the reorganization proceeding, although the terms and

provisions thereof are of great importance to those participating in the proceeding. For this reason the plan approved by us will provide for the formation of a committee, after approval of the plan by us and by the court, with power to determine, subject to the approval of the court, the form and provisions of the indentures, bonds, stock certificates, and other instruments, in connection with the carrying out of the plan. The committee also will have power, but only such power as necessary, to carry out the plan in accordance with its provisions subject to the direction of the court. The committee should consist of three members, one of whom should be nominated by the committee representing the first-mortgage bondholders, one by the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company, as a group, and the remaining member by purchasers of the new first-mortgage bonds to be issued to provide the new money in the reorganization, or, if no commitment be received for the purchase of such bonds, by the party or parties advancing the money for the retirement of the trustees' certificates.

Submission of the plan to the creditors for acceptance or rejection will be contingent upon the deposit with us, not more than 60 days after its approval by the court, of tentative commitments for the purchase of all the $10,000,000 of new first-mortgage bonds to be sold under the plan, or, within 75 days after such approval, a tentative commitment on the part of the Reconstruction

Finance Corporation, to make the required loan of $10,000,000.

Under the foregoing, the plan of reorganization would provide as follows:

1. The assumption by the reorganized company of the outstanding equipment trusts, Baldwin lease, and Pullman contract of the debtor and its trustees.

[288]

2. The immediate issue by the reorganized company of $10,000,000, principal amount, or such additional amount as may be necessary in the event a loan of $10,000,000 must be secured, of 50-year first-mortgage 4-percent bonds, $19,716,040, principal amount, of 75-year income mortgage 4-percent bonds, $29,574,060, par value, of 5-percent preferred stock, and 313,703 shares of no-par-value common stock.

3. The sale of the $10,000,000 principal amount, of new first-mortgage bonds at par or the borrowing of $10,000,000 through the pledge of new first-mortgage bonds.

4. The creation and maintenance of a capital fund of not to exceed $500,000 in any one year, nor $1,000,000 at any time, to be accumulated out of available net income.

5. The immediate creation and maintenance of a one-half of 1 percent sinking fund for the retirement of the new income bonds out of available net income remaining after payments into the capital fund, and payment of interest on the new income

bonds; and the creation out of available net income remaining after payment of fixed charges of a similar fund for the retirement of first-mortgage bonds, when and if $20,000,000, principal amount, thereof are issued.

6. The holders of the debtor's existing first-mortgage bonds (with March 1, 1934, and subsequent coupons) to receive in exchange for each $1,000, principal amount, of such bonds and accrued and unpaid interest thereon approximately (a) $400 of new income 4-percent bonds, (b) $600 of new 5-percent preferred stock, and (c) 3.13 shares of new common stock, and, subject to the terms and conditions herein provided, the contingent right to subscribe for new first-mortgage bonds to be issued to provide new money.

7. The Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company, holders of the debtor's notes which are secured by the pledge of the debtor's general mortgage bonds, to receive in exchange therefor and for accrued unpaid interest thereon, 159,462 shares of new no-par-value common stock, the stock to be distributed among them on the basis herein- [289] before described, together with warrants to subscribe for the purchase of the new first-mortgage bonds.

8. The formation of a committee with such power as may be necessary to carry out the plan, and to determine, subject to the approval of the court, the form and provisions of the indentures, bonds, stock certificates, and other instruments, in

connection with the carrying out of the plan; the committee to consist of three members, one to be named by the committee representing first-mortgage bondholders, one by the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company, as a group, and the remaining member by the purchasers of the new first-mortgage bonds to be issued to provide the new money in the reorganization, or by the party or parties advancing the money necessary to retire the trustees' certificates.

9. The obligations of the debtor (other than to the Western Pacific Railroad Corporation and the Western Realty Company, unsecured claimants) not specifically herein provided for shall be paid by the debtor or the reorganized company or assumed by the reorganized company.

10. The Western Pacific Railroad Corporation and the Western Realty Company, unsecured claimants, to receive no securities or cash in satisfaction of their claims, since such claims are found to be without value.

11. The present holders of the debtor's capital stock not to participate in the plan, since the present stock of the debtor is found to be without value.

12. The plan to be accepted and carried out in accordance with its terms and the provisions of section 77 of the Bankruptcy Act, under the direction of the court.

13. The plan to be effective as of July 1, 1938.

The plan also will provide that existing mortgages on the debtor's properties be released and canceled, and all funds on deposit with the debtor's mortgage trustees representing sums paid from time to time to the trustees for the release of properties, sale of scrap, and otherwise, and all collateral pledged under the mortgages, be surrendered to the reorganized company free from existing mort- [290] gage liens, after deductions therefrom of any amounts which the court may find should be deducted under the provisions of the mortgages and consistent with the plan of reorganization herein approved. The plan should provide further that all collateral pledged by the debtor as security for its notes to the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company shall be surrendered to the reorganized debtor. The Railroad Credit Corporation also should release and surrender to the reorganized company its rights and interests in the debtor's distributive shares under the marshaling and distributing plan, 1931, from and after the effective date of the plan, and any proceeds from such shares applied by the Railroad Credit Corporation to the payment of principal and/or interest of and upon the obligations of the debtor after the effective date of the plan, unless such application shall have been made by authority of the court of competent jurisdiction, shall be turned over to the reorganized company.

In view of the provisions of section 77(b), when a plan finally is adopted, we shall give considera-

tion to the granting of such authorization for the issue of such securities as may be required and appropriate for the execution of the plan.

We find that the plan herein approved will meet with the requirements of section 77(b)(e) of the Bankruptcy Act, and will be compatible with the public interest.

The journal entries covering the necessary accounting adjustments should be submitted to us for approval before they are recorded on the books of the debtor or of the reorganized company.

An appropriate order will be issued.

Eastman, Commissioner, concurring in part:

I am in accord with the findings of the majority with two exceptions. For the reasons stated in my expression of partial concurrence in Spokane International Ry. Co. Reorganization, 228 I.C.C. 387, 408-411, I do not favor the provision for the creation and maintenance of a so-called capital fund. Nor do I favor the provision that additional first mortgage bonds "shall not be issued on the basis of additional property of any kind or additions and betterments, unless the income of the reorganized company available for [291] fixed charges in a period of 12 consecutive months within the 18 calendar months immediately preceding the date of authentication and delivery of the bonds equals or exceeds 1.5 times the fixed charges, including inter-

est on the bonds then applied for". This may be, and I think is, a very wise general rule to follow, but we have entire control of the matter under section 20a of the Interstate Commerce Act. No additional bonds can at any time be issued without our specific approval. That being so, I see no good reason for tying our own hands for the future by the incorporation in the plan of reorganization of an inflexible rule of this character. Exceptional conditions may arise making the application of such a rule unwise and contrary to the public interest in some particular instance.

Commissioner Aitchison authorizes me to state that he does not favor provision for the creation and maintenance of a capital fund in this case.

Miller, Commissioner, dissenting in part:

In view of the possibility of legislation at the next session of the Congress to compel consolidation of railroads into a few systems, or even into one system, which would obviate the necessity of reorganization of the railroads now in bankruptcy and also taking into consideration the fact that railroads can not be reorganized to the best advantage under present economic conditions, I am of the opinion that it would be in the interest of the security holders to defer this reorganization.

I agree with the conclusions in the report that present fixed charges must be practically eliminated

if the reorganization is now to be effectuated. I disagree in some particulars with other conclusions reached by the majority. This applies especially as to the capital fund required and the amount of capitalization allowed. The reasons for my objection to a capital fund are well stated in Commissioner Eastman's concurring-in-part expression in Spokane International Ry. Co. Reorganization, 228 I.C.C. 387, 408-411, in which I concurred.

In connection with capitalization the majority state (page 52, mimeograph):

> It is true that considered alone, the data pertaining to the rate-making value of the debtor's property, and its investment, [292] would support capitalizations approximating those proposed in the three plans. We have hereinbefore stated, however, the reasons why, in our opinion, those factors can not be of controlling importance in a determination of the capital strueture for the reorganized company.

With this conclusion I can not agree but am strongly of the view that the capitalization should be generally on the basis of original cost less depreciation amounting to something over $120,000,000, which is about the same as is proposed in two of the three plans referred to in the above quotation. The no-par-value common stock may have little or no market value when the company is reorganized, but the issuance in the neighborhood of $30,000,000 more than the majority authorize would

give the present stockholders a chance to participate in the future profits of the reorganized company.

Commissioner Rogers did not participate in the disposition of this proceeding. [293]

ORDER

At a General Session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 10th day of October, A. D. 1938.

Finance Docket No. 10913

The Western Pacific Railroad Company
Reorganization

Investigation of the matters and things involved in this proceeding having been made, a hearing having been held, and this Commission having, on the date hereof, made and filed a report containing its findings of fact and conclusions thereon, and a full statement of the reasons for its conclusions, which report is hereby referred to and made a part hereof:

It is ordered, That the following plan of reorganization of the Western Pacific Railroad Company, debtor, be, and it is hereby, approved:

A. The effective date of said plan shall be July 1, 1938.

B. The term "reorganized company", as used herein, means the corporation in which will be vested the assets of the debtor pursuant to the plan. It may be the existing company with a modified charter, or a new corporation organized for the purpose.

C. The capitalization of the reorganized company, immediately after the consummation of the plan, shall be substantially as follows: Undisturbed equipment trusts, Baldwin lease, and Pullman contract $3,066,117; first-mortgage 4-percent bonds $10,000,000, or a short-term note for $10,000,000; income mortgage 4-percent bonds $19,716,040; 5-percent preferred stock $29,574,060; common stock without par value 313,703 shares.

D. The first-mortgage bonds shall be secured by a mortgage constituting a first lien upon all property, real and personal, and equipment at any time acquired by the reorganized company, subject, however, to the lien of any equipment obligations issued and [294] outstanding on equipment acquired by the reorganized company in the reorganization. The total authorized issue of bonds thereunder shall be limited to $50,000,000, of which $10,000,000 shall be sold on terms to be approved by this Commission, to provide the new money required in the reorganization, or shall, with such additional amount of such bonds as may be necessary, be pledged under a $10,000,000 short-term note; and the remainder shall be reserved to be issued, with our approval, to provide

for, or to reimburse the reorganized company for, expenditures for additions, betterments, improvements, or extensions made after the effective date of the reorganization, in a principal amount not exceeding 75 percent of the actual cost of such additions, betterments, improvements, or extensions. The bonds shall be dated as of the effective date of reorganization and shall mature in 50 years; shall bear interest at the rate of 4 percent per annum payable semiannually; provided, however, that interest accruing for a period not exceeding five years from the effective date of reorganization, or any portion thereof, on such bonds shall accumulate and payment thereof shall be made only at such time as earnings are available therefor; and provided further, that interest on such bonds accruing subsequent to a period not exceeding five years from the effective date of reorganization shall be a fixed charge. The bonds shall be redeemable, in whole or in part, on any interest payment date upon 30 days' notice, at not to exceed 105 and accrued interest. Bonds in excess of the $10,000,000 to be sold, or in excess of such additional amount as may be necessary for pledge, to provide the new money required in the reorganization, shall not be issued on the basis of additional property of any kind or additions and betterments, unless the income of the reorganized company available for fixed charges in a period of 12 consecutive calendar months within the 18 calendar months immediately preceding the date of authentication and delivery of the bonds equals or

exceeds 1.5 times the fixed charges, including interest on the bonds then applied for. Whenever $20,000,000 of such bonds shall have been issued, a one-half of 1 percent sinking fund, payable out of available net income remaining after the payment of all fixed charges, shall be created for the redemption of such bonds.

E. The income-mortgage bonds shall be secured by a mortgage constituting a lien, subject only to the lien of the first mortgage, [295] upon all property from time to time subject to the lien of the first mortgage. The total authorized issue of bonds thereunder shall be limited to $19,716,040. The bonds shall be dated as of the effective date of the reorganization and shall mature in 75 years, shall bear interest at the rate of 4 percent, payable annually, and only out of available net income of the reorganized company, and such interest shall be cumulative, whether earned or not, up to a maximum of 12 percent at any time; provided, however, that no interest shall be cumulative if and as long as any deficit exists in the payment of interest on the first-mortgage bonds herein approved. The bonds shall be redeemable on any interest payment date at their principal amount, plus any interest payable thereon upon such interest payment date. They shall be entitled to the benefit of a one-half of 1 percent sinking fund, payable out of available net income remaining after the payment of all prior charges herein and hereafter approved.

F. The preferred stock shall be authorized in the total amount of 500,000 shares of the par value of $100 per share, of which 295,740-3/5 shares shall be issued forthwith for distribution to the present first-mortgage bondholders, and shall be entitled to receive dividends at the rate of 5 percent per annum in respect to each calendar year before any dividends shall be paid, or declared, upon the common stock. Such dividends shall be cumulative to the extent earned in respect to any income period, but not paid; but such dividends shall otherwise be noncumulative. In event of liquidation the preferred stock shall be entitled to receive out of the assets of the reorganized company its par value plus accumulated unpaid dividends before any distribution is made to any common stock, but shall not be entitled to any further participation in such assets. The preferred stock shall be redeemable, in whole or in part, at any time at its par value plus accrued and unpaid cumulative dividends. . .

The reorganized company shall not, without the vote or consent of the holders of at least two-thirds in par value of outstanding preferred stock (1) create or permit to be created any mortgage or other lien upon any of its properties, excepting the new first mortgage and new income mortgage or purchase money liens (including equipment obligations) upon property hereafter acquired; given [296] for not more than 75 percent of the purchase price of such property; (2) create or issue any bonds, notes, or other evidence of indebtedness ma-

turing more than two years from their date, except purchase money obligations, given for not more than 75 percent of the purchase price of property hereafter acquired; (3) create any stock, other than that authorized herein, ranking, either as to assets or dividends, in priority to or on a parity with, the preferred stock; or (4) permit any subsidiary, substantially all of whose stock shall be owned by the reorganized company, to create any mortgage or other lien upon any of the properties of the subsidiaries or issue any such bonds, notes, or other evidences of indebtedness (except purchase money liens or obligations as aforesaid), or issue any additional stock of any class, unless the obligations or such stock shall first be offered for acquisition by the reorganized company. Each share of preferred stock shall have equal voting rights and privileges with any common stock issued by the reorganized company.

G. The common stock shall be authorized in a total amount of 500,000 shares, without par value, of which 313,703 shares shall be issued forthwith for distribution to the first-mortgage bondholders, Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company.

H. Available net income shall be determined for the six-month period ending December 31, 1938, and thereafter for each calendar year ending December 31 (hereinafter called income period, except that the six-month period ending December 31, 1938, also shall be considered an income period), as promptly

as possible after the termination thereof. Available net income for each income period shall be determined by deducting from the consolidated income of the reorganized company and its subsidiaries available for fixed charges for such income period (determined in accordance with this Commission's accounting rules) all fixed charges of the reorganized company and its subsidiaries accrued during such income period, together with an amount representing any deficit in fixed charges including deficit in interest payments on the reorganized company's first-mortgage bonds which may have accrued in previous periods; provided, however, (1) that in determining available net income there shall not be deducted any amounts expended from the pro-
[297] ceeds of the trustees' certificates issued for rehabilitation purposes, notwithstanding that under our accounting rules such expenditures may be chargeable to operating expenses; and (2) notwithstanding that the reorganized company shall not have come into ownership and possession of the properties now operated by the trustees of the debtor on or before July 1, 1938, available net income for any period after July 1, 1938, until the reorganized company comes into possession and operation of such properties, shall be computed as if the reorganized company had come into such ownership or possession on July 1, 1938, and had issued, as of that date, the new securities issuable under the plan, other than the $10,000,000 of new first-mortgage bonds, and in lieu of interest on such bonds there should be charged the amount of interest actually

accruing during such period upon any trustees' certificates or other obligations issued to provide funds for the rehabilitation program.

I. Available net income for each income period shall be applied to the following purposes and in the following order:

1. To the creation, if and when $20,000,000 of first-mortgage bonds hereinbefore approved shall have been issued, of a cumulative sinking fund, in an amount up to, but not exceeding, in respect to any calendar year, one-half of 1 percent of the total principal amount of such bonds issued by the reorganized company. Such sinking fund shall be applied to the purchase of first-mortgage bonds at not exceeding their redemption price, and whenever the amount in the sinking fund exceeds $50,000 and first-mortgage bonds are not tendered or can not otherwise be purchased at less than their redemption price, the fund then in the sinking fund shall be applied to the redemption of the income-mortgage bonds on the next succeeding interest payment date. Bonds purchased or redeemed out of the sinking fund shall not thereafter be reissued.

2. To the creation of a capital fund to be applied to, or to provide for, or to reimburse the treasury of the reorganized company for capital investments (as defined by this Commission's Classification of Income Profit and Loss and General Balance Sheet Accounts for Steam Railroads, and including therein initial and principal payments upon equipment leased under equipment trusts or pur-

chased under conditional sale agreements). Annual pay- [298] ments into the fund shall be $500,000, or such lesser sum as may be required, together with unappropriated accumulations in the fund as of the close of the calendar year prior to that for which the payment is to be computed, less charges for additions and betterments during the latter year, to bring the total in the fund to $1,000,000; provided, however, that (a) the capital fund shall not exceed $1,000,000 at any one time; and (b) capital expenditures reimbursed out of the capital fund shall not be capitalized through the issue of additional fixed or contingent interest-bearing bonds.

3. Any then available net income shall be applied to the payment of the contingent interest on the outstanding income-mortgage 4-percent bonds accruing during the income period ending on the next preceding December 31, and, to the extent unpaid, any accumulations thereof.

4. Any then remaining available net income shall be applied to the creation of a cumulative sinking fund, in an amount up to, but not exceeding, in respect to any calendar year, one-half of 1 percent of the total principal amount of income-mortgage bonds issued in the reorganization. Such sinking fund shall be applied to the purchase of income-mortgage bonds at not exceeding their redemption price, and whenever the amount in the sinking fund exceeds $50,000 and income-mortgage bonds are not tendered or can not otherwise be purchased at less than their redemption price, the funds then in the sinking fund shall be applied to the redemption of

the income-mortgage bonds on the next succeeding interest payment date. Bonds purchased or redeemed out of the sinking fund shall not thereafter be issued.

5. Any then remaining available net income shall be applied if, and to the extent that, such dividends shall be declared by the board of directors of the reorganized company, to the payment of dividends at the rate of 5 percent per annum upon the preferred stock in respect to the income period ending on the next preceding December 31.

6. Any then remaining available net income may be applied to any proper corporate purpose of the reorganized company, including dividends on the common stock. [299]

J. The existing securities of the debtor and its trustees shall be treated as follows:

(1) Outstanding existing equipment trusts, Baldwin lease, and Pullman contract of the debtor and its trustees shall remain undisturbed and shall be assumed by the reorganized company.

(2) Holders of existing first-mortgage bonds (with March 1, 1934, and subsequent coupons) shall receive for each $1,000, principal amount, of such bonds and accrued and unpaid interest thereon approximately (a) $400 of new income-mortgage 4-percent bonds, (b) $600 of new 5-percent preferred stock, (c) 3.13 shares of new common stock, and (d) subject to the terms and conditions hereinafter provided, the contingent right to subscribe for new first-mortgage bonds to be issued to provide new money.

(3) Notes to the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company, together with interest accrued thereon to July 1, 1938, shall be dealt with as follows: The Reconstruction Finance Corporation shall receive for the principal amount of its note and accrued unpaid interest approximately 90,255½ shares of new no-par-value common stock and the right to subscribe for new first-mortgage bonds to be issued to provide new money; the Railroad Credit Corporation shall receive for the principal amount of its note and accrued unpaid interest approximately 33,646½ shares of new no-par-value common stock and the right to subscribe for new first-mortgage bonds to be issued to provide new money; and The A. C. James Company shall receive for the principal amount of its note and accrued unpaid interest approximately 35,560 shares of new no-par-value common stock and the right to subscribe for new first-mortgage bonds to be issued to provide new money.

(4) The unsecured claims of the Western Pacific Railroad Corporation and the Western Realty Company are found to be without value, and no securities or cash shall be distributed under the plan in respect to these claims.

(5) The capital stock of the debtor is found to be without equity or value, and the stockholders shall not be entitled to participate in the plan. [300]

(6) Current liabilities of the debtor incurred in the ordinary conduct of its business prior to the institution of this proceeding; current liabilities and

obligations of the debtor and its trustees incurred during this proceeding; and all other claims, liabilities, or obligations which have not hereinbefore been dealt with, are not to be affected by the plan, but to the extent that such claims, liabilities, or obligations are not paid by the debtor or its trustees pursuant to the order of the court, they shall be paid in cash or assumed by the reorganized company.

K. There will be issued to or on the orders of the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company, subscription warrants, in proportion to the general-mortgage bonds held by them, entitling the holders thereof to purchase at par, plus accrued interest, the $10,000,000, principal amount, of new first-mortgage bonds to provide the new money in the reorganization. The warrants shall provide that they must be exercised within, but not later than, 45 days after the confirmation of the plan by the court. If any of these parties shall fail to subscribe for its full proportion, the other or others of such parties shall be entitled to subscribe for the unsubscribed balance in the proportion which the general-mortgage bonds held by them respectively bear to the total amount of general-mortgage bonds held by the parties so electing to subscribe for their full proportion. Should these parties fail to provide the new money in accordance with the above terms, holders of the debtor's first-mortgage bonds shall be entitled within 60 days of confirmation of the plan to provide the same upon the same terms and conditions as those provided for the aforesaid parties,

and appropriate subscription warrants will be issued to them. The holders of the warrants will be required to elect prior to the expiration of the warrants, in each case, the extent to which they will exercise their subscription rights.

In the event that none of the aforesaid creditors or the Reconstruction Finance Corporation subscribes for the bonds, a loan of $10,000,000 shall be obtained from the Reconstruction Finance Corporation, secured by the pledge of such new first-mortgage bonds as division 4 of this Commission and the Reconstruction Finance Corporation may require in proceedings under section 5 [301] of the Reconstruction Finance Corporation Act. The purchase of any of the bonds by the Reconstruction Finance Corporation, or any loan by that Corporation upon such bonds as collateral will be subject to our approval under the provisions of the Reconstruction Finance Corporation Act.

L. A committee will be formed, after approval of the plan by this Commission and the court, with such power as may be necessary to carry out the plan, and to determine, subject to the approval of the court, the form and provisions of the indentures, bonds, stock certificates, and other instruments in connection with the carrying out of the plan. The committee shall consist of three members, one to be named by the first-mortgage bondholders, one by the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company, as a group, and the remaining member by the purchasers of the new first-mortgage bonds to be issued

to provide the new money in the reorganization, or if no commitment be received for the purchase of such bonds, by the party or parties advancing the new money necessary to retire the trustees' certificates.

M. The authority of the reorganization committee shall be auxiliary to, and supplementary of, the authority, powers, and duties of the debtor and any other corporation organized for the purpose of carrying out the plan to "put into effect and carry out the plan and the orders of the judge relative thereto, under and subject to the supervision and the control of the judge", as provided in section 77(f) of the Bankruptcy Act.

N. Existing mortgages on the debtor's properties shall be released and canceled, and all funds on deposit with the debtor's mortgage trustees representing sums paid from time to time to the trustees for the release of properties, sale of scrap, and otherwise, and all collateral pledged under the mortgage, shall be surrendered to the reorganized company free from existing mortgage liens, after deductions therefrom of any amounts which the court may find should be deducted under the provisions of the mortgages and consistent with the plan of reorganization herein approved. All collateral pledged by the debtor as security for its notes to the Reconstruction Finance Corporation, Railroad Credit Corporation, [302] and A. C. James Company, shall be surrendered to the reorganized company and canceled. The Railroad Credit Corporation also shall release and surrender the reorganized

company all its right and interest in the debtor's distributive shares under the marshaling and distributing plan, 1931, from and after the effective date of the plan, and any proceeds from such shares applied by the Railroad Credit Corporation to the payment of principal and/or interest of and upon the obligations of the debtor after the effective date of the plan, unless such application shall have been made by authority of the court of competent jurisdiction, shall be turned over to the reorganized company.

O. The approval and confirmation of the plan shall in no wise disturb or alter the right and interest of the Reconstruction Finance Corporation and the Railroad Credit Corporation in collateral pledged with them by parties other than the debtor.

P. Acceptance of the plan shall include acceptance of the new bonds, mortgages, stock certificates, and all instruments necessary and appropriate to the carrying out of the plan, other than the orders of the court and this Commission, to the same effect as though the terms of such instruments were set forth in full herein.

Q. The acceptance and confirmation of the plan, or the confirmation of the plan without acceptance, and the carrying of the plan, shall be provided in the Bankruptcy Act.

It is further ordered, That submission of the plan to the creditors for acceptance or rejection will be contingent upon the deposit with us in not more than 60 days after its approval by the court, of tentative commitments for the purchase of all of the

$10,000,000 of new first-mortgage bonds to be issued under the plan, or within 75 days after such approval, a tentative commitment on the part of the Reconstruction Finance Corporation to make the required loan of $10,000,000.

It is further ordered, That the authorization and approval herein granted by this Commission are upon the condition that the journal entries covering the necessary accounting adjustment under this order will be submitted to this Commission for approval before they are recorded on the books of the debtor or the reorganized company. [303]

It is further ordered, That nothing herein contained shall be, or be construed, as a grant of authority for the issue of any securities, assumption of obligations, transfer of any property, sale, consolidation, or merger of the debtor's property, or pooling of traffic, pursuant to either the Bankruptcy Act or the Interstate Commerce Act until further appropriate action by this Commission upon confirmation of the plan by the court.

By the Commission.

[308]

Upon further consideration, pursuant to appropriate petitions, plan for the reorganization of the Western Pacific Railroad Company modified and approved.*

Appearances as in prior reports.

REPORT OF THE COMMISSION ON FURTHER CONSIDERATION

By the Commission:

By our report and order issued October 10, 1938, in this proceeding, we approved a plan of reorganization of the Western Pacific Railroad Company, hereinafter called the debtor, pursuant to the provisions of section 77 of the Bankruptcy Act, as amended. 230 I.C.C. 61. On December 9, 1938, petitions for modification of our report and order of October 10, 1938, supra, were filed by the debtor, and the following interveners: Institutional Bondholders Committee, hereinafter called the bondholders committee; A. C. James Company, hereinafter called the James Company; Reconstruction Finance Corporation, hereinafter called the Finance Corporation; Railroad Credit Corporation, hereinafter called the Credit Corporation; and the Irving Trust Company, trustee under the debtor's general and refunding mortgage, hereinafter called the general-mortgage trustee. Under the provisions of section 77(d) of the Bankruptcy Act, as

*Previous reports 207 I.C.C. 793, and 230 I.C.C. 61.

amended, we may, upon petition for good cause [309] shown filed within 60 days of the date of our order approving a plan, in a supplemental report and order modify any plan which we have approved. By our order of December 30, 1938, we reopened the proceeding for consideration of the modifications requested by the petitioners, and since additional evidence was not required for a consideration of the modification sought, we did not deem a further hearing necessary. The petitions for modification have been the subject of oral argument before us.

Requested Modifications

Under the modifications requested by the Credit Corporation, the effective date of the plan would be January 1, 1939, and the capitalization of the reorganized company would be comprised of $2,750,050 of undisturbed equipment obligations, $10,000,000 of first-mortgage 4-percent bonds, due 1989, $20,901,240 of income-mortgage 4-percent bonds, due 2014, $33,797,670, par value, of participating 5-percent preferred stock, $14,190,318, par value, of participating 4-percent preferred stock, and 343,730 shares of common stock without par value.

Present holders of the debtor's first-mortgage bonds and the Finance Corporation would receive for the principal of their claims 40 percent thereof in new 4-percent income-mortgage bonds and 60 percent thereof in new 5-percent preferred stock,

and for the interest accrued and unpaid thereon 1 share of new 4-percent preferred stock for each $100 thereof. The Credit Corporation would receive for the principal of its claim 100 percent thereof in new 5-percent preferred stock, and for the interest accrued and unpaid thereon 1 share of new 4-percent preferred stock for each $100 thereof. The James Company would receive for the principal of its claim and for interest accrued and unpaid thereon new common stock at the rate of approximately 3 shares for each $100 thereof. The Western Pacific Railroad Corporation and the Western Realty Company would receive for the principal of their claims and for interest accrued and unpaid thereon new common stock at the rate of approximately 2 shares for each $100 thereof. The capital fund provided for in the approved plan would be decreased to $300,000.

Counsel for the debtor concurred in the Credit Corporation's proposed modification on oral argument. [310]

The James Company requests that the capitalization provided for in the approved plan be substantially increased so that participation may be allowed to the debtor's unsecured creditors and stockholders in the reorganization but proposes no specific amount in its modifications. It further requests that the approved plan be modified to provide for the allocation to it, the Finance Corporation, and the Credit Corporation of new securities

on the basis of their respective claims rather than on the basis of the collateral pledged to secure the claims.

The bondholders committee incorporated its proposed modifications in a modified plan of reorganization and requests that such modified plan be approved by us in its entirety. The Finance Corporation concurs in the bondholders committee's modified plan.

Under the modified plan of the bondholders committee, the effective date of the plan would be January 1, 1939, and the capitalization of the reorganized company would be comprised of $2,750,050 of undisturbed equipment obligations, $10,000,000 of first-mortgage 4-percent bonds, series A, due 1964; $20,901,240 of income-mortgage 4½-percent bonds, series A, due 2014, $31,351,900 of participating 5-percent preferred stock, and 287,025 shares of common stock without par value.

Existing first-mortgage bondholders and the Finance Corporation would receive for the principal of their claims 40 percent thereof in new income mortgage bonds and 60 percent thereof in new preferred stock, and for interest accumulated and unpaid thereon new common stock equal to the amount of such interest, at the rate of $66⅔ a share. The Credit Corporation would receive new common stock equal to the principal of its claim and interest accrued and unpaid thereon, taking the stock at a price of $70 a share. The James Company would receive for the principal of its claim and interest

accrued and unpaid thereon an amount of new common stock which bears to the amount of common stock allotted to the claim of the Credit Corporation the same proportion that the principal amount of general and refunding bonds of the debtor held by the James Company as collateral for its claim bears to the principal amount of such bonds held by the Credit Corporation as collateral for its claim. Neither unsecured creditors nor stockholders would be entitled to participate in the reorganization.

The $19,000,000 of new first-mortgage bonds would be sold at par and accrued interest to the Finance Corporation and the pro- [311] ceeds thereof used to retire the $10,000,000 of the debtor's trustees' certificates now held by the Finance Corporation. The purchase of these bonds at par is relied on as the consideration for the allocation to the Finance Corporation for the debtor's secured notes held by it of new securities of the same kind and amount as allotted to the holders of the debtor's existing first-mortgage bonds.

The modified plan of the bondholders committee also would modify and supplement the provisions in the plan approved in our prior report and order with respect to (1) the payment of interest and the date of maturity of the first-mortgage bonds, the issue of additional such bonds, and the lien of the first mortgage; (2) the rate of interest on the income-mortgage bonds, the issue of additional such bonds, and the lien of the income mortgage; (3) the

determination and application of available net income; (4) the issue of additional preferred stock, and the rights and interests of the holders of such stock; (5) the issue of additional common stock, and the rights and interests of the holders of such stock; (6) the claims not affected by the plan; (7) sale of the properties of the debtor at a fair upset price in the discretion of the court; (8) the capital fund; (9) the number, right of appointment, and functions of the reorganization managers; and (10) miscellaneous matters. These proposals will be more fully stated hereinafter.

The trustee under the debtor's general and refunding mortgage urges that there is such substantial value in certain assets pledged under the general and refunding mortgage as to which that mortgage admittedly constitutes a first lien as to require the allocation to the holders of the debtor's notes secured by general and refunding mortgage bonds a fair proportion of their claims in new securities of the same character as those allocated to the holders of the debtor's first-mortgage bonds.

Effective Date of the Plan

Under the plan approved in our prior report and order, the effective date of the plan would be July 1, 1938.

Conclusion.—Upon further consideration we approve January 1, 1939, as the effective date of the plan, and as the date from which interest shall run on the new securities provided in the plan. In view

of this modification, the modified plan will provide for the treatment of claims as of the effective date of the plan. [312]

Capitalization and Charges

The outstanding capitalization of the reorganized company under the plan approved in our prior report and order would be comprised of $3,066,117 of undisturbed equipment obligations, $10,000,000 of first-mortgage 4-percent bonds, or a note for a like amount, $19,716,040 of income-mortgage 4-percent bonds, $29,574,060 of 5-percent preferred stock of the par value of $100 a share, and 313,703 shares of common stock without par value.

Under the Credit Corporation's proposed modifications, the total funded debt of the reorganized company would be $33,651,290 and the total annual fixed and contingent interest charges thereon, plus requirements for the capital and sinking funds proposed therein, would be $1,734,758. Under the modified plan of the bondholders committee the total funded debt would be the same as under the Credit Corporation's plan but the total annual fixed and contingent interest charges, plus requirements for the capital and sinking funds, would be $2,039,264. Under the Credit Corporation's modifications the new income bonds would bear interest at the rate of 4 percent per annum and the annual installment on the capital fund would be $300,000 as compared to a rate of interest of 4½ percent on the income bonds and an annual installment of

$500,000 on the capital fund proposed under the bondholders committee's modified plan.

In our prior report we stated that the total annual charges on the funded debt of the reorganized company, plus requirements of capital and sinking funds, should not exceed $2,000,000, although the total of such amounts resulting under the provisions of the approved plan was only $1,898,223. The income bonds provided for in the approved plan would bear interest at the rate of 4 percent per annum and the annual installment on the capital fund was fixed at $500,000 with certain qualifications. We were influenced in fixing a rate of 4 percent on the income bonds in order to approve as large an amount of such bonds as we then considered practicable. The $500,000 installment on the capital fund was based on the debtor's evidence that at least $500,000 was needed for routine additions and betterments.

Conclusions.—We do not approve the decrease of capital fund installments from $500,000 to $300,000. Since the total funded [313] debt, including interest at 4½ percent on the income bonds, plus requirements of the capital and sinking funds, proposed under the bondholders committee's modified plan, plus the securities hereinafter provided for recognition of the first-lien position of the general and refunding bonds, would not result in charges materially exceeding $2,000,000, we find that the reorganized company would be justified in issuing in consummation of the plan $21,219,075 of income

mortgage 4½-percent bonds, and we will modify our previous report and order accordingly.

In our prior report we stated that the entire capital structure of the reorganized company must be realistically related to its actual earning power, and in determining such capital structure consideration should be given to the investment in the property only to the extent that such investment is justified by the probable earnings reasonably foreseeable for the future if the reorganization was to be successful. With these considerations in mind, and for the reasons there set forth, and upon consideration of the investment of the debtor in its property, the probable rate-making value thereof, and its traffic and earnings, we conclude that we cannot approve the total capital structure under the Credit Corporation's proposed modification. Upon further consideration of the above factors, however, we find that the issue by the reorganized company in the reorganization of 318,502 97/100 shares of 5-percent preferred stock of the par value of $100 a share, and 319,441 shares of common stock without par value would be justified, and we will modify our prior report and order accordingly.

Under the above modifications the capitalization of the reorganized company upon reorganization will be comprised of $2,750,050 of undisturbed equipment obligations, $10,000,000 of first-mortgage 4-percent bonds, $21,219,075 of income-mortgage 4½-percent bonds, $31,850,297 of 5-percent pre-

ferred stock, and 319,441 shares of common stock without par value.

Provisions for New Money

The plan approved in our prior report and order provides that the $10,000,000 of first-mortgage bonds be sold at par, or, as an alternative, the borrowing of $10,000,000 from the Finance Corporation, in order to secure funds to retire trustees' certificates out- [314] standing in the total amount of $10,000,000. These certificates are now held by the Finance Corporation as collateral security for a loan of $10,000,000. They rank equally and ratably with other expenses of administration and constitute a charge upon the estate prior to the claims of the first-mortgage bondholders and the secured noteholders. From representations of the intended purchasers and the possible loaner, it appears that the most feasible method for obtaining the necessary $10,000,000 is to provide for the purchase of the new first-mortgage bonds by the Finance Corporation. But the Finance Corporation is unwilling to purchase the bonds at par unless the payment of interest on them is made an immediate fixed charge instead of a contingent charge for the first five years as now provided in the approved plan. Our conclusion that the payment of interest on the bonds should be contingent for the first five years was based on the then current earnings of the debtor, and the possibility that the depressed business conditions then being experienced might continue.

Conclusions.—The present earnings justify the conclusion that the reorganized company should be able to meet the charges on the first-mortgage bonds. Under these circumstances, and in order to insure the raising of the new money which is absolutely necessary to effect a reorganization, we conclude and find that the interest on the first-mortgage bonds should be a fixed charge from the date of issue. We will modify our prior report and order accordingly, and will also provide that the Finance Corporation purchase the bonds at par and accrued interest and that in consideration of such purchase and the value of the collateral securing its claim, the Finance Corporation receive for the secured notes of the debtor held by it, treatment equal to that accorded the holders of the debtor's existing first-mortgage bonds. However, the proposed purchase of the new first-mortgage bonds or any part thereof by the Finance Corporation from the reorganized company is subject to and dependent upon our approval thereof in a separate proceeding.

Assets Pledged under the General and Refunding Mortgage

Upon further consideration, we also are of the opinion that the *that the* value of the assets pledged under the general and refund- [315] ing mortgage upon which that mortgage admittedly constitutes a first lien requires a reexamination of the allocation of new securities to the holders of the debtor's notes

secured by the general and refunding mortgage bonds. These assets consist of cash in the hands of the mortgage trustee amounting to $223,732, note of the Tidewater Southern Railway Company for $508,278 representing that company's total funded debt, $1,147,955, par value, of the capital stock of the Tidewater Southern, being about 97.5 percent of the total amount outstanding, $270,000, principal amount, of bonds and $360,834, par value, of stock of the Central California Traction Company, and $465,300, par value, of the capital stock of the Alameda Belt Line.

Under section 19a of the Interstate Commerce Act, this Commission, by division 1, in Tidewater S. Ry. Co. 46 Val. Rep. 540, reported the value for rate-making purposes of the Tidewater Southern's property owned and used for common carrier purposes to be $1,440,000 as of December 31, 1927. From December 31, 1927, to December 31, 1935, the carrier reported the net for additions and betterments, less retirements, to be $168,882, and claims for items which were in existence, but omitted from the basic inventory to be $1,910. Deducting depreciation accrued on equipment from January 1, 1928, to December 31, 1935, of $4,184, as reported by the carrier, gives a net property change of $166,608, which, if added to the final value for rate-making purposes, makes a total of $1,606,608. In addition to the property owned and used for carrier purposes, the carrier owned and held for purposes other than those of a common carrier property the present value of

which was stated in the report, supra, to be $272,951. The net additions and retirements on this class of property between January 1, 1928, and December 31, 1935, is reported as $35,691. If these amounts be added to the total for common-carrier property, the total for property owned would be $1,915,250. On the basis of the depreciation ratio of the property in 1927 the rate-making value as of December 31, 1935, plus the value of noncarrier property, would approximate $1,850,000.

During the 6-year period 1930-35 the Tidewater Southern's earnings available for payment of interest averaged $72,991 a year. In 1934 and 1935 such earnings were $113,967 and $114,512, respectively. During the same two years the debtor derived [316] revenues of $549,069 and $544,748, respectively, from traffic interchanged with the Tidewater Southern. For the 6-year period 1930-35 such revenues averaged $532,820 a year.

The holdings of the debtor in the securities of the Central California Traction Company and the Alameda Belt Line, which are pledged under the general and refunding mortgage, do not appear to be of much value, except as the debtor through such holdings may be able to secure traffic for its lines which it might not otherwise be able to secure. The Central California Traction Company's stock is owned equally by the debtor, the Atchison, Topeka & Santa Fe Railway Company, and the Southern Pacific Company. The parent companies have agreed to share equally any operating deficits or profits as

well as advances for bond interest, sinking fund, or additions and betterments. In 1934 and 1935, for example, the company reported net income of $48,690 and $6,314, but the parent companies contributed $91,638 to the company in 1934 and $61,373 in 1935. The stock of the Alameda Belt Line is owned in equal shares by the Atchison, Topeka & Santa Fe and the debtor. The parent companies have agreed to share equally any operating deficits or profits as well as advances for additions and betterments or other requirements. The parent companies contributed $18,305 to the company in 1934 and $27,727 in 1935. The company reported no net income in 1934 and $480 in 1935. Thus the lien on the securities of these two companies has no material value.

Conclusions.—It is apparent that the Tidewater Southern is a paying railroad and also a valuable feeder for the debtor. But its earnings are, to a large extent, dependent upon the divisions of joint rates accorded it by the debtor. From the foregoing, it appears that the creditors secured by the general and refunding mortgage bonds should be awarded new income mortgage bonds in the amount of $732,010, and new participating preferred stock of a par value of $1,147,955. Applying to these amounts the proportionate amounts of general and refunding mortgage bonds securing the notes of the Finance Corporation, The Credit Corporation, and the James Company, the Finance Corporation would receive $414,175 of income mortgage bonds and $649,518

of new preferred stock, the Credit Corporation $154,111 of income-mort- [317] gage bonds and $241,681 of new preferred stock, and the James Company $163,724 of income bonds and $256,756 of new preferred stock for part of their claims. However, this allocation will apply only to the Credit Corporation and the James Company, for, as appears herein, we approve the allocation of new securities to the Finance Corporation on a different basis, i.e. on the basis upon which securities are allotted to the holders of existing first-mortgage bonds. In this connection we also find that such allocation of reorganization securities to the Finance Corporation exhausts the value of the collateral pledged by the debtor under the notes held by the Finance Corporation, and that the equity of the Credit Corporation in such collateral has no value.

The above modifications require further modification of our prior report and order with respect to the allocation of the reorganization securities. Under the modified capitalization there will be available for distribution among the creditors of the debtor, other than the holders of equipment obligations and trustees' certificates, $21,219,075 of income mortgage bonds, $31,850,297 of preferred stock, and 319,441 shares of no-par-value common stock. These securities represent the equitable equivalent of the debtor's assets available for the satisfaction of claims. The total of the claims of secured creditors other than the holders of equipment obligations and trustees' certificates, including interest accrued and

unpaid to January 1, 1939, amounts to $75,138,610, and is comprised of the following: First-mortgage bondholders $49,290,100 principal and $13,143,777 interest; Finance Corporation $2,963,000 principal and $899,870 interest; Credit Corporation, $2,445,610 principal and $146,503 interest; and James Company $4,999,800 principal and $1,249,950 interest.

Conclusions in General as to Allotment of Securities

Based upon our conclusion as to the relative priority, value, and equity of the various claims and the value of the new securities available in exchange therefor, we find that the new securities should be allotted as follows: (1) First-mortgage bondholders, $19,716,040 of income-mortgage bonds, $29,574,060 of preferred stock, and 230,593 shares of common stock (the common stock to be taken at the price of $57 a share); (2) Finance Corpora- [318] tion, $1,185,200 of income-mortgage bonds, $1,777,800 preferred stock, and 15,788 shares of common stock (the common stock to be taken at a price of $57 a share); (3) Credit Corporation, $154,111 of income mortgage bonds, $241,681 preferred stock, and 35,425 shares of common stock, (the common stock to be taken at a price of $62 a share); and (4) James Company, $163,724 of income mortgage bonds, $256,756 preferred stock, and 37,635 shares of common stock (being the amount of common stock which bears to the amount of common stock allotted to the claim of the Credit Corporation the same proportion that the principal amount of gen-

cial and refunding bonds of the debtor held by the James Company as collateral for its claim bears to the principal amount of such bonds held by the Credit Corporation for its claim). We will modify our prior report and order accordingly.

New First Mortgage and Bonds

Under the modified plan of the bondholders' committee the first mortgage would be a lien, subject only to liens upon equipment, on all properties and assets owned by the reorganized company on consummation of the plan, and all property acquired after reorganization, except that (a) if the reorganized company should acquire properties of any other company (except a company which is a wholly owned railway subsidiary on January 1, 1939) constituting a class 1 carrier, such properties would not be subject to the lien of the first mortgage unless acquired in whole or in part by the use of first-mortgage or income-mortgage bonds, or moneys deposited under those mortgages, and (b) if the reorganized company should be consolidated with, or merged into, or should sell its assets substantially as an entirety to any other class 1 carrier, no properties theretofore owned or thereafter acquired by such other company would be subject to the lien of the first mortgage except properties thereafter acquired which would be appurtenant or incident to properties subject to the lien of the first mortgage, or which would be within the maintenance or replacement covenants of the first mortgage, or which would be acquired by the use of first-mortgage or

income-bonds or moneys deposited under those mortgages. [319]

The amount of bonds issuable under the first mortgage would be limited to $50,000,000. The mortgage would provide (1) that on each May 1 when the aggregate principal amount of first-mortgage bonds outstanding should equal or exceed $20,000,000 the reorganized company would pay to the trustee under the mortgage as a sinking fund a sum equal to one-half of 1 percent of the maximum principal amount of such bonds theretofore at any one time authenticated and uncanceled; and (2) that on each May 1 when the aggregate principal amount of first-mortgage bonds outstanding plus all other funded debt bearing fixed interest should exceed either (a) 35 percent of the total capitalization of the reorganized company or (b) 50 percent of such total capitalization, less the principal amount of funded debt bearing contingent interest at the time outstanding, the reorganized company, in addition to the above-stated sums provided for the sinking fund for first-mortgage bonds, would pay into the sinking fund a sum equal to 50 per cent of the available net income of the next preceding calendar year that remains after providing for all income-mortgage sinking funds and charges prior thereto. Such sinking fund would be applied to the retirement of first-mortgage bonds, by purchase in the open market or by call for tenders at not exceeding the redemption price (or in case of bonds not redeemable, the principal amount and accrued inter-

est) and whenever the amount in the sinking fund exceeds $50,000 and first-mortgage bonds are not tendered or cannot otherwise be purchased at less than their redemption price, the funds then in the sinking fund would be applied to the redemption of new first-mortgage bonds on the next succeeding interest payment date. All bonds so acquired would be canceled and no bonds would be issued to refund any such bonds. First-mortgage bonds and income-mortgage bonds outstanding would be deemed to include all bonds authenticated and delivered to the reorganized company which would not have been canceled or assured of retirement through the deposit of cash. Funded debt would include an amount equal to the capitalized value, at 5 percent per annum, of fixed rents payable for leased roads, other than terminal or bridge properties, but would not include (a) obligations (other than mortgage bonds or equipment-trust obligations) maturing not more than two years after their date, or (b) obligations of longer maturity secured by pledge [320] of bonds having a lien on property of the reorganized company except to the extent, if any, by which the principal amount of such obligations exceeds the principal amount of such bonds so pledged. Bonds guaranteed by the reorganized company as to interest or principal or both (other than bonds of a terminal or bridge company) would be included in funded debt, but, in case of a joint and several guaranty with other corporations, only to the extent of the reorganized company's basic obligation of the principal

liability. There would be included in determining total capitalization only (a) obligations constituting funded debt, (b) stock having par value, at such par value, and (c) stock without par value, at $100 a share in case of the stock issuable under the plan, and, in case of other stock, at the capital value at which such stock is carried on the books of the company, not exceeding, however, (except to the extent that earned surplus would have been duly capitalized), the net amount received by the reorganized company on the issue thereof.

The first-mortgage bonds would be issuable in series, subject to such limitations and restrictions as may be specified in the first mortgage, payable on such date or dates, in such denominations, bearing interest at such rates and containing such provisions in regard to redemption, conversion, taxes, place or places and money or moneys of payment, registration, and sinking funds, and having such other characteristics as may be prescribed by the board of directors of the new company at the time of issue, but with respect to the lien of the first mortgage all equally secured, and $10,000,000, series A, would be issued in the reorganization to provide the $10,000,000 of new money required in the reorganization. So long as any of the series A bonds are outstanding no additional first-mortgage bonds would be issued having a maturity earlier than January 1, 1964. The series A bonds would be dated January 1, 1939, would mature January 1, 1964, would bear interest at 4 percent per annum, payable

semiannually, and would be redeemable, in whole or in part, at any time on 30 days' notice, at their principal amount and accrued interest, plus a premium of 3 per cent of their principal amount if redeemed on or before December 31, 1941, 2½ percent if redeemed thereafter and on or before December 31, 1945, 2 percent if redeemed thereafter and on or before December 31, 1949, 1½ percent if redeemed [321] thereafter and on or before December 31, 1953, 1 percent if redeemed thereafter and on or before December 31, 1957, and one-half of 1 percent if redeemed thereafter and on or before December 31, 1960, and without any premium if redeemed on or after January 1, 1961.

First-mortgage bonds, in addition to those authenticated in the reorganization, could be authenticated from time to time; (a) to refund first-mortgage bonds (excluding bonds issued solely by way of pledge, except as hereinafter stated) or outstanding obligations secured by first-mortgage bonds to the extent so secured or obligations secured by prior lien on after acquired property; or (b) upon the deposit of new cash equal to the principal amount to be issued; or (c) to provide for, or to reimburse the reorganized company for, not exceeding 75 percent of expenditures made after December 31, 1938, but not more than three years prior to the date of authentication (including expenditures for the acquisition or construction of new railroad equipment, free from other lien, but not including expenditures for the making of additions and betterments to

equipment) which are properly chargeable to capital account under our accounting rules; provided, that (a) except when bonds are authenticated in respect of new mileage or in respect of new equipment, the 75 per cent would be applied to the net amount of such capital expenditures after deducting therefrom credits to capital account after December 31, 1938; (b) if any first-mortgage bonds are authenticated or cash deposited under the first mortgage is withdrawn to acquire railroad equipment, a sinking fund would be established, payable in equal annual installments sufficient to retire within the expected efficient service life of such equipment a principal amount of first-mortgage bonds equal to (1) the principal amount of bonds so authenticated or (2) the amount of deposited cash so paid; (c) if any property is acquired subject to existing liens the amount of additional first-mortgage bonds issuable therefor or issued to refund prior-lien obligations thereon, together with the aggregate amount of existing liens to which such property is subject, would not exceed 75 percent of the net cost thereof; and (d) no bonds would be issued on the basis of the acquisition of equipment under equipment-trust obligations or any obligations for the deferred payment of [322] the purchase price for equipment or on the basis of the retirement of any such obligations.

The first mortgage would contain a covenant to the effect that no first-mortgage bonds (other than those authenticated under the plan) would be sold

or pledged unless (1) the reorganized company should have contracted forthwith to sell or pledge such bonds and (2) two-thirds of the directors of the reorganized company should have determined that it was impracticable to provide the needed money (a) by the sale of income-mortgage bonds, or preferred stock, or common stock on specified terms and conditions. The first mortgage would also contain a covenant that the excess of the aggregate principal amount of all first-mortgage bonds under pledge at any one time over the principal amount of all indebtedness so secured would not exceed 10 per cent of the aggregate principal amount of all first-mortgage bonds then authenticated and uncanceled.

Conclusions.—Upon further consideration we find that the foregoing provisions with respect to the new first-mortgage bonds and the new first mortgage should be substituted for the corresponding provisions in our previous report and order, and we will modify our previous report and order accordingly, except that (1) the issue of all such bonds subsequent to the reorganization should be subject to our approval or to the approval of such regulatory body or tribunal as may have jurisdiction thereof; (2) the bonds of series A should be dated January 1, 1939, and should mature January 1, 1974; and (3) the premium payable in the event of their redemption should be at the following rates and on the following conditions: At the rate of 3 percent of their principal amount if redeemed on or before De-

cember 31, 1943, 2½ percent if redeemed thereafter and on or before December 31, 1948, 2 per cent if redeemed thereafter and on or before December 31, 1953, 1½ percent if redeemed thereafter and on or before December 31, 1958, 1 per cent if redeemed thereafter and on or before December 31, 1963, one-half of 1 per cent if redeemed thereafter and on or before December 31, 1968, and without any premium if redeemed on or after January 1, 1969. [323]

Income Mortgage and Bonds

The income mortgage under the bondholders' committee's modified plan would constitute a lien, subject to the lien of the first mortgage, upon all property from time to time subject to the lien of the first mortgage. The income-mortgage bonds would be issuable, without limit as to aggregate amount or within such limit as might be specified in the income mortgage, from time to time in different series, subject to such limitations and restrictions as might be specified in the income mortgage, payable on such date or dates, in such denominations, bearing interest at such rates and containing such provisions in regard to accumulation of interest, redemption, conversion, taxes, place or places and money or moneys of payment, registration, and sinking funds, and having such other characteristics as may be prescribed by the board of directors of the new company at the time of issue, but with respect to the lien of the income mortgage all equally secured. No interest would be mandatorily payable on in-

come-mortgage bonds of any series (except at maturity or redemption) except out of available net income, as hereinafter provided. A total amount of $20,901,240 of income-mortgage bonds would be authenticated and issued in the reorganization. The series A income bonds would be dated January 1, 1939, would mature January 1, 2014, would bear interest at the rate of 4½ percent per annum, due and payable as hereinafter stated and would be redeemable, in whole or in part, on May 1 in any year on 30 days' notice at their principal amount plus (a) full interest for the last preceding year and all unpaid accumulated interest for prior years and (b) interest at the rate of 4½ percent per annum from the last preceding December 31 to the redemption date. The series A bonds would be convertible into shares of common stock, as at the time constituted, at any time at the rate of 20 shares for each $1,000, principal amount, of such bonds.

The interest on the series A income bonds, accruing for each calendar year would (up to the limits of accumulation hereinafter specified) become absolutely due as a debt on December 31 in such year, but would be payable on May 1 of the next succeeding year or thereafter as provided below. Such interest would be mandatorily payable (except as hereinafter stated) only out of [324] available net income remaining after providing for the capital fund hereinafter described and charges prior to the capital fund. All interest due and not paid on the next following May 1 would accumulate up to the

maximum amount of 13½ percent at any one time, but not beyond. Accumulated interest, within the limitations stated, would be mandatorily payable (a) whenever, and to the extent that, there is available net income for any subsequent year remaining after the deductions made pursuant to the provisions for the first-mortgage bond sinking fund, and the capital fund (in which case such amount would be paid on the next following May 1), or (b) in any event (whether earned or not) at the maturity or on redemption of the series A income bonds.

The income mortgage would provide for the payment on May 1 of each year while any series A income-mortgage bonds are outstanding of an installment of sinking fund, if earned, as, and in the amount hereinafter stated. Such installment would be payable only out of available net income for the last preceding calendar year that remains after meeting the requirements of the first mortgage bond sinking fund and the capital fund and payment of interest on outstanding income-mortgage bonds. The installment would equal (a) one-half of 1 percent of the principal amount of income-mortgage bonds, series A, theretofore at any one time authenticated and uncanceled, plus (b) an amount equal to interest on all income-mortgage bonds, series A, theretofore purchased or redeemed out of the sinking fund, calculated at the rate paid on such May 1 upon outstanding series A income-mortgage bonds. Accruals of such sinking fund installments would not be cumulative. The sinking

fund would be applied to the retirement of income-mortgage bonds, series A, by purchase in the open market or by call for tenders at not exceeding their redemption price, and whenever the amount in the sinking fund exceeds $50,000 and income-mortgage bonds, series A, are not tendered or cannot otherwise be purchased at less than their redemption price, the funds then in the sinking fund shall be applied to the redemption of the income-mortgage bonds, series A, on the next succeeding interest payment date. All bonds so acquired shall be canceled and no bonds may be issued to refund any such bonds. Income-mortgage bonds in addition to those to [325] be issued at reorganization would be issuable from time to time to refund outstanding income-mortgage bonds or in lieu of first-mortgage bonds for the purposes and subject to the restrictions described as to the issue of additional first-mortgage bonds to the extent first-mortgage bonds are not issued for such purposes. No income-mortgage bonds, other than those to be issued in reorganization, could be issued under the bondholders' committee's proposals, unless (1) the reorganized company shall have contracted forthwith to sell or pledge such bonds and (2) the board of directors of the reorganized company, by resolution adopted by two-thirds of the entire number of directors, shall have determined that, in the opinion of the board, taking into account market and all other relevant conditions at the time, it is impracticable to provide the amount of money needed (a) by the sale of pre-

ferred stock at a price which would give a current dividend return of 6 percent or less, or (b) by the sale of common stock at a price (not less than $50 a share) which would give a dividend return (based on the regular dividend rate then in effect, or if no regular dividend rate is in effect, on the average rate at which dividends shall have been paid during the last 12 calendar months) of 6 percent or less. Provision would also be made in the mortgage substantially to the effect that the excess of the aggregate principal amount of all income-mortgage bonds under pledge at any one time over the principal amount of all indebtedness so secured should not exceed 10 percent of the aggregate principal amount of all income-mortgage bonds then authenticated and uncanceled. The mortgage would contain a further covenant for its modification and alteration and of the rights and obligations of the reorganized company and of the holders of the income-mortgage bonds, at any time by the concurrent action of the reorganized company and the holders of not less than 66⅔ percent in aggregate principal amount of the bonds then outstanding, but the covenant would contain a proviso that no such change or modification would alter or impair the obligation of the reorganized company to pay the principal of any bond without the consent of the holder of such bond.

Conclusions.—Upon further consideration we approve the foregoing provisions relative to the income mortgage and bonds, except that (1) $21,219,

075 of such bonds should be issued in [326] the reorganization; and (2) the issue of income-mortgage bonds subsequent to the reorganization should be subject to our approval or to the approval of such regulatory body or tribunal as may have jurisdiction thereof. We find that the provisions so modified should be substituted for the corresponding provisions in our previous report and order.

Determination and Application of Available Net Income

Available net income under the bondholders' committee's modified plan would be determined for each calendar year beginning with the year 1939, and continuing thereafter so long as any income-mortgage bonds remain outstanding.

Available net income for each calendar year would be determined by deducting all fixed charges of the reorganized company and its wholly owned railway subsidiaries accrued during such calendar year from the consolidated income of the reorganized company and its wholly owned railway subsidiaries available for fixed charges for such calendar year (determined in accordance with our accounting rules). It would be provided, however, that if the reorganized company should not come into ownership and possession of the properties now operated by the debtor's trustees on or before January 1, 1939, available net income for any period after January 1, 1939, until the reorganized company comes into ownership and possession of such properties, would be computed

as if the reorganized company had come into such ownership and possession on January 1, 1939, and had issued as of that date, the new securities issuable under the plan, other than the $10,000,000 of new first-mortgage bonds, series A, and in lieu of interest on such bonds there would be charged the amount of interest actually accruing during such period upon any then outstanding trustees' certificates or other obligations issued to provide funds for rehabilitation purposes.

Available net income would be ascertained for each such calendar year, as the accounts would be stated on the books of the reorganized company during such calendar year, without adjustments, except that (1) in determining available net income there would not be deducted any amounts from the proceeds of the trustees' certificates issued for rehabilitation purposes, notwith- [327] standing that under our accounting rules such expenditures may be chargeable as operating expenses; (2) if in respect of any calendar year the available net income is a deficit, the amount of the deficit may, in the discretion of the reorganized company, be carried forward and deducted in determining available net income for the succeeding calendar year or calendar years until such deficits (or accumulated deficits) be extinguished by earnings which in the absence of such deficits would be available net income; and (3) debits or credits to adjust income in prior years would be treated as income items for the year in which entered on the books, whether

cleared through income or profit and loss accounts, so far, but only insofar, as such debits and credits reflect cash receipts or disbursements in the year in which they are entered on the books.

Available net income for each calendar year would be applied to the following purposes and in the following order:

(1) To the creation, if and when the aggregate principal amount of first-mortgage bonds outstanding should equal or exceed $20,000,000, of the sinking fund hereinbefore described in connection with the first-mortgage indenture, in an amount up to, but not exceeding, in any calendar year, one-half of 1 percent of the maximum principal amount of first-mortgage bonds theretofore at any one time authenticated and uncanceled.

(2) If the directors of the reorganized company in their discretion should so determine, available net income of each calendar year may be applied to the creation of a capital fund to be applied to, or to provide for, or to reimburse the treasury for, capital investments, as defined by our Classification of Income, Profit and Loss, and General Balance Sheet Accounts for Steam Railroads, Accounts Nos. 701, 702, and 705 (or advances to subsidiaries for expenditures, which, if made directly by the reorganized company in respect of its owned or leased properties, would be charged to such accounts), or such substituted accounts as may at the time be in effect, to the extent that such capital investments have been made or contracted for during such cal-

endar year or within three months thereafter, and including therein (but only to the extent that such payments during such calendar year shall exceed depreciation of equipment charged against income for such calendar [328] year) payments made for new equipment, or initial and principal payments upon equipment leased under equipment trusts or purchased under conditional-sale agreements and installments of sinking funds proposed in the event proceeds of additional first-mortgage bonds are issued in the purchase of equipment, provided, however, that

(a) The amount set aside in the capital fund should not exceed $500,000 in respect of any calendar year, or such lesser sum as may be required, together with unappropriated accumulations in the fund as of the close of the calendar year prior to that for which the payment is to be computed, less charges for additions and betterments during such calendar year for which payment is to be computed, to bring the total in the fund to $1,000,000; provided, however, that the capital fund should not exceed $1,000,000 at any one time;

(b) The capital funds may be applied only to such part of the cost of the capital investments as hereinbefore defined as remains after deducting from such cost all retirements of roadway and structures charged against income in such calendar year; and

(c) To the extent that expenditures are so provided for or reimbursed out of the capital fund, the company would not thereafter have the right to issue any bonds or other evidence of indebtedness or any stock ranking, as to either assets or dividends, in priority to, or on a parity with, the preferred stock of series A to capitalize or reimburse such expenditures; provided, however, that such expenditures may, within such limits, if any, as may be specified in the first mortgage or the income mortgage, be used to supply the excess of capital expenditures required to be certified under either mortgage over the principal amount of the bonds that may be issued under the terms thereof; and

(3) Any then remaining available net income for any calendar year would be applied to the payment on the next succeeding May 1 of interest on the then outstanding income mortgage bonds (not including any thereof held in the sinking fund) accrued during the last preceding calendar year, and of any accumulated unpaid interest thereon.

(4) Any then remaining available net income for any calendar year would be applied to the payment of the sinking fund installment provided for the income bonds, series A. [329]

(5) Any then remaining net income for any calendar year might be applied to the creation of a sinking fund for income-mortgage bonds of series

other than A, if any such sinking fund should have been provided for at the time of the creation of any such series.

(6) Any then remaining available net income for any calendar year would be applied to the payment of the installment, if any, then due under the sinking fund provided in the event first-mortgage bonds are outstanding in excess of certain limits.

(7) Any then remaining available net income for any calendar year may be applied to any proper corporate purpose of the reorganized company (except dividends on the new common stock), including, if and to the extent that such dividends are declared by the directors, the payment of dividends upon the preferred stock in respect of such year and of any accrued and unpaid cumulative dividends on the preferred stock.

(8) Any then remaining available net income for any calendar year may be applied to any proper corporate purpose of the reorganized company, including dividends on common stock (but only after all accrued and unpaid cumulative dividends on the preferred stock have been paid).

No interest would need to be paid on income-mortgage bonds if the amount to be paid is less than one-fourth of 1 percent. Any excess available for interest but not paid because of the foregoing provision would be reserved and added to income available for interest on the income-mortgage bonds for the next succeeding calendar year.

If there are outstanding income-mortgage bonds of different series, the amount applicable to interest

on such bonds would be distributed among the respective series in proportion to the unpaid interest at the time accumulated on the bonds of such series, respectively.

Dividends could be paid on stock of any class (subject to the relative rights of the several classes of stock) out of the income of any calendar year prior to the close of such calendar year if, but only if, prior to the declaration of such dividends, the directors should have determined that the available net income [330] for such year applicable for the purposes specified in the foregoing paragraphs (1), (3), (4), (5), and (6) would be more than sufficient to pay the amounts payable out of such available net income pursuant to such paragraphs and such amounts should have been deposited in trust for the purposes specified in such paragraphs. Dividends on common stock would be so declared only if, prior to such declaration, the directors should have determined that the applicable part of available net income for such year would be more than sufficient to pay the amount hereinabove specified for dividends (including accumulations) on the preferred stock and such amount should have been deposited in trust for the purpose of paying such dividends.

Conclusions.—In our opinion payments into the capital fund should be mandatory upon the board of directors and the plan should so provide. It should also provide that the amount required to be set aside for the capital fund each calendar year be $500,000

less amounts charged during the calendar year to operating expenses in respect of retirements of road property, and in respect of depreciation of road property if reserves for depreciation of road property be established, provided that the amount in the capital fund at the end of the calendar year, including the amount set aside for the fund in respect of that calendar year, should not exceed $1,000,000. The plan should further provide that the capital fund may be applied only to such part of the cost of capital investments defined in the foregoing proposals as remains after deducting from such cost the amounts charged to operating expenses for retirement of road property and all amounts charged to operating expenses for any reserves for depreciation of road property that may be established. In all other respects we find that the foregoing provisions for the determination and application of available net income should be substituted for the corresponding provision in our previous report and order.

Preferred Stock

Under the modified plan of the bondholders committee, preferred stock would be authorized in the total amount of 750,000 shares each of the par value of $100, of which 313,519 shares of series A would be issued in the reorganization. The additional [331] authorized preferred stock not issued in the reorganization would be issuable from time to time in the discretion of the board of directors of the reorganized company, but (unless for the purposes

for which first-mortgage bonds might otherwise have been issued) only after the concurring vote or consent of the holders of a majority of the outstanding preferred stock. So far as permitted by law, such additional preferred stock would be of series A, or of any other series, one or more, and preferred stock of any such other series might bear dividends at such rate, cumulative or noncumulative, might be redeemable or nonredeemable, convertible or nonconvertible, and might have such other rights and privileges and be subject to such limitations and restrictions, as should be from time to time determined by the board of directors prior to the issue of preferred stock of any such other series. If there should be outstanding shares of preferred stock of different series, the earnings applicable to dividends thereon would be apportioned among the respective series in proportion to the dividends accumulated on the shares of such series respectively. In any liquidation or winding up of the reorganized company, whether voluntary or involuntary, the preferred stock would be entitled to receive, out of the assets of the reorganized company, its par value, plus any accrued and unpaid cumulative dividends thereon, plus such premium, if any, as may be specified for any series, before any distribution would be made on the common stock, but would not be entitled to any further participation in such assets. Holders of preferred stock would be entitled to one vote per share on all matters, except that in the elections of directors, which would be by cumu-

lative voting, each holder of stock of either class would be entitled to as many votes per share as the number of directors to be elected. The reorganized company could not, without the vote or consent of the holders of at least two-thirds in par value of the outstanding new preferred stock,

(1) Create or permit to be created any mortgage or other lien upon any of the properties, excepting the new first mortgage, the new income mortgage, or purchase-money liens (including equipment obligations) upon property hereafter acquired, given for not more than 75 percent of the purchase price of such property; [332]

(2) Create or issue any bonds, notes, or other evidence of indebtedness maturing more than two years from their date, except new first-mortgage bonds and new income-mortgage bonds and except purchase-money obligations given for not more than 75 percent of the purchase price of the property hereafter acquired;

(3) Create any stock ranking either as to assets or dividends, in priority to, or on a parity with, the new preferred stock, or

(4) Permit any subsidiary, all of the stock of which except directors' shares, shall be owned by the reorganized company, to create any mortgage or lien upon any of its properties or issue any bonds, notes, or other evidences of indebtedness or any additional stock, unless the obligations secured by such mortgage or other lien or such other obligation or such stock would be acquired by the reorganized company.

The preferred stock, series A, would be entitled to receive all accumulated unpaid dividends and current dividends at the rate of 5 percent per annum in respect of any calendar year before any dividends could be paid or declared or set apart for payment on the common stock in respect of such year. Such dividends would be cumulative to the extent earned in any calendar year but not paid; but such dividends would otherwise be noncumulative. For the purposes of the next preceding sentence herein above, preferred stock dividends would be considered to be earned in any calendar year to the extent covered by available net income for such year that remains after providing for prior charges. After dividends shall have been paid or declared on the new common stock at the rate of $3 a share in respect of any calendar year, each share of preferred stock, series A, would be entitled to share equally with each share of new common stock in any dividends paid or declared in respect of such year. The preferred stock, series A, would be redeemable, in whole or in part, at any time at its par value plus accrued and unpaid cumulative dividends, and proportionate dividend for the current year. The holders of preferred stock, series A, would not have any preemptive right to subscribe to any additional issues of stock of any class or of securities convertible into stock of any class.

Conclusion.—We find that the foregoing provisions should be substituted for corresponding provisions of our previous report [333] and order, ex-

cept that (1) 318,502 97/100 shares of preferred stock, series A, should be issued in the reorganization; and (2) no preferred stock, after reorganization, should be issued without our approval or the approval of such regulatory body or tribunal as may have jurisdiction thereof.

Common Stock

Under the modified plan of the bondholders committee, common stock would be authorized in the total amount of 1,000,000 shares, without par value, of which 287,025 shares would be issued in the reorganization and 418,026 shares would be reserved for the conversion of income-mortgage bonds, series A. Holders of common stock would be entitled to one vote on all matters except that directors would be elected by cumulative voting.

Conclusion.—We find that the foregoing provisions should be substituted for the corresponding provisions of our prior report and order, except that (1) 319,441 shares of common stock should be issued in the reorganization and 424,382 shares should be reserved for the conversion of income-mortgage bonds, series A; and (2) no new common stock additional to that actually issued in connection with the reorganization shall be issued without our approval or the approval of such regulatory body or tribunal as may have jurisdiction thereof.

Claims Not Affected by the Plan

The modified plan of the bondholders committee would provide that the following claims would not

be affected by the plan: (a) Current liabilities of the debtor incurred in the ordinary conduct of its business prior to the institution of the reorganization proceeding, which are entitled to priority over one or more of the mortgages of the debtor, and (b) current liabilities and obligations of the debtor's trustees incurred during the reorganization proceeding. It would further provide that to the extent that such claims, liabilities, or obligations are not paid by the debtor or its trustees pursuant to order of the court, they would be paid in cash or assumed by the reorganized company. All such claims, liabilities, and obligations may be adjusted or compromised [334] and dealt with or paid or discharged by the reorganized company, all as may be determined by the directors of the reorganized company subject to approval by the court. The reorganized company would be deemed to have assumed such of the contracts of the debtor which are executory in whole or in part, including any executory leases and liabilities under guaranties, as shall have been affirmed by the debtor's trustees with the approval of the court prior to the date of confirmation of the plan, and also any executory contracts made by the debtor's trustees with the approval of the court which, by their terms, do not terminate at the conclusion of the reorganization proceeding.

Conclusions.—We are unable to approve all of the foregoing provisions. The plan should provide that claims *against* the debtor entitled to priority over any mortgage of the debtor, current liabilities,

and obligations incurred by the trustees of the properties of the debtor during the reorganization proceeding, and expenses of reorganization allowed by the court within the maximum fixed by us should be paid in cash or assumed by the reorganized company, provided that any amounts so assumed by the reorganized company shall constitute a charge upon the properties of the reorganized company prior in lien to all new securities issued under the plan. When so treated, we find that claims against the debtor entitled to priority over any mortgage of the debtor are not affected by the plan. We further find that the claims of the holders of the debtor's equipment-trust certificates, and obligations under the Baldwin lease and Pullman contract are not materially and adversely affected by the plan. The plan should further provide that the reorganized company should be deemed to have assumed the executory contracts of the debtor which by their terms do not terminate at or prior to the conclusion of the reorganization proceeding and which shall have been affirmed or shall not have been disaffirmed by the trustees, with the approval of the court, prior to the confirmation of the plan and also any executory contracts made by the trustees with the approval of the court which by their terms do not terminate at or prior to the conclusion of the reorganization proceeding. The plan also should provide that the reorganized company will assume the liability for, and will pay in full in due course, any and all taxes due to the United States from the debtor or the

debtor's trustees [335] for any taxable period prior to the date of the confirmation of the plan, whether or not proof thereof has been made in this proceeding and without prejudice by reason of not having made proof thereof. We will modify our previous report and order accordingly.

Method of Executing the Plan

Under the bondholders' committee's modified plan, existing mortgages on the debtor's properties would be released and canceled, and all funds on deposit with the trustees under the debtor's mortgages representing sums paid from time to time for the release of properties, sale of scrap, and otherwise, and all collateral pledged under the mortgages, would be surrendered to the reorganized company free from liens of the debtor's mortgages, after deductions therefrom of any amounts which the court may find should be deducted under the provisions of such mortgages and consistent with the plan. All collateral pledged by others than the debtor as security for the debtor's notes to the Finance Corporation, Credit Corporation, and James Company, would be surrendered to the pledgors thereof, and all collateral pledged by the debtor as security for such notes would be reduced to possession by the respective pledgees thereof, and would then be by them surrendered to the reorganized company and canceled, except that the Credit Corporation would not release or surrender any right or interest in the distributive shares of the debtor or its subsidiaries

under the marshaling and distributing plan, 1931, but any proceeds from such distributive shares after the effective date of the plan, would become the property of and be retained by the Credit Corporation, but to the extent to which received prior to the issue of the new securities under the plan would be applied in reduction of the claim of the Credit Corporation.

Conclusion.—We do not approve that part of the foregoing provisions which states that all collateral pledged by others than the debtor as security for the debtor's notes to the Finance Corporation, Credit Corporation, and James Company would be surrendered to the pledgors thereof. With this provision eliminated we approve the foregoing provisions. The court by orders of March 11, 1936, and March 20, 1936, authorized the Chase Na- [336] tional Bank of the City of New York to pay from funds which had been deposited with it by the debtor all outstanding first-mortgage bond coupons which matured on or prior to September 1, 1933, and had not theretofore been presented for payment. In the absence of later information it is assumed that not all of these coupons will have been presented at the consummation of the reorganization and that the plan should make provision for them. Our order of approval of a plan will provide that such coupons shall be paid in cash by the new company if and when presented by the holders thereof.

Under the bondholders' committee's modified plan, the plan would be carried out under the supervision of a reorganization committee consisting of five persons, three of whom would be designated by holders of existing first-mortgage bonds in such manner as we may prescribe, one by the Finance Corporation, and one by the Credit Corporation and the James Company jointly. The plan would be carried out either by revesting the properties formerly of the debtor in the debtor or by transferring such properties to a new corporation organized for the purpose, and the execution by the corporation in which such properties are vested of the new mortgages and the issue by it of the new securities contemplated by the plan. The method of carrying out the plan would be determined by the reorganization committee in its discretion, and the reorganization committee would also determine, subject to the approval of the court, the form and, except as otherwise expressly provided in the modified plan, the provisions of all mortgages, bonds, coupons, charters, by-laws, stock certificates, voting trust certificates, acceptances, assents, and all other instruments in the judgment of the reorganization committee necessary or desirable in connection with carrying out the plan. The reorganization committee would act by a majority of its members as from time to time constituted, at a meeting or in writing without a meeting. The reorganization committee could from time to time delegate to others any power or discretion conferred upon it by the plan; and the

members of the committee would not be liable for any action taken by them in good faith or by any person employed by the committee in good faith, except for their respective individual malfeasance or wilful neglect. [337]

Conclusions.—Upon further consideration, we find that the foregoing provisions respecting the appointment and functions of the reorganization committee and the carrying out of the plan should be substituted for the corresponding provisions in our prior report and we will modify our previous report and order accordingly except that

(1) The reorganization committee should consist of three persons, all to be approved by the court, one of whom should be designated by the bondholders committee, one by the Finance Corporation, and one by the Credit Corporation and the James Company jointly. Should the bondholders committee, or the Finance Corporation, or the Credit Corporation and the James Company jointly, fail to designate a representative for membership on the committee within such time as the court considers reasonable, the court should appoint such a representative.

(2) Should the reorganization committee solicit deposits of securities, or authorization to represent holders of the debtor's existing securities in the reorganization, the terms and conditions upon which such solicitation and representation would be made should be subject to our prior approval.

The modified plan of the bondholders committee would provide that in case any class of creditors or stockholders does not accept the plan, any party in interest would have the right to move the court to confirm the plan on the ground that the interests of such class of creditors have no value, or that the equity of such class of stockholders has no value, or on the ground that the plan provides for the payment in cash to such class of an amount not less than the value of their interests or equity, if any, in accordance with subsection (e) of section 77, through the sales described in the following paragraph in accordance with clause (5) of subdivision (b) of section 77:

If so ordered by the court the plan would be executed by a sale at public auction, at not less than a fair upset price as determined by the court, of all or any part of the properties and assets of the debtor, free from all liens or claims, other than those expressly stated in the plan not to be affected by the plan. Upon any such sale the properties and assets offered for sale may be purchased for the benefit of the reorganized company by the reor- [338] ganization committee, or by a purchaser nominated by the reorganization committee, and in that event there would be applied on account of the purchase price the distributive share, if any, of the proceeds of such sale of all securities the holders of which should have accepted the plan, and the securities, though not accepting the plan, of all classes which, as a class, have accepted the plan in accord-

ance with section 77. All properties and assets so sold which are purchased by the reorganization committee would be transferred to the reorganized company. In the event of any such sale, the reorganization committee might in its discretion sell all or any portion of the new securities distributable under the plan in respect of the securities of any creditor, if neither such creditor nor the class to which such creditor belongs should have accepted the plan in accordance with section 77. The proceeds of any such sale, together with any other funds, which in the judgment of the reorganization committee are available among the assets of the debtor estate or of the reorganized company, might be used to pay the portion of the purchase price payable in cash on any such sale. Upon any such sale, nonassenting secured creditors of any class, which, as a class, should not have accepted the plan in accordance with section 77 and the unsecured creditors and the stockholders of either class, would be entitled to receive, in lieu of the securities, if any, otherwise issuable under the plan, their aliquot proportion of the proceeds of such sale, after deducting therefrom all expenses of such sale and the amount which would be required to pay in full, or principal and unpaid interest accrued to the date of such sale, all creditors whose claims are prior in lien or superior in equity to the claims of such nonassenting secured creditors or the rights of such unsecured creditors or stockholders. If any properties and assets are purchased at any such sale by others than

the reorganization committee, security holders having an interest in such properties and assets would be entitled, in accordance with the priorities of their respective interests, to receive, in lieu of such securities, if any, issuable to them, their aliquot portion of the proceeds of the sale of such property and assets, after deducting therefrom all expenses of such sale. In such event the reorganization committee would, with the approval of this Commission and the court, make such modification in the plan as may be appropriate under the circumstances.

[339]

In our prior report we declined, for reasons stated therein, to approve a provision in the plan for the public sale of the property at a fair upset price. The foregoing terms and conditions for such a sale, however, are materially different from those proposed originally. Under the foregoing provision, the determination as to whether a sale should be had would be in the discretion of the court.

Conclusions.—Since, in our opinion, the plan of reorganization approved herein conforms to the requirements of section 77, and believing that the public interest would be promoted by an early consummation of this proceeding, we approve the substance of the foregoing provisions respecting the sale of the debtors' properties, but not all of the detailed provisions proposed in connection therewith. We approve the following in lieu of the foregoing provisions:

If deemed desirable and so ordered by the court, the plan, after it has been found fair and equitable

and confirmed by the court, may be executed by a sale at not less than a fair upset price to be fixed by the court, of all or any part of the property of the debtor, all on such conditions and in such manner as the court may direct. Upon any such sale the property and assets offered for sale may be purchased for the benefit of the reorganized company by the reorganization committee, and in that event there shall be applied on account of the purchase price the distributive share of the proceeds of such sale of all securities the holders of which shall have assented to the plan, and of the securities, though not assenting to the plan, of all classes which shall have accepted the plan.

In the event of a sale of the properties of the debtor to the reorganization committee, the committee may in its discretion sell all or any portion of the new securities, if any, distributable under the plan to holders of existing securities, if neither such security holder nor the class to which such security holder belongs shall have accepted the plan, provided that security holders in a class which shall not have accepted the plan, and who themselves shall not have accepted the plan shall have the right, if they shall so notify the committee within a period of 30 days after the confirmation of such sale, to assent to the plan and receive the securities allocated to them under the plan in lieu of their aliquot share of [340] the proceeds of such sale of the properties. The proceeds of any such sale of securities may be used to pay the portion of the purchase

price payable in cash on any such sale of the properties.

Method of Giving Notice

The modified plan of the bondholders committee provides that unless otherwise provided in section 77 or any order or orders of the court or of this Commission, whenever notice would be required or permitted to be given under or pursuant to the plan, such notice should be given by publishing a copy of such notice once in each week on any secular day in each such week for two successive weeks in one newspaper published and of general circulation in the Borough of Manhattan, City and State of New York, and in one newspaper published and of general circulation in the City of San Francisco, State of California, and also (1) in case of notices to security holders who have accepted the plan, by mailing such notice to such security holders at the addresses set forth in the acceptances signed by them; and (2) in case of notices to security holders who shall not have accepted the plan, by mailing such notice to such security holders whose names and addresses appear on the books of the debtor or of the reorganized company, as the case may be, but failure to mail any such notices, would not invalidate the notice by publication above provided for, which alone would be sufficient.

Conclusion.—We approve the foregoing provisions and will incorporate them in the modified plan.

Expenses of the Reorganization

The bondholders' committee's modified plan provides that all expenses in connection with the plan and its consummation, and all costs of administration and other allowances made by the court would be paid by the reorganized company, subject to the provisions of section 77, and would constitute a charge upon the properties of the reorganized company as a cost of administration prior in lien to all new securities issued under the plan. There would be included in such expenses such reasonable compensation for necessary services rendered and reimbursement for actual expenses incurred in connection with the reorganization [341] proceeding and the plan by the trustees under the mortgages, the reorganization committee, the bondholders committee, and other parties in interest and the attorneys or agents of any thereof, as may be approved by this Commission and the court pursuant to section 77, but no compensation would be paid to members of the bondholders committee for their services as such members.

Conclusion.—In view of the definite provisions of section 77 relative to allowances for compensation and expenses of a reorganization, and in view of the other provisions of the plan, we see no necessity for including the foregoing provisions in the plan and, therefore, do not approve them.

Management

Under the modified plan of the bondholders' committee the board of directors of the reorganized company would consist of not less than 7 nor more than 11 members, who would be elected by the stockholders of the reorganized company at an election to be held not later than 90 days after the consummation of the plan. Pending such election the board of directors would consist of such persons as may be designated by the reorganization committee with the approval of the court.

Conclusion.—We find that the foregoing provisions should be incorporated in the modified plan.

General Conclusions

We find that the plan of reorganization approved in our report and order of October 19, 1938, supra, modified as herein indicated, will meet with the requirements of section 77 (b) and (e) of the Bankruptcy Act, as amended, and will be compatible with the public interest.

In view of the provisions of section 77(f), we will give consideration, when a plan is finally adopted, to the granting of such authorizations as may be requisite and appropriate for the execution of the plan, including the issue of securities.

The authorization and approval herein granted by us should be upon the condition that the journal entries covering the necessary accounting adjustments under such authorization and approval

should be submitted to us for approval before they are recorded [342] on the books of the reorganized company under the plan of reorganization herein approved.

An appropriate order, superseding our order of October 10, 1938, in this proceeding, will be entered.

Eastman, Commissioner, concurring in part:

For the reasons indicated in my expression of partial concurrence in connection with the prior report in this proceeding, 230 I.C.C. 81, 107, I do not favor the provision for a mandatory capital fund.

Nor am I satisfied with the following provision of the report:

> (2) if in respect of any calendar year the available net income is a deficit, the amount of the deficit may, in the discretion of the reorganized company, be carried forward and deducted in determining available net income for the succeeding calendar year or calendar years until such deficits (or accumulated deficits) be extinguished by earnings which in the absence of such deficits would be available net income;

It seems to me that this provision should be mandatory and should not be left to the discretion of the railroad management.

While I do not dissent from other provisions of the plan, I venture to add a word of comment in

regard to one problem which has engaged much attention in the consideration of this and other reorganization plans. It is recognized that it is one thing to bring a railroad out of bankruptcy with a sound financial structure and quite another thing to keep the structure sound for the future. There are, broadly speaking, two ways to promote the latter result. One way is to incorporate more or less automatic safeguards in the plan, in the way of mortgage limitations upon the issue of bonds, capital funds, sinking funds, and the like. The other way is to rely upon a sound and intelligent management of the company as a first line of defense, and upon sound and intelligent regulation by this Commission as a second line of defense.

The difficulty with the first way is that it is impossible to foresee all contingencies of the future, and rigid provisions of the automatic type may, on this account, prove of dubious benefit under some conditions, if not of actual harm. While I by no [343] means oppose all such provisions, they do not impress me as being entirely satisfactory.

The second way ought to be the better way. Its weakness lies in the frailties of human beings. In one respect neither the Commission nor the managements made a very distinguished record for soundness and intelligence in connection with the issue of railroad securities in the decade which preceded the depression. The record was not so bad as some think, for there were notable issues of stock, and the ratio of indebtedness to total in-

vestment for the railroads in the aggregate decreased materially, but I think it cannot be denied that insufficient advantage was taken of opportunities to issue stock in preference to bonds, and that too little foresight was exhibited in this respect. I am hopeful, however, that experience has taught its lesson and that the managements may be counted upon as a more effective safeguard for the future against the development of unsound financial structures than they have proved to be in the past, and I am confident that this will be true of the Commission.

Miller, Commissioner, concurring in part:

As stated in my dissent to our previous decision in this case (Western Pacific Reorganization, 230 I.C.C. 61), I do not agree with the provision for a mandatory capital fund. I am also unable to agree that the stockholders of the old company are not entitled to participate in the reorganization. If capitalization were based on the original cost of the property less depreciation, as I also suggested in the decision referred to above, the stockholders could be given an opportunity to participate to some extent in the future profits, if any, either with or without a cash contribution as might be appropriate.

While I do not feel warranted at this time nor at this stage of the proceedings in connection with the reorganization of this road, in dissenting upon

any other points, I do wish to draw attention to certain questions which this plan raises in my mind. All these questions are closely related to the possibility that under this plan the future financing of the Western Pacific will be done primarily by expanding fixed interest debt. Although the junior income indenture under the present plan has quite properly been opened up for future financing, we still permit the increase of fixed interest [344] first mortgage bonds up to a total of 50 million dollars. This permission, when considered in connection with the par value of the preferred stock, the cumulation of income bond interest and the covenants relating to the issuance of the first mortgage bonds, strengthens an impression that this plan may facilitate the creation of first mortgage fixed interest debt and militate against financing by junior incomes and capital stock.

The par value provision naturally tends to prevent the preferred stock from being sold at less than par, while the provision for the accumulation of interest charges on the income bonds, even though only a partial one, will tend to prevent the preferred stock price from reaching a par level.

The new plan attempts to guard against the overissue of fixed interest bonds by requiring that whenever the fixed interest debt of the corporation exceeds 35 percent of the total capitalization of the reorganized company or 50 percent of such total capitalization less the principal amount of contin-

gent interest funded debt, the corporation shall pay into the sinking fund 50 percent of the available net income of the preceding calendar year after providing for all income mortgage sinking funds and charges prior thereto, such fund to be applied to the amortization of the first mortgage bonds.

The total capitalization of the company, taking the no par common stock at $100 per share, has been fixed at $97,763,522. The fixed interest debt is $12,750,050. The total capitalization less the present fixed interest debt, therefore, is $85,013,472. If neither the income bonds, other debt, nor the stock are increased, the first mortgage fixed interest debt may be expanded to a total of $45,776,485, or 35 percent of a total capitalization of $130,789,957 before the penalty sinking fund under the 35 percent of total capitalization covenant becomes effective. On similar assumptions the total fixed interest debt, including these bonds, may rise to a higher total before the penalty sinking fund under the 50 percent of total capitalization less the contingent interest debt becomes operative.

Although the amortization of the income bonds is to begin immediately under the plan, no sinking fund is provided for the first mortgage fixed interest debt until or unless the amount of such debt is double the 10 million dollars of first mortgage bonds presently to be issued. [345]

The lien and the earning capacity of the income bonds and consequently their availability for financing would no doubt be greatly improved (1) by

the limitation of the first mortgage issue to 10 million or perhaps a slightly larger amount to provide for emergencies, and (2) by the requirement of sinking fund payments on the first mortgage bonds at a rate sufficiently high to eliminate them from the capitalization at a comparatively early date. The sinking fund payments on the income bonds might be postponed for a time in order to increase those on the first mortgage debt, and the amounts to be paid to the capital fund could be diverted to the same purpose.

If the preferred stock were made a no par issue and the cumulative feature of the income bonds eliminated, the availability of the former for future financing would presumably be greatly enhanced. The loss of protection from the elimination of the cumulative feature might be compensated by giving the bondholders in its place a participation in the earnings after income bond interest, such participation to be applicable only in so far as the specified rate has not been paid on the incomes in any and all prior years.

The proposed restriction on the issuance of fixed interest first mortgage bonds would appear to imply that it is the amount of fixed interest debt in relation to the capitalization which determines the ability of the corporation to meet fixed interest payments. Is it not rather the amount of fixed interest in relation to the earnings which determines the ability of the corporation to meet its interest charges? Certainly the question may be raised as

to whether the sounder method of checking the undue expansion of fixed interest debt does not lie in covenants restricting the expansion of that debt in terms of demonstrated capacity to meet fixed interest charges during the immediately preceding years. Nor would it be necessary to make this earnings type of covenant less elastic than the one now proposed. Although we have jurisdiction over the future issuance of securities by this road, an indenture limitation on the issuance of bonds in terms of the relation of fixed interest obligations to total capitalization is no less a restriction of our jurisdiction than a similar limitation framed in terms of adequate coverage of interest charges by the earnings. [346]

The amortization of the first mortgage bonds could be begun immediately. If the bonds were limited as indicated above, to the amount presently to be issued or slightly higher, the sinking fund payments should be fixed at whatever percentage of the earnings (estimated as nearly as possible) after fixed or contingent interest is calculated to redeem the entire debt in some limited period of years. If the mortgage were left open up to 50 million dollars, the percentage of earnings after fixed or after contingent interest, as might be determined, should be so adjusted that the sinking fund payments would progressively increase with the expansion of borrowing to an extent sufficient to redeem all the first mortgage bonds by maturity regardless of the

extent or frequency of first mortgage borrowing in the meantime.

Aitchison, Commissioner, did not participate in the disposition of this case. [347]

ORDER

At a General Session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 21st day of June A. D. 1939.

Finance Docket No. 10913

Western Pacific Railroad Company Reorganization

It appearing, That this Commission, by its report and order of October 10, 1938, approved a plan of reorganization for the debtor; and

It further appearing, That upon the filing of petitions by the debtor and five other interveners, requesting that certain modifications be made in the approved plan, the proceeding was reopened and oral argument was heard on the question of such proposed modifications; and

It further appearing, That the Commission upon reconsideration of the record herein in the light of the aforesaid argument, has, on the date hereof, made and filed its supplemental report containing its findings of fact and conclusions thereon with respect to the modifications of plan requested, and a full statement of the reasons therefor, which

report is hereby referred to and made a part hereof.

It is hereby ordered, That the following plan of reorganization of the aforesaid debtor be, and it is hereby, approved:

Terms used herein shall have the following meanings respectively:

The debtor.—The Western Pacific Railroad Company;

Consummation of the plan—The transfer to the reorganized company, to the extent contemplated by the plan, of the properties and assets of the debtor.

Court.—The District Court of the United States for the Northern District of California, Southern Division. [348]

Effective date of the plan.—The date from which interest shall run on the new securities provided in the plan, namely, January 1, 1939.

First-mortgage bonds.—Bonds issued under the first mortgage dated June 26, 1916, from the company to the First Federal Trust Company and Henry E. Cooper, as trustees (Crocker First National Bank and Samuel Armstrong successor trustees), designated as the first mortgage.

General and refunding bonds.—Bonds issued under the mortgage dated January 1, 1932, from the company to the Chase National Bank of the City of New York as trustee (Irving Trust Company now successor trustee), designated as the general and refunding mortgage.

Reorganized company.—The corporation, whether the debtor or a new corporation, which shall acquire substantially all of the properties now held by the bankruptcy trustees and issue the new securities provided for by the plan.

A. The effective date of said plan shall be January 1, 1939.

B. The capitalization of the reorganized company, upon consummation of the plan, shall consist substantially of undisturbed equipment trusts, Baldwin lease, and Pullman contract, $2,750,050; new first-mortgage 4-percent bonds $10,000,000; new income-mortgage 4½-percent bonds $21,219,075; new 5-percent preferred stock $31,850,297; new common stock without par value 319,441 shares.

C. The first-mortgage bonds shall be secured by a first mortgage, which will be a lien, directly or through pledge of securities, subject only to liens upon equipment, on all the properties and assets owned by the reorganized company on the consummation of the plan, including securities, equipment, and the equity in such equipment as is subject to equipment obligations. The first mortgage will also be a lien on all similar property acquired by the reorganized company after the reorganization, except that (a) if the reorganized company shall acquire the properties of any other company (except a company which is a wholly owned railway subsidiary on January 1, 1939) constituting a class I carrier as defined by the rules of this Commission or other public regula- [349] tory bodies having

jurisdiction at the time, such properties shall not be subject to the lien of the first mortgage unless acquired in whole or in part by the use of first-mortgage bonds or income-mortgage bonds, or moneys deposited under the first mortgage or the income mortgage, and (b) if the reorganized company shall be consolidated with, or shall be merged into, or shall sell its assets substantially as an entirety to, any other company which at the time is a class I carrier defined as aforesaid, no properties theretofore owned or thereafter acquired by such other company shall be subject to the lien of the first mortgage except properties thereafter acquired which shall be appurtenant or incident to properties subject to the lien of the first mortgage, or which shall be within the maintenance or replacement covenants of the first mortgage, or which shall be acquired in whole or in part by the use of first-mortgage bonds or income-mortgage bonds or moneys deposited under the first mortgage or the income mortgage.

D. The amount of bonds issuable under the first mortgage will be limited to $50,000,000.

The first mortgage will provide (1) that on each May 1 when the aggregate principal amount of first-mortgage bonds outstanding shall equal or exceed $20,000,000, the reorganized company will pay to the trustee under the first mortgage as a sinking fund a sum equal to one-half of 1 percent of the maximum principal amount of first-mortgage bonds theretofore at any one time authenticated and

uncanceled; and (2) that on each May 1 when the aggregate principal amount of first-mortgage bonds outstanding plus all other funded debt bearing fixed interest shall exceed either (a) 35 percent of the total capitalization of the reorganized company, determined as hereinafter provided, or (b) 50 percent of such total capitalization, less the principal amount of funded debt bearing contingent interest at the time outstanding, the reorganized company, in addition to the sums provided in this subdivision D to be paid, will pay into said sinking fund a sum equal to 50 percent of the available net income of the next preceding calendar year that remains after providing for all income mortgage sinking funds and charges prior thereto (i. e., that remains after the deductions made pursuant to subparagraphs (1), (2), (3), (4), and (5) of *of* the fourth paragraph of subdivision L hereof; or after the [350] provisions of said subdivision L shall have ceased to be operative, 50 percent of net income as defined by the accounting rules or practice referred to in said subdivision L). Such sinking fund shall be applied to the retirement of first-mortgage bonds, by purchase in the open market or by call for tenders at not exceeding the redemption price (or in the case of bonds not redeemable, the principal amount and accrued interest), and whenever the amount in the sinking fund exceeds $50,000 and first-mortgage bonds are not tendered or cannot otherwise be purchased at less than their redemption price, the funds then in-

the sinking fund shall be applied to the redemption of new first-mortgage bonds on the next succeeding interest payment date. All bonds so acquired shall be canceled and no bonds may be issued to refund any such bonds. First-mortgage bonds and income-mortgage bonds outstanding shall be deemed to include all bonds authenticated and delivered to the reorganized company which shall not have been canceled or assured of retirement through the deposit of cash. Funded debt shall include an amount equal to the capitalized value, at 5 percent per annum, of fixed rents payable for leased roads, other than terminal or bridge properties, but shall not include (a) obligations, other than mortgage bonds or equipment-trust obligations, maturing not more than two years after their date, or (b) obligations of longer maturity secured by pledge of bonds having a lien on property of the reorganized company except to the extent, if any, by which the principal amount of such obligations exceeds the principal amount of such bonds so pledged. Bonds guaranteed by the reorganized company as to interest or principal or both, other than bonds of a terminal or bridge company, shall be included in funded debt, but, in case of a joint and several guaranty with other corporations, only to the extent of the reorganized company's basic proportion of the principal liability. There shall be included in determining total capitalization only (a) obligations constituting funded debt, (b) stock having par value, at such par value, and (c) stock without

par value, at $100 a share in case of the stock issuable under the plan, and, in case of other stock, at the capital value at which such stock is carried on the books of the company, not exceeding, however (except to the extent that earned surplus shall have been duly capitalized), the net amount received by the reorganized company on the issue thereof. [351]

E. The first-mortgage bonds may be issued from time to time in different series, subject to the approval of this Commission or the approval of such regulatory body or tribunal as may have jurisdiction thereof, and to such limitations and restrictions as may be specified in the first mortgage, payable on such date or dates, in such denominations, bearing interest at such rates and containing such provisions in regard to redemption, conversion, taxes, place or places and money or moneys of payment, registration, and sinking funds and having such other characteristics as may be prescribed by the board of directors of the reorganized company at the time of issue, but with respect to the lien of the first mortgage all equally secured. So long as any first-mortgage bonds, Series A, shall be outstanding no additional first-mortgage bonds shall be issued having a maturity earlier than January 1, 1974.

F. Ten million dollars first-mortgage bonds, series A, are to be authenticated and issued in the reorganization for the purpose of providing the $10,000,000 of new money required in the reorganization.

The bonds of series A shall be dated January 1, 1939, shall mature January 1, 1974, shall bear interest at the rate of 4 percent per annum, payable semiannually, and shall be redeemable, in whole or in part, at any time on 30 days' notice, at their principal amount and accrued interest, plus a premium of 3 percent of their principal amount if redeemed on or before December 31, 1943, 2½ percent if redeemed thereafter and on or before December 31, 1948, 2 percent if redeemed thereafter and on or before December 31, 1953, 1½ percent if redeemed thereafter and on or before December 31, 1958, 1 percent if redeemed thereafter and on or before December 31, 1963, one-half of 1 per cent if redeemed thereafter and on or before December 31, 1968, and without any premium if redeemed on or after January 1, 1969.

G. First-mortgage bonds, in addition to those to be authenticated in the reorganization, may be authenticated from time to time, subject to the approval of this Commission or such regulatory body or tribunal as may have jurisdiction thereof: (a) to refund first-mortgage bonds (excluding bonds issued solely by way of pledge, except as hereinafter provided) or outstanding obligations secured [352] by first-mortgage bonds to the extent so secured or obligations secured by prior lien on after acquired property; or (b) upon the deposit of new cash equal to the principal amount to be issued; or (c) to provide for, or to reimburse the reorganized company, for, not exceeding 75 percent of expenditures made after December 31, 1938, but not more than three

years prior to the date of such authentication (including expenditures for the acquisition or construction of new railroad equipment, free from other lien, but not including expenditures for the making of additions and betterments to equipment) which, under the accounting rules of this Commission or other Federal regulatory bodies having jurisdiction in the premises, at the time in force, are properly chargeable to capital account; provided, however, that

(a) Except when bonds are authenticated in respect of new mileage (or securities representative thereof) or in respect of new equipment, the said 75 percent shall be applied to the net amount of said capital expenditures after deducting therefrom, to such extent and on such basis as may be specified in the first mortgage, credits to capital account after December 31, 1938;

(b) If any first-mortgage bonds are authenticated or cash deposited under the first mortgage is withdrawn to provide or reimburse for the acquisition of railroad equipment, a sinking fund shall be established (in addition to any other sinking fund then in effect for any series of first-mortgage bonds) payable in equal annual installments in an amount sufficient to retire (at par) within the expected efficient service life of such equipment (in no case to exceed 15 years) a principal amount of first-mortgage bonds equal to (1) the principal

amount of bonds so authenticated or (2) the amount of deposited cash so paid;

(c) If any property is acquired subject to existing liens the amount of additional first-mortgage bonds issuable therefor or issued to refund prior-lien obligations thereon, together with the aggregate amount of existing liens to which such property is subject, shall not exceed 75 percent of the net cost thereof, including as part of such cost the amount of such existing liens whether or not the indebtedness secured thereby is assumed by the reorganized company; and

(d) No bonds shall be issued on the basis of the acquisition of equipment under equipment-trust obligations or any [353] obligations for the deferred or serial payment of the purchase price for equipment, or on the basis of the retirement of any such obligations.

H. The first mortgage will contain a covenant substantially to the effect that no first-mortgage bonds (other than those to be authenticated under the plan) will be sold or pledged unless (1) the reorganized company shall have contracted forthwith to sell or pledge such bonds and (2) the board of directors of the reorganized company, by resolution adopted by two-thirds of the entire number of directors, shall have determined that, in the opinion of the board, taking into account market and all other relevant conditions at the time, it is impracticable to provide the amount of money needed (a) by the

sale of income-mortgage bonds having a maturity of 20 years or more at a price which would give a yield to maturity of 5 percent or less, or (b) by the sale of preferred stock at a price which would give a current dividend return of 6 percent or less, or (c) by the sale of common stock at a price (not less than $50 a share) which would give a current dividend return (based on the regular dividend rate then in effect, or, if no regular dividend rate is in effect, on the average rate at which dividends shall have been paid during the last twelve calendar months) of 6 per cent or less.

The first mortgage will also contain a covenant substantially to the effect that the excess of the aggregate principal amount of all first-mortgage bonds under pledge at any one time over the principal amount of all indebtedness so secured shall not exceed 10 percent of the aggregate principal amount of all first-mortgage bonds then authenticated and uncanceled.

I. The income mortgage shall constitute a lien, subject to the lien of the first mortgage, upon all property from time to time subject to the lien of the first mortgage.

The income-mortgage bonds may be issued, without limit as to aggregate amount or within such limit as may be specified in the income mortgage, from time to time in different series, subject to the approval of this Commission or such regulatory body or tribunal as may have jurisdiction thereof, and subject to such limitations and restrictions as

may be specified in the income mortgage, payable on such date or dates, in such denominations, bearing interest [354] at such rates and containing such provisions in regard to accumulation of interest, redemption, conversion, taxes, place or places and money or ~~moneys of p~~yment, registration, and sinking funds, and having such other characteristics as may be prescribed by the board of directors of the reorganized company at the time of issue, but with respect to the lien of the income mortgage all equally secured. No interest shall be mandatorily payable on income-mortgage bonds of any series (except at maturity or redemption) except out of available net income, as hereinafter provided.

J. Twenty-one million two hundred nineteen thousand seventy-five dollars of income-mortgage bonds, series A, are to be authenticated and issued in the reorganization, as set out in subdivision P below.

The income-mortgage bonds of series A shall be dated January 1, 1939, shall mature January 1, 2014, shall bear interest at the rate of 4½ percent per annum, due and payable as hereinafter provided, and shall be redeemable, in whole or in part, on May 1 in any year, on 30 days' notice, at their principal amount plus (a) full interest for the last preceding year and all unpaid accumulated interest for prior years and (b) interest at the rate of 4½ percent per annum from the last preceding December 31 to the redemption date.

The income-mortgage bonds of series A shall be convertible into shares of common stock, as at the time constituted, at any time at the rate of 20 shares per $1,000, principal amount, of such bonds.

Interest on income-mortgage bonds, series A, accruing for each calendar year shall (up to the limits of accumulation hereinafter specified) become absolutely due as a debt on December 31 in such year, but shall be payable on May 1 of the next succeeding year or thereafter as provided below. Such interest shall be mandatorily payable (except as hereinafter provided) only out of available net income of the reorganized company that remains after providing for the capital fund and charges prior thereto (i.e., that remains after the deductions made pursuant to subparagraphs (1) and (2) of the fourth paragraph of subdivision L). All interest that comes due and is not paid on the next following May 1 shall accumulate up to the maximum amount of 13½ percent at any one time; but not beyond. Accumulated interest shall be mandatorily payable (a) whenever, and to the extent that, there is available net income [355] for any subsequent year remaining after the deductions made pursuant to said subparagraphs (1) and (2) of the fourth paragraph of subdivision L (in which case such amount shall be paid on the next following May 1), or (b) in any event (whether earned or not) at the maturity or on redemption of the income-mortgage bonds of series A. For the purposes of the two sentences next hereinabove, payments of

interest shall be considered as applied to interest accrued for the last preceding calendar year before being applied to accumulations. The board of directors of the reorganized company may at any time, in its discretion, pay any interest accrued on the income-mortgage bonds, series A, even if not earned, out of any funds lawfully available therefor.

The income-mortgage will provide for the payment on May 1 of each year while any income-mortgage bonds, series A, are outstanding, of an installment of the sinking fund, if earned, as, and in the amount, hereinafter specified. Such installment shall be payable only out of available net income for the last preceding calendar year that remains after paying interest on outstanding income-mortgage bonds (i.e., that remains after the deductions made pursuant to subparagraphs (1), (2) and (3) of the fourth paragraph of said subdivision L). The amount of such installment shall equal (a) one-half of 1 percent of the maximum principal amount of income-mortgage bonds, series A, theretofore at any one time authenticated and uncanceled, plus (b) an amount equal to interest on all income-mortgage bonds, series A, theretofore purchased or redeemed out of the sinking fund, calculated at the rate paid on said May 1 upon outstanding income-mortgage bonds of series A. Such accruals of the sinking-fund installments shall not be cumulative. The sinking fund shall be applied from time to time to the retirement of income-mortgage bonds, series A, by purchase in the open market or by call for tenders

at not exceeding their redemption price, and whenever the amount in the sinking fund exceeds $50,000 and income-mortgage bonds, series A, are not tendered or cannot otherwise be purchased at less than their redemption price, the funds then in the sinking fund shall be applied to the redemption of the income-mortgage bonds, series A, on the next succeeding interest payment date. All bonds so acquired shall be canceled and no bonds may be issued to refund any such bonds. [356]

Income-mortgage bonds, in addition to those to be issued in the reorganization, may be issued from time to time, subject to the approval of this Commission or of such regulatory body or tribunal as may have jurisdiction thereof, to refund outstanding income-mortgage bonds or in lieu of first-mortgage bonds, for the purposes and subject to the restrictions stated in respect of the issue of additional first-mortgage bonds above, to the extent that first-mortgage bonds are not issued for such purposes.

K. No income-mortgage bonds (other than those to be issued under the plan) may be authenticated and delivered unless (1) the reorganized company shall have contracted forthwith to sell or pledge such bonds and (2) the board of directors of the reorganized company, by resolution adopted by two-thirds of the entire number of directors, shall have determined that, in the opinion of the board, taking into account market and all other relevant conditions at the time, it is impracticable to provide the amount

of money needed (a) by the sale of preferred stock at a price which would give a current dividend return of 6 percent or less, or (b) by the sale of common stock at a price (not less than $50 a share) which would give a current dividend return (based on the regular dividend rate then in effect, or, if no regular dividend rate is in effect, on the average rate at which dividends shall have been paid during the last 12 calendar months) of 6 percent or less.

The income mortgage will also contain a covenant substantially to the effect that the excess of the aggregate principal amount of all income-mortgage bonds under pledge at any one time over the principal amount of all indebtedness so secured shall not exceed 10 percent of the aggregate principal amount of all income-mortgage bonds then authenticated and uncanceled.

The income mortgage will provide, within conditions and limits to be therein prescribed, for the modification and alteration thereof and of the rights and obligations of the reorganized company and of the holders of the income-mortgage bonds thereunder, at any time by the concurrent action of the reorganized company and of the holders of not less than 66⅔ percent in aggregate principal amount of the bonds then outstanding; provided, however, that no such change or modification shall alter or impair the obligation of the reorganized company to pay the principal of any bond without [357] the consent of the holder of such bond. In the event of any unification of the properties of the reorganized com-

pany with the properties of any other company, the modifications hereinabove authorized may include provisions excluding in whole or in part the earnings from such other properties in determining available net income and providing for the determination of such available net income without the maintenance of separate accounts.

L. Available net income shall be determined for each calendar year beginning with the year 1939, and continuing thereafter so long as any income-mortgage bonds remain outstanding. When no income-mortgage bonds remain outstanding, the provisions of this subdivision L shall cease to be operative.

Available net income for each such calendar year shall be determined by deducting all fixed charges of the reorganized company and its wholly owned railway subsidiaries accrued during such calendar year from the consolidated income of the reorganized company and its wholly owned railway subsidiaries available for fixed charges for such calendar year (determined in accordance with the accounting rules of this Commission or other analogous Federal authority having jurisdiction in the premises at the time in force, or, to the extent not governed by such accounting rules, in accordance with sound accounting practice); provided, however, that if the reorganized company shall not come into ownership and possession of the properties now operated by the bankruptcy trustees on or before January 1, 1939, available net income for any period after January 1, 1939, until the reorganized com-

pany comes into ownership and possession of such properties shall be computed as if the reorganized company had come into such ownership and possession on January 1, 1939, and had issued, as of that date, the new securities issuable under the plan, other than the $10,000,000 of new first-mortage bonds, series A, and in lieu of interest on such bonds there shall be charged the amount of interest actually accruing during such period upon any then outstanding trustees' certificates or other obligations issued to provide funds for rehabilitation purposes.

Available net income shall be ascertained for each such calendar year as the accounts shall be stated on the books of the reorganized company during such calendar year, without adjust- [358] ments, except that (1) in determining available net income there shall not be deducted any amounts from the proceeds of the trustees' certificates issued for rehabilitation purposes, notwithstanding that under the accounting rules hereinbefore mentioned such expenditures may be chargeable as operating expenses; (2) if in respect of any calendar year the available net income is a deficit, the amount of such deficit may, in the discretion of the board of directors of the reorganized company, be carried forward and be deducted in determining available net income for the succeeding calendar year or calendar years until such deficit (or accumulated or remaining deficits) be extinguished by earnings which in the absence of such deficit or deficits, would be available net income; and (3) debits or credits to

adjust income in prior years shall be treated as income items for the year in which entered on the books, whether cleared through income or profit and loss accounts, so far but only insofar, as such debits and credits reflect cash receipts or disbursements in the year in which they are entered on the books.

Available net income for each calendar year shall be applied to the following purposes and in the following order:

(1) To the creation, if and when the aggregate principal amount of first-mortgage bonds outstanding shall equal or exceed $20,000,000, of the sinking fund provided for in subdivision D hereinabove, in an amount up to, but not exceeding, in respect of any calendar year, one-half of 1 percent of the maximum principal amount of first-mortgage bonds theretofore at any one time authenticated and uncanceled.

(2) To the creation of a capital fund to be applied to, or to provide for, or to reimburse the treasury of the reorganized company for, capital investments, as defined by this Commission's Classification of Income, Profit and Loss and General Balance Sheet Accounts for Steam Roads, Accounts Nos. 701, Investment in road and equipment, 702, Improvements on leased railway property, and 705, Miscellaneous physical property (or advances to subsidiaries for expenditures which, if made directly by the reorganized company in respect of its owned or

leased properties, would be charged to said accounts), or such substituted accounts as may at the time be in effect, to the extent that such capital investments have been made or contracted for during such calendar year or within three months thereafter, and including therein but only to [359] the extent that such payments during such calendar year shall exceed depreciation of equipment charged against income for such calendar year) payments made for new equipment, or initial and principal payments upon equipment leased under equipment trusts or purchased under conditional-sale agreements and installments of sinking fund provided for by subparagraph (b) of subdivision G (relating to first-mortgage bonds issued for equipment), provided, however, that

(a) The amount set aside in the capital fund each calendar year shall be $500,000 less amounts charged during the calendar year to operating expenses in respect of retirements of road property, and in respect of depreciation of road property if reserves for depreciation of road property be established, provided that the amount in the capital fund at the end of the calendar year, including the amount set aside for the fund in respect of that calendar year, shall not exceed $1,000,000.

(b) The capital fund may be applied only to such part of the cost of capital investments as hereinabove defined as remains after deducting from such cost the amounts charged

to operating expenses for retirement of road property and all amounts charged to operating expenses for any reserves for depreciation of road property that may be established.

(c) To the extent that expenditures are so provided for or reimbursed out of the capital fund, the company shall not thereafter have the right to issue any bonds or other evidences of indebtedness or any stock ranking, as to either assets or dividends, in priority to, or on a parity with, the preferred stock of series A to capitalize or reimburse such expenditures; provided, however, that such expenditures (if for purposes for which first-mortgage bonds or income-mortgage bonds may be issued) may, within such limits, if any, as may be specified in the first mortgage or the income mortgage, be used to supply, in whole or in part, the excess of capital expenditures required to be certified under either such mortgage over the principal amount of the bonds that may be issued under the terms thereof; and

(3) Any then remaining available net income for any calendar year shall be applied to the payment on the next succeeding May 1, of interest on the then outstanding income-mortgage bonds (not including any thereof then held in any sinking fund) accrued during the last preceding calendar year, and of any accumulated unpaid interest thereon. [360]

(4) Any then remaining available net income for any calendar year shall be applied, so long as any income-mortgage bonds, series A, are outstanding, to the payment on the next succeeding May 1, of the sinking fund installment provided for in subdivision J (relating to income-mortgage bonds, series A).

(5) Any then remaining available net income for any calendar year may be applied to the creation of a sinking fund for income-mortgage bonds of series other than series A, if any such sinking fund shall have been provided for at the time of the creation of any such series.

(6) Any then remaining available net income for any calendar year shall be applied to the payment on the next succeeding May 1 of the installment, if any, then due under the sinking fund provisions of subdivision D hereinabove (relating to first-mortgage bonds when outstanding in excess of certain limits).

(7) Any then remaining available net income for any calendar year may be applied to any proper corporate purpose of the reorganized company (except dividends on the new common stock), including, if and to the extent that such dividends shall be declared by the board of directors of the reorganized company, the payment of dividends upon the preferred stock in respect of such year and of any accrued and unpaid cumulative dividends on the preferred stock; such dividends to be paid, except as here-

inafter provided, on such date or dates in the next succeeding year as may be specified in the certificate of incorporation or by-laws of the reorganized company, or in the certificates for the preferred stock.

(8) Any then remaining available net income for any calendar year may be applied to any proper corporate purpose of the reorganized company, including (but only after all accrued and unpaid cumulative dividends on the preferred stock to the end of such year shall have been paid, or declared and set apart for payment) dividends on the common stock.

No interest need be paid on income-mortgage bonds if the amount to be paid is less than one-fourth of 1 percent. Any excess available for interest but not paid because of the foregoing provision shall be reserved and added to the income available for interest on the income-mortgage bonds for the next succeeding calendar year. [361]

If there are outstanding income-mortgage bonds of different series, the amount applicable to interest on such bonds shall be distributed among the respective series in proportion to the unpaid interest at the time accumulated on the bonds of such series, respectively.

Dividends may be paid on stock of any class (subject to the relative rights of the several classes of stock) out of the income of any calendar year prior to the close of such calendar year if, but only if, prior to the declaration of such dividends, the board

of directors shall have determined that the available net income for such year applicable for the purposes specified in the foregoing paragraphs (1), (2), (3), (4), (5), and (6) will be more than sufficient to pay the amounts payable out of such available net income pursuant to said paragraphs and such amounts shall have been deposited in trust for the purposes specified in said paragraphs. Dividends on common stock may be so declared only if, prior to such declaration, the board of directors shall have determined that the applicable part of available net income for such year will be more than sufficient to pay the amount hereinabove specified for dividends including accumulations) on the preferred stock and such amount shall have been deposited in trust for the purpose of paying such dividends.

M. There will be authorized 750,000 shares of preferred stock, each of the par value of $100, of which 318,502 97/100 shares of series A are to be issued in the reorganization as set out in subdivision P below.

The additional authorized preferred stock not issued in the reorganization will be issuable from time to time, subject to the approval of this Commission, or of such regulatory body or tribunal as may have jurisdiction thereof, in the discretion of the board of directors of the reorganized company, but (unless for purposes for which first-mortgage bonds might otherwise have been issued) only after the concurring vote or consent of the holders of a

majority of the outstanding preferred stock. So far as permitted by law, such additional preferred stock may be of series A, or of any other series, one or more, and preferred stock of any such other series may bear dividends at such rate, cumulative or noncumulative, may be redeemable or nonredeemable, convertible or non- [362] convertible, and may have such other rights and privileges and be subject to such limitations and restrictions, as may be from time to time determined by the board of directors prior to the issue of preferred stock of any such other series. If there are outstanding shares of preferred stock of different series, the earnings applicable to dividends thereon shall be apportioned among the respective series in proportion to the dividends accumulated on the shares of such series respectively.

In any liquidation or winding up of the reorganized company, whether voluntary or involuntary, the preferred stock shall be entitled to receive, out of the assets of the reorganized company, its par value, plus any accrued and unpaid cumulative dividends thereon, plus such premium, if any, as may be specified for any series, before any distribution shall be made on the common stock, but shall not be entitled to any further participation in such assets.

The reorganized company shall not, without the vote or consent of the holders of at least two-thirds in par value of the outstanding new preferred stock,

(1) create or permit to be created any mortgage or other lien upon any of its properties, excepting the new first mortgage, the new income mortgage, or purchase money liens (including equipment obligations) upon property hereafter acquired, given for not more than 75 percent of the purchase price of such property; (2) create or issue any bonds, notes, or other evidences of indebtedness maturing more than two years from their date, except new first-mortgage bonds and new income-mortgage bonds and except purchase money obligations given for not more than 75 percent of the purchase price of property hereafter acquired; (3) create any stock ranking, either as to assets or dividends, in priority to, or on a parity with, the new preferred stock, or (4) permit any subsidiary, all of the stock of which, except directors' shares, shall be owned by the reorganized company, to create any mortgage or other lien upon any of its properties or issue any such bonds, notes, or other evidences of indebtedness (except purchase money liens or obligations limited as aforesaid), or issue any additional stock of any class, unless the obligations secured by such mortgage or other lien or such other obligations or such stock shall be acquired by the reorganized company.

The preferred stock, series A, shall be entitled to receive all accumulated unpaid dividends and, current dividends at the rate [363] of 5 percent per annum in respect of any calendar year before any dividends shall be paid or declared or set apart for payment on the common stock in respect of such

year. Such dividends shall be cumulative to the extent earned in any calendar year but not paid; but such dividends shall otherwise be noncumulative. For the purposes of the next preceding sentence hereinabove, preferred stock dividends shall be considered to be earned in any calendar year to the extent covered by the available net income for such year that remains after providing for prior charges (i.e., that remains after the deductions made pursuant to subparagraphs (1), (2), (3), (4), (5), and (6) of the fourth paragraph of subdivision L); or after the provisions of said subdivision L shall have ceased to be operative, to the extent covered by net income (as defined by the accounting rules or practice referred to in said subdivision L).

After dividends shall have been paid or declared, or set apart for payment, on the new common stock at the rate of $3 a share in respect of any year, each share of preferred stock, series A, shall be entitled to share equally with each share of new common stock in any dividends paid or declared or set apart for payment, in respect of such year.

The preferred stock, series A, shall be redeemable, in whole or in part, at any time at its par value plus accrued and unpaid cumulative dividends, and proportionate dividend for the current year.

The holders of preferred stock, series A, shall not have any preemptive right to subscribe to any additional issues of stock of any class or of securities convertible into stock of any class.

Holders of preferred stock shall be entitled to one vote per share on all matters, except that in elections of directors, which shall be by cumulative voting, each holder of stock of either class shall be entitled to as many votes per share as the number of directors to be elected.

N. There will be authorized 1,000,000 shares of common stock, without par value, of which 319,441 shares are to be issued in the reorganization as set forth in subdivision P below and 424,382 shares shall be reserved for the conversion of income-mortgage bonds, series A. No new common stock additional to that actually issued in connection with the reorganization, as above [364] stated, shall be issued without the further authorization of this Commission or of such regulatory body or tribunal as may have jurisdiction thereof.

Holders of common stock shall be entitled to one vote per share on all matters except that directors shall be elected by cumulative voting as aforesaid.

So far as permitted by law, any vote or consent by the holders of common stock, authorizing the issue of additional shares of stock of any class or of securities convertible into stock of any class, may waive on such terms and conditions, if any, as may be specified in such vote or consent, the preemptive right of all the holders of shares of common stock to subscribe to such additional shares or securities.

O. The $10,000,000 of new first-mortgage bonds, series A, to be authenticated and issued in the reorganization shall be sold at par and accrued interest

to the Reconstruction Finance Corporation (subject to the approval and authorization of this Commission and the delivery to the Reconstruction Finance Corporation of a legal opinion satisfactory to it as to the validity of the acquisition by the reorganized company of title to the properties of the debtor and the validity of the new first-mortgage bonds, series A, and the new first mortgage). In consideration of such purchase by the Reconstruction Finance Corporation of new first-mortgage bonds, series A, and considering the value of the collateral securing its claim, such claim amounting as of January 1, 1939, to $3,862,870 ($2,963,000 principal and $899,870 interest) and represented by notes secured by general and refunding bonds of the debtor and other collateral, shall be provided for under the plan in like securities and in like proportions as those given holders of the debtor's first-mortgage bonds.

P. The existing securities of the debtor shall be treated as follows:

1. Existing equipment trusts, Baldwin lease, and Pullman contract, aggregating $2,750,050 shall remain undisturbed and shall be assumed by the reorganized company.

2. Holders of existing first-mortgage bonds shall receive for each $1,000 principal amount thereof, together with $266.66⅔ of [365] interest accrued and unpaid thereon to January 1, 1939, approximately $400 of income-mortgage 4½-percent bonds, series A, (being 40 percent of the principal amount of said existing bonds); $600 of 5-percent preferred

stock, series A (being 60 percent of the principal amount of said bonds); and 4.67 shares of common stock (being common stock taken at the price of $57 a share for 100 percent of said accrued and unpaid interest).

3. The Reconstruction Finance Corporation shall receive in respect of the $10,000,000 of new money provided for in subdivision O (or the surrender of trustees'-certificates at their principal amount and accrued interest, to a like amount) and its existing claim in the principal amount of $2,963,000, together with $899,870 of interest accrued and unpaid thereon to January 1, 1939, approximately $10,000,000 of new first-mortgage 4-percent bonds, series A (being 100 percent of said new money); $1,185,200 of income-mortgage 4½-percent bonds, series A (being 40 percent of the principal of said claim); $1,777,800 of 5-percent preferred stock, series A (being 60 percent of the principal of said claim); and 15,788 shares of common stock (being common stock taken at the price of $57 a share for 100 percent of said accrued and unpaid interest).

4. The Railroad Credit Corporation shall receive in respect of its claim in the principal amount of $2,455,610, together with $146,503 of interest accrued and unpaid thereon to January 1, 1939 (subject to the reduction of said amounts by the application, prior to the date of issue of the new securities under the plan, of any proceeds from the distributive shares of the company or its subsidiaries

under the marshaling and distributing plan, 1931), approximately $154,111 of income mortgage 4½-percent bonds, series A; $241,681 of 5-percent preferred stock, series A; and 35,425 shares of common stock (being common stock taken at the price of $62 per share). The Railroad Credit Corporation's equity in the collateral securing the claim of the Reconstruction Finance Corporation is found to be without value.

5. The A. C. James Company shall receive in respect of its claim in the principal amount of $4,999,800, together with $1,249,950 of interest accrued and unpaid thereon to January 1, 1939, [366] $163,724 of income mortgage 4½-percent bonds, series A; $256,756 of 5-percent preferred stock, series A; and 37,635 shares of common stock (being an amount of common stock which bears to the amount of common stock allotted to the claim of the Railroad Credit Corporation the same proportion that the principal amount of general and refunding mortgage bonds of the debtor held by the A. C. James Company as collateral for said claim, bears to the principal amount of such bonds held by the Railroad Credit Corporation as collateral for its claim).

6. The unsecured claims of the Western Pacific Railroad Corporation and the Western Realty Company, and other unsecured claims not entitled to priority over existing mortgages, are found to be without value, and no securities or cash shall be distributed under the plan in respect of these claims.

7. The capital stock of the debtor is found to be without equity or value, and the stockholders shall not be entitled to participate in the plan.

Q. Claims against the debtor entitled to priority over any mortgage of the debtor, current liabilities and obligations incurred by the trustees of the properties of the debtor during the reorganization proceeding, and expenses of reorganization allowed by the court within the maximum fixed by this Commission shall be paid in cash or assumed by the reorganized company, provided that any amounts so assumed by the reorganized company shall constitute a charge upon the properties of the reorganized company prior in lien to all new securities issued under the plan. When so treated, claims against the debtor entitled to priority over any of its mortgages are found not to be affected by the plan. Obligations under the debtor's equipment-trust certificates, the Baldwin lease, and the Pullman contract are found not to be materially and adversely affected by the plan. The reorganized company shall be deemed to have assumed the executory contracts of the debtor which by their terms do not terminate at or prior to the conclusion of the reorganization proceeding and which shall have been affirmed or shall not have been disaffirmed by the trustees of the properties of the debtor with the approval of the court prior to the confirmation of the plan, and also any executory contracts made by the trustees [367] of the properties with the approval of the court which by their terms do not ter-

minate at or prior to the conclusion of the reorganization proceeding.

R. The capital stock of the debtor and the unsecured claims against the debtor not entitled to priority over existing mortgages shall be canceled. Existing mortgages on the debtor's properties shall be released and canceled, and all funds on deposit with the trustees under the debtor's mortgages representing sums paid from time to time to such trustees for the release of properties, sale of scrap, and otherwise, and all collateral pledged under the debtor's mortgages, shall be surrendered to the reorganized company free from liens of the debtor's mortgages, after deductions therefrom of any amounts which the court may find should be deducted under the provisions of such mortgages and consistent with this plan. All collateral pledged by the debtor as security for notes to the Reconstruction Finance Corporation, the Railroad Credit Corporation, and the A. C. James Company shall be reduced to possession by the respective pledgees thereof, and shall be by them surrendered to the reorganized company and canceled, except that the Railroad Credit Corporation shall not release or surrender any right or interest in the distributive shares of the debtor or its subsidiaries under the marshaling and distributing plan, 1931, but any proceeds from such distributive shares after the effective date of the plan shall become the property of and be retained by the Railroad Credit Corpo-

ration, but to the extent to which received prior to the issue of the new securities under the plan shall be applied in reduction of the claim of the Railroad Credit Corporation in respect of which such new securities are to be issued at the rates provided in subdivision P. The court by orders of March 11, 1936, and March 20, 1936, authorized the Chase National Bank of the City of New York to pay from funds which had been deposited with it by the debtor all outstanding first-mortgage bond coupons which matured on or prior to September 1, 1933, and had not theretofore been presented for payment. Any such coupons as shall not have been presented for payment up to the time of the consummation of the plan shall be paid in cash by the new company if and when presented by the holders thereof. [368]

The plan shall be carried out under the supervision of a reorganization committee consisting of three persons, all to be approved by the court, who shall be designated, one by the bondholders committee, one by the Reconstruction Finance Corporation, and one by the Railroad Credit Corporation and the A. C. James Company jointly. Should the bondholders committee, or the Reconstruction Finance Corporation, or the Railroad Credit Corporation and the A. C. James Company jointly, fail to designate a representative for membership on the committee within such time as the court shall consider reasonable, the court shall appoint such a representative.

The plan may be carried out either by revesting the properties formerly of the debtor in the debtor company or by transferring said properties to a new corporation organized for the purpose, and the execution by the corporation in which said properties are vested of the new mortgages and the issue by it of the new securities contemplated by the plan.

The method of carrying out the plan shall be determined by the reorganization committee in its discretion, and the reorganization committee shall also determine, subject to the approval of the court, the form, and, except as herein otherwise expressly provided, the provisions, of all mortgages, bonds, coupons, charters, by-laws, stock certificates, voting trust certificates, acceptances, assents, and all other instruments in the judgment of the reorganization committee necessary or desirable in connection with carrying out the plan.

The reorganization committee may act by a majority of its members as from time to time constituted, at a meeting or in writing without a meeting. The reorganization committee may employ such agents, attorneys, and others as it may deem desirable for the purposes of the plan. The reorganization committee may from time to time delegate to others any power or discretion conferred upon it by the plan; and the members of the reorganization committee shall not be liable for any action taken by them in good faith or by any person employed by the reorganization committee in good faith, ex-

cept for their respective individual malfeasance or wilful neglect.

Should the reorganization committee solicit deposits of securities, or authorization to represent holders of the debtor's existing [369] securities in the reorganization, the terms and conditions upon which such solicitation and representation would be made shall be subject to the prior approval of this Commission.

S.. If deemed desirable and so ordered by the court, the plan, after it has been found fair and equitable and confirmed by the court, may be executed by a sale at not less than a fair upset price to be fixed by the court, of all or any part of the property of the debtor, all on such conditions and in such manner as the court may direct. Upon any such sale the property and assets offered for sale may be purchased for the benefit of the reorganized company by the reorganization committee, and in that event there shall be applied on account of the purchase price the distributive share of the proceeds of such sale of all securities the holders of which shall have assented to the plan, and of the securities, though not assenting to the plan, of all classes which shall have accepted the plan.

In the event of a sale of the properties of the debtor to the reorganization committee, the committee may in its discretion sell all or any portion of the new securities, if any, distributable under the plan to holders of existing securities, if neither

such security holder nor the class to which such security holder belongs shall have accepted the plan, provided that security holders in a class which shall not have accepted the plan, and who themselves shall not have accepted the plan shall have the right, if they shall so notify the committee within a period of 30 days after the confirmation of such sale, to assent to the plan and receive the securities allocated to them under the plan in lieu of their aliquot share of the proceeds of such sale of the properties. The proceeds of any such sale of securities may be used to pay the portion of the purchase price payable in cash on any such sale of the properties.

T. Unless otherwise provided in section 77 or any order or orders of the court in the reorganization proceeding or of this Commission, whenever notice shall be required or permitted to be given under or pursuant to the plan, such notice shall be given by publishing a copy of such notice once in each week on any secular day in each such week for two successive weeks in one newspaper published and of general circulation in the Borough of [370] Manhattan, City and State of New York, and in one newspaper published and of general circulation in the City of San Francisco, State of California, and also (1) in case of notices to security holders who have accepted the plan, by mailing such notice, postage prepaid, to the addresses of such security holders set forth in the acceptances signed by them; and (2) in case of notices to security holders who shall not have accepted the plan, by

mailing such notice, postage prepaid, to such security holders whose names and addresses appear on the books of the debtor or of the reorganized company, as the case may be, but failure to mail any such notices, or delay in mailing any such notices, shall not invalidate the notice by publication above provided for, which alone shall be sufficient.

U. The board of directors of the reorganized company shall consist of not less than 7 nor more than 11 members, who shall be elected by the holders of the preferred stock and the common stock of the reorganized company at an election to be held not later than 90 days after the consummation of the plan. Pending such election the board of directors shall consist of such persons as may be designated by the reorganization committee, with the approval of the court.

V. The construction of the plan by the court shall be final and conclusive. The court may cure any defect, supply any omission, or reconcile any inconsistency in such manner or to such extent as may be necessary or expedient in order to carry out the plan effectively.

W. Acceptance of the plan shall include acceptance of the new bonds, mortgages, stock certificates, and all instruments necessary and appropriate to the carrying out of the plan, other than the orders of the court and this Commission, to the same effect as though the terms of such instruments were set out in full herein.

Notwithstanding any other provisions of this modified order, the reorganized company shall as-

sume the liability for, and shall pay in full in due course, any and all taxes due to the United States from the debtor or the debtor's trustees for any taxable period prior to the date of the confirmation of the plan, whether [371] or not proof thereof has been made in the proceeding and without prejudice by reason of not having made proof thereof.

It is further ordered, That the authorization and approval herein granted by this Commission are upon the condition that the journal entries covering the necessary accounting adjustments under the order will be submitted to this Commission for approval before they are recorded on the books of the reorganized company under the plan of reorganization herein approved;

It is further ordered, That nothing herein contained shall be, or be construed as, a grant of authority for the issue of any securities, assumption of obligations, transfer of any property, sale consolidation, or merger of the debtor's properties, or pooling of traffic, pursuant to either the Bankruptcy Act or the Interstate Commerce Act, except as provided herein, or until further action by this Commission upon confirmation of the plan by the court; and

It is further ordered, That the order herein, dated October 10, 1938, be, and it is hereby, revoked.

By the Commission.

(Seal) W. P. BARTEL,
Secretary.

[Endorsed]: Filed July 29, 1939. [372]

Before the
Interstate Commerce Commission
Finance Docket No. 10913

In the Matter of

THE WESTERN PACIFIC RAILROAD COMPANY,

Debtor.

EXCEPTIONS OF THE RAILROAD CREDIT CORPORATION, INTERVENOR, TO REPORT PROPOSED BY THE BUREAU OF FINANCE AND SUPPORTING BRIEF

Comes now The Railroad Credit Corporation and excepts to the report proposed by the Bureau of Finance in the above entitled proceeding, and assigns the following errors:

1. That the Bureau erred in finding (p. 7) that the sum of $58,566.12 was due from The Railroad Credit Corporation on November 30, 1936. (The date, 1916, in the report, was obviously intended to mean 1936.)

2. That the Bureau erred in failing to find that The Railroad Credit Corporation is entitled by the general law and by special contract to apply income and proceeds from collateral (including distributive shares under the Marshaling and Distributing Plan), to or towards the payment of princi-

pal or interest, or both, of and upon the obligations of the Debtor, in its untrammeled discretion.

3. That the Bureau erred in recommending (p. 50) that the Commission consider, for the purposes of a plan of reorganization, that the equipment covered by leases, conditional sale agreements or equipment trust agreements, is subject to the lien of the First Mortgage in priority to the General Mortgage. [400]

4. That the Bureau, although finding that the equity of the preferred and common stockholders of the Debtor has no value (p. 55), and that claims of several general creditors should be cancelled, nevertheless erred in recommending the issuance of warrants to The Western Railroad Corporation, one of the general creditors and stockholders of the Debtor, enabling it to purchase at par, within sixty days, all or any part of the $10,000,000 of new first mortgage bonds, receiving a bonus of 10 shares of new common stock with every $1,000 bond so purchased.

5. That the Bureau erred in recommending (p. 40) the immediate sale of $10,000,000 of new First Mortgage Bonds, necessitating the payment of interest thereon, although it does not appear that said sum is presently required.

6. That the Bureau erred in failing (p. 54) to accord full recognition to all the collateral held by The Railroad Credit Corporation, in the allocation of new securities.

7. That the Bureau erred in failing to find that important and valuable items of collateral were

assigned to and pledged with The Railroad Credit Corporation by others than the Debtor, and cannot be taken from The Railroad Credit Corporation in this proceeding.

8. That the Bureau erred in proposing that the claim of The Railroad Credit Corporation against the Debtor be discharged.

9. That the Bureau's proposals are unfair, and unjustly discriminatory and prejudicial to the rights and interests of The Railroad Credit Corporation.

10. That the Bureau erred in proposing (p. 60) as the effective date of a plan of reorganization, January 1, 1937, a date already passed. [401]

BRIEF

1. That the Bureau erred in finding (p. 7) that the sum of $58,566.12 was due from The Railroad Credit Corporation on November 30, 1936. (The date, 1916, in the report, was obviously intended to mean 1936.)

The figure given doubtless related to the undistributed book balance of the Debtor in the fund established under the Marshalling and Distributing Plan, 1931; but, as appears from said Plan, said undistributed book balance does not represent an amount due from The Railroad Credit Corporation to the Debtor, The Railroad Credit Corporation's only obligation in this respect being to credit to the account of the Debtor such sums, if any, as The Railroad Credit Corporation may find in its

hands in excess of its requirements in administering said Plan and said fund; moreover, the amount of said undistributed book balance is currently reduced as distributions are made, the undistributed book balance at date hereof being $52,074.17.

2. That the Bureau erred in failing to find that The Railroad Credit Corporation is entitled by the general law and by special contract to apply income and proceeds from collateral (including distributive shares under the Marshalling and Distributing Plan), to or towards the payment of principal or interest, or both, of and upon the obligations of the Debtor in its untrammelled discretion.

See decision of District Court of United States, District of Connecticut, in Re Reorganization of New York, New Haven & Hartford Railroad Company; not yet reported, but printed at pp. 2689-2697, 2829-2830, and 2903-2904 of the record in said proceeding, filed with the Interstate Commerce Commission.

In consequence of applications made since the close of the hearing herein, the obligations of the Debtor have been further reduced, the amount [402] thereof on September 15, 1937, being

Principal	$2,445,609.88
Interest	67,836.33
Total	$2,513,446.21

Note: In view of the reduction of the rediscount rate of the Federal Reserve Bank in the New York District, from 1½% to 1% in August, 1937, that

interest rate, unless sooner changed, will be applied by The Railroad Credit Corporation under the terms of the Marshalling and Distributing Plan, 1931, effective October 1, 1937.

3. That the Bureau erred in recommending (p. 50) that the Commission consider, for the purpose of a plan of reorganization, that the equipment covered by leases, conditional sale agreements or equipment trust agreements, is subject to the lien of The First Mortgage in priority to the General Mortgage.

In support of this exception, The Railroad Credit Corporation refers to the exceptions and supporting brief filed herein by the trustee of the General Mortgage. The Railroad Credit Corporation adopts all said exceptions, and the supporting brief, to the same extent as though set out herein at length.

4. That the Bureau, although finding that the equity of the preferred and common stockholders of the Debtor has no value (p. 55), and that claims of several general creditors should be cancelled, nevertheless erred in recommending the issuance of warrants to The Western Pacific Railroad Corporation, one of the general creditors and stockholders of the Debtor, enabling it to purchase at par, within sixty days, all or any part of the $10,000,000 of new first mortgage bonds, receiving a bonus of 10 shares of new common stock with every $1,000 bond so purchased.

If the value of the new common stock is sufficiently low to make the combined value of a new

$1,000 first mortgage 4% bond and ten shares of
[403]
stock approximate the purchase price of $1,000, there must clearly be an over-issue of stock. It must be assumed, however, that the Bureau has found that there is sufficient property to support fully not only the other stock provided for, but also the $10,000,000 of common stock proposed to be alloted as a bonus with the $10,000,000 of new first mortgage bonds. If such value exists, as a basis for this stock, creditors senior to The Western Pacific Railroad Corporation are entitled to it. In any event, the holder of the warrants for new bonds will secure two dollars in securities for every dollar of investment: this is incongruous, even if lawful, in a reorganized corporation. It can scarcely be claimed that first mortgage 4% bonds, in the amount of only $10,000,000 upon a property which the Bureau proposes to capitalize at more than $90,000,000, and which even through the worst years of the depression, has earned sums available for interest more than sufficient to cover the interest requirements upon such bonds, must be "sweetened" by the addition of stock of an equal liquidating value, or, indeed, by the addition of any stock.

If the estate of the Debtor is insufficient to support this additional $10,000,000 of stock, then, to the extent that such deficiency exists, the stock will be watered. In this connection, it is of interest to note that the Bureau found that if the $10,000,000 of bonus stock is issued, the Debtor's estate is not sufficient to support the issue to The Railroad Credit

Corporation of stock having a par value equal to the amount of The Railroad Credit Corporation's claim, even though that claim is secured inter alia by general mortgage bonds in a principal amount nearly double the amount of the claim. If there is insufficient equity for mortgage bonds, there must of necessity be insufficient equity for general creditors: no general creditor is thus entitled to participate. [404]

It is significant that the Bureau proposes to allot to Reconstruction Finance Corporation common stock having a par value nearly double the amount of the claim: since we must assume that the Bureau would not propose giving to Reconstruction Finance Corporation securities worth more than the amount of the claim, it follows that, in the opinion of the Bureau, the new common stock, though it may be worth less, cannot be worth more than roundly $50 a share. It also follows that The Railroad Credit Corporation is offered stock having, at most, a value of not more than half its claim: and yet the Bureau proposes to give something of value out of the Debtor's estate to The Western Pacific Railroad Corporation, whose position is junior to that of The Railroad Credit Corporation. Such a proposal might stand, on composition principles, if every creditor assented, but if a single creditor dissented, the proposal would necessarily be rejected by the court as being contrary to the requirements of Section 77. The allocation of the bonus stock to the secured note holders would patently be more equitable than the Bureau's proposal.

In either event, the Bureau's proposal would result in an unfair and unsound distribution of securities.

The Bureau's proposal tends not only to discredit other securities of the new company, but to discredit even the new first mortgage bonds themselves. It would be preferable to adjust the interest rate on the new bonds, to the market, or to sell those bonds at a discount. It is possible that satisfactory terms could be made for a loan in the full amount from Reconstruction Finance Corporation, without any increase in the rate of interest.

Even if the proposed issue of bonus stock is legal; it may well be that its issue as "fully paid" would subject the purchaser to an assessment in the event of subsequent financial difficulties. See Brockett v. Winkle Terra Cotta Company, 81 F. (2d) 949 (C. C. A. 8th, 1936); and Spencer v. [405] Anderson, 222 Pac. (Cal.) 355 (1924). The mere possibility of such an assessment would depress the market value not only of the bonus stock, but of all the remaining common stock.

It is obvious that if such an offer as is proposed to be made to The Western Pacific Railroad Corporation is to be made to any general creditor, it should be made on equal terms to all general creditors: certainly there is no basis for offering $20,000,000 par value of securities to a single general creditor having a claim amounting to but a fraction of that sum. It would appear, that such an offer, if made at all, should be made first to prior creditors

whose claims are not satisfied by the proposals of the Bureau.

It should be noted, moreover, that The Railroad Credit Corporation is the holder of $5,494,722 (plus interest), or substantially all, of the claim that is made on the basis of the proposed allocation of warrants to The Western Pacific Railroad Corporation, amounting to $5,747,560, plus interest. If the possession of that claim justifies the proposed offer of warrants, that offer should be extended to The Railroad Credit Corporation rather than to The Western Pacific Railroad Corporation.

The further proposal of the Bureau, that said warrants be offered to Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Company, pro rata, in the event and to the extent that they are not taken up by The Western Pacific Railroad Corporation, is wholly illusory: it is obvious that if the warrants have value, the Western Pacific Railroad Corporation will exercise them to the extent, if any, that it is able and willing to do so, and sell the remainder to others. Obviously no part of the warrants will descend to The Railroad Credit Corporation if there is value in them; The Railroad Credit Corporation cannot expect to secure any right to such warrants unless they are entirely worthless. [406]

The proposed allotment of warrants opens the door to full ultimate recovery by The Western Pacific Railroad Corporation: that door is simultaneously closed to The Railroad Credit Corporation,

although the latter has a position senior to the former.

5. That the Bureau erred in recommending (p. 40) the immediate sale of $10,000,000 of new First Mortgage Bonds, necessitating the payment of interest thereon, although it does not appear that said sum is presently required.

It may well be that before all of this sum is required, conditions may be such that first mortgage bonds of the character here proposed, will sell at their face value or even at a premium, without being bolstered by stock. In any event, it would seem unwise to saddle the new corporation with unnecessary interest charges.

6. That the Bureau erred in failing (p. 54) to accord full recognition to all the collateral held by The Railroad Credit Corporation, in the allocation of new securities.

The allocation proposed is based solely on holdings of general mortgage bonds. In addition, The Railroad Credit Corporation also holds (1) pledge of interest accrued upon said general mortgage bonds; (2) assignments of advances to the Debtor by three subsidiaries of the Debtor; (3) assignment of distributive shares of Debtor, and of two subsidiaries of the Debtor, under the Marshalling and Distributing Plan; (4) "negative pledge" of dividends on stock; and (5) equity in collateral pledged with Reconstruction Finance Corporation.

In this respect the Bureau's proposal, if carried

out, would be confiscatory. See comments under Paragraphs 9 and 10, infra. [407]

7. That the Bureau erred in failing to find that important and valuable items of collateral were assigned to and pledged with The Railroad Credit Corporation by others than the Debtor, and cannot be taken from The Railroad Credit Corporation in this proceeding.

The items referred to are as follows:

(a) $2,000,000 principal of Debtor's general and refunding bonds;

(b) Assignment of distributive shares of two subsidiaries of the Debtor, under the Marshalling and Distributing Plan, 1931;

(c) Assignment of certain advances made by The Western Pacific Railroad Corporation to (I) the Debtor, (II) Sacramento Northern Railroad Company, and (III) Standard Realty and Development Company, respectively.

8. That the Bureau erred in proposing that the claim of The Railroad Credit Corporation against the Debtor be discharged.

The Railroad Credit Corporation holds as partial security for its claim against the Debtor, three items of collateral pledged with it by The Western Pacific Railroad Corporation, one item pledged with it by the A. C. James Company, and the distributive shares (under the Marshalling and Distributing Plan, 1931) of two subsidiaries of the Debtor. A pledge of collateral by a third person

is analogous to a guaranty, being in practical effect a guaranty limited to the value of the property pledged. The discharge of the claim of The Railroad Credit Corporation would terminate these several pledges. The right to retain a lien until the debt secured thereby is paid, is a substantive right which may not be taken from the creditor consistently with the Fifth and Fourteenth Amendments to the Constitution. Security-First National Bank v. Rindge Land & Navigation Co., 85 F. (2d) 557 (C.C.A. 9, 1936). This rule is especially applicable when the pledge is given by third parties. In this respect the situation is closely parallel to that presented in In Re Nine North Church Street 85 F. (2d) 186 (C.C.A. 2nd, 1936). As there [408] intimated, the liquidation of said collateral may be essential to a reorganization of the Debtor. The Railroad Credit Corporation is ready and willing to liquidate said collateral on a proper basis. See also In re Deversey Bldg. Corporation, 85 F. (2d) 456 (C.C.A. 7th, 1936).

Moreover, although The Railroad Credit Corporation has the legal right to sell any collateral pledged with it by third parties, there is doubt whether it could surrender, under any plan of reorganization, any collateral pledged with it by third parties, including, of course, the $2,000,000 principal amount of general mortgage bonds of the Debtor pledged with The Railroad Credit Corporation by the A. C. James Company, unless such third party pledgors assented thereto. Furthermore, while The

Railroad Credit Corporation has the legal right to sell the $2,000,000 principal amount of said bonds pledged with it by the Debtor, and upon which Reconstruction Finance Corporation has a second lien, it is doubtful whether The Railroad Credit Corporation would have the right to surrender said bonds under any plan of reorganization, unless the Reconstruction Finance Corporation had assented thereto. The Reconstruction Finance Corporation would be likewise restricted in its dealings with collateral upon which The Railroad Credit Corporation has a second lien.

9. That the Bureau's proposals are unfair, and unjustly discriminatory and prejudicial to the rights and interests of The Railroad Credit Corporation.

To the extent that the claim of The Railroad Credit Corporation is secured, it is entitled to treatment on a parity with other equally secured creditors, including in that category the holders of first mortgage bonds. See In re New York, New Haven & Hartford Railroad Co., 16 F. Suppl. 504 (D.C., D. of Conn., 1936); also, comment under Paragraph No. 5, above. [409]

The Bureau's proposal:

(a) fails to recognize all of the collateral held by The Railroad Credit Corporation;

(b) allocates to The Railroad Credit Corporation securities having a value of less than half the amount of its claim;

(c) provides for the discharge of the claim of The Railroad Credit Corporation, so as to

deprive The Railroad Credit Corporation of collateral pledged with it by third persons;

(d) allocates valuable rights and interests in property of the Debtor to a general creditor, although the prior claim of The Railroad Credit Corporation has not been fully satisfied;

(e) allocates property to a general creditor based on a claim that had been assigned by that creditor to The Railroad Credit Corporation;

(f) provides for the issuance of stock upon terms that result in the dilution of what value there might otherwise be in the stock assigned to The Railroad Credit Corporation;

(g) recommends the issue of warrants for new first mortgage bonds and stock on a basis that dissipates assets of the Debtor, places an unnecessary interest charge on the Debtor, and discredits all securities issued by the Debtor under the proposed plan of reorganization; and

(h) deprives The Railroad Credit Corporation of income and proceeds of collateral to which it is lawfully entitled pending the consummation of a plan of reorganization. (See Paragraph No. 10, below).

Such treatment is confiscatory and contrary to the provisions of section 77 of the Bankruptcy Act, as well as in violation of the law of the land.

10. That the Bureau erred in proposing (p. 60) as the effective date of a plan of reorganization, January 1, 1937, a date already passed.

The Railroad Credit Corporation since that date has applied, and in duty bound will continue to apply, in accordance with its legal rights, income and proceeds from collateral, including distributive shares of the Debtor under the Marshalling and Distributing Plan. See also comment under Paragraph No. 2. [410]

Wherefore, The Railroad Credit Corporation, because of each and all of the errors herein specified, prays that the report proposed by the Bureau of Finance be so amended as to correct the errors hereinabove specified, in the manner hereinabove set forth.

Dated: Washington, D. C., September 25 1937.

Respectfully submitted,

D. WILLARD, JR.,
General Counsel,
The Railroad Credit Corporation.

Office and P. O. Address:
D. WILLARD, JR.,

17th & H Streets, Northwest,
Washington, D. C.

[Endorsed]: Filed Oct. 5, 1939. [411]

Before the
Interstate Commerce Commission
Finance Docket No. 10913.

THE WESTERN PACIFIC RAILROAD COMPANY REORGANIZATION

EXCEPTIONS OF RECONSTRUCTION FINANCE CORPORATION TO THE PROPOSED REPORT OF THE BUREAU OF FINANCE.

Reconstruction Finance Corporation (hereinafter called "Reconstruction"), an intervenor in the above-entitled proceeding, hereby makes and presents the following exceptions to the report proposed by the Bureau of Finance:

1. The report errs in failing to give any recognition to the accrued unpaid interest on the General and Refunding Mortgage Bonds (hereinafter called "Refunding Bonds") of the Western Pacific Railroad Company (hereinafter called "the Debtor") held by Reconstruction.

2. The report errs in failing to give any recognition to the substantial additional collateral security held by Reconstruction other than Refunding Bonds.

3. The report errs in failing to give any recognition to the claim which Reconstruction has for the deficiency, if any, on [412] its notes, after a sale or determination of the value of its collateral.

4. The report errs in giving to Western Pacific Railroad Corporation, an unsecured creditor, the

right to subscribe to $10,000,000 principal amount of new First Mortgage Bonds and to receive in addition to said bonds a bonus of $10,000,000 par value of new common stock.

5. The exceptions filed by Irving Trust Company, trustee of the Debtor's General and Refunding Mortgage, are concurred in by Reconstruction, which hereby adopts such exceptions as supplemental and additional exceptions.

6. If the Commission approves the plan proposed by the report, it will be unable to give the approval required by Section 5b(3) of the Reconstruction Finance Corporation Act, as amended.

7. The plan proposed by the report is unfair and inequitable to Reconstruction, fails to afford due recognition to its rights as the holder of an entire class of claims, discriminates unfairly against such class, and fails to conform to the requirements of the law of the land.

I.

The report errs in failing to give any recognition to the accrued unpaid interest on the General and Refunding Mortgage Bonds of the Western Pacific Railroad Company held by Reconstruction.

Since the treatment of Reconstruction in the plan recommended by the Bureau of Finance is based entirely on the total amount of Debtor's Refunding Bonds held by Reconstruction, obviously such [413] treatment should recognize the rights given

by the covenants of the Bonds to the holders of such Bonds to be paid the principal thereof together with interest as specified in the Bonds. This the Bureau has failed to do and has given consideration merely to the principal amount of the Bonds without considering the unpaid interest. This constitutes error, since unpaid interest is as much of a debt as the principal.

That Reconstruction is a pledgee holding Refunding Bonds of the Debtor furnishes no reason why Reconstruction's right to treatment based on a calculation of the unpaid interest accrued on the Bonds should be ignored, since it is the universal rule that a pledgee—until satisfaction of the debt secured by pledged collateral—is entitled not only to the proceeds but the income of the pledged collateral.

In the present case the notes executed by the Debtor to Reconstruction were delivered in the State of New York and the loans evidenced by said notes were made in the State of New York. Furthermore, said notes are payable in the State of New York. In such circumstances, the law of New York is controlling with respect to the parties to the pledge contract, i. e., Reconstruction and the Debtor. See the following cases: Burns Mortgage Co. v. Fried (1934), 292 U. S. 487; Dale v. Pattison (1914), 234 U. S. 399, 404; Taney v. Penn. Nat. Bank (1914), 232 U. S. 174; Hiscock v. Varick [414] Bank (1907), 206 U. S. 28; Cook v. Moffatt (1847), 5

How. (46 U. S.) 295, 307; Lee v. State Bank and Trust Co. (1930), 38 F. (2d) 45, 47.

The right of a pledgee to income or proceeds of pledged collateral, until the satisfaction of the debt for which the collateral is pledged, is well recognized in the State of New York. See the following cases: Brightson v. Claflin (1919), 225 N. Y. 469, 122 N. E. 458; D. S. Stern & Co. Inc. v. Pisitz (1934), 270 N. Y. S. 715; Manufacturers Trust Co. v. Bank of Yorktown (1935), 282 N. Y. S. 507, 509; In re Brewer's Estate (1931); 253 N. Y. S. 213; Ross v. Mabbett Motor Car Co. Inc. (1922), 194 N. Y. S. 200.

While the Debtor was not in default on its notes held by Reconstruction, Reconstruction allowed it to pay to itself the interest as it matured on the $10,750,000 principal amount of Refunding Bonds pledged with Reconstruction. Accordingly, the interest was so paid on said bonds to March 1, 1934. Since that date interest has been accruing at the rate of 5 per cent per annum, none of which has been paid or collected. As of January 1, 1938 (before which date the reorganization of the Debtor cannot be effected) there will be accrued and unpaid on the notes of the Debtor held by Reconstruction $2,150,000 of interest as follows, viz.:

Principal amount of Bonds	Series	Interest from March 1, 1934 to January 1, 1938
$8,750,000	A	$1,750,000
2,000,000	B	400,000
	Total	$2,150,000

This sum, $2,150,0000, when added to the principal amount of the bonds pledged with Reconstruction, $10,750,000, amounts to $12,900,000, which latter amount (with an additional adjustment for such further unpaid interest as shall have accrued on the pledged bonds at the date the plan is actually made effective) should serve as the basis for the issuance of securities to Reconstruction on account of the Refunding Bonds pledged with it.

Under the Bureau's proposal, the accrued unpaid interest on the First Mortgage Bonds is added to the principal amount of said Bonds as a basis for calculating the treatment to be given such bondholders. The Bureau's failure to add such interest in the case of the Refunding Bonds constitutes an inequitable discrimination against Reconstruction and the other pledgees of the Refunding Bonds in favor of the holders of the First Mortgage Bonds.

II.

The report errs in failing to give any recognition to the substantial additional collateral security held by Reconstruction other than Refunding Bonds.

As already referred to, the treatment proposed in the report for Reconstruction's claim is based entirely upon the principal amount of $10,750,000 of Refunding Bonds pledged with Reconstruction. In addition to such principal amount of bonds Reconstruction holds substantial additional collateral security consisting [416] of (1) 150,000 shares, or

one-half, of the outstanding common stock of Denver and Rio Grande Western Railroad Company, represented by voting trust certificates, and (2) a second lien upon $2,000,000 principal amount of Refunding Bonds held in pledge by The Railroad Credit Corporation. Obviously, the report errs in failing to give any recognition to this additional collateral security.

Since the report contemplates the extinction of Reconstruction's claim on its notes and the surrender of the collateral therefor, the acceptance by Reconstruction of the plan proposed in the report would automatically release from pledge the additional items of collateral security (1) and (2) above. The proposed plan is confiscatory to the extent that it fails to give any recognition to such additional collateral security.

The Denver and Rio Grande Western stock, regardless of its intrinsic value, is of considerable value strategically, since through the stock control is exercised over the Denver and Rio Grande Western Railroad Company, an essential link in the transcontinental route consisting of the Western Pacific, the Denver and Rio Grande Western, and the Missouri Pacific systems. The disposition of this stock vitally affects both the Missouri Pacific and Western Pacific interests. See petition and brief dated September 3, 1937, filed by the Missouri Pacific Railroad Company for reconsideration of its petition for leave to intervene. This [417] stock

was pledged with Reconstruction by the Western Pacific Railroad Corporation. Unless the latter corporation releases Reconstruction, this stock will have to be returned by Reconstruction to the Western Pacific Railroad Corporation. For such return Reconstruction, under the proposed plan, will receive no equivalent consideratjon. A fair and equitable plan either would assign to Reconstruction, in consideration of the return of this stock to Western Pacific Railroad Corporation, an equivalent part of the securities which would otherwise be accorded to the Western Pacific Railroad Corporation; or would provide that Reconstruction may sell this stock, in its untrammelled discretion, for such price as it can obtain for the stock. Failure to do so constitutes a discrimination against Reconstruction, in favor of the Western Pacific Railroad Corporation.

A somewhat different situation exists as to the $2,000,000 principal amount of Refunding Bonds on which Reconstruction has a second lien. Should Reconstruction not accept the plan proposed in the report and The Railroad Credit Corporation, on the other hand, do so, The Railroad Credit Corporation, the holder of the senior lien, will be under a legal duty to turn over to Reconstruction the $2,000,000 principal amount of [418] bonds. The Railroad Credit Corporation is likewise under a legal duty to surrender the bonds to Reconstruction (and not to the Debtor) upon satisfaction of its claim by payment out of the proceeds of its other col-

lateral, or otherwise than by the acceptance of new securities under the proposed plan. Reconstruction's right to the bonds, in any of these eventualities, is a valuable property right; and the failure of the report to give any recognition to such right, in the circumstances herein involved, is unjustly discriminatory and prejudicial to the interests of Reconstruction.

III.

The report errs in failing to give any recognition to the claim which Reconstruction has for the deficiency, if any, on its notes, after a sale or determination of the value of its collateral.

It is elementary that to the extent, if any, Reconstruction is not fully secured, Reconstruction is a general creditor for the deficiency. It is likewise elementary that all general creditors must be treated alike.

That these elementary principles are applicable to a Section 77 proceeding, plainly appears from In re New York, New Haven & Hartford Railroad Co., 16 F. Supp. 504 (D.C., D. of Conn., Sept. 16, 1936) where Judge Hincks stated (p. 509):

> "* * * as observed earlier in this memorandum, under the Act only a plan which is free from confiscatory features may be confirmed. To be sure, under the Act the court may approve a plan 'modifying or altering [419] the rights of creditors generally, or of any class of them, secured or unsecured,' etc. But since only an

equitable plan may be approved, the plan must provide that every creditor in the order of his priority shall receive under the plan rights which in equity are the fair equivalent of such of his rights as have been subjected to equitable modification, at least in so far as the assets of the debtor's estate permit. *Any creditor found to be only partially secured is entitled to the equitable equivalent of such security as he has, with a right to share in equality with common creditors for the excess of his claim as allowed above the value of his security as ascertained by equitable considerations.* And the plan must recognize the prior right of common creditors with respect to such assets as remain after equitable treatment has been accorded to secured creditors. Kansas City Ry. v. Central Union Trust Co., 271 U. S. 445. Such is the intent of the Act: * * *" (Italics ours.)

The Bureau's report violates these principles. It fails to find that Reconstruction's claim is fully secured. On the contrary, it does not make any finding whatever as to the extent to which Reconstruction's claim is secured; and in view of the allocation against the claim of new common stock only, we must conclude that the Bureau is of the view that Reconstruction and the other collateral noteholders (who are less well secured than Reconstruction) are all inadequately secured and that such collateral noteholders, including Reconstruc-

tion, have deficiencies on their respective notes. To the extent of such deficiencies, they are, accordingly, general creditors of the Debtor, and must be accorded equal treatment with the Debtor's other general creditors. Yet the report gives a single general creditor, the Western Pacific Rail- [420] road Corporation, the warrant rights hereinafter more fully discussed, without recognizing in any way the claims of the collateral noteholders as general creditors to the extent, if any, of their respective deficiencies.

This treatment is unfair and inequitable. Likewise it fails to afford due recognition to the rights of Reconstruction and discriminates unfairly against it. If the secured creditors are only partially secured and have deficiency claims for the balance—this the Bureau assumes to be clearly so in the case of The Railroad Credit Corporation and the A. C. James Co., since they are given common stock of a less par value than the face amount of their claims—then, if, as the Bureau's plan also assumes, there is not a sufficiency of value to recognize the deficiency claims, there can be no justification for giving anything, under the plan, to The Western Pacific Railroad Corporation. Neither can there be any such justification, if such assumptions are correct, unless and until Reconstruction's claim is satisfied in full. [421]

IV.

The report errs in giving to the Western Pacific Railroad Corporation, an unsecured creditor, the right to subscribe to $10,000,000 principal amount of new First Mortgage Bonds and to receive in addition to said bonds a bonus of $10,000,000 par value of new common stock.

Although the Bureau states that "The Commission should find that the equity of the preferred and common stockholders of the Debtor has no value" (p. 55) and although it recommends that the unsecured, general claim of the Western Realty Company should be cancelled (p. 55), it then proceeds to give to the Western Pacific Railroad Corporation (which holds stock and also an unsecured note of the Debtor), warrants to purchase at any time within sixty days after the reorganization is effected, $10,000,000 of new First Mortgage 4% Bonds which (except for equipment trusts) will be the only fixed interest obligation of the reorganized company and will have an absolute first lien on the Debtor's entire system, valued by this Commission at approximately $145,000,000. In addition, the purchaser of the new First Montgage Bonds of the reorganized company will be entitled to receive as a bonus $10,000,000 aggregate par value of common stock.

This treatment is subject to the following objections for reasons predominately of a business nature:

a. The record does not show any need for the immediate sale, upon reorganization, of $10,000,000 of new First Mortgage [422] Bonds, necessitating the payment of interest thereon from the date of their issuance. The Bureau's recommendation is not supported by any finding of such necessity.

b. The report proposes that the new bonds will be part of a proposed authorized issue of $50,000,000 of such bonds. As mentioned heretofore, such bonds would constitute the only fixed interest obligation of the reorganized company, except for equipment trusts. Whether or not the Bureau had a purpose in making the amount of the authorized issue of new bonds substantially the same as the amount of the outstanding First Mortgage Bonds now in default, does not appear. At any rate, the record fails to disclose any necessity or justification for such a large authorized issue of new bonds. The authorized amount should be cut down to but a fraction of the figure proposed. In addition, the new mortgage should provide restrictions, not proposed in the report, against the issuance of additional bonds when there is insufficient earnings coverage. Otherwise, the Bureau's proposal is but an invitation to the reorganized company to repeat the process, in which the Debtor has indulged, of overloading the property with debt and fixed interest charges—the cause of the present bankruptcy.

c. The Bureau's proposal to issue a bonus of $10,000,000 [423] of stock with the new bonds tends not only to discredit the new bonds themselves, but also all of the other securities issuable under the plan. If the new bonds cannot be sold at their principal amount with a 4% coupon rate, and without any stock bonus, it would be preferable to adjust the interest rate on the new bonds.

Apart from the above, the Bureau's proposal to allot $10,000,000 of new common stock as a bonus with $10,000,000 of new First Mortgage Bonds is subject to other fatal objections. As shown by the record (see Exhibit 2), Reconstruction on July 20, 1935 was willing, provided the approval of the Interstate Commerce Commission was obtained, to accept new securities for its present debt and to put $10,000,000 of new money into the property, as needed, taking therefor either at their face amount $10,000,000 of new First Mortgage Bonds carrying an interest rate of 4 per cent for the first ten years and 4½ per cent thereafter, or a twenty-year or twenty-five-year 4% note secured by bonds of the same issue on a basis of 120 per cent of the amount borrowed. As shown by the Debtor's plan, these bonds were to be part of no less than some $25,000,000 of new First Mortgage Bonds to be issued upon reorganization. With an issue of only $10,000,000 of new First Mortgage Bonds constituting a first lien on properties valued at about

$145,000,000 it is highly probable that the holder of the warrants for the new bonds will be able to [424] make arrangements through private banking channels for a syndicate to take the bonds off his hands at their face amount and resell them to the public at the face amount or better, thus leaving the warrant holder with the bonus of $10,000,000 of new common stock for which he has paid nothing whatsoever. Bearing upon this probability, it should be kept in mind that the Debtor's rehabilitation program instituted during the reorganization period has called for abnormally large expenditures which have reduced substantially the Debtor's net income available for fixed charges. Upon the completion of such program the effect of these expenditures should be just the opposite. The economies which the Debtor should be able to realize from the improvements made should be reflected in substantially better earnings. Likewise, increased traffic may reasonably be expected from the Northern California Extension and the Dotsero Cut-off, both of which were completed during the depression.

It must be assumed that the Bureau *if* of the opinion that there is value to support both the issue of $10,000,000 of new First Mortgage Bonds and $10,000,000 of new common stock. If there is such value, then, as pointed out above, the holder of the warrants will receive under the proposed plan $2.00 worth of new securities for each $1.00 of new money put in the property. Unless and until senior creditors are satisfied, there can be

no justification for singling out one of the general creditors, the Western Pacific Railroad [425] Corporation, and affording it more advantageous treatment than is afforded secured creditors.

On the other hand, if there is not value in the Debtor's estate sufficient to support the $10,000,000 of new common stock, then to the extent of the deficiency in value, there will be a watering of stock, with consequent dilution of the value of the stock to be issued to the First Mortgage bondholders and the collateral noteholders. There is no provision of Section 77 which allows the Commission to authorize an issue of watered stock. In this respect, Section 77 is like Section 77B. Watered stock, issued in a reorganization under either section, will, even if legally issued, be subject to the claims of creditors of the reorganized company. This point was decided by the Circuit Court of Appeals for the Eighth Circuit in Brockett v. Winkle Terra Cotta Company (1936), 81 Fed. (2d) 949, a case involving a Section 77B reorganization. In its decision that court held (p. 959):

> "We have been referred to no case where stock has been permitted to be issued 'without the shadow of right or consideration' and where it 'does not represent actual or substituted value in corporate assets.' It is, of course, urged that the cancellation of the bonded indebtedness constitutes a consideration for the stock issued to the bondholders. This may be true as between the corporation and assenting stock-

holders, but it cannot be held binding upon creditors who deal with the company upon the faith of its capital stock. No new money or its equivalent accrues to the Terra Cotta Company by virtue of the transaction. Not a dollar has been added to the physical assets of the Corporation by this additional stock issue. [426] One who assents to that issue and accepts the certificates stands in the same relationship to the public as that assumed by an original subscribing stockholder. * * *

"And it is the avowed purpose of the plan to seek credit and to borrow money upon the faith of this stock issue. It is not proposed to offer that stock for sale upon the market at its real worth. As stated in the plan, 'it is believed * * that its financial position would justify a line of bank credit sufficient to prepare for, make up, and fill any orders it may be able to obtain.' The witness Davis, on behalf of the debtor-petitioner, says: 'It seems to me this company can handle its credit situation by getting rid of this bond issue and then going to the banks on its individual orders.' By this means, notwithstanding the fact that the terra cotta business is admitted to be at a standstill, two other local companies being out of business or in liquidation, it is hoped 'that the company will be able to endure the loss of business incident to the economic depression for a few more years.'

"We may lay on one side the question of whether the financial responsibility of stock in an uncertain business venture may fairly be substituted for a first mortgage lien against the protest of the lienor. The paramount question here is whether these objecting bondholders may be forced into the position of holders of stock issued for an inadequate consideration, and thereby exposed to possible if not probable financial responsibility and loss. We do not think so. Without impugning the motives of the proponents of the plan, we feel that potentially it may affect injuriously the rights of creditors and of the public generally, and is, therefore, nonfeasible and unfair to these objectors as well. The small value of the physical property involved, and the large percentage of acceptance on the part of the stockholders and bondholders, no doubt operated in the trial court to obscure this issue which, we think, conditions the disposition of this appeal."

For a California decision (under the laws of which the Debtor Railroad is incorporated, see Spencer v. Anderson (1924) [427] 222 Pac. 355, where the Court recognized the liability of the holder of watered stock to creditors, saying in part (p. 357):

"* * * the creditor does not stand in the shoes of the corporation and he is not suing to recover upon a claim of the corporation against the stockholder. He may recover, though the

corporation have no such claim. His action is not upon a debt due from the stockholder to the corporation. It is to recover compensation for a wrong done directly to him by the corporation acting for the stockholder and participated in by the latter. The gist of the creditor's action is that he was induced to extend credit to the corporation by the false representations of the corporation respecting the amount paid in by the stockholder to the corporate capital, and the measure of his recovery is the same as in ordinary actions for damages for deceit, namely, the difference between the amount which has actually been paid in by the stockholder to the corporate capital and the amount which would have been paid in had the representations been true."

If the Commission is of the view that warrants should be issued in the reorganization to any of the parties, they should be offered first to secured creditors whose claims are not satisfied by the Bureau's proposal. The proposed plan would give one of the unsecured creditors, The Western Pacific Railroad Corporation, as a bonus or gift, $10,000,000 par value of new common stock, against $7,188,607 of debt, including interest (Report, p. 24), while the General Mortgage bondholders, who are secured, would receive new common stock for their bonds, on the basis of dollar for dollar. This is essentially unfair. The Bureau's proposal that if The Western Pacific Railroad Corporation does not

within sixty days [428] exercise the warrants, they will then be offered to Reconstruction, The Railroad Credit Corporation, and the A. C. James Company, pro rata, is unrealistic. If the warrants are of any value (and there is justification for belief that they will have substantial value), then they will either be exercised by The Western Pacific Railroad Corporation or sold by it to investment bankers or other purchasers. Obviously, no part of the warrants will accrue to Reconstruction if they have any value. Reconstruction cannot reasonably expect to receive any of the warrants unless at the time the reorganization is effected they are completely valueless.

V.

The exceptions filed by Irving Trust Company, Trustee of the Debtor's General and Refunding Mortgage, are concurred in by Reconstruction, which hereby adopts such exceptions as supplemental and additional exceptions.

Reconstruction adopts all of the exceptions filed by Irving Trust Company, Trustee of the Debtor's General and Refunding Mortgage, and said Trust Company's supporting brief, to the same extent as though set out herein at length.

On the basis of the said exceptions, it is obvious that Reconstruction is entitled to securities of the reorganized company on a substantially more favorable basis than are the holders of the Debtor's First Mortgage Bonds. This is for the reason that, as said Trust Company sets forth, the Refunding

Bonds are secured by a first [429] lien on substantial properties of the Debtor of a value in excess of the amount of Refunding Bonds outstanding; and Reconstruction's claim, in turn, is secured by Refunding Bonds of a principal amount in excess of three times the amount of Reconstruction's claim. Clearly, if the exceptions of said Trust Company are well taken, as we believe them to be, Reconstruction's claim is more than 100% secured.

VI.

If the Commission approves the plan proposed by the report, it will be unable to give the approval required by Section 5b(3) of the Reconstruction Finance Corporation Act, as amended.

It should not be forgotten that both the Commission and the Directors of Reconstruction, found, in 1932 and 1933, at the time that the Reconstruction loans were made, and when the earnings of the Debtor Railroad were much less favorable than they are to-day, that with the collateral security required by the Commission, Reconstruction would be adequately secured. Western Pacific Railroad Company Reconstruction Loans, 180 I.C.C. 645, 184 I.C.C. 699, and 189 I.C.C. 575.

Likewise, it should ont be forgotten that, in addition to any duties imposed upon it by Section 77 of the Bankruptcy Act, a special duty with respect to the claim of Reconstruction in the [430] reorganization is imposed upon the Commission by Section

5b(3)* of the Reconstruction Finance Corporation Act, as amended. Under the latter section, Reconstruction has no power to accept for its present claim new securities, except "with the prior approval of the interstate Commerce Commission." This provision is an integral part of the Reconstruction Finance Corporation Act, as amended, and is a limitation upon the powers of Reconstruction. Obviously, its purpose was to insure, by requiring the prior approval of the Commission, that Reconstruction's claim should receive adequate treatment

---

* This section provides as follows:

"(3) In connection with the reorganization under section 77 of the Federal Bankruptcy Act, approved July 1, 1898, as amended, or with receivership proceedings in a court or courts, of any railroad or railway indebted to the Corporation or any railroad or railway the receivers or trustees of which are indebted to the Corporation, the Corporation may, *with the prior approval of the Interstate Commerce Commission*, adjust or compromise its claim against such railroad or railway, or any such receiver or trustee, by accepting, in connection with any such reorganization or receivership proceedings and in exchange for securities or any part thereof then held, new securities which may have such terms as to interest, maturity, and otherwise as may be approved by the Corporation, or part cash and part new securities so approved: Provided, That any such adjustment or compromise shall not be made on less favorable terms than those provided in the reorganization of the railroad or railway for holders of claims of the same class and rank as the claim of the Corporation." (Italics ours). [431]

in a Section 77 proceeding or in an equity receivership. Under the provision, the responsibility is imposed upon both the Commission and Reconstruction to make certain that Reconstruction does receive such adequate treatment.

It is respectfully submitted that if the Commission approves the Bureau's plan, it will not be able to give the approval required by Section 5b(3) of the Reconstruction Finance Corporation Act, as amended.

VII.

The plan proposed by the report is unfair and inequitable to Reconstruction, fails to afford due recognition to its rights as the holder of an entire class of claims, discriminates unfairly against such class, and fails to conform to the requirements of the law of the land.

Neither the Commission nor the Court can approve a plan which does not conform to the requirements of Section 77. Subsection (d) of Section 77 provides that the Commission, if it approves any plan whatsoever, shall approve a plan "that will in its opinion meet with the requirements of subsections (b) and (e)" of Section 77, "and will be compatible with the public interest." Subsection (e) of Section 77 provides in part that "the judge shall approve the plan if satisfied that: (1) it * * * is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding

the participation of the various classes of creditors and stockholders * * *."

These requirements, as we have already shown, are not met [432] by the plan proposed in the Bureau's report. Incidentally, the District Court, in classifying creditors and stockholders, has put Reconstruction in a class by itself, so that the failure of the Bureau's plan to give due recognition to the rights of Reconstruction constitutes a failure to afford due recognition to an entire class of creditors. Likewise, the unfair discrimination of the proposed plan against Reconstruction is an unfair discrimination against an entire class of creditors. Yet, even if the claims of Reconstruction, The Railroad Credit Corporation, and the A. C. James Company, in respect of the Refunding Bonds, were consolidated into a single class, Reconstruction's claim would amount to 56.6 per cent of the class.

It is respectfully submitted that the proposed plan, even if approved by the Commission, could not be approved by the Court. For the reason that if could not be approved by the Court, it should not be approved by the Commission.

Oral argument is requested.

Respectfully submitted.

EXCEPTIONS.

The Western Pacific Railroad Company, the Debtor herein, hereby excepts to the proposed Report of the Bureau of Finance filed herein on or about August 2, 1937, and respectfully submits the following exceptions to said proposed Report (herein called "the Report"): [440]

I.

The Report errs in failing to approve a practicable Plan of Reorganization reasonably acceptable to security holders as a composition under Section 77 of the Bankruptcy Act (pp. 59, 60).

II.

The Report errs in proposing to limit total capitalization to $91,406,510. (p. 46) by authorizing in addition to existing obligations to be assumed in reorganization not more than $10,000,000. of First Mortgage Bonds (p. 39), $19,716,040. of 50 Year Income Mortgage 4% Bonds (p. 43), 295,740-3/5 shares of Preferred Stock (p. 44), and 300,682-1/5 shares of Common Stock (p. 44).

III.

The Report errs in construing Section 77 of the Bankruptcy Act as a mandate or legislative declaration that capitalization shall "not exceed a conservative valuation of the assets to be taken over by the reorganized Company" (p. 36).

IV.

The Report errs in disregarding the Section 19a

value of the System properties amounting as of December 31, 1935, to $144,619,851. (p. 23).

V.

The Report errs in refusing to authorize the issue of stock without par value and in treating no par value [441] stock at $100. per share in measuring capitalization (p. 36).

VI.

The Report errs in providing for the expropriation of the collateral, or the Debtor's interest in the property represented by the collateral, securing the Debtor's notes held by Reconstruction Finance Corporation, the A. C. James Co. and The Railroad Credit Corporation (p. 54).

VII.

The Report errs in assuming that the public interest involves matters lying beyond the field of transportation and includes the amount of interest charges which are not fixed obligations to pay but are payable only out of available income (p. 37); sound financing (p. 38); financing through junior obligations and other phases of controversial economics (p. 42).

VIII.

The Report errs in proposing a finding that the equity of the preferred and common stockholders of the Debtor has no value (p. 55).

IX.

The Report errs in failing to find that the Debtor's Plan is fair and equitable and otherwise com-

plies with the provisions of Section 77 and is compatible with the public interest (pp. 36, 37). [442]

BRIEF.

I.

The Report Errs in Failing to Approve a Practicable Plan of Reorganization Reasonably Acceptable to Security Holders as a Composition Under Section 77 of the Bankruptcy Act.

From the tenor of the Report it is clear that the Bureau of Finance misconceives the true function of the Interstate Commerce Commission under Section 77, which is to reconcile differences between security holders so as to make practicable a composition under Section 77 and not to rewrite the Debtor's capital structure.

In Continental Illinois Bank and Trust Company v. Chicago, Rock Island & Pacific Railway Company (294 U. S. 648), the United States Supreme Court, referring to the original Section 77, said:

> "As outlined by that section, a plan of reorganization, when confirmed, cannot be distinguished in principle from the composition with creditors authorized by the act of 1867, as amended by the act of 1874." (p. 672)

To this end subsection (d) of Section 77 requires that a Plan of Reorganization shall be set down for hearing unless the Interstate Commerce Commission shall consider it to be "*prima facie impracticable.*"

Obviously the Commission, if it is to make Section 77 a workable statute, if it is to develop a Plan that will bring the property of the Debtor out of the courts and restore it to private operation, ought not itself [443] to report a Plan which, if it were proposed by the Debtor or by a group of creditors, it would be the duty of the Commission to dismiss because impracticable.[1]

II.

The Report Errs in Attempting to Limit Total Capitalization to $91,406,510. By Authorizing in Addition to existing Obligations to Be Assumed in Reorganization Not More Than $10,000,000. of First Mortgage Bonds, $19,716,040. of 50 Year Income Mortgage 4% Bonds, 295,740-3/5 Shares of Preferred Stock, and 300,682-1/5 Shares of Common Stock

Nowhere in the Act do we find any authority or jurisdiction conferred upon the Interstate Commerce Commission to limit *capitalization** and to prescribe the amount and character of the securities which a corporation reorganized thereunder shall be permitted to issue.

The lesser authority—the authority to limit fixed charges—is given *expressly* by subsection (b) but

---

[1] A further interpretive discussion of Section 77 appears in the Appendix.

* Italics used in this brief are by counsel for Western Pacific Railroad Company.

must be exercised subject to and in conformity with a prescribed statutory formula. It would, therefore, be contrary to familiar rules of statutory construction to assume that a greater authority—the authority to limit the amount and character of *all* forms of capital securities—is given (a) not expressly but only by implication and (b) to be exercised not according to [444] formula or statutory guide but in the uncharted discretion of the Interstate Commerce Commission.

$10,000,000. principal amount of First Mortgage Bonds.

We agree that it is within the province of the Interstate Commerce Commission to say that the reorganized Company shall not issue more than $10,000,000. of First Mortgage 4% Bonds, either (a) because fixed charges under the formula prescribed in subsection (b) ought not to exceed $400,000. (a conclusion we think would be erroneous) or (b) because a first lien on the rails ought to be reserved exclusively as a credit basis for new money (a position asserted by the A. C. James Co. but which we think is not sustained by the record in this case).

The public interest requires that carriers engaged in interstate commerce be assured of new capital on reasonable terms and in certain cases it may be necessary to reserve an exclusive first lien on the rails to attract new capital.

Such cases are, however, the exception and not

the rule and the present case, we submit, is governed by the rule and not by the exception.

In presenting the Debtor's "earnings experience" the System Income Account for the fourteen years period 1922 to 1935 was introduced, showing average annual income available for interest of $2,165,920.[2] Deferred maintenance of $5,036,778. existing on January 1, 1936, was assumed to have accrued during this period reducing the average to $1,800,000. or more than 1.7 times the fixed charges proposed by the Debtor and [445] more than 4½ times the fixed charges proposed by the Bureau of Finance.[3]

The true earnings are depressed in the Bureau's Report by substituting for the fourteen years period 1922-1935 as the Debtor's "earnings experience" the ten years period 1926-1935, thereby giving greater effect to the low depression period earnings and reducing the average to $1,207,100., assuming (which is *not* the fact) that all deferred maintenance accrued during this ten year period.

The Report then refers to tax burdens under the Social Security Act and the Railroad Retirement Act, which if applied retroactively would have amounted to $537,653. in 1930, $488,633. in 1931, $365,498. in 1932, $331,149. in 1933, and $257,345. in 1934, asserts that similar data is lacking for the full ten years period, but states

---

[2] Tr. p. 221.

[3] Tr. pp. 215, 216; Ex. 23.

"it is apparent that such amounts should be considered in determining the debtor's probable future earnings available for interest and dividends."[4]

At a later point, however, the Report states,

"* * * But limitation of the fixed charges of the reorganized company on the basis of such hypothetical adjustments can hardly be justified, since other factors, now unknown, tending to increase net earnings may later affect the situation.[5]

In attempting to limit fixed interest charges to less than $500,000 the Report seems to rest entirely [446] upon the depression years of 1931, 1932 and 1933, and in so doing

(a) it *ignores* the fact that the 1931 deficit is a nonrecurring incident of the rapidly changing operating conditions peculiar to that period and that total Operating Revenues in that year which yielded no profit amounted to $14,852,938, whereas in 1934, with Operating Revenues of only $13,779,237, there was income available for interest of $1,084,243.85;

(b) it *erroneously assumes* that the 1932 income of $252,706. was a deficit, thus understating the reported income by $515,412, and,

(c) it *entirely disregards* the controlling fact that the reported incomes for these years do not

---

[4] Report, pp. 19-21.

[5] Report, p. 39.

contain the revenue of the Northern California Extension as a seasoned line and an established route.[6]

We respectfully urge that the Bureau of Finance was not justified in ignoring the estimate of Charles Elsey, President of the Debtor, who testified that in any future depression equally as severe as that of 1931, 1932 and 1933, the earnings from this new line will not fall below $2,961,853. and that in any such future depression the System earnings available for interest would not fall below $1,218,000.[7]

As already pointed out we are working under a composition statute which aims to bring about capital readjustments by agreement of creditors and stockholders in specified percentages. Success or failure easily may depend upon the allotment of a reasonable [447] proportion of fixed interest bearing bonds to our present First Mortgage Bondholders. 30% was the percentage originally agreed upon and we submit that this amount could properly be authorized (a) because an interest charge of $1,027,036. is abundantly justified by the 1931-1934 income *plus* a very conservative estimate of earnings from the Northern California Extension, (b) because reserved Bonds under the First Mortgage after an initial issue requiring not more than $1,027,036. to be paid as the annual fixed charge

---

[6] Report, pp. 38-40; Tr. p. 255.

[7] Tr. pp. 162, 163.

would be sound Bonds according to accepted standards and reasonably certain to attract sufficient new capital, and (c) because the primary purpose of Section 77 is to promote and not to prevent the prompt reorganization of rail carriers that are victims of the late depression.

$19,716,040. of 50 Year Income Mortgage 4% Bonds.

We cannot agree that it is within the province of the Interstate Commerce Commission to say that the reorganized Company shall not issue more than $19,716,040. of Income Bonds. Such Bonds are not fixed interest bearing obligations and the public interest is not affected by the amount of Income Bonds which find their way into the capital structure of the reorganized Company but the public interest may be adversely affected if the present holders of our First Mortgage Bonds (many of whom are testamentary trustees or other fiduciaries, institutional investors, banks and insurance companies) are relegated to a stock position which in many jurisdictions they are not permitted to occupy and are required to [448] accept a form of security which they cannot hold and are obliged to sell. *A sound reorganization should include among its features every inducement to the old security holders to continue their investment in the new Company and not in effect merely pave the way for future involuntary liquidation.*

By consulting its own archives the Commission will find that it heretofore certified that it was

compatible with the public interest for the Debtor to issue actually or nominally $49,290,100. of First Mortgage Bonds and $18,999,500 of General and Refunding Mortgage Bonds, a total of $68,289,600. of fixed interest bearing obligations, although it is now asked by the Bureau of Finance to say that only $19,716,040. of this grand total is entitled to preserve its superior character as debt and that $48,573,560. must be converted into stock.

How the Bureau of Finance reached the conclusion that only $19,716,040. of Income Bonds should be issued is not clear but apparently has some relation to a capitalization of the 1936 reported income after deducting fixed interest and the $500,000. capital fund.

As already noted there is nothing in Section 77 authorizing the Interstate Commerce Commission to limit or prescribe the character of the securities of the reorganized company except as expressly authorized in respect of fixed interest bearing obligations but even if such authority may be implied, it is manifestly unfair to holders of our First Mortgage Bonds to use 1936 income as a yardstick in view of the fact that the cycle of earnings is upward in transportation and nearly every other industry and in view of the further admitted fact that the construction of the Northern California Extension, a new and as yet undeveloped [449] property, has revolutionized the Debtor's earning power.[8]

---

[8] Tr. pp. 161-163; 255.

We do not overlook the argument that fifty years hence the reorganized company may be embarrassed by the maturity of this issue of Income Bonds. This, however, is not a substantial or practical reason which should be given weight as against the insistence of substantial holders of our First Mortgage Bonds that debt should be preserved as debt and not converted into a lower form of investment.

Income Bonds should be authorized up to the full principal amount of First Mortgage Bonds, $49,290,100. (or such part thereof as is not refunded in new First Mortgage Bonds) and despite the misgivings of the Bureau of Finance, we think that full interest upon these Income Bonds will be earned in 1938.[9]

295,740-3/5 shares of Preferred Stock and
300,682-1/5 shares of Common Stock.

The major vice of the Report is the proposal to wipe out all of the equity and part of the lien investment in the property of the Debtor by refusing to authorize an issue of securities thereagainst. Instead of giving to the Debtor the relief contemplated by Section 77, i.e., a stake in the future

---

[9] Note Exhibit 29, Statement No. 2, and monthly income statements subsequent to the last hearing filed under stipulation. Our estimate for 1938 is $2,929,586. The estimate for 1936 was exceeded by $242,546. Figures to date show an even greater improvement over the 1937 estimate. There is no reason whatever to doubt the integrity of the estimate for 1938.

prosperity of the property, the Bureau proposes a death sentence.

In justifying this result the Report states that the [450] debtor's forecasts of earnings are open to doubt but as one critic has well observed, "It might better have said, not subject to determination."

Property rights ought not to be taken away or titles extinguished by mere appraisals of even present values; much less by estimates of future earnings. Such a result runs counter to all of our conceptions of due process of law.

III.

The Report Errs in Construing Section 77 of the Bankruptcy Act as a Mandate or Legislative Declaration that Capitalization Shall "Not Exceed a Conservative Valuation of the Assets to Be Taken Over by the Reorganized Company."

Nowhere in the Act is there any suggestion that the Interstate Commerce Commission should undertake to reduce, limit or otherwise deal with capitalization. To read into the Act as the Bureau of Finance attempts to do in this case a requirement that capitalization "shall not exceed a conservative valuation of the assets to be taken over by the reorganized Company" is to read into the Statute a provision which it does not contain and which is alien to its express and fundamental objectives.

The real intent is to keep alive and conserve potential values by averting a foreclosure or a permanent readjustment of capital on the basis of present day values. The Commission is expressly authorized by [451] the Act to judge the future by the past in limiting fixed charges, but there is no such authorization in respect of junior securities which involve no fixed interest obligations.

Again we observe that appraisals of property values and earning power by a Bureau of the Government, however informed and impartial may be the judgment upon which such appraisals are based, cannot be accepted as a safe substitute for the traditional requirements of due process of law.

IV.

The Report Errs in Disregarding the Section 19a Value of the System Properties Amounting as of December 31, 1935, to $144,619,851.

For reasons above stated the Debtor contends that Section 77 does not authorize the Commission to fix, limit or otherwise deal with *capitalization*.

If, however, the Commission enters this field then we submit that it ought not except for the most cogent reasons and upon a clear and convincing record entirely disregard its own Section 19a valuation.[1]

Here the discrepancy between the capitalization proposed in the Report and the value placed by the Commission under Section 19a as the property in-

[1] Atlanta, Birmingham and Coast Railroad Company v. United States, 296 U. S. 33 (1935).

vestment upon which the carrier is guaranteed a fair return by the Fifth Amendment is so extreme, amount- [452] ing as it does to more than $53,000,000, as to constitute a menace to the general rate structure.

Under-capitalization may be even more serious in its repercussions than over-capitalization, and we are confident that this strategic railway bridging the territory between the Great Salt Lake and the Pacific Ocean, and occupying what is perhaps the last available route through the Sierra Nevada Mountains but also serving a new and undeveloped territory lying to the north, should not be so recapitalized as (a) to liquidate on the basis of present day depressed levels its undeterminable potential values, and (b) to set up in competition with its more prosperous neighbors a reorganized Company, which, because of excessive under-capitalization forced upon it by a governmental authority may do business profitably at less than the cost of the service.

V.

The Report Errs in Refusing to Authorize the Issue of Stock Without Par Value and in Treating No Par Value Stock at $100. Per Share in Measuring Capitalization.

In the following cases the Interstate Commerce Commission has authorized the issue of stock without par value:

New York Central Railroad Company Securities, 221 I. C. C. 269 (1937).

curities, 221 I. C. C. 269 (1937) [453]

Louisiana & Arkansas Railway Company Stock, 217 I. C. C. 208 (1936).

East Washington Railway Company Acquisition and Stock, 212 I. C. C. 516 (1936). Commissioner Porter dissenting.

Great Northern Railway Company Securities, 212 I. C. C. 327 (1936).

Missouri-Kansas Belt Railway & Terminal Company Proposed Construction, Etc., 207 I. C. C. 175 (1935).

Cook Transit Corporation Stock, 202 I. C. C. 465 (1934).

New York Central Railway Company Securities, 199 I. C. C. 546 (1934). (Stock changed from $100. par to no par value).

Ohio & Morenci Railroad Company Stock, 199 I. C. C. 7 (1933).

St. Louis & Troy Railroad Company et al. Acquisition and Construction, 189 I. C. C. 464 (1933).

San Diego & Arizona Eastern Railway Company Acquisition and Stock, 187 I. C. C. 713 (1932).

Minneapolis, Anoka & Cuyuna Range Railroad Company Stock, 170 I. C. C. 591 (1931).

Algers, Winslow & Western Railway Company Securities, 166 I. C. C. 788 (1930).

Cincinnati, Georgetown Railroad Company Acquisition and Operation, 166 I. C. C. 134 (1930). [454]

Savannah & Atlanta Railway Company Acquisition and Securities, 166 I. C. C. 119 (1930).

Delaware & Northern Railway Company Stock, 162 I. C. C. 187 (1930).

Grand Trunk Western Railroad Company Stock, 162 I. C. C. 540 (1930).

Savannah & Atlanta Railway Company Acquisition and Securities, 162 I. C. C. 771 (1930).

Seaboard Air Line Railway Company Readjustment, 158 I. C. C. 182 (1929) modified in 162 I. C. C. 267 (1930).

Stock of Castleman River Railroad Company, 158 I. C. C. 149 (1929).

Finance Application of Delaware & Hudson Company and Delaware & Hudson Railroad Corporation, 158 I. C. C. 615 (1930).

Securities of Mayo & Cook's Hammock Railroad Company, 154 I. C. C. 622 (1929).

Stock of Santa Fe, San Juan & Northern Railroad, 154 I. C. C. 741 (1929).

Securities and Acquisition of Control of Railway Express Agency, Incorporated, 150 I. C. C. 423 (1929).

Kansas City, Mexico & Orient Reorganization, 145 I. C. C. 339 (1928).

Stock of Port Angeles Western Railroad, 145 I. C. C. 144, (1928).

Chicago, Milwaukee & St. Paul Reorganization, 131 I. C. C. 673 (1928). [455]

Acquisition of Control of Seaboard Air Line Railway, 131 I. C. C. 733 (1927).

Acquisition and Operation of Fellsmere Railroad by Trans-Florida Central Railroad Company, 124 I. C. C. 366 (1927).

Reorganization and Control of Atlanta, Birmingham & Atlantic Ry. Co., 117 I. C. C. 439 (1926).

Denver & Salt Lake Reorganization, 117 I. C. C. 397 (1926); 117 I. C. C. 749 (1927).

It is respectfully submitted that the Bureau of Finance is in error in this case (a) in not resorting to stock without par value as a sound and convenient method of keeping alive for the benefit of the junior creditors and stockholders the equity in this virile and resilient property and (b) in assuming that no par value stock if resorted to must be given a substantial value for the purpose of measuring capitalization.

From the foregoing incomplete but impressive list of precedents we select the first and the last as illustrating the usefulness of stock without par value.

The case first cited is that of the New York Central Railroad Company which, with the approval of the Interstate Commerce Commission, changed its $100. par value Common Stock to no par value stock as an integral and indispensable part of a financial operation that saved one of the premier railroads of the United States.

The case last cited is that of Denver and Salt Lake Railroad Company, which was reorganized in 1926 on the basis of an issue of 50,000 shares of Common Stock [456] without par value. With the approval of the Interstate Commerce Commission the Common Stock was set up upon the books at $5,000,000, "arrived at by adjusting book values to the basis of our tentative valuation, plus additions and betterments since the date of valuation". While the Commission expressly disclaimed any responsibility for the then book value of the stock, it is interesting to note that it subsequently authorized the purchase of the no par value stock by the Denver and Rio Grande Western Railroad Company at the price of $150. per share.[2]

It is true that the unfortunate stockholders of the old Railroad Company were foreclosed and were not permitted to participate in the valuable equity that was conserved through the issue of the no par value stock of the new Railway Company but it was just such a case that Congress had in mind when it adopted Section 77 for the express purpose of relieving Debtors from the inequity of final capital adjustments on the basis of subnormal conditions.

There is no sanctity or virtue in stock having a par value or a book value of $100. As already noted the capital stock of the New York Central Railroad Company is without par value. The stock of the

---

[2] Denver & Salt Lake Railway Company Control, 170 I. C. C. 4 (1930).

Pennsylvania Railroad Company has always been a $50. par value stock and this is true of most rail carriers organized in Pennsylvania. In other fields stocks vary from no par or nominal ($1.00) par value to $10., $20., $25., $50., $100. and intermediate figures determined by the exigencies of each case.

[457]

Values change from day to day, from week to week and from year to year, and it is impossible to maintain any rational relationship between the property account and the capital stock and why therefore should the Commission try to fix a relation which almost immediately will begin to yield to the force of changing conditions.

The true course and the one plainly indicated by Section 77 is to preserve the positions of all creditors and stockholders and unless the case of the stockholder is hopeless (when he may be taken care of by purchase warrants) stock without par value should be allotted to the equity to give the equity holders a participation in any extraordinary prosperity that may develop in the future. The book value may be placed at $1.00, or as was done in the case of the Denver and Salt Lake Railway Company, may be measured somewhat in relation to the 19a value of the System properties plus additions and betterments to the date of reorganization.[3]

---

[3] 117 I. C. C. at page 406.

VI.

The Report Errs in Providing for the Expropriation of the Collateral or the Debtor's Interest in the Property Represented by the Collateral Securing the Debtor's Notes Held by Reconstruction Finance Corporation, the A. C. James Co. and the Railroad Credit Corporation.

Equity abhors a forfeiture.

So it is that properties are not foreclosed and property rights not forfeited without, [458]

(a) a reasonable nisi period within which the debtor may pay, and

(b) an opportunity to bid at a public sale, and

(c) a reasonable period thereafter within which to redeem.

The Report cuts off all of these rights by giving outright the collateral to the pledgees after first converting it into capital stock of the reorganized Company.

Such a procedure was not contemplated by Section 77 which, whatever may be its defects, was mindful of the solicitude of equity for redemption rights and in connection with a sale of property stipulates that it shall be "at not less than a fair upset price".

Here, however, all equity of the junior interests in $18,999,500. of General and Refunding Bonds and other collateral securing the Notes held by Reconstruction Finance Corporation, A. C. James Co. and The Railroad Credit Corporation, is proposed to be wiped out without sale or upset price or right

of redemption. This we submit is contrary to the requirement of Section 77, the usages of equity and the established principles of due process of law.

Whatever Plan is ultimately adopted for the Debtor we submit that the secured Notes should be converted into some form of collateral note issue that will give effect to their present collateral position but will nevertheless afford the Debtor an opportunity to work out the problem over a period of years. The idea of giving Reconstruction Finance Corporation more, and the A. C. James Company less, than the face of their re- [459] spective claims cannot be justified by Section 77 or by the law of the land regarding the participation of creditors—especially since both the A. C. James Co. and The Railroad Credit Corporation have special or cross equities in the collateral held by Reconstruction Finance Corporation.

VII.

The Report Errs in Assuming That the Public Interest Involves Matters Lying Beyond the Field of Transportation and Includes the Amount of Interest Charges Which Are Not Fixed Obligations to Pay But Are Payable Only Out of Available Income; Sound Financing; Financing Through Junior Obligations and Other Phases of Controversial Economics.

Subsection (d) of Section 77 expressly provides that the Interstate Commerce Commission may

> "render a report and order in which it shall approve a Plan which may be different from any Plan which has been proposed."

Literally construed this provision may be deemed to authorize the Commission to write its own Plan for any carrier and give effect to any views it may have on any features even though inherently controversial in their nature.

But when we consider that the objects of the Statute are the relief of debtors and, as pointed out by Mr. Justice Sutherland in his opinion in the Rock Island [460] case, a prompt reorganization of the property and its release from the Courts, the inevitable conclusion is that the Interstate Commerce Commission was expected to adhere somewhat closely to the trail blazed by the Act; that it was to concern itself primarily with the points that touch the public interest.

Of course, a determination of the permissible fixed charge is of prime importance and is to be dealt with by the Commission on the basis of a statutory formula. The only other requirement is that the Plan shall be in the public interest, which gives no new or extraordinary jurisdiction to the Commission but merely reasserts a jurisdiction that it has exercised in the authorization of securities ever since the enactment of the Transportation Act, 1920.[4] Here the public interest has always been understood to lie in the encouragement of an inflow of private capital that will insure an adequate transportation service.[5]

---

[4] Transportation Act, 1920, Sec. 20a.

[5] Dayton-Goose Creek Railway Company v. U. S., 263 U. S. 456.

VIII.

The Report Errs in Proposing a Finding That the Equity of the Preferred and Common Stockholders of the Debtor Has No Value.

The Report finds the single sum value of the System properties as of December 31, 1935, to be $144,619,851, on which date the indebtedness of the Company, exclusive of claims for interest, amounted to only $69,071,271. Accrued interest was then less than $6,461,469., so that [461] the total debt ahead of the stock was only $75,450,640.[6] There was, therefore, an equity of more than $69,169,211. represented by the Debtor's stock on the basis of the Commission's own valuation under Section 19a.

Although, as we have already pointed out, the Section 19a valuation may not be a criterion of value except as it fixes the amount upon which the carrier is given a constitutional right to a fair return, it is, nevertheless, made *prima facie* evidence and ought not to be cast aside to permit equities to be taken away on mere estimates and speculative forecasts.

Estimates were submitted by the Debtor which show a 4% on $100,000,000. in 1940.[7] This was part of an estimate for a five year period of which one and one-half years have already elapsed during which elapsed period the actual results have greatly exceeded the estimates. Moreover, these estimates were prepared solely for the purpose of showing that $1,027,031. would be a conservative fixed charge and not for the purpose of placing a limit of $4,000,-

000, on the earning power of the property in 1940 or in any other period. When the estimates were made the Northern California Extension had barely emerged from the construction stage and there was no basis for a true appraisal of its earning power. Subsequent earnings show that the value of the north and south line, which opens up a new channel of trade between the Pacific Northwest and the System lying to the South and the East of the lines of the Debtor, was [462] greatly understated.[5] Should there be any disposition on the part of the Commission to make a finding that extinguishes nearly $70,000,000. of property represented by the Commission's own 19a value; then we ask that this case be set for further hearing to enable the Debtor to meet an issue that it had never conceived it could be called upon to meet in this case—the issue of confiscation.

IX.

The Report Errs in Failing to Find That the Debtor's Plan Is Fair and Equitable and Otherwise Complies With the Provisions of Section 77 and Is Compatible With the Public Interest.

The Commission will recall the classic case of a Czar of all the Russias who indicated the route of a railroad between St. Petersburg and Moscow by a straight line ruled on a map between these ill-fated cities.

The railroad was not built on the Czar's route. Barriers erected by nature may not have been insuperable but there were the vested moral rights of communities long established in territories tributary to the more natural lines of communication.

It is just as impracticable to attempt to reorganize rail carriers by "straight-line" methods and, as we have already pointed out such does not seem to be the underlying scheme and purpose of Section 77.

[463]

The most practicable approach to a reorganization must be along the normal line of least resistance and we shall now undertake briefly to show that the Plan promising the most hope (if not the only hope) of early accomplishment is the Debtor's modified Plan as summarized in the Report but with further modifications to meet certain views of the Bureau of Finance.

We submit, therefore, that the Report errs in failing at least to approve the basic principles of the Debtor's Plan.

It is to be here noted that the Debtor's original Plan was the Plan developed by leading members of the group representing First Mortgage Bondholders and in spite of their subsequent tactical defection we still think that a reorganization closely following the Debtor's Plan will command the support of sufficient First Mortgage Bonds to assure its success.[9]

We shall therefore discuss in detail what we think would be an acceptable capital structure for the reorganized Company.

$2,048,190. Equipment Trust Obligations and Baldwin Lease.

The assumption of these obligations by the reorganized Company is approved by all parties, is recommended by the Report; and no doubt will be acceptable to the Interstate Commerce Commission.

$10,000,000.-$19,858,000. 30 Year First Mortgage 4% Bonds.

The report limits the present issue of First Mortgage Bonds to $10,000,000., the amount required for new money, and makes no allotment of new First [464] Mortgage Bonds to the holders of $49,290,100. of the Debtor's present First Mortgage Bonds. The Debtor proposed that they be allotted 30% of their principal in new First Mortgage Bonds, involving a

---

[9] Ex. 2—Outline Plan annexed to minutes of June 27, 1935. The background of the Debtor's Plan is shown at pages 4-9 of its Brief filed below.

fixed charge of only $1,027,036, a reduction of approximately 66⅔%.

We have already stated the reasons why we think such a fixed charge is permissible and if the Commission also finds it permissible then 30% in new First Mortgage Bonds might properly be given the present holders of First Mortgage Bonds as an inducement to accept the composition. Inasmuch, however, as the Committee representing substantial holders of First Mortgage Bonds has itself proposed 20%, we think this ultra conservative allotment may prove a satisfactory compromise and ask that the Plan, as approved and reported by the Commission, provide for $19,858,000. of First Mortgage Bonds, of which $10,000,000. shall be for new money (or retirement of Trustees' Certificates) and $9,858,000. for allotment to holders of $49,290,100. of presently outstanding First Mortgage Bonds.

$49,290,100.-$39,432,100. 50 Year Income Mortgage 4% Bonds.

The Report limits the issue of Income Bonds to $19,716,140. and relegates the present First Mortgage Bondholders to a stock position in respect of approximately 60% of their principal debt. This, as we have already pointed out, is unduly harsh to the First Mortgage Bondholders, is required by no factor of public interest and tends to defeat a composition. Without repeating more of the prior discussion on this subject, we submit that a practicable Plan calls most [465] imperatively for the preserva-

tion of existing senior debt *as debt* and not as a mere equity and that $39,432,100. of Income Bonds should be issued to holders of present First Mortgage Bonds, unless the Commission rejects our proposal to issue them 20% in new First Mortgage Bonds, in which event they should be given $49,290,100. in Income Bonds, upon which they may reasonably expect a *full* return from the effective date of reorganization.

$10,487,707. of 15 Year Collateral Income Notes.

Our more mature consideration of this reorganization in the light of the arguments of counsel and the discussions in the report leads us to the conclusion that a Collateral Note issue is the solution of the problem growing out of the present secured notes—a new issue of 15 Year Income Notes to be secured by $18,999,500. of Prior Lien 4% Preferred Stock. The Collateral Notes should be in three series equally secured by the pledged collateral, Series A to be allotted to Reconstruction Finance Corporation, Series B to Railroad Credit Corporation, and Series C to A. C. James Co., with appropriate preference in the payment of interest to give recognition to their comparative collateral positions. Amortization should be provided on a sound basis.

$9,503,664. of 4% Participating Preferred Stock for accrued interest to date of Reorganization.

There is a serious question whether *any* interest subsequent to the filing of the Petition under Sec-

---

[1] Sexton v. Lloyd's Bank, Ltd., supra.

tion 77 is entitled to recognition.' It would be a liberal compromise of this [466] highly litigious issue to offer full interest up to the date of reorganization in a 4% Participating Preferred Stock ($100. par value) consisting of 95,036 64/100ths shares amounting to $9,503,664.

$7,188,607. of 4% Convertible Preferred Stock for unsecured indebtedness.

To avoid any question as to the right of the unsecured creditors to a complete priority over the holders of the Debtor's Stock, the medium of settlement should be a 4% Convertible Preferred Stock ($100. par value) junior to the Participating Preferred Stock issued in adjustment of claims for interest. We therefore propose that such Convertible Preferred Stock be issued at par to The Western Pacific Railroad Corporation and Western Realty Company in settlement of their unsecured indebtedness.

300,000 shares of No Par Value Common Stock.

The revised Plan of the Debtor proposes the issue of 300,000 shares of no par value stock.

We respectfully submit that this number of shares should be issued to The Western Pacific Railroad Corporation as sole holder of the Debtor's capital stock—the entire issue to be taken up upon the books at a valuation of $1.00. If, as is indicated by the Report there is doubt as to its value, it will conform to sound accounting principles to enter the entire issue on the books at a valuation of $1.00. *The public will*

then be advised that the Common Stock is accorded no present day value but represents (a) voting power and, (b) the right to participate in possible future prosperity. [467]

Assuming that the no par value stock is given a book value of $1.00., the foregoing adjustments would provide the reorganized Company with the following simple, sound, financial structure:

Equipment Trust Obligations and Baldwin Locomotive Lease	$ 2,048,190.
First Mortgage 30 Year 4% Bonds	19,858,000.
Income Mortgage 50 Year 4% Bonds	39,432,100.
Collateral Income Notes	10,487,707.
4% Participating Preferred Stock	9,503,664.
4% Convertible Preferred Stock	7,188,607.
Common Stock (Book Value)	1.
Total	$88,518,269.

If, however, there is objection on the part of the Interstate Commerce Commission to a nominal value being placed upon no par value stock, then we suggest (but without waiving our contention that such a policy is wrong in principle and tends to destroy the usefulness of Section 77) that the proposed no par value stock be entered on the books at a substantial value. If this stock is entered at a value of $100. a share, it will bring the total capital up to only $118,518,269., which is an amount upon which a return may be earned in the immediate future but nevertheless is $25,101,582. below the Commission's Section 19a valuation. If it is placed on the books at a valuation of $50.00 a share, which is the present par value of the stocks of The

Pennsylvania Railroad Company and many other railroad companies, the total capitalization will be $103,518,269, or $40,191,582. less than the Commission's Section 19a valuation. If this is done the Plan "will conform to the requirements of the law of the land regarding the participation of various creditors [468] and stockholders", all of whom will be taken care of on a fair and equitable basis and should command sufficient support to make practicable the composition contemplated by Section 77.

Even in the days of ruthless mortgage foreclosures the stockholder was permitted to pay an assessment and stay in the situation. Section77, like the Frazier-Lemke Act, the Home Loan Act, the various State enactments providing for suspension of foreclosure remedies, and a great mass of legislation, Federal and State, which came in the wake of the depression, was all for the protection and relief of the debtor and not for the aid of the creditors and we submit with all deference to the Bureau of Finance that the Commission should recognize this as the true spirit of Section 77.

Oral argument is hereby requested.

Respectfully submitted,

FRANK C. NICODEMUS, JR.,
Counsel, the Western Pacific
Railroad Company.
15 Broad Street,
New York City.

Dated: September 27, 1937. [469]

APPENDIX*

The high function of the Interstate Commerce Commission is to approve a plan of reorganization compatible with the public interest designed to command the support of the percentages of each class of creditors and stockholders necessary to make a binding composition under Section 77 of the Bankruptcy Act which contemplates the relief and not the elimination of the debtor.

In Continental Illinois Bank and Trust Company v. Chicago, Rock Island and Pacific Railway Company, 294 U. S. 648, the Supreme Court, referring to the original Section 77, said:

> "As outlined by that Section, a Plan of Reorganization, when confirmed, cannot be distinguished in principle from the composition with creditors authorized by the Act of 1867, as amended by the Act of 1874."

In the body of Section 73 of the Bankruptcy Act Congress declared that it was enacting Section 77 for the "relief of debtors." This unusual expressed declaration of the purpose of the Act was the most

* This Appendix is a Section of the brief now being prepared by Frank C. Nicodemus, Jr. and William V. Hodges, as counsel for The Denver and Rio Grande Western Railroad Company, for filing in Finance Docket No. 11002 on October 1, 1937 and although subject to possible revision is here included in its original form for advance consideration by the Interstate Commerce Commission.

that Congress could do to prevent the defeat of its purpose and the avoidance of its objective in the course of administration through the interpretation and con- [470] struction of any other language that might be found in the Act.

The plight of a railroad debtor under the applicable rules of law and equity as they existed before the enactment of Section 77 was that its creditors could take its property at a present-day depressed market value, determined by judicial sale and strip the Debtor of all value and interest not presently realizable on liquidation. If under Section 77 it is given similar treatment, its "loaf of bread" becomes a stone. It is twice mocked if, while relying upon Section 77, there is added to the creditor threat the political threat that its property is to be confiscated.

The relief which Congress offers the Debtor under Section 77 is predicated on the constitutional right of Congress to provide for *composition* under the bankruptcy power. Unless in its enactment Congress was evincing the lowest of legislative morals, it should not be contended that a law which depends for its life on the fact that it is an assertion of the constitutional power to authorize composition, really provides for the treatment of creditors or debtors in a manner repugnant to the principles of composition.

Long before Section 77 became law, men negotiated railroad reorganizations and sought the aid of

courts of equity to carry out their reorganization plans. Minorities had an effective power of obstruction, because they had in equity remedies which do not exist under composition principles.

Under equity practice much has been said by the courts about what is "fair and equitable" in a re-

[471]

organization plan, which had to be said in the light of rights and remedies there under consideration. Much that has been so said has no application under Section 77, which contemplates the alteration of rights and a modification of remedies (Section 77 (b)).

One approach to the defeat of the declared intent and purpose of Section 77 is to insist on the application to the situation of the parties under that Act of all the language used by the courts in the discussion of what is "fair and equitable," but used with reference to the old rights and remedies.

The Debtor is familiar with the cases that are repeatedly cited on this question, and knows that they have been called to the attention of the Interstate Commerce Commission in many of the pending railroad reorganization cases. The Debtor is also familiar with the fact, not so often adverted to, that in the *Kansas City Terminal Railway* case (271 U. S. 445) the Supreme Court, attached qualifications to the test of "priority for priority," which is at the bottom of the other legalistic tests which are sometimes sought to be used as absolute measures of what is "fair and equitable" in a

corporate reorganization plan. All such tests are subject to qualification by the weight of a multitude of possible circumstances, so many circumstances that no rule for a test is so clear that it bars the way to a full consideration and weighing of all facts which bear upon the present-day value to the creditor of his existing claim and the value to him of what is offered in exchange.

Another road to the defeat in practice of the declared purpose of the Act would be to attempt under it [472] to exercise the power to extinguish anyone's interest in the Debtor's assets through administrative or judicial appraisement except in accordance with the principles of composition. Such a step would raise constitutional questions so serious that no self-respecting citizen would submit without exhausting his right of appeal to the highest authority.

Another course which leads beyond the safe boundaries of administrative and judicial jurisdiction under the Act would be the attempt to force upon any class of creditors or stockholders an adjustment in new securities to which the requisite majority of the interested class could not be expected within reason to give assent.

There are some who seek to locate the extreme boundaries of that jurisdiction beyond the constitutional danger point. It seems to the Debtor that it is much better to try through a practical course to make the Act useful and not jeopardize its usefulness by crowding beyond safe boundaries into areas of dubious power.

Before Section 77, when men representing various interests in a railroad property sought to reorganize and not dismember the property, they met around a table to agree upon a reorganization plan. Their first step was to engage in that field of business discussion and judgment where the real and important problems of give and take were solved. They functioned as reasonable and informed businessmen, each presumably intent on a "fair and equitable" adjustment of interests. Those judgments were far and away the most important steps in the process of arriving at a new [473] plan.

Their test of "fair and equitable," used in that area of discussion, was a business test. If the result of their efforts received the approval of a majority in interest of free and independent security holders, it was the best proof of the fairness of their efforts. Dissenting minorities could defeat those efforts by the application of legalistic tests of "fair and equitable"—quite different tests. Those tests were blocking the needed rehabilitation of railroad properties, and Congress substituted composition tests under bankruptcy powers.

Under the statute, that field of business judgment is now occupied by the Interstate Commerce Commission. If formerly aggressive selfishness tainted the formulations of reorganization plans, it is now eliminated. Furthermore, within the limits of Section 77, the Interstate Commerce Commission can see to it that any reorganization plans at birth conform to the public interest.

As intended by the Act, the Debtor has attempted to cooperate in a composition proposal to be made to all parties in interest under the ægis of Interstate Commerce Commission approval. Until the Interstate Commerce Commission shall have proposed a Plan, the attitude of any class of security holders cannot be assumed. Fractions of various classes of creditors are represented before the Commission, but there is no one present to give an affirmative answer for the requisite majority, or a negative answer for a requisite minority. The Commission can and should do what could and should be done by reasonable and fair-minded men, representing the various interests in the Debtor's property toward evolving a Plan. [474]

The hope of the statute is that, in the first instance, the Commission can do the thing that reasonable men have been continually doing through this depression looking to the readjustment of debtor and creditor relations in all business areas.

If either through insistence on some assumed rights of creditors or because of some view of the public interest it is suggested that the Debtor be stripped, such a suggestion will be contrary to the purpose of the statute. If the existing priorities of interest in the property are not reasonably recognized, it will be contrary to the statute. But such priorities are not sanctified.

The decisions of the Federal Courts under the composition provisions of bankruptcy statutes hold

that an offer to creditors of a consideration equivalent to the present-day liquidating value of the Debtor's assets, leaving to the Debtor the hope of realization out of the unestimateable residue of value, is the proper basis for composition.

Cumberland Glass Co. v. DeWitt, 237 U. S. 447.

Nassau Smelting & Refining Works, Ltd. v. Brightwood Bronze Foundry Company, 265 U. S. 269.

In re Waynesboro Drug Co., 157 Fed. 101.

In re H. J. Arrington Co., 113 Fed. 498.

In re Realty Associates Securities Corp., 6 Fed. Supp. 549; 295 U. S. 295.

In the instant case the Debtor has suggested that creditors receive securities which represent not only any maximum appraisal of the present-day liquidating [475] value of the assets, but also a share in the future expectations of the property, which if realized will then give to the creditors a prior right to all the earnings that they would receive were the present-day securities to stand under a moratorium until that earning power is again reached.

As for the relief which Section 77 promises the Debtor, the Debtor suggests that it receive the common stock representing the residue of those values that cannot be estimated or liquidated today, and which the railroad as a going concern under present management and relationships has a promise of

realizing through the growth and development of the empire served by the Denver and Salt Lake Railroad, the development of business which must inevitably follow from the construction of the Cut-off and from the great expenditures for the betterment of the old lines made prior to the depression and being currently made by the Trustees.

The various classes of creditors and the stockholders of the Debtor, instead of locking horns at the threshold over problems of ultimate right, can, we submit, better serve the interests of all by endeavoring through the mechanics provided in Section 77 to reach a fair composition.

When the Plan goes to the Court it will be tested for conformity to composition principles and constitutional limitations. Unless there is an attempt to ignore composition principles or an attempt to confiscate the interests of some class of security or shareholders in the property, no constitutional objections need be expected.

AUTHORITIES

Pomeroy's Equity Jurisprudence, 4th ed., §167	11	502

EXCEPTIONS

Irving Trust Company, as Trustee under General and Refunding Mortgage of The Western Pacific Railroad Company, dated as of January 1, 1932 (hereinafter termed the General Mortgage), hereby makes and presents the following exceptions to the Report proposed by the Bureau of Finance:

I. The Report errs in recommending (p. 51) that the Commission consider, for the purposes of a plan of reorganization, that the equipment covered by leases, conditional sale agreements or equipment trust agreements is subject to the lien of the First Mortgage in priority to the General Mortgage.

II. The Report errs in recommending (p. 50) that the Commission conclude that, in determining the equitability of plans of reorganization for the debtor, the lien of the General Mortgage on the Northern California extension and various branches and spurs in question is subject to the lien of the entire First Mortgage. [481]

III. The Report errs in recommending (p. 51) that the Commission also consider that the property characterized as non-carrier real estate, which was owned by the predecessor of the debtor, is covered by the First Mortgage in priority to the General Mortgage; and errs in not recommending that non-carrier real estate acquired after the date of the First Mortgage be considered by the Commission to be free from the lien thereof.

IV. The Report errs in its conclusion (p. 52)

that the creditors with whom are pledged General Mortgage bonds are not entitled to the same treatment as First Mortgage bondholders.

V. The Report errs in its conclusion (p. 56) that the provision made in the recommended plan for the participation of one of the unsecured creditors would not discriminate against either the First Mortgage bondholders or the General Mortgage bondholders.

VI. The Report errs in not recognizing that the creditors secured by the General Mortgage bonds are entitled to the benefit of the interest accrued on said bonds; and discriminates unfairly against such creditors in that the Report does recognize (p. 53) accrued interest upon the First Mortgage bonds.

VII. The plan recommended by the Report is unfair and inequitable to the holders of General Mortgage bonds and is contrary to the law of the land and the provisions of Section 77. [482]

BRIEF

With a view to avoiding duplication, the General Mortgage Trustee confines this brief to the questions relating to relative priority of liens between the General Mortgage and the First Mortgage. Other questions which are raised by the Report, and which are of general interest to the security holders, such as the particulars of the securities to be issued, the power of the Commission to reduce the valuation of

the Debtor's property so drastically below the valuations made by the Commission for rate-making purposes, or the propriety of its action in so doing, are left for treatment by the interested parties.

I.

The Report errs in recommending that the Commission consider, for the purposes of a Plan of Reorganization, that the equipment covered by leases, conditional sale agreements or equipment trust agreements is subject to the lien of the First Mortgage in priority to the General Mortgage.

In this respect the Report is most clearly and manifestly in error for the following reasons:

1. The First Mortgage expressly excepts such equipment unless acquired by the use of First Mortgage bonds or cash (First Mortgage, Exhibit 5, pp. 17, 21, 22); and the record shows that no First Mortgage bonds or cash were used in the acquisition of this equipment (see our brief dated January 11, 1937—hereinafter termed our original brief, p. 48). [483]

2. The First Mortgage omits the provision contained in the General Mortgage to the effect that when and as the Railroad Company acquires an equity in such equipment the equity becomes subject to the General Mortgage (see our original brief, pp. 50-51).

3. The Listing Application of December 21, 1931 (Exhibit 112), specifically states that such equip-

ment is not subject to the lien of the First Mortgage (see our original brief, p. 46).

4. The Report is directly contrary to the conclusions reached in the memorandum opinion of Circuit Judge Sanborn in The Equitable Trust Company of New York, Trustee v. The Wabash Railroad Company, et al., U. S. District Court, Eastern District of Missouri, In Equity No. 3977; opinion filed November 7, 1921 (see our original brief, p. 52).

Our argument in respect of this equipment is set forth under Point III of our original brief, the general principles of construction being set forth under the heading "General" at pages 12-24. Specific comment appears to be required, however, in respect of the language in the First Mortgage, with reference to which the Report states as follows (p. 51):

> "The latter paragraph reads as follows:
>
> 'Subject, however, as to all equipment now owned to the equipment trust or conditional sale agreements secured thereon, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby * * *'
>
> If all equipment acquired under equipment trusts was to be entirely free of the lien of the first mortgage, it is not understood why the words [484] 'equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby' were made part of

the last quoted provision. The Commission should consider, for the purposes of a plan of reorganization, that since the equipment in question was acquired for use, and was actually used, on the mortgage *lines*, the debtor's equity in that equipment is subject to the lien of the first mortgage."

The extract above quoted from the Report contains a typographical error in that it omits the language upon which the conclusion of the Report is based. The above-quoted language refers only to equipment "now owned", but the mortgage itself refers also to equipment "hereafter acquired". The correct language of the First Mortgage (Exhibit 5) is as follows (p. 22):

> "Subject, however, as to all equipment now owned to the equipment trust or conditional sale agreements secured thereon and, as to equipment hereafter acquired, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby, and as to any property hereafter acquired by the Company or by any successor or purchasing corporation and becoming subject to the lien of this indenture, to any liens thereon existing at the time of such acquisition and not expressly prohibited by the terms of this indenture."

The Report does not quote the specific exception in the granting clauses of equipment acquired under lease, conditional sale or equipment trust (Exhibit

5, p. 22), nor is the exception mentioned in the summary of the First Mortgage contained in the Report (p. 49).

If the last-quoted provision were necessarily inconsistent with the immediately preceding and plain lan- [485] guage (see Exhibit 5, p. 22) specifically excluding such equipment from the mortgage (unless acquired by First Mortgage bonds or cash), the last-quoted provision would have to give way. It is not contained in the granting clauses proper but only in the "Subject, However", provision which follows the descriptions of the property granted. The Report erroneously permits the "Subject, However," clause to override the clear and controlling language of the granting clauses.

American S. S. Co. v. Wickwire Spencer Steel Co., 42 F. (2d) 886, 893-94, aff'd 49 F. (2d) 766;

Hernickell v. Omaha Water Co., 146 App. Div. (N. Y.) 693, 699;

McKay v. Howard, 6 Ont. 135, 137.

However, the language is not inconsistent. It is plain that the "Subject, However", clause with reference to thereafter-acquired equipment refers only to the possibility that equity in equipment, subject to equipment trust or conditional sale agreements, might be acquired by the use of First Mortgage bonds or moneys—in which case it might come under the First Mortgage by virtue of the provisions relating to the use of First Mortgage bonds or cash.

The First Mortgage (Exhibit 5) permits the use of First Mortgage bonds or cash for the acquisition of equipment (Article Second, Section 2, subsection A, clause (b), p. 41).

The documents required to be furnished as a basis for delivery of such bonds or cash are required to state (Exhibit 5, pp. 46-48) among other things whether the property acquired "is, or upon its acquisition will [486] become, subject to any lien or charge (within the meaning of the terms 'lien' and 'charge' as defined in subsection G of this Section 2) * * *; and, if so, such certificate shall briefly describe such liens and charges and state the amount and character of indebtedness secured thereby, the due date thereof, the date of and parties to any indenture securing the same, and other particulars with respect thereto, and that sufficient First Mortgage Bonds or deposited cash remain available for reservation against such liens or charges as provided in subsection E of this Section 2."

Subsection E (pp. 57-58) provides for the reservation of bonds or cash equal to the amount of the "lien" or "charge" to which the acquired property is subject.

Subsection G (p. 60) then provides: "The words 'lien' and 'charge', as used in this Section 2, shall be deemed to include, among other things, deferred instalments of the purchase price of property in every case where title thereto has not then vested in the purchaser or, having so vested, is subject to a vendor's lien or any right of the seller to retake

or enforce a charge upon such property upon default in the payment of such deferred instalments of the purchase price and *also the deferred payments to be made or rentals to be paid under any conditional sale agreement or lease or trust agreement covering equipment.*" (Italics supplied.)

It thus appears that the Report is completely in error in the vital conclusion that the equipment in question is subject to the First Mortgage because the "Subject, However" clause mentions a *particular species* of after-acquired property as covered by the mortgage although subject to equipment trust or conditional sale agreements to which the same shall be subject "*as permitted hereby*". The above quoted provisions from the [487] First Mortgage show that equipment is "permitted" to be subject to such agreements if First Mortgage bonds or cash are reserved in an amount equal to any such "lien" or "charge". The Report completely distorts the meaning of this limited provision in the "Subject, However" clause and permits it to destroy the clearly expressed intent of the mortgage that such after-acquired equipment shall not be covered thereby unless acquired by the use of First Mortgage bonds or cash.

In the present case, if First Mortgage bonds or moneys had been used to acquire the equity in question there would be presented a different question; but since it is clearly shown by the record (see our original brief, p. 48) that no First Mortgage bonds or moneys were used in the acquisition of the

equipment which we are considering, the question is not complicated; and we are left with a case coming indisputably within the specific mortgage provision that equipment acquired by "lease, conditional sale agreement or under any form of equipment trust" shall be "free from the lien hereof" "unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same* * *," (First Mortgage, Exhibit 5, p. 22).

[488]

II.

The Report errs in recommending that the Commission conclude that, in determining the equitability of Plans of Reorganization for the debtor, the lien of the General Mortgage on the Northern California extension and various branches and spurs in question is subject to the lien of the entire First Mortgage.

This recommendation is based upon a construction of the language of the First Mortgage as providing (Report, p. 49) that "the lien of the first mortgage attaches to after-acquired extensions if the purchase, acquisition or construction thereof, or any work thereon, be financed *in any part* with first mortgage bonds or cash deposited under that mortgage". (Italics added.)

Even this principle would not apply to the miscellaneous branches, aggregating some twenty-three miles, which were mentioned at pages 56 and 57 of

our original brief, nor to the certain tracks and spurs discussed in Point V of our original brief.

The Report is also in error in its statements concerning the execution of the General Mortgage, with reference to the lien on the Northern California Extension, and particularly in the statement (Report, p. 50) that "the general and refunding mortgage was not executed and delivered until several months after the completion of the extension." In fact the General Mortgage was executed and delivered on February 29, 1932 (Exhibit 6 p. 188), whereas the Northern California Extension was not completed for full operation until June 1, 1932, or later (Exhibit 56, p. 7), after further expenditures of [489] money obtained by the pledge of General Mortgage bonds (Exhibit 50, pp. 3-4; and see pp. 32-33 of our original brief).

A more far reaching objection to the conclusion which the Report recommends is that the language on which it relies does not support the proposed conclusion which is reached. The Report refers (p. 49) to subdivision marked Third (a) of the granting clause in the First Mortgage (Exhibit 5, p. 17), which covers after-acquired property and extensions if (1) they are "acquired or constructed by the use of First Mortgage Bonds or proceeds thereof or cash deposited hereunder," or if (2) "*on account of* the purchase, acquisition or construction thereof or work thereon, First Mortgage Bonds shall hereafter be authenticated and delivered or the proceeds of First Mortgage Bonds or other cash deposited here-

under shall hereafter be paid out under any of the provisions of this indenture."

The alternatives which the last quoted paragraph contemplates are either (1) the use of First Mortgage bonds or cash originally for the acquisition or construction of the property, or (2) their use as reimbursement for the cost of acquisition or construction. The words "on account" are not inserted in a manner to connote payments of only a part of the cost of construction, as the Report infers, or to indicate an intention to confer a complete lien in return for partial advances from First Mortgage funds, but rather serve to distinguish payments in reimbursement from original payments in anticipation of the acquisition or construction of new property.

If the meaning of the language quoted be regarded as open to any doubt, it should be resolved by a reasonable and equitable construction. In order to [490] demonstrate the inequity and practical absurdity of a construction which confers a first lien for the entire First Mortgage if *any* First Mortgage money is used, it is only necessary to suppose that the Railroad Company had acquired the Northern California extension at a cost of $10,000,000 and had financed such acquisition to the extent of $5,000 by means of First Mortgage bonds or cash. No court of equity would ever construe the mortgage so as to give to it a prior lien upon the extension beyond the amount of First Mortgage bonds and cash expended thereon.

The enforcement of a mortgage as against after-acquired property is wholly a matter of equity. (Guaranty Trust Co. v. New York & Queens County Railway Co., 253 N. Y. 190, 199; Hodder v. Kentucky & Great Eastern Railway Co., 7 Fed. 793, 799, aff'd sub nom. Wright v. Kentucky & Great Eastern Railway Co., 117 U. S. 72; Moulder Holcomb Co. v. Glasgow Cooperage Co., 173 Ky. 519, 522; Pomeroy's Equity Jurisprudence, Fourth Edition, Section 167.) Courts of equity apply the rule of strict construction to after-acquired property clauses in a mortgage and will not bring property within their purview unless the language imperatively demands. (See Cleveland Trust Co. v. Consolidated Gas, E. L. & P. Co., 55 F. (2nd) 211, 214, and other cases cited at pages 12-13 of our original brief.)

There can be no dividing line depending upon the amount of the expenditure. If the conclusion in the Report is correct, the same principle would necessarily control, no matter how trivial the expenditure, and how valuable the property, might be.

It is worthy of note also that (as is pointed out in our original brief, at pp. 35-37) it was never represented to the First Mortgage bondholders that their mortgage [491] would constitute an exclusive first lien upon the entire extension.

An equitable result would be reached by recognizing the prior lien of the First Mortgage to the extent of expenditures made from such bonds or cash, but only to such extent. The situation is very similar

in its equities to those which arose in the case of Citizens' Savings & Trust Co. v. Cincinnati & Dayton Traction Co., 106 Ohio St. 577 (referred to in our original brief, at pp. 43-44). In that case it might have been held that the mortgage which was the earliest in date attached to the new power plant and that inasmuch as such mortgage was the earliest in date, it became the prior lien upon the entire new plant. Such a result, however, would have been inequitable, and the court worked out a manifestly fair and proper result by allowing to the earliest mortgage only its pro-rata lien. Similarly, in the present case, while no one would suggest that the First Mortgage lien should be cut down below the amount of expenditures, it would be equally inequitable to conclude that the entire First Mortgage lien attaches to this $10,000,000 extension by virtue of the expenditure of less than $5,000,000 thereupon. The only way by which the First Mortgage language in question can be so construed as to avoid gross unfairness is to construe it as meaning that the First Mortgage is the prior lien upon after-acquired property to the extent only of the First Mortgage bonds and cash used thereon.

Our arguments with respect to these properties are more fully set forth under Points II, IV, and V of our original brief. In the interest of economy of space, we refrain from repeating them here. [492]

III

The Report errs in recommending that the Commission also consider that the property characterized as non-carrier real estate, which was owned by the predecessor of the debtor, is covered by the First Mortgage in priority to the General Mortgage; and errs in not recommending that non-carrier real estate acquired after the date of the First Mortgage be considered by the Commission to be free from the lien thereof.

In Point VI of our original brief, we urged to the Commission that specific property not subject to the lien of the First Mortgage included, among other things, (1) non-carrier property owned at the date of the First Mortgage (brief pp. 62, 63) and (2) subsequent additions to non-carrier property (brief pp. 63-69).

The Report mentions only the non-carrier property originally owned and recommends (p. 51), with respect to this, that the Commission conclude that such property is subject to the lien of the First Mortgage. This recommendation is stated to be based on the language of the First Mortgage, which the Report construes as not limited to railway property by the description of the First Mortgage bonds in the 1916 reorganization plan pursuant to which they were issued. That plan described the bonds as being secured by the "*existing railway properties*" (Rec. 584). Such a plan constituted a contract with the stockholders of the new Company

as well as with the new bondholders (see our original brief, pp. 67-68), entitling them to consider that non-railway property would not be subject to the new First Mortgage. [493]

This Trustee, however, did not cite the 1916 plan solely for its contractual effect in limiting the lien of the First Mortgage, but as confirming the principle of legal interpretation that non-carrier real estate is not included in the security for a railroad mortgage unless specifically described, even though owned at the time the mortgage was created (see our original brief, pp. 65-69).

After-acquired non-carrier real estate is clearly free from the First Mortgage.

No argument in the Report, or in the Brief of the First Mortgage Trustees dated January 9, 1937, undertakes to justify extending the lien of the First Mortgage to after-acquired non-carrier property which was not financed by First Mortgage bonds or funds.

An analysis of Exhibit 114, and of Point VI of our original brief shows that the real estate owned prior to 1916 and now claimed by the First Mortgage Trustees amounted to $2,165,615.48, book value; and that subsequently acquired non-carrier real estate, not financed under the First Mortgage, has a present book value of $1,262,308.32. This represents a substantial item which must be recognized as free from the First Mortgage even if the proposed Report be sound in respect of non-carrier property

owned prior to 1916. No language in the First Mortgage will permit even a plausible argument that this property is covered by it. The existence of this substantial amount of real property not subject to the First Mortgage is particularly important in its bearing on the statement on page 52 of the proposed Report that the First Mortgage "should be considered as having a first lien on practically all the assets of the [494] debtor". That statement is in error even if the specific recommendations of the Report already discussed herein were sound.

IV

The Report errs in its conclusion that the creditors with whom are pledged General Mortgage bonds are not entitled to the same treatment as First Mortgage bondholders.

Under the plan recommended in the proposed Report (p. 53), the existing First Mortgage bondholders would receive all of the new income bonds, all of the new preferred stock and (as satisfaction of unpaid interest) approximately twenty-seven per cent. of the new common stock. The holders of General Mortgage bonds would receive only common stock, representing about forty per cent. of the total amount of common stock proposed to be issued.

Such completely subordinate treatment of the General Mortgage bondholders cannot be justified unless it be literally true (as the Report states, at p. 52) that the First Mortgage bondholders have "a first lien upon practically all of the assets of the

debtor." If there be *any* assets which are available to the General Mortgage bondholders in priority to the First Mortgage bondholders, the former must be given securities equal in priority to those received by the latter, to the extent of the assets on which the General Mortgage is a prior lien. These creditors, in fact, are as fully secured as are the holders of the First Mortgage bonds.

A plan which accords a completely subordinate position to creditors who hold a prior lien on even a sub- [495] stantial amount of assets does not, as required by Section 77(e), afford "due recognition to the rights of each class of creditors and stockholders."

Moreover, if the First Mortgage were to be foreclosed, the burden would be upon the First Mortgage Trustees to show what assets were subject to its lien, applying a strict construction of the after-acquired property clause, and excluding from the foreclosure sale all assets which were not subject to its lien. The Commission, in any proposed reorganization plan, cannot deny to the General Mortgage bondholders the rights of priority which they would have to be granted in a foreclosure of the First Mortgage.

Our original brief listed, at pages 9 and 10, assets free from the First Mortgage, and available to the General Mortgage bondholders, worth more than $19,800,000. This is more than the total amount of outstanding General Mortgage bonds ($18,999,500),

and over fifty per cent. more than the total amount of debt secured by such bonds, including interest (approximately $11,770,582 as of January 1, 1937).

The proposed Report would eliminate, from the list of property available to the General Mortgage bondholders, the equity in rolling stock subject to lease or equipment trust agreement, the Northern California extension, and the real estate owned prior to 1916. These items, with the addition of the Deep Creek Railroad Company note and the Standard Realty & Development Company note as to which the General Mortgage lien is disputed, amount to approximately $14,075,000, leaving approximately $6,000,000 of property free from the lien of the First Mortgage, made up as follows: [496]

Cash in the hands of Trustee under General Mortgage	$ 82,369.59
Interest on Tidewater Southern note paid to Railroad Company after default under General Mortgage	50,827.88
Additional interest accrued on Tidewater Southern note to December 31, 1936	33,885.25
Note of Tidewater Southern Railway Company due March 1, 1945	508,278.61
Stock of Tidewater Southern Railway Company (based on net assets at Interstate Commerce Commission values)	1,567,108.84
Bonds of Central California Traction Company	270,000.00
Non-carrier real estate after-acquired and not financed with First Mortgage funds (book value)	1,262,308.32
Cash on hand at date of institution of reorganization proceedings (adjusted by elimination of Tidewater Southern interest paid after default under General Mortgage)	810,331.39

Stock of Central California Traction Company (at book value to Western Pacific)	393,367.10
Alameda Belt Line stock (at book value to Western Pacific)	465,300.00
Industrial tracks, spurs, etc., representing investment by Western Pacific of	239,663.04
Miscellaneous property acquired from free funds (at book value)	101,409.33
Various branches, 23.33 miles in length, not financed under First Mortgage	not valued
Total	$5,784,849.37

It cannot be stated with any fairness that even the list of assets set forth above, which indisputably are security alone for the General Mortgage creditors (either as the holders of the General Mortgage lien or as the bulk of the unsecured creditors), are not sub- [497] stantial, in relation to the amount of debt secured by the General Mortgage. It should be emphasized, moreover, that the above reduced list is set forth only to show the situation if the recommendations in the proposed Report (which are clearly erroneous) were to be accepted.

The Report does not show the real value of most of the above-listed assets. For instance, while reciting (p. 18) the gross freight revenue of Tidewater Southern Railway Company, it omits to state that this important feeder, contributing traffic from which Southern Pacific Railroad derives approximately $500,000 per year (Exhibit 27, statement No. 4; p. 2), earns a net income itself (after interest on the note held by the General Mortgage Trustee), of approximately $75,000 per year (Exhibit 29, state-

ment Nos. 3-7, 28). No mention is made, among the analysis of subsidiaries (pp. 17-19), of the Central California Traction Company, although it is considered especially valuable as a feeder (Exhibit 82, p. 18; Rec. p. 164). The $465,300 of stock of Alameda Belt Line pledged under the General Mortgage (see Exhibit 103) is not even mentioned in the Report's list of pledged collateral (p. 7). No consideration is given to the non-carrier real estate; nor to the free cash, amounting to over $800,000, on hand when the reorganization proceeding was instituted, although this also is clearly free from the lien of the First Mortgage.

The various items listed above are discussed in more detail in our original brief.

Therefore, and even if (which is far from the case) the recommendations of the proposed Report, to which we except, should be accepted as correct, it is clear (from the amount of assets on which the General Mortgage is a prior lien as well as the smaller amount of [498] assets which are free both from the First Mortgage and the General Mortgage) that the creditors secured by General Mortgage bonds are entitled at least to upwards of forty per cent. of their debt in securities of the same type offered to the First Mortgage bondholders and should be treated, to such extent, as on a parity with the First Mortgage bondholders, rather than being completely subordinated to them. The failure of the Report to recognize this principle, as well as its fail-

are to find that the General Mortgage bondholders are fully secured, vitiate the entire Report.

V

The Report errs in its conclusion that the provision made in the recommended Plan for the participation of one of the unsecured creditors would not discriminate against either the First Mortgage bondholders or the General Mortgage bondholders.

The plan recommended in the proposed Report allocates $10,000,000 par value of common stock to be issued as a bonus to the purchasers of the $10,000,000 principal amount of new First Mortgage 4% bonds proposed to be issued. The first right to subscribe to such bonds, and to obtain such common stock bonus, is given to an unsecured creditor, which is also the principal stockholder. The result of the plan, if such unsecured creditor exercises its option, will be that it will receive practically the same amount of common stock which the General Mortgage bondholders receive. The plan of distribution of stock among the General Mortgage bondholders, as recommended in the proposed Report, would result [499] in certain of them receiving less than the face amount of their claims. Thus, while secured creditors are reduced to common stockholders with stock of par value less than the amount of their claims, one of the unsecured creditors would end up with stock of the same class, in an amount sub-

stantially equal to the total received by the General Mortgage creditors. Such a dilution of the securities offered to the creditors secured by General Mortgage bonds cannot be justified.

This Trustee has no information concerning the necessity for offering a $1,000 bonus of common stock for every new $1,000 bond. It doubts, however, that any stock bonus is necessary. At any rate, the determination of the amount of stock promised to be given should be based on the minimum necessary to provide a market, rather than on any theory (which the Report, at p. 54, apparently follows) that such bonus stock will recognize the claims of one of the unsecured creditors.

The pretense at recognition of the value of General Mortgage bonds is illusory. The securities which the holders would receive under the recommended plan are not only of much lower grade, but of less nominal value than the General Mortgage bonds which they replace. So long as this is true, and the holders of General Mortgage bonds are not paid in full at least the face value of their bonds, plus interest, it is improper to dilute their securities by handing out stock to one unsecured creditor.

Even if the value of new securities issued to the General Mortgage bondholders equalled the amount of their bonds, with accrued interest, a fair plan would still have to recognize their rights as general creditors for the amount by which any of their debts exceeded [500] the value of the new securities.

The total disregard of the portion of their debts which the recommended plan leaves unpaid, while offering them even less than the face amount of the bonds held as collateral to their debts, is indefensible.

The creditors secured by General Mortgage bonds now have a claim on the debtor's income and assets prior to any claim of the unsecured creditors. This priority of rank is a substantial right, which the reorganization plan cannot properly take away from them. Even a modified plan which would give to the creditors secured by General Mortgage bonds securities of a value equal to the bonds which they hold, must also provide, in order to be fair and equitable, that any stock offered to the unsecured creditor, as a bonus or otherwise be stock of a class inferior, as to dividend and liquidation rights, to the stock or other securities given in exchange for General Mortgage bonds. However, as has been stated, the General Mortgage bondholders are so fully secured that they should be given the same treatment as the First Mortgage bondholders.

VI

The Report errs in not recognizing that the creditors secured by the General Mortgage bonds are entitled to the benefit of the interest accrued on said bonds; and discriminates unfairly against such creditors in that the Report does recognize accrued interest upon the First Mortgage bonds.

The Report gives no recognition to the fact that

the General Mortgage bonds bear interest to which the pledgees are entitled after default. (See our original [501] brief, pp. 71-72.) The Report does recognize accrued interest upon the First Mortgage bonds, and recommends the issuance of common stock to them for the entire amount of the unpaid interest (pp. 52-53). This constitutes an unfair discrimination against the holders of the General Mortgage bonds.

VII

The Plan recommended by the Report is unfair and inequitable to the holders of General Mortgage bonds and is contrary to the law of the land and the provisions of Section 77.

Some of the requirements of a reorganization plan are that it must (1) be "fair and equitable", (2) afford "due recognition to the rights of each class of creditors and stockholders", (3) "not discriminate unfairly in favor of any class of creditors or stockholders", and (4) "conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders" (Sec. 77(c)).

A plan is not fair and equitable if it does not afford due recognition to the rights of each class of creditors or if it discriminates unfairly in favor of any class of creditors or stockholders.

What has already been said above shows that the plan recommended in the proposed Report does not

afford due recognition to the rights of General Mortgage bondholders, and in fact takes no account of the substantial assets on which they have the prior lien.

What has been set forth in Point V shows also that the plan recommended in the proposed Report would discriminate unfairly in favor of one of the unsecured [502] creditors, and in effect place it on a parity with, or even on a higher plane than, the creditors secured by General Mortgage bonds.

A plan which has these effects does not "conform to the requirements of the law of the land."

The "law of the land" must have been meant by Congress to include the doctrine of the Boyd case (Northern Pacific Railway Company v. Boyd, 228 U. S. 482), that neither unsecured creditors nor stockholders can be given any participation in a reorganization until the prior rights of all senior creditors have been recognized. This principle is too well known to require elaboration. Recent cases which have applied the rule include Security-First National Bank v. Rindge Land & Navigation Co., 85 F. (2d) 557 (CCA 9), disapproving a plan of reorganization which proposed a payment to bondholders of 40¢ on the dollar in full satisfaction, where the Court stated:

> "The right to retain a lien until the debt secured thereby is paid is a substantive property right which may not be taken from the creditor consistently with the Fifth and Fourteenth Amendments to the Constitution" (p. 561);

and Horn v. Ross Island Sand & Gravel Co., 88 F. (2d) 64 (CCA 9).

The requirements of a fair reorganization plan were clearly set forth in the opinion of In re New York, New Haven & Hartford Railroad Company, 16 F. Supp. 504, 509, where the Court said:

> "To be sure, under the act the court may approve a plan 'modifying or altering the rights of creditors generally, or of any class of them, secured or unsecured,' etc. 11 U. S. C. A. §205 (b).
>
> [503]
>
> But since only an equitable plan may be approved, the plan must provide that every creditor in the order of his priority shall receive under the plan rights which in equity are the fair equivalent of such of his rights as have been subjected to equitable modification, at least in so far as the assets of the debtor's estate permit. Any creditor found to be only partially secured is entitled to the equitable equivalent of such security as he has, with a right to share in equality with common creditors for the excess of his claim as allowed above the value of his security as ascertained by equitable considerations."

The plan recommended does not meet the principles set forth in the foregoing opinion nor the requirements of the Act.

VIII.

CONCLUSION.

The recommendations of the Report with respect to the lien of the First Mortgage on equipment covered by leases, conditional sale agreements or equipment agreements, on the Northern California extension and various branches and spurs, and on non-carrier real estate, should be rejected. The Commission should find that these items are free from the First Mortgage, subject only to the lien thereof on the Northern California extension to the amount, and the amount only, of First Mortgage bonds or cash used in the acquisition or construction thereof.

The Commission should then allocate to the creditors secured by General Mortgage bonds their proper prorata of the same securities as shall be given to the holders of First Mortgage bonds. We have refrained [504] from discussing the details of the proposed capitalization and the nature of the securities which should be issued to the holders of the First Mortgage bonds and the General Mortgage bonds, because we believe that if the Commission shall find, as it should find, that the General Mortgage bonds are fully secured, further opportunity should be afforded for discussing, in the light of such finding, the treatment to be accorded to the General Mortgage bondholders.

Provision should also be made to prevent any possible dilution of the securities allotted to General Mortgage bondholders by securities offered to junior interests. This Trustee does not intend, by

anything which has been stated herein, to take sides as between the three creditors secured by General Mortgage bonds or even to discuss the comparative treatment which these creditors should receive.

Oral argument is requested.

Dated, New York, September 24, 1937.

Respectfully submitted,

DAVIES, AUERBACH & CORNELL,
Attorneys for Irving Trust Company,
as Successor Trustee under General
and Refunding Mortgage of West-
ern Pacific Railroad Company,
One Wall Street,
New York, New York.

HAROLD C. McCOLLOM,
ORRIN G. JUDD,

[508]

EXCEPTIONS

A. C. James Co., a secured creditor of the Western Pacific Railroad Company in the principal amount of $4,999,800, representing cash advances made to the carrier in 1931 and 1932 for the construction of the Northern California Extension, hereby excepts to the Report proposed herein by the Bureau of Finance, in the following respects:

1. The Report errs in its recommendation (Report, p. 46) that the capitalization of the reorganized company should be limited to $91,406,510, principal or par value, of securities to be issued.

2. The Report errs in failing to give adequate weight, in its recommendations for the capitalization of the reorganized company, to the valuation of the properties of the company by the Interstate Commerce Commission; [509] under Section 19(a) of the Interstate Commerce Act, of $144,619,851 (Report, p. 23).

3. The Report errs in recommending that the "allotment of the common stock to the secured creditors" (Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co.) "be made on the basis of the collateral held rather than on the amount of the claims" (Report, p. 54).

4. The Report errs in its recommendation that a capital fund be created out of available net income remaining after payment of fixed interest (Report, p. 41).

5. The Report errs in recommending that a sinking fund of one-half of one per cent be created and maintained for the retirement of proposed income bonds (Report, p. 42).

6. The Report errs in its recommendation that First Mortgage bondholders "should be considered as having a first lien upon practically all of the assets of the debtor" (Report, p. 52).

7. The Report errs in recommending that valuable rights be allotted to the Western Pacific Railroad Corporation (Report, p. 54) although it proposes to allot to A. C. James Co., on a claim amounting with interest to $5,749,770, only $2,643,320 par value of new common stock, or less than fifty per cent of the total amount of the claim.

8. The Report errs in recommending (Report, p. 55) that the Commission find that the equity of the preferred and common stockholder of the debtor is of no value.

9. The Report errs in failing to make provision for the claim of the Western Realty Company.

[510]

10. The Report errs in recommending (Report, p. 55) that any conditional rights under subscription warrants be allotted to the secured creditors in proportion to collateral held by them rather than in proportion to their actual advances.

11. The plan recommended is unfair and inequitable for its unjust discrimination against the A. C. James Co., is contrary to the law of the land and to the provisions of Section 77, and should be

modified in accordance with the recommendations hereinafter made.

BRIEF

General Statement

In certain respects the plan recommended by the Bureau of Finance for the reorganization of The Western Pacific Railroad Company is sound and forward looking. It fails, however, in vital respects, to take into account the actualities of the situation and disregards the intent of Section 77 of the Bankruptcy Act. The adoption of the proposed Report, without the modifications hereinafter indicated, will destroy existing possibility of a prompt reorganization of this carrier, consistent with the rights of interested parties and in accord with public interest.

The Western Pacific Railroad Company is, of all the more important carriers now in reorganization under Section 77, the one with the simplest capital structure, and the one most favorably situated to obtain the necessary consents of security holders. It is respectfully submitted that if sound principles are applied to the problem, The Western Pacific Railroad Company can be reorganized under Section 77, wisely and without further delay. [511]

In the following pages, we outline briefly the considerations which support the various exceptions stated above, and indicate those changes in the plan proposed by the Bureau of Finance which, if made, will render that plan an equitable and sound solution of the relations between the various classes

of security owners interested in the Western Pacific property.

Point I.

1. The Report errs in its recommendation (Report, p. 46) that the capitalization of the reorganized company should be limited to $91,406,510, principal or par value, of securities to be issued.

2. The Report errs in failing to give adequate weight, in its recommendations for the capitalization of the reorganized company, to the valuation of the properties of the company by the Interstate Commerce Commission, under Section 19(a) of the Interstate Commerce Act, of $144,619,851 (Report, p. 23).

The basic weakness of the plan suggested in the Report of the Bureau of Finance flows from the drastic and unnecessary limitation on capitalization which is suggested; namely, that the securities of the reorganized company shall not exceed an aggregate of $91,406,510, including $2,048,190 of assumed equipment trust obligations and $10,000,000 of First Mortgage 4% Bonds, used for new money rather than to provide for existing creditors.

This proposed devaluation is surprising when one notes the statement in the Report that the company being reorganized held assets of a book value of $171,- [512] 096,992.80, as of November 30, 1936 (Report, p. 6). These assets are now set off in the balance sheet of the company against capital liabilities, exclusive of accrued and unpaid interest, of $145,276,379.26 (Report, p. 8).

Even more surprising is the suggested limitation in the light of the valuation of these assets as made by the Interstate Commerce Commission under Section 19(a) of the Interstate Commerce Act, adjusted to December 31, 1935, amounting to $144,619,851 (Report, p. 23). Note also that this valuation figure is brought down only to December 31, 1935, and therefore does not include any increase in capital accounts due to the investment of new money under the current Improvement Program.

The suggested limitation on capitalization cannot be justified by any specific limitation within the four corners of Section 77. Subsection (b) (4) is the only definite limitation of capitalization in Section 77, and this limitation is solely as to securities which set up *fixed* charges. Under this provision of the Act, a plan to be approved by the Commission should contemplate that "there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof."

In the plan recommended by the Bureau of Finance the fixed charges are to be no more than the interest on equipment trusts amounting to $86,473 (Report, p. 39), and the interest at 4% on such part of $10,000,000 of First Mortgage Bonds, as may be issued for new money, which interest will not exceed $400,000 per annum. Since the demonstrated adjusted net earnings available for interest even for 1936 amounted to $1,766,632 (Report, p. 21), the provisions of Subsection (b) (4) of Section 77 are fully complied with. [513]

It is fair to ask this question:

> "Why does the Bureau of Finance recommend such a radical limitation upon capitalization against the protests of all interested parties?"

When one reviews the Report in an endeavor to find an answer to this question, one does not find it squarely answered. The nearest approach to an answer is found on page 44 of the Report. There, after discussing the three plans submitted in this proceeding (one by the debtor company, one by a committee representing a group of institutions holding First Mortgage Bonds, and one by the A. C. James Co.), the Report makes the following statement:

> "The debtor's assets consisting of real and personal property have been described, and its investment in such property has been stated. While these data alone would seem to support the total capitalization proposed in each of the three plans. Yet when considered in connection with its record of earnings, it appears that the total capitalization of the reorganized company should be less than that proposed in any of the plans *if any material return in the future on the reorganized company's capital stock is to be expected.*" (Italics ours.)

Certainly nothing in Section 77 of the Bankruptcy Act requires or authorizes a restriction upon capitalization to assure common stock dividends.

Apparently upon this tenuous basis the Bureau of Finance proposes to give to the A. C. James Co. only $2,643,320 par value of common stock in liquidation of its secured claim, which arises from the actual advance of $4,999,800 in cash during the years 1931 and 1932, to enable the debtor company to build its Northern [514] California Extension. This Northern California Extension is necessarily recognized to be, and has clearly demonstrated that it will continue to be, a highly important source of the earning power of the debtor company.

There is nothing clearer in our law than that in any reorganization proceeding creditors are entitled to insist that *fair values, and not forced sale values,* shall be used in determining the capitalization of the reorganized company and the securities to be given each class of creditors. A United States District Court in Michigan correctly stated the principle (In Re Dutch Woodcraft Shops, 14 Fed. Supp. 467, November 19, 1935) in the following language:

> "Confirmation of the plan to revest the stockholders with title to the property of debtor would be justified only upon clear proof of fairness to creditors Here the appraisal evidently was made on the basis of values which would be realized at a forced sale. Creditors may not be thus dealt with. In determination of the value of their claims, they are entitled to have recognized not only present [illegible]dation values but also the prospective [illegible]es of debtor's assets as a going concern.'
>
> See also First National Bank of Cincinnati v. Flershem, 290 U. S. 504.

If Section 77 is deemed impliedly to empower the Commission to so cut down capitalizations (in addition to the express power as to fixed charges), the Report of the Bureau of Finance does not point out the source of such power.

And conceding that a plan, to be in the public interest, "must provide a capital structure * * * which [515] will give it a reasonable opportunity to function efficiently and continuously as a going concern" (Report, p. 36), it is not clear how the drastic and unnecessary scaling down of real values suggested in the Report is justified.

Nor is it enough to say that "the capitalization should not exceed a conservative valuation of the assets to be taken over by the reorganized company", for the question is, what is a conservative valuation? All the evidence in the record supports the Commission's lump sum valuation under Section 19(a) far better than it does the Bureau's theoretical devaluation to approximately ninety-one million dollars (and note that ten million dollars of this represents new money).

The Commission has dual powers and responsibilities. Its long existing powers over rates, and its responsibility to the public that reasonable rate structures be maintained, are necessarily ever present in the thinking of the Commission as to railroad problems. Yet elementary principles of due process of law and eminent domain should render the Commission alert to avoid any unreasonable and

confiscatory exercise of its powers over capitalization in reorganizations under Section 77 of the Bankruptcy Act.

Can the Bureau equitably sustain its recommended plan by any reference to "probable earning power"? When creditors are ready and willing to protect the carrier from future difficulties by accepting long term *income obligations*, no possible consideration of public policy requires the Commission to squeeze out of the picture honest debts, heretofore created under the supervision of the Commission, on the ground that unless this is done the *stockholders* of the reorganized company *may not* receive "any material return". [516]

In this case the record shows clearly that the probable earnings of the reorganized company justify a far greater capitalization than the Bureau of Finance here proposes.

Certainly the Commission ought not, as the Bureau of Finance would have it do, indulge in vague speculations as to whether an issue of income bonds maturing fifty years from now may then be refunded (if not previously converted into stock), or form a judgment as to whether, over the years, the holders of the proposed stock in the reorganized carrier will receive a "material return."

Even though the Report of the Bureau of Finance established a sound *theoretical* basis for its proposed drastic devaluation—and this it clearly does not do—nevertheless, the Commission ought not to approve such proposed devaluation. The Com-

mission has always had the difficult task of subjecting theories to the test of practical application. The problem of the Commission in this proceeding is to give to Section 77 of the Bankruptcy Act a practical application. No *theory* which defeats the legislative intent expressed in Section 77 should be adopted by the Commission for application in this proceeding, even though it may seem to present advantages from other points of view.

The test to be applied by the Commission in this proceeding has been well expressed by the Supreme Court in Continental Illinois National Bank & Trust Co. v. Chicago, Rock Island & Pacific Ry. Co., 294 U. S. 648, 676, as follows:

> "* * * But a proceeding under §77 is not an ordinary proceeding in bankruptcy. It is a special proceeding which seeks only to bring about a reorganization, if a satisfactory plan to that end can be devised. And to prevent the attainment of [517] that object is to defeat the very end the accomplishment of which was the sole aim of the section, and thereby to render its provisions futile."

If a plan embodying the drastic devaluation proposed by the Bureau of Finance were to be adopted by the Commission, (a) the purpose and intent of Congress that Section 77 of the Bankruptcy Act should provide machinery for the speedy reorganization of carriers which came into difficulties during the recent depression would be defeated; (b) the security owners interested in such carriers

would be thrown back to the prior practices of mortgage foreclosure and equity receivership, and (c) there would be substituted for the reorganization by negotiation contemplated by Section 77, reorganization by litigation, with all its attendant ills.

Point II.

3. The Report errs in recommending that the "allotment of the common stock to the secured creditors" (Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co.) "be made on the basis of the collateral held rather than on the amount of the claims" (Report, p. 54).

A second vital defect in the proposed plan of the Bureau of Finance is one which especially discriminates against the A. C. James Co. as a secured creditor. This defect in the proposed plan flows directly from the recommended drastic devaluation of the assets of the carrier, which prevents the Bureau assigning obligations to the secured creditors in exchange for their existing claims. The Bureau of Finance suggests a plan which would deal with three secured creditors, all of whose [518] claims clearly belong in the same class*, under the doctrine of Morgan v. Missouri Pacific Railroad Company (U. S. Circuit Court of Appeals, 8th Cir-

* The order of August 20, 1935, of the U. S. District Court in California, putting these claims, each in a separate class, was not upon notice to such creditors and was tentative and provisional, as to the propriety of such a classification.

cuit), 85 Fed. (2d) 351, by giving them common stock.

The Bureau has recommended that common stock can be provided for the Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co., consistently with the public interest as prescribed in Section 77 of the Bankruptcy Act, in the total amount, par value, of $11,853,454.

The Bureau points out that this amount just equals "the total of the claims of the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company" (Report, p. 53).

It is further recommended that "the allotment of the common stock to these secured creditors be made on the basis of the collateral held rather than on the amount of the claims" (Report, p. 54).

The opinion of the Bureau setting forth the recommended allotment is as follows (Report, p. 54):

> "While, as stated, the par value of the stock available for distribution equals the principal and unpaid interest on the secured creditors' notes, the collateral pledged by the debtor as security for the notes is of varying amounts. For instance, the total of the Reconstruction Finance Corporation's claim is $3,507,310 although it holds as pledgee 56.6 percent of the debtor's general mortgage bonds. The total claim of the Railroad Credit Corporation amounts to $2,596,374 and 21.1 percent of the general mortgage bonds are pledged thereunder.

"The total of the A. C. James [519] Company's claim amounts to $5,749,770 and only 22.3 percent of the general mortgage bonds are pledged thereunder. Under these circumstances it is recommended that the allotment of the common stock to these secured creditors be made on the basis of the collateral held rather than on the amount of the claims. Such allotment would result in the Reconstruction Finance Corporation receiving $6,709,055 par value, the Railroad Credit Corporation $2,501,079 par value, and the A. C. James Company $2,643,320 par value of new common stock."

In short, the Bureau finds that common stock in the proposed reorganized company may be made available in an amount, par value, sufficient to pay in full the total loans of these creditors and interest thereon, but it is recommended that Reconstruction Finance Corporation, *with a claim of $3,507,310 shall receive $6,709,055* in stock in discharge of its debt; that The Railroad Credit Corporation, *with a claim of $2,596,374, shall receive $2,501,079* in discharge of its debt; and that A. C. James Co., *with a claim of $5,749,770, shall receive $2,643,320* in discharge of its debt.

A. C. James Co. excepts to this proposed allotment on the grounds that it ignores and repudiates the established equitable rights of the parties and that it is unfair and unduly discriminatory in favor of Reconstruction Finance Corporation and The Railroad Credit Corporation, at the expense of A.

C. James Co. contrary to the intent and purpose of Section 77 of the Bankruptcy Act.

A. C. James Co. maintains that the proposed common stock or any other securities in a reorganized company should be allotted to these three creditors pro rata according to the present value of their respective claims against the debtor. [520]

If an amount of common stock of par value equal to the "total of the claims" of these three creditors can lawfully be made available for them under Section 77:

(1) Why should the allotment of their respective shares of that stock be made "on the basis of the collateral held rather than on the amount of the claims"?

(2) If this amount of common stock can lawfully be made available to liquidate and discharge the "total of the claims" of these three creditors, as the proposed plan contemplates, why should it not be allotted *as a payment and discharge of each of their claims, rather than as a substitute for, or liquidation of, their respective holdings of collateral?*

Analysis of Reasons in Support of Recommended Allotment.

The Report does not undertake to answer the foregoing questions, nor to sustain the basis of the proposed allotment, other than as reference is made to the fact that "the collateral pledged by the debtor as security for the notes is of varying amounts" (Report, p. 54).

Apparently the Bureau has accepted the general thesis set forth by the Institutional Bondholders' Committee in its brief, dated January 9, 1937. The Committee's thesis is stated as follows:

> "RFC, RCC, and ACJ are the holders of promissory notes of the Debtor for which there is pledged as the principal security in each case General and Refunding Mortgage Bonds of the Debtor. This collateral is held as between the three parties in entirely different ratios (Ex. 9). [521] The legal question is, whether their rights in the property of the Debtor are to be measured by the amount of the notes which they hold, or by the amounts of General and Refunding Mortgage Bonds held as collateral. It is clear that the latter is the true test, subject only to the limitation that no one of the claimants may realize a present value in excess of the total amount due on its claim for principal and accrued interest." (p. 64).

No authorities involving proceedings under or outside the Bankruptcy Act are cited in support of this "true test."

It is further set forth in the foregoing brief that:

> "The pledge of the Debtor's mortgage obligations to secure a promissory note of course creates but one 'debt' viz. the note. But the effect of the pledge is to vest in the holder of the note an interest in the mortgage securing

the pledged obligations equal to that proportion of the whole value of the mortgaged property which the amount of pledged mortgaged [sic] obligations bears to the total amount of obligations outstanding under the mortgage. Obviously, if a debtor has outstanding two notes each for $10,000, one secured by $10,000 of the debtor's mortgage bonds and the other secured by $90,000 of the debtor's mortgage bonds, both out of a total issue of $100,000 of such bonds, the security of the second noteholder in the debtor's assets is nine times that of the first note holder. This is subject to the limitation that in realization upon his interest in the mortgage the second noteholder must not receive more than the amount due on the note itself.

"Thus in equity proceedings it has become settled law that noteholders in the position of RFC, RCC and ACJ in this case are entitled upon the sale of the Debtor's property to realize [522] directly upon the pledged securities without having first reduced them to possession and to receive distribution on the basis of face value of their collateral." (pp. 65-66)

Five cases (p. 66) are cited at the conclusion of this last paragraph. We fail to find how they support the "true test."

It will be observed that the foregoing statements nowhere particularize *how or when*, under existing law, the right of these pledgee-creditors *to realize*

upon their collateral mortgage bonds according to their respective holdings of those bonds, is reconciled with "the limitation that in the realization" no one *"may realize a present value in excess of the total amount due on its claim for principal and accrued interest."*

Such particularization, when made according to established rules of equity, will show that, on the facts of this case at least, these pledgee-creditors should share in the proposed common stock according to the present value of their respective claims, and not according to their respective bond holdings. (By the term "present value" of a claim is meant the amount of the principal loan, plus interest accrued thereon, pursuant to the terms of the loan agreement to the date of confirmation of the plan by the judge without compounding interest.)

The Equitable Rights of the Three Pledgee-Creditors

It seems unquestionable that, in proceedings under Section 77 of the Bankruptcy Act, established rules of equity fixing the relative rights of the parties in interest should be accorded full credit. This is true because courts of bankruptcy "are essentially courts of equity, and their proceedings inherently proceedings in equity," [523] Continental Illinois National Bank & Trust Co. v. Chicago, Rock Island & Pacific Ry. Co., 294 U. S. 648, 675 (1934) (proceedings under Section 77 of the Bankruptcy Act), and because the Act conditions the judge's jurisdiction to approve any plan of reorganization upon

his being satisfied that it is "*fair and equitable*" (Section 77 (e) (1)).

Stated as a *broad generalization*, it may be conceded as an elementary rule of equity that where two or more creditors are secured by pledge of unequal amounts of bonds which in turn are secured by the same mortgage, and the bonds are of equal priority under the mortgage, the pledgees may, as between themselves, share in the net proceeds of the foreclosure sale according to the face value of their bonds. *But this rule of equity is of consequence as a rule of distribution only if and when a deficiency in the mortgage security has been realized so that all of the pledgee-creditors holding the mortgage bonds will not be paid therefrom their principal and interest in full.*

We emphasize this particularization of the foregoing elementary equity rule of distribution because the record of these proceedings nowhere discloses, nor has it been contended, that the mortgage security is or has been inadequate to pay in full the present value of the claims of the three pledgee-creditors. This same particularization likewise reconciles the alleged "true test" set out in the brief of the Bondholders' Committee (quoted *supra*) with the limitation that no one of the claimants shall receive more than the principal of his claim with interest.

There appears to be no dissent in the authorities that the debtor's General and Refunding Mortgage could not be foreclosed for a greater sum than the ag- [524] gregate present value of the pledgees'

claims (aggregate principal with interest thereon pursuant to the respective loan agreements to date of the foreclosure decree). This was decided by Brewer, J., in the notable case of Simmons v. Taylor, et al. (Circuit Court, S. D. Iowa, C. D. 1885), 23 Fed. 849, 857, as follows:

> "One further question requires notice. Obviously most, if not all, of the bonds secured by this second mortgage were issued as collateral security for certain debts of the mortgagor. *Should such bonds today be treated as valid obligations for their face and interest, or as binding only to the extent of the debts secured thereby? I think the latter.* Take the bonds held by the Lackawanna Iron Company, for instance. They were given as a collateral security only, and the present holder took them under such circumstances as to charge him with notice. *Instead of being a debt for their face, all that the present property should be held liable for is the amount of the debt due to the iron company secured by these bonds.* So in respect to others.
>
> "The order therefore should be that the matters be referred to the master of this court, to state—*First*, which of those bonds secured by this second mortgage were issued simply as collateral security for debts of the mortgagor; *second, the present value of the debts secured thereby*, and *third*, if any of those bonds have been transferred from the holders of such debts,

under what circumstances, and for what consideration they passed to the present holders. *Upon the coming in of such report of the master, and finding of the amount which is properly secured by this second mortgage, a decree will be entered directing the sale of the mortgaged property within 60 days to pay such amount.*" (Italics ours.) [525]

As we have stated, this ruling appears to have the unanimous approval of the authorities.

Accord:

Newport & Cincinnati Bridge Co. v. Douglass, trustee, 12 Bush (Ky.) 673, 720 (1877) (Foreclosure proceedings with receivership in aid. "Some of the bonds issued under the later mortgages are in pledge to certain of the company's creditors. These bonds should be paid to the extent necessary to satisfy the debts for which they are held as collateral security, and no more.").

Jessup, et al. v. City Bank of Racine, et al., 14 Wis. 331, 340 (1861) (Foreclosure proceedings).

Baxter v. Washburn, 8 Lea (Tenn.) 1, 17 (1881) (Foreclosure proceedings).

Nelson v. Hubbard, 96 Ala. 238, 254 (1891-1892) (Foreclosure and statutory proceedings for dissolution and liquidation of mortgagor corporation).

Peacock v. Phillips, et al., 247 Ill. 467, 93 N. E. 415 (1910) (Foreclosure proceedings).

Kelly et al. v. Wellsburg, Etc., Co., 74 W. Va. 130, 140, 81 S. E. 712 (1914) (Foreclosure proceedings).

See, also, Equitable Trust Co. of New York v. Great Shoshone & Twin Falls Water Power Co., et al. (D. Ct. D. Idaho, S. D. 1915), 228 Fed. 516.

It necessarily follows from the foregoing authorities that parties entitled to redeem the mortgaged property may do so by paying no more than the present value of the debt owed to pledgees like Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co. Simmons v. Taylor, et al., supra.

It may also be pointed out in passing, that there is substantial authority holding that while a pledgee of mortgage bonds may sue at law upon the collateral [526] bonds (rather than upon his principal note) as the personal obligation of the debtor-mortgagor, judgment will be allowed only in sufficient amount to pay the debt and interest due thereon. Murphy v. Murphy, 74 Conn. 198 (1901). And, of course, in insolvency proceedings, the pledgee may prove and have allowed against the debtor's *general estate* his principal-debt only and not his collateral bonds. Hitner, et al. v. Diamond State Steel Co. (Circuit Court, D. Delaware, 1910), 176 Fed. 384.

The rule of distribution *in case of a deficiency* was neatly and precisely applied in the recent case of First Nat. Bank of Ottawa v. Kay Bee Co., et al., 366 Ill. 202, 7 N. E. (2d) 869 (1937).

The case came before the Supreme Court of Illinois upon appeal from a judgment affirming a decree of foreclosure. The mortgagor corporation had executed a deed of trust mortgage to the plaintiff

to secure $50,000, which was represented by two bonds, each in the principal sum of $25,000 of equal priority, and bearing interest at the rate of 6%. One bond was pledged with the Ottawa bank as collateral security for loans which totaled at foreclosure $24,000 (not including unpaid interest). The other bond was pledged with the Morrison Bank as collateral security for loans which totaled at foreclosure $16,500 (not including interest). To quote the Court (pp. 860, 861):

> "* * * On March 20, 1936, a decree of foreclosure was entered by the circuit court of Whiteside County. The decree found there was due the Ottawa bank, $24,956.20, for which it held as collateral security bond No. 1, and due the Morrison Bank, $17,117.25 for which it held as collateral security bond No. 2. The mortgaged premises were directed to be sold to satisfy the indebtedness. The decree further provided that *if the sum* [527] *should be insufficient to pay the several amounts due* the respective banks, then the master should distribute the fund in the proportion that the sum due each bank bore to the total amount due both banks." (Italics ours.)

The Morrison Bank appealed from the provision of the decree relating to distribution in event of a deficiency; taking the position that, in event of deficiency, the proceeds of the foreclosure sale "should be prorated between the banks on the basis of the proportion which the bond held by each bore to the total amount of the bonds issued."

The Supreme Court reversed the lower court, and held (p. 861):

> "* * * The rule applicable is, that the two banks, as the holders of the several bonds pledged to them respectively as surety for the primary indebtedness of each, should share in the funds derived from the sale of the mortgaged property, until the primary indebtedness is satisfied, on the basis of the bond held, and not on the factor of the aggregate debt owing the banks."

The court set forth the rationale of its ruling as follows (p. 861):

> "The purpose of a pledge is to give the creditor additional security out of which payment of the primary debt may be made. In the case at bar the bonds, secured by the trust deed stood on the same plane. When they were pledged, each bank, *for the purpose of further protection to its primary debt*, owned one-half of the security furnished by the trust deed. By the sale of the property under the foreclosure of the trust deed, the funds derived are substituted for the real estate. By the conversion of the property into money through sale under the foreclosure, the security [528] afforded by the bonds pledged to the respective banks, did not shift so that the funds should be distributed on the basis of the debt due each bank bore to the total of the primary debts due

the two banks. So to hold would, in practical effect, give the bond held by the creditor to whom there was due the larger debt, a preference over the creditor to whom the lesser amount was due. The application of a different rule would result in a variable and shifting factor in the value and extent of the security granted the creditor to whom had been pledged a portion of a series of corporate bonds, the value varying in accordance with the amount of primary indebtedness held by other creditors holding like hypothecated bonds as collateral security therefor." (Italics ours.)

We do not challenge the foregoing decision nor the authorities which are in accord. We emphasize only that the decision expressly concerned a decree involving the distribution of the proceeds of a foreclosure sale, *if, and when, a deficiency were realized.*

Relying upon the foregoing authorities, we reiterate that it *is the established equity law of the land that the allotment of common stock to Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co. should be according to the present value of their respective claims, unless and until it is shown that there is a deficiency in the value of the mortgage security. Only in case of such deficiency might they realize upon the security according to the face value of their collateral bond holdings. Absent such deficiency the pledgees' relative interests in the mortgage security exist ac-*

cording to the present value of their respective claims.

The record in this case makes no pretense at showing, nor has it been contended, that the security back of the [529] debtor's General and Refunding Mortgage Bonds has been, or is, insufficient to pay in full the present value of the debts owed to Reconstruction Finance Corporation, The Railroad Credit Corporation, and A. C. James Co.

It is conceded that the General and Refunding Mortgage is secured by all of the assets of the debtor's system except cash and current assets derived from free funds; that it covers assets of substantial value which are not subject to the First Mortgage; and that the extent and scope of the First Mortgage as a lien prior to the General and Refunding Mortgage are challenged by the Trustee of the latter mortgage.

In order not to engage at this point in the challenge of the scope and extent of the lien of the First Mortgage as made by the Trustee of the General and Refunding Mortgage, we will assume its priority and restate our point, set forth in the last preceding paragraph, *supra*, as follows: Nothing in the record of these proceedings shows, nor has it been contended, that the property of the debtor subject to its two mortgages is, or would be, insufficient upon foreclosure or other judicial sale, to liquidate and pay in full the present value of the genuine debt secured by the respective mortgages;

The First Mortgage indebtedness, with interest thereon to January 1, 1937, has been reported as	$57,504,866
The debt secured by the General and Refunding Mortgage (notes held by Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co., with interest thereon to January 1, 1937), has been reported as	11,853,454
Total	$69,358,320.

[530]

The Bureau has set forth in the Report (pp. 22-23) that the debtor's system was valued as of December 31, 1935, for rate making purposes, in the total amount of $144,619,851.00.

Book value of road and equipment investments alone was reported in the Trustee's balance sheet of November 30, 1936, at $139,371,768.08 (Report, p. 6).

The Bureau has further found that even on its drastic basis of proposed reorganization, the assets and probable earnings warrant a capitalization of $91,406,510 (including the $10,000,000 "new money" for expenditures under the Rehabilitation Program). (Report, p. 46.)

Note further that the issue of all the outstanding First Mortgage Bonds of the carrier, and all of the General and Refunding Mortgage Bonds held by the secured creditors, was approved by the Commission, and that the last such order of approval, which brought the authorized General and Refunding Mortgage Bonds to a total of $18,000,000 was

made February 25, 1933. In other words, that order, which confirmed the existing debt structure of the carrier, was made approximately at the end of the recent depression, and since that time we have had five years of recovery.

In view of these considerations, and in view of the absence of any judicial sale in these proceedings, we submit that it is beyond challenge that the security behind the carrier's General and Refunding Mortgage is and has been sufficient to liquidate and pay in full the total claims due Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co. And, to repeat, this conclusion is derived without relying upon the challenge by the Trustee of the General and Refunding Mortgage of the scope and extent of the First Mortgage as a prior lien. [531]

Further Equitable Rights Which Are Unlawfully Denied by the Recommended Plan

The recommended allotment also ignores and repudiates the rights of subrogation and exoneration of A. C. James Co. to have The Railroad Credit Corporation reimburse itself under its junior lien on the excess collateral held by Reconstruction Finance Corporation, and restore the $2,000,000 of bonds which A. C. James Co. loaned to The Railroad Credit Corporation, thereby obviating the deficiency of collateral bonds held by A. C. James Co. It is also apparent that the right of A. C. James Co. to the restitution of its $2,000,000 bonds loaned to The Railroad Credit Corporation is further sup-

ported by the equitable rule of marshalling which requires that a creditor holding two securities shall, when it can be done without prejudice to him, exhaust one of his security funds in aid of another creditor who has a claim on only one of the security funds. Merrill v. National Bank of Jacksonville, 173 U. S. 131, 140 (1899). This is especially important in this case because of the excess collateral held by the Reconstruction Finance Corporation for its secured loan.

The Proposed Common Stock Is Not a Mere Substitute or Exchange for the Existing Collateral Security

As we have pointed out before, the Bureau utters no explanation in support of its recommended allotment of the common stock in the reorganized company.

We have also pointed out how the proposed allotment ignores and repudiates the existing equitable rights of the parties as established by courts of equity, including the rights of subrogation, exoneration and marshalling of A. C. James Co. [532]

Speculation upon a possible support for the allotment has prompted the thought that possibly it was predicated upon the hypothesis that the new stock will be distributed as *a substitute and exchange for the collateral security which the pledgee-creditors now hold* and that, therefore, they should be awarded proportional ownership in the substitute according to their holdings in the original collateral rather than according to their claims as creditors.

This would be extraordinary principle indeed.

Any such rule would necessarily rest upon an assumption that these creditors were entitled to trace their collateral bond holdings into the new stock without any regard for the principles of equity or law under which the collateral bonds were held for purposes of security only; that they were subject to redemption; that they were subject to rules at law and in equity precluding the creditors from collecting more than the amounts due them respectively; and subject to the equitable rights of The Railroad Credit Corporation as a junior lienor of the collateral bonds held by Reconstruction Finance Corporation, and subject to the equities of subrogation, exoneration and marshalling inhering in A. C. James Co. with respect to the security.

Nothing in Section 77, nor elsewhere in the Bankruptcy Act, authorizes a plan of reorganization *to reclassify and transform creditors* holding collateral security into *co-owners* of a substitute for their collateral security and then require them to share their ownership in the substitute according to the ratio of their prior collateral security holdings.

Traditional it is that Section 77 was amended into the Bankruptcy Act as a debtor relief measure to provide ways and means of scaling down and extending [533] the time of payment of debts of railroad corporations. The Bureau recommends in its Report that, under Section 77, the capitalization of the reorganized company should be scaled down and altered so that the fixed charges of the company

shall be adequately covered by the probable earnings available therefor, and the plan as a whole shall be compatible with the public interest (Report, p. 36).

To comply with the intent and purpose of Section 77 it is unquestionable that the new common stock must have been proposed for the three pledgee-creditors as a *payment and discharge of their present claims as creditors.* This is further manifest from the provisions of Section 77 concerning the function and effect of a plan of reorganization. If the plan is confirmed by the judge, Subsection (f) of Section 77 provides that "the provisions of the plan and of the order of confirmation shall, subject to the right of judicial review, be binding upon the debtor, all stockholders thereof, * * * *and all creditors* secured or unsecured * * *. Upon confirmation of the plan * * * property dealt with by the plan, when transferred and conveyed to the debtor or to the other corporation or corporations provided for by the plan, or when retained by the debtor pursuant to the plan, *shall be free and clear of all claims* of the debtor, its stockholders and *creditors, and the debtor shall be discharged from its debts and liabilities, except such as may consistently with the provisions of the plan be reserved in the order confirming the plan* * * *." Everyone realizes that the proposed common stock is not made available as a continuing or substitute *security* for any debt which will continue to be owed to these creditors; its one and sole function under [534] the

plan would be to pay and discharge their several claims. It should be allotted accordingly.

There is no authority in Section 77, nor elsewhere, whereby the proposed common stock provided for the three pledgee-creditors shall be allowed to serve a *series of functions*, namely, first, as a substitution and exchange for the creditors' present collateral holdings and, second, as a payment and discharge of their claims. *But if there were authority under Section 77 to treat the proposed stock as a substitute and exchange for the original security, rules of fairness and equity are yet to be conceived which would sustain the recommended allotment. As has been pointed out, there is no deficiency in the original security held by these pledgee-creditors.* No principle of law or equity justifies *assuming* one for purposes of alloting the "substitute collateral." Such assumption would be no more warranted in law or equity than is the allotment. Finally, there is, of course, no principle of fairness or equity to support any suggestion that the proposal to give this common stock to these creditors of itself establishes any deficiency in the original security held by them.

These same considerations would apply with the same force against the proposed allotment, if the common stock were conceived as being offered in "payment" or "liquidation" of the creditors' *original collateral holdings* rather than as a substitution or exchange therefor. Under the principles of law and equity set forth above, the relative rights of these creditors are derived through their claims

against the debtor and according to their present value. Absent a deficiency in their original security, there is no equity or law to justify the creation of new and discriminatory rights in what may be offered as a "payment" or "liquidation" of that security. [535].

Any plan which does not recognize the advances made by the three junior creditors as equal in equity, all having been made during the depression years to preserve the existence of the carrier would be inequitable and discriminatory as to the A. C. James Co. If there is a distinction as between these junior creditors, arising from the application of the funds advanced, it is in favor of the A. C. James Co., since its advances were used for the construction of the Northern California extension, now an important element in the earning power of the carrier property, while the advances of the Reconstruction Finance Corporation and The Railroad Credit Corporation largely went into the pockets of the First Mortgage bondholders, either by paying them unearned interest, or by paying current tax charges prior in lien to the First Mortgage Bonds.

Point III

4. The Report errs in its recommendation that a capital fund be created out of available net income remaining after payment of fixed interest (Report, p. 41).

In addition to the difficulties of fair apportionment of interest between the different classes of creditors which flow from the drastic limitation on

capitalization recommended by the Bureau of Finance, the Report adds additional difficulties by recommending a deduction up to $500,000 a year from the effective income of the carrier to provide for future capital additions.

The language of the Report (pp. 40-41) in which this recommendation is made is as follows: [536]

> "Since new first mortgage bonds would not be issued in principal amount to exceed 75 percent of future capital expenditures, the balance of such expenditures must be financed through the issue of junior securities or from earnings. Under both the debtor's plan and the bondholders' plan funds for such expenditures would be secured from the hereinbefore described capital fund contemplated by their plans. *While the A. C. James Company opposes the creation of such a fund, as well as a sinking fund for the redemption of bonds, it does not contend such funds are not in accordance with the principles of sound financing, but that the Revenue Act of 1936 places too great a penalty on the retention of earnings for such purposes.* It is essential, however, that the reorganized company should not be embarrassed in securing funds for future capital expenditures. * * * It is recommended, therefore, that the plan approved by the Commission provide for the creation of a capital fund out of available net income remaining after payment of fixed interest. To avoid too heavy a sacrifice by present security

holders, payments into the fund should not exceed $500,000 in any one year, nor, in any event, the sum needed to raise the totals of the fund to $1,000,000 at any time, and payment into the fund should be dependent upon earnings and noncumulative." (Italics ours.)

In the above statement, the fact that the debtor's plan and the bondholders' plan each provided for a capital fund should be read with the qualification that each of these plans, as the record in this proceeding clearly indicates, was prepared in the interest of the institutional holders of First Mortgage Bonds and by the same draftsman. The rights of other creditors of the carrier were not given fair consideration in providing such a [537] drain upon the earnings of the company with a priority over the interests of all other creditors.

As to the intimation that the A. C. James Co. conceded that a capital fund from current earnings was in accordance with the principles of sound financing and only barred by the present Federal Revenue Act limitations, it is obvious that the position of this creditor was not clearly understood by the Bureau of Finance.

A. C. James Co. opposed and opposes, for basic reasons, the creation of such a capital fund from current earnings. It maintains that a deduction of $500,000 a year from the current earnings of the reorganized carrier immediately after fixed charges is unnecessary, violates modern principles of sound

corporate financing, imposes upon the carrier an unreasonable tax burden under the Federal Revenue Act, and is prejudicial to the equitable rights of all existing creditors of the carrier.

Is the current deduction of $500,000 a year for capital expenditures necessary, as is intimated by the language of the Report set out above? In so far as capital expenditures represent replacements, the moneys are provided from income by reason of the operation of the depreciation deductions prescribed by the Interstate Commerce Commission. To say that any further moneys are required *to replace* capital assets which must be retired for obsolescence or otherwise is to suggest that depreciation provisions of the Uniform System of Accounting prescribed by the Interstate Commerce Commission are inadequate and unsound.

Consider next new additions of fixed capital.

We submit that it is a far more wholesome situation for a carrier to be compelled to come before the Commission and ask for authority for the issue of the nec- [538] essary capital securities, whether bonds or stock, than for the carrier to be left free to plow back into the property moneys obtained from the shippers. Investment in such additions is not warranted until after earnings have covered operating expenses and a fair return on the existing capital.

If a sound capital structure is constituted, there is no reason why the necessary funds for any proper extension, approved by the Interstate Commerce

Commission, cannot be obtained through properly balanced senior and junior financing. It is a reasonable limitation that 25% of such capital funds should be derived from sources other than First Mortgage Bonds. *It is, however, an unreasonable requirement that 25% of such future capital expenditures should be derived from funds withheld from those creditors of the carrier who advanced money for its prior capital expenditures.* So long as capital additions to the property of the carrier are obtained through the issue of new capital securities, the Interstate Commerce Commission retains full control of such additions. If, on the other hand, the Commission should attempt to force a compulsory investment of money, which ought to go to the existing creditors of the carrier on account of their prior investment, that would seem to be clearly confiscatory action by the Commission, and as such, unreasonable.

Nor is it true that such deductions from current income for capital expenditures (or for sinking funds on bond issues, hereinafter discussed) are recognized as being in accordance with the principles of sound corporate financing. Even before the Federal Revenue Acts included a legislative declaration condemning the policy of retaining undistributed current earnings, through reinvestment or otherwise, it had become apparent that [539] provisions in corporate mortgages for deductions from current income for capital purposes or for the retirement of bonds did far more harm than good.

We cannot but recognize that the Interstate Commerce Commission has forcibly urged upon Congress that the existing provisions of the Revenue Act which penalize the retention of current earnings by corporations, including railroad, should not have application to the railroads of the country. The Commission, however, must recognize as a practical matter that its representations to Congress have had no effect, and that the Federal Revenue Act does still penalize such retention of capital funds. A compulsory redemption ought, therefore, to be imposed upon a carrier, only upon a clear showing of necessity.

Take the situation we are here considering: Suppose the reorganized carrier were to earn only the interest on its equipment trusts, $86,473 (Report, p. 39), and the interest on ten million dollars of First Mortgage Bonds of $400,000, plus $500,000 which it was compelled to plow back into the property under the suggested capital fund provisions of the Bureau of Finance. Actually, it would not be able to plow back $500,000, because in retaining such moneys, it would impose upon itself a liability to pay $161,202.80 in Federal income taxes on such retained income.

If the somewhat unduly pessimistic view of the Bureau of Finance as to future earnings of this carrier should prove to have any basis, the unreasonableness of a provision for $500,000 per year

deduction from income for new capital expenditures becomes obvious. *Why should the management of the carrier be allowed or required to spend $500,000 a year from current income* [540] *for future capital additions, while the creditors of the carrier, who have furnished the money to build the present property, stand aside and wait upon such additional investment for any return upon their moneys?* Why should the principal claims of existing creditors be scaled down in deference to such inequitable charge upon future earnings? Obviously, the proposed charge could be justified only if it were shown to be essential to the preservation of the property as a going concern. If the depreciation reserve policies promulgated by the Interstate Commerce Commission are sound, as the Bureau should assume they are, there can be no necessity for $500,000 per annum of additional capital expenditures to preserve the property.

Any plan which contemplates a deduction from the earnings of the reorganized carrier, after fixed charges, for the purpose of capital investment, is unsound and inequitable.

Point IV

5. The Report errs in recommending that a sinking fund of one-half of one per cent be created and maintained for the retirement of proposed income bonds (Report, p. 42).

In the Report of the Bureau of Finance, after a discussion of the proposed $500,000 per year capital fund, it is stated (Report, pp. 41-42):

"* * * It also is believed to be desirable that provision be made at least for the retirement of the income bonds. * * *

"* * * It is recommended, therefore, that provision should be made in the plan approved by [541] the Commission for the creation and maintenance of a sinking fund of one-half of 1 percent to be used for the retirement of income bonds hereafter recommended out of available net income remaining after the payment of fixed charges, payment into the capital fund, and interest on income bonds."

In discussing this recommendation of the Bureau of Finance, we will point out at the outset that we are not here concerned with a proposed sinking fund for an issue of bonds which will be sold to the public and which, in the judgment of the Bureau of Finance, should contain provisions assuring retirement within the period of the issue. The proposed sinking fund applies only to income bonds proposed to be issued to existing creditors of the carrier. The money of these creditors is now frozen into the carrier property. None of these creditors is asking that it be permitted to withdraw it. What everyone is trying to do in this proceeding is to assure the creditors of the carrier that their relative claims will be recognized on a fair basis, consistent with the continuance of the carrier as a going concern, and that future income will be fairly apportioned among them. The Commission, therefore, may well omit a sinking fund from these income bonds

without abandoning the position which it has taken in the past as to the desirability of sinking funds in connection with the issue of new capital obligations.

We reiterate, moreover, that, owing to unfortunate experiences with the operation of sinking funds on corporate obligations during the depression years, and a realization of the heavy burden imposed upon such moneys retained from income to retire capital obligations through the operation of the Federal Revenue Acts, the [542] use of sinking funds is being largely abandoned in connection with the issue of corporate obligations, except where such obligations are supported by wasting assets, as in the case of mining companies, oil companies, and similar operations.

Take one instance from the electrical industry, which is in some respects closely comparable to the railroad industry: In the years 1935, 1936 and 1937, one group of gas and electric companies in Greater New York issued capital obligations in the aggregate principal amount of $235,000,000. These issues were approved by the Public Service Commission of the State of New York, registered with the Securities and Exchange Commission, and sold to the general public by banking houses. The issuing companies, the amount of each issue, and the maturity of each issue were as follows:

Name of issuer	Amount of issue	Date of maturity
Consolidated Edison Company of New York, Inc.	35,000,000	Apr. 1, 1946
Consolidated Edison Company of New York, Inc.	35,000,000	Apr. 1, 1956
The New York Edison Company, Inc.	55,000,000	Oct. 1, 1965
The New York Edison Company, Inc.	30,000,000	Apr. 1, 1966
Brooklyn Edison Company, Inc.	55,000,000	May 15, 1966
New York and Queens Electric Light and Power Company	25,000,000	Nov. 1, 1965

In no one of the indentures supporting the above issues was there any provision for a sinking fund for the retirement of these obligations before maturity.

If the income bonds which the Bureau of Finance proposes shall be issued for a part of the existing debt [543] owed First Mortgage bondholders of this carrier were to be ten year bonds or twenty year bonds, some provision for retirement might fairly be considered. Here, however, the proposed income bonds are fifty year bonds. Not for a half century will the carrier face the problem of refunding the obligation. If it be thought that we ought now to plan for that refunding, quite obviously it can better be done by including a conversion privilege which at some time in the fifty years is likely to make it advantageous to exchange such income bonds for preferred or common stock without fixed maturity, rather than by a compulsory deduction from current income which penalizes the company

in additional Federal income taxes, and unnecessarily and inequitably penalizes existing creditors of the carrier with like effect as the proposed capital fund considered in Point III above.

It would appear that in the existing situation, the creation of a sinking fund from current income to retire the income bonds is unnecessary and prejudicial, and should not be incorporated in a plan approved by the Commission.

Point V

6. The Report errs in its recommendation that First Mortgage bondholders "should be considered as having a first lien upon practically all of the assets of the debtor" (Report, p. 52).

This recommendation in the Report is clearly contrary to the facts which appear on the face of the Report itself. Leaving out of account the persuasive showing made by the Trustee of the General and Refunding [544] Mortgage Bonds as to substantial items of physical property upon which that mortgage is asserted to be a lien, at least *pari passu* with the First Mortgage, it is undisputed that the General and Refunding Mortgage is a prior lien on property of substantial value. Moreover, the First Mortgage cannot, on any possible theory, be regarded as any lien on current assets, stated on page 7 of the Report, to amount to $7,653,809.28, including $3,290,601.55 in cash.

During the hearings before the Bureau of Finance, the position of the A. C. James Co., as a

secured creditor of the carrier, was stated to be one of unwillingness to concede that the First Mortgage bondholders had, as their counsel asserted broadly but failed to prove, a first lien upon practically all of the assets of the debtor, but as willing to concede, as a part of a fair plan of reorganization (and in the plan submitted on behalf of the A. C. James Co., it was so provided) that there should be a definite subordination of other creditors to the First Mortgage bondholders, even as to assets upon which the other creditors may now have (through holding General and Refunding Mortgage Bonds as collateral) a first lien, as an offset to certain necessary concessions on the part of the First Mortgage bondholders. This continues to be the position of this creditor. [545]

Point VI

7. The Report errs in recommending that valuable rights be alloted to the Western Pacific Railroad Corporation (Report, p. 54) although it proposes to allot to A. C. James Co., on a claim amounting with interest to $5,749,770, only $2,643,320 par value of new common stock, or less than fifty per cent of the total amount of the claim.

It is perhaps sufficient to state in connection with this exception that if the A. C. James Co. were to be given for a claim of $5,749,770, only $2,643,320 par value of new common stock, it would clearly be

a general creditor for upwards of $3,000,000, and entitled, as such, to share in any distribution to general creditors of the carrier in any sort of proceeding.

Nor can there be any doubt in the minds of anyone familiar with this situation and with the existing situation as to general interest rates, that the right which it is proposed to give to the Western Pacific Railroad Corporation as a general creditor, to buy 4% First Mortgage Bonds at their face value, with the issue presently limited to $10,000,000, and secured by a first lien upon a property fairly valued at approximately fifteen times that amount, with a bonus of $1,000 of common stock for each $1,000 bond, is a valuable right. On no possible theory can such a right be allocated to the Western Pacific Railroad Corporation while the claim of the A. C. James Co. remains unsatisfied to the extent of more than one-half its amount. [546]

Point VII.

8. The Report errs in recommending. (Report, p. 55) that the Commission find that the equity of the preferred and common stockholder of the debtor is of no value.

The factors involved in this exception have been sufficiently discussed in Point I above. It seems unnecessary to do more than to repeat here that an attempt on the part of the Bureau of Finance to solve the problem of reorganization proceeding un-

der Section 77 by asking the Commission to squeeze out in such a proceeding about one-half of the value which it heretofore found the carrier to have for rate-making purposes, in order to eliminate the preferred and common stockholders, is unsound and confiscatory beyond justification in law or equity.

Point VIII.

9. The Report errs in failing to make provision for the claim of the Western Realty Company.

Some reference has been made above to various instances of the sweeping way in which the Bureau of Finance proposes to brush aside vested equitable and legal rights without any showing of public right or interest. Its treatment of the claim of the Western Realty Company is a further example. The Western Realty Company is a creditor of the carrier in the principal amount of $50,000, which debt ranks on a parity with the debt owed to the Western Pacific Railroad Cor- [547] poration. The Bureau of Finance proposes to give the Western Pacific Railroad Corporation valuable rights in exchange for its claim, but gives nothing to the Western Realty Company, unless paragraph 10 on page 60 of the Report applies, and the debt to the Western Realty Company is to be paid by the reorganized company, as an obligation of the debtor not specifically provided for. As a matter of fact, whether or not the record discloses it, the stock of Western Realty Company has been pledged to one of the

creditors of Western Pacific Railroad Corporation, and its rights cannot be so completely ignored.

Point IX.

10. The Report errs in recommending (Report, p. 55) that any conditional rights under subscription warrants be allotted to the secured creditors in proportion to collateral held by them rather than in proportion to their actual advances.

There has heretofore been a sufficient discussion of the principle here involved, under Point II. above. Obviously, any conditional rights under subscription warrants which were allotted to the secured creditors could not properly be allotted in proportion to the collateral held by them, but must be allotted instead according to the present value of their claims upon confirmation of the plan by the judge. [548]

Point X.

11. The plan recommended is unfair and inequitable for its unjust discrimination against the A. C. James Co., is contrary to the law of the land and to the provisions of Section 77, and should be modified in accordance with the recommendations hereinafter made.

It is possible that other creditors of this carrier will protest broadly against the suggestion of the Bureau of Finance that the Interstate Commerce

Commission should itself propose a plan which differs so radically from the plans submitted by interested parties. In any such broad protest A. C. James Co. will not join. This creditor conceives it to be the right and duty of the Commission under Section 77 so to proceed; *provided the plan so proposed is fair and equitable,* and is motivated by a desire to find a sound ground upon which the minds of the interested parties may meet, rather than by a desire to effect unnecessary and drastic changes in the capital structure of the carrier, for reasons not related to the solution of its present difficulties.

This creditor believes, moreover, that if the plan proposed by the Bureau of Finance were to be modified in the respects indicated below and approved by the Commission, it would be likely to receive the necessary approval of at least two-thirds of each class of creditors.

The changes indicated, however, are, in the opinion of this creditor, the minimum changes necessary to secure a practical, fair and equitable plan and to make possible a speedy reorganization of this carrier under the provisions of Section 77. [549]

Proposed Amendments to Bureau of Finance Plan.

For the reasons set out above, it is respectfully urged that the Interstate Commerce Commission modify the plan proposed by the Bureau of Finance, in the respects specified below:

1. By increasing the issue of Fifty Year Income Mortgage 4% Bonds from the proposed principal

amount of $19,716,040 to $49,290,100; that is, to an amount sufficient to refund the entire principal amount of the outstanding First Mortgage Bonds of the carrier.

2. By authorizing an issue of $10,445,018 of Sixty Year 4% Convertible Income Debentures to refund the principal amounts owed Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co., convertible into preferred stock on the basis of fifteen shares of such preferred stock for each $1,000 Convertible Income Debentures.

3. By reducing the amount of the proposed Non-Cumulative 5% Preferred Stock from $29,574,060 par value, to $25,290,729, of which $9,623,202 would be immediately issued to fund the interest claims of the existing First Mortgage bondholders and of Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co., and $15,667,527 reserved in the treasury of the reorganized company to meet the expected conversion of the Convertible Debentures given to the secured creditors for the principal of their debt. (Here, as elsewhere in this brief, the amounts of interest stated in the Report as of December 31, 1936, are used.)

[550]

4. By eliminating from the proposed plan of the Bureau of Finance any provision for deductions from current income for capital expenditures or for a sinking fund on the income bonds.

If the above-suggested modifications in the plan proposed by the Bureau of Finance were to be adopted by the Commission, the reorganized company would issue (a) $10,000,000 (or such part thereof as might be necessary to secure the new money required for the Rehabilitation Program) of its new Thirty Year Mortgage 4% Bonds; (b) $49,290,100 principal amount of Fifty Year Income Mortgage 4% Bonds to the First Mortgage bondholders for the principal of their debt; (c) $10,445,018 in Sixty Year 4% Convertible Income Debentures to Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co., to represent the principal of their claims, allocated so as to refund their respective principal claims in full; (d) $9,623,202 par value of Non-Cumulative 5% preferred Stock (or so much thereof as may be necessary) for the unpaid interest which has accumulated on the First Mortgage Bonds and on the claims of Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co.; (e) $5,807,650 of Common Stock to the Western Pacific Railroad Corporation and to the Western Realty Company, in satisfaction of their claims (principal only), for unsecured advances; (f) $10,000,000 of the Common Stock as a pro rata bonus with such new First Mortgage Bonds as are issued; (g) the balance of the Common Stock to be allocated to the Western Pacific Railroad Corporation in recognition of the inter-

est which it has as sole stockholder in the carrier.

[551]

After these steps were taken, the capital structure of the new company (prior to any conversion of income debentures) would appear as follows:

Undisturbed Equipment Trusts, Baldwin Lease and Pullman Contract	$ 2,048,190
New Thirty Year First Mortgage 4% Bonds	10,000,000
Fifty Year Income Mortgage 4% Bonds	49,299,100
Sixty Year 4% Convertible Income Debentures	10,445,018
5% Non-Cumulative Preferred Stock	9,623,202
Common Stock	30,068,220
Total	$111,474,730

Against the above capital obligations which would be outstanding, there would be assets valued by the Interstate Commerce Commission under Section 19(a) of the Interstate Commerce Act, at $145,000,000 as of December 31, 1935, and this prior to any increase in such assets which may result from the application of the proposed $10,000,000 of new money invested under the Rehabilitation Program.

In Conclusion, A. C. James Co. respectfully urges upon the Interstate Commerce Commission that it modify the plan proposed by the Bureau of Finance so as to make possible a prompt and equitable readjustment of the capital structure of this carrier as a demonstration of the effectiveness of the machinery provided by Congress to that end, in the provisions of Section 77 of [552] the Bankruptcy Act. And A. C. James Co. respectfully asks that it

be granted an oral hearing before the Commission on the matters herein discussed.

Respectfully submitted,

ROBERT E. COULSON,
Attorney for A. C. James Co.,
Office and Post Office Address:
40 Wall Street, New York, N. Y.

ROBERT E. COULSON,
WESLEY A. STURGES,
Of counsel.

EXCEPTIONS.

1. The Report errs in recommending (pages 53 and 59) that new common stock be allotted on a dollar for dollar basis to the holders of existing First Mortgage Bonds in respect of the unpaid interest on said bonds and in not recommending the allotment in respect of such interest of securities ranking prior to the securities allotted to the junior secured creditors.

2. The Report errs in recommending (pages 53-54 and page 60) that the junior secured creditors be allotted securities ranking equally with the securities allotted in respect of the unpaid interest on the existing First Mortgage Bonds.

3. The Report errs in recommending (pages 41 and [556] 43) that interest on the new income mortgage bonds should be non-cumulative, payable only out of available net income determined on the basis of six months' income periods ending June 30 and December 31 in each year.

4. The Report errs in not recommending the allotment of new first mortgage bonds to the holders of existing First Mortgage Bonds in respect of at least a portion of their claims.

5. The Report errs in recommending (pages 52 and 59) that a bonus of 10 shares of new common stock be given to the purchaser of each $1,000 principal amount of new first mortgage bonds and in recommending (pages 54, 55 and 60) that The Western Pacific Railroad Corporation and the

junior secured creditors be given preferential rights to purchase such bonds at par and to receive such bonus in common stock.

6. The Report errs in its conclusion (page 56) that "The provision for the participation of the unsecured creditor would not discriminate against * * * the first mortgage bondholders * * * because such unsecured creditor must contribute $1,000 in cash for each new $1,000 bond and 10 shares of new common stock received."

7. The Report errs in its conclusion (page 56) that, if the new securities are allocated as recommended in the Report, "it would result in preserving the priority [557] of the first mortgage bondholders as to the principal amount of their bonds over all other existing creditors and stockholders in so far as new securities are available."

8. The Report errs in recommending (page 61) "that the Commission find that the plan as recommended herein will meet with the requirements of subsections (b) and (e) of section 77 of the Bankruptcy Act, and will be compatible with the public interest."

BRIEF.

I.

Introductory Statement.

Section 77 of the Bankruptcy Act requires, among other things, that any plan approved by the Commission pursuant to subsection (d) of that section shall be "fair and equitable," shall afford

"due recognition to the rights of each class of creditors and stockholders," shall "not discriminate unfairly in favor of any class of creditors or stockholders," and shall "conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders" (subsection (e) of Section 77).

The Report states (pages 46-47) with reference to the provisions of subsection (e): [558]

> "The language comprising those provisions has long had a settled meaning in equity reorganizations. Briefly stated it is to the effect that no plan of reorganization will be fair and equitable if it attempts to secure the rights and interests of stockholders at the expense of the prior rights of secured or unsecured creditors. Subsection (e) specifically commands that the rights of each class of creditors and stockholders be accorded due consideration."

The First Mortgage Trustees, in the brief heretofore filed on their behalf in this proceeding, contended that substantially all of the Debtor's property, except certain cash and securities therein specified, is subject to the lien of the First Mortgage as a first lien, and they asked that the Commission, in approving a plan for the Debtor pursuant to subsection (d) of Section 77, take this contention as its premise or starting point.

The findings of the Report (pages 48-52) sustain in every respect this contention of the First Mort-

gage Trustees and reach the conclusion (page 52) that

> "While due recognition must be accorded to the rights of the creditors with whom are pledged general mortgage bonds, those creditors are not entitled to the same treatment as first mortgage bond holders, who should be considered as having a first lien upon practically all of the assets of the debtor. It follows that holders of the debtor's first mortgage bonds should receive securities of a higher rank than other creditors, at least to the extent that existing conditions will permit."

The First Mortgage Trustees believe, however, that the plan recommended by the Report (hereinafter referred [559] to as the "Plan") departs in several important respects from the principle of First Mortgage priority above stated and that, to the extent that it does so depart, the Plan does not conform to the requirements of Section 77.

II.

The Plan Discriminates Unfairly Against the Holders of Existing First Mortgage Bonds in Its Treatment of Unpaid Interest on Said Bonds.

(Exceptions 1 and 2.)

The Plan provides that the holders of existing First Mortgage Bonds (hereinafter sometimes referred to as the "First Mortgage Bondholders")

shall receive, in respect of their unpaid interest, new common stock of a par value equal to the amount of such interest. The Plan further provides that the junior secured creditors (Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company) shall receive new common stock of an aggregate par value equal to the aggregate amount of their claims for principal and unpaid interest, such stock to be distributed among the individual creditors proportionately to the General and Refunding Mortgage Bonds held by them as collateral rather than proportionately to the amount of their claims.

Clearly, these provisions of the Plan discriminate unfairly against the First Mortgage Bondholders and in favor of the junior secured creditors and depart from the principle [560] of First Mortgage priority upon which the Plan is predicated.

The right of the First Mortgage Bondholders to priority in respect of their unpaid interest is not questioned by the Report; on the contrary, the Report states (page 53) that "the rights represented by unpaid interest should be recognized with the principal of the debt." Nevertheless, the Plan accords to them, in respect of their unpaid interest, neither a qualitative nor a quantitative preference. They are offered, on a dollar for dollar basis, securities of the same rank as the securities offered to the junior secured creditors.

The First Mortgage Trustees believe that the First Mortgage Bondholders should receive, in re-

spect of their accrued interest, securities of a higher rank—at least preferred stock—than those offered to the junior secured creditors.

III.

The Plan Discriminates Unfairly Against the Holders of Existing First Mortgage Bonds in Its Provision for Non-Cumulative Interest on the New Income Mortgage Bonds.

(Exception 3.)

The Plan provides that the new income mortgage bonds, to be allotted to the First Mortgage Bondholders in respect of [561] 40% of their claim for principal, shall bear interest at the rate of 4% per annum, payable semi-annually only out of available net income determined on the basis of six months' income periods ending June 30 and December 31 in each year and further provides that such interest shall be "cumulative only as against such available net income for the income period in respect of which such interest is payable" (page 43).

The discriminatory nature of these provisions becomes apparent when it is considered that the earnings of the Debtor are seasonal, being consistently much lower during the first six months of the year than in the last six months. As a result of the non-cumulative feature, "the cards are stacked" against the First Mortgage Bondholders. Except in unusually prosperous years, their chances of receiving more than a 2% annual return on their new income

mortgage bonds are slight, although the earnings on an annual basis may be more than sufficient for the payment of full 4% interest.

Furthermore, as indicated in the Report (page 22), the earnings of the Debtor fluctuate widely from year to year. Even if interest on the new income mortgage bonds were made cumulative against available net income for each annual period, the First Mortgage Bondholders would bear the full brunt of low earnings in a "lean" year without having an opportunity [562] to share in the excess earnings of a succeeding prosperous year.

So drastic a limitation upon the right of the First Mortgage Bondholders to share in the income of the Debtor discriminates unfairly against them and in favor of the junior creditors who are to receive new common stock under the Plan, and in this respect the Plan fails to afford due recognition to the rights of the First Mortgage Bondholders in respect of such income.

The First Mortgage Trustees believe that the Commission should eliminate the discrimination resulting from seasonal earnings by making interest on the new income mortgage bonds cumulative at least against available net income for each annual period. They further believe that the Commission should eliminate the discrimination resulting from fluctuations of earnings from year to year by making such interest cumulative against available net income for a reasonably longer period—not less than three years.

IV.

The Plan Discriminates Unfairly Against the Holders of Existing First Mortgage Bonds in Its Provisions Relating to the Issue of New First Mortgage Bonds.

(Exceptions 4, 5 and 6.)

An outstanding feature of the Plan is a drastic scaling down both of debt structure and of fixed and contingent [563] charges. The issue of new first mortgage bonds for the purposes of the Plan is limited to $10,000,000 principal amount, all of which are to be sold to provide new money. No new first mortgage bonds are allotted to the First Mortgage Bondholders, who are to receive securities subordinate in every respect to the new first mortgage bonds.

The Plan provides that the $10,000,000 principal amount of new first mortgage bonds shall be sold at par, with a bonus of 10 shares of new common stock for every $1,000 principal amount of bonds purchased, and it offers preferential rights to purchase the bonds on these terms to The Western Pacific Railroad Corporation (an unsecured creditor and the sole stockholder of the Debtor), to the junior secured creditors, and to the First Mortgage Bondholders, in the order named.

The First Mortgage Trustees believe that these provisions of the Plan involve an unfair discrimination against the First Mortgage Bondholders in two respects, viz.:

(a) in failing to offer them new first mortgage bonds for at least a portion of their claims, and [564]

(b) in offering to the sole stockholder and to the junior secured creditors preferential rights to purchase new first mortgage bonds on unduly favorable terms.

(a) As Regards the Failure to Offer the First Mortgage Bondholders New First Mortgage Bonds for at Least a Portion of Their Claims.

The First Mortgage Trustees believe that any plan approved by the Commission should preserve the first lien position of the First Mortgage Bondholders to the greatest extent consistent with the requirement that (to use the language of the Report) "the plan must provide a capital structure for the reorganized company which will give it a reasonable opportunity to function efficiently and continuously as a going concern" (page 36). Any plan which unnecessarily sacrifices their first lien position is not "fair and equitable" as regards the First Mortgage Bondholders.

The First Mortgage Trustees believe that the first lien position of the First Mortgage Bondholders can be preserved as to at least a portion of their claims without creating a capital structure inconsistent with the requirement above stated. For example, the issue to the First Mortgage Bondholders

of a reasonable amount of new first [565] mortgage bonds (in lieu of a like amount of new income mortgage bonds allotted to them in the Plan) would not involve any increase in either the total debt structure or the total charges—fixed and contingent—contemplated by the Plan, and the First Mortgage Trustees believe that it would not involve an undue increase in the fixed charges.

The extent to which the first lien position of the First Mortgage Bondholders can be preserved is governed, of course, by the further requirement that adequate provision should be made for obtaining new capital without exceeding the limits of a sound debt structure. The Plan limits the total authorized issue of new first mortgage bonds to $50,000,000 principal amount. With only $10,000,000 principal amount immediately required to be issued for new money, the First Mortgage Trustees believe that reasonable provision can be made for issuing new first mortgage bonds to the First Mortgage Bondholders and still leave an ample margin to meet the requirements of future capital financing.

(b) As Regards the Offer to the Sole Stockholder and to the Junior Secured Creditors of Preferential Rights to Purchase New First Mortgage Bonds on Unduly Favorable Terms.

As now contemplated by the Plan, the $10,000,000 principal amount of new first mortgage bonds to be [566] presently issued for new money will be the sole first lien on property having a value (see pages 22-23 of the Report) well over $100,000,000;

they will be issued to finance capital expenditures of a corresponding amount under a rehabilitation program calculated to put the property in excellent physical condition and to effect substantial operating economies, and they will carry a 4% fixed interest charge which, according to the findings in the Report, will have an adequate coverage of earnings. Considering these factors, it seems reasonable to believe that these bonds can be sold at not less than par without any stock bonus. Nevertheless, the Plan offers to the purchasers a bonus of new common stock aggregating 100,000 shares (out of a total authorized issue of 300,682-1/5 shares) and having an aggregate par value of $10,000,000. Moreover, the Plan offers preferential rights to purchase these bonds at par, with this stock bonus, first to the sole stockholder of the Debtor and next to the junior secured creditors.

If, as the First Mortgage Trustees believe, the $10,000,000 principal amount of new first mortgage bonds can be sold at par without any stock bonus, these provisions of the Plan discriminate unfairly against the First Mortgage Bondholders and in favor [567] of the sole stockholder and the junior secured creditors. Their effect is to permit the sole stockholder or the junior secured creditors to acquire a first lien position on the property (to the entire exclusion of the First Mortgage Bondholders), and in addition a large share of the equity, by paying no more (and possibly less) than the market value of the new first mortgage bonds. If the bonds

are purchased by The Western Pacific Railroad Corporation, the result will be a donation of new common stock to a stockholder (who is also one of the unsecured creditors) whose equity, according to the findings of the Report (page 55), has no value; if the bonds are purchased by the junior secured creditors, the gratuitous increase in their allotments of new common stock will accentuate the discrimination in their favor which is discussed under Point II of this brief.

The conclusion in the Report (page 56) that "The provision for the participation of the unsecured creditor would not discriminate against * * * the first mortgage bondholders * * * because such unsecured creditor must contribute $1,000 in cash for each new $1,000 bond and 10 shares of new common stock received" can be accurate only if the value of the bonds and stock received does not exceed the amount of cash contributed. [568]

The First Mortgage Trustees believe that the Commission should give effect to the principle of First Mortgage priority as regards the issue of new first mortgage bonds, (a) by providing for the issue of new first mortgage bonds to the First Mortgage Bondholders in respect of at least a portion of their claims, and (b) by eliminating stock bonuses in connection with the sale of the $10,000,000 principal amount of new first mortgage bonds to be sold to provide new money, except to the extent that such stock bonuses may, in the judgment of the

Commission, be required to insure the salability of the bonds at par.

V.

To the Extent That the Plan Fails to Give Effect to the Principle of First Mortgage Priority, It Fails to Meet the Requirements of Section 77 of the Bankruptcy Act.

(Exceptions 7 and 8.)

The foregoing discussion has indicated certain respects in which the Plan departs from the principle of First Mortgage priority upon which it is predicated. In these respects the First Mortgage Trustees believe the Plan fails to meet the requirements of Section 77 of the Bankruptcy Act, in that

[569]

(a) it is not fair and equitable as regards the First Mortgage Bondholders,

(b) it does not afford due recognition to the rights of the First Mortgage Bondholders,

(c) it discriminates unfairly against the First Mortgage Bondholders and in favor of junior creditors and stockholders, and

(d) it does not conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders.

The First Mortgage Trustees also believe that in these respects the Plan is not compatible with the public interest.

VI.

Conclusion.

The First Mortgage Trustees ask that the Commission, in approving a plan for the Debtor pursuant to subsection (d) of Section 77 of the Bankruptcy Act, give full effect to the principle of First Mortgage [570] priority which the Report adopts as its premise or starting point.

Respectfully submitted,

I.

Introductory Statement.

A. Scope of this brief.

Western Pacific Railroad Company (hereinafter called the Debtor) filed its petition under Section 77 of the Federal Bankruptcy Act on August 5, 1935.

The Debtor on February 8, 1936, filed its plan of reorganization, hereinafter called the Debtor's Plan.

Two additional plans have been submitted, a plan prepared by the Bondholders' Committee (hereinafter called the Bondholders' Plan) and a plan prepared on behalf of A. C. James Co. (hereinafter called the James Plan). [580]

The proposed Report of the Bureau of Finance rejects all three of these plans and recommends a wholly new plan (hereinafter called the Bureau Plan).

It is the firm belief of the Bondholders' Committee that the Bondholders' Plan, as originally filed, but in any event with the modifications hereinafter indicated, both (1) is compatible with the public interest and (2) affords due recognition to the rights of each class of security-holders.

It is the equally firm belief of the Bondholders' Committee that the Bureau Plan neither (1) is compatible with the public interest nor (2) affords due recognition of the rights of each class of security-holders.

This brief will discuss only the issues between the Bondholders' Plan and the Bureau Plan. The Bond-

holders' Committee and its counsel therefore rely upon, and request the Commission carefully to examine, their earlier brief of January 9, 1937, in respect of the issues between the Bondholders' Plan on the one hand and the Debtor's Plan and the James Plan on the other hand, particularly since on many of them the proposed report of the Bureau of Finance is supported by, and entirely in accord with, the arguments advanced in that brief.

B. Present Capital Structure.

The Debtor was organized in 1916 to acquire in reorganization the properties of its predecessor. In the 1916 reorganization all bonds (aggregating $75,000,000) and all other debt of the predecessor were wiped out, as debt, and the Debtor's presently outstanding stock was issued in lieu thereof. $20,000,000 principal amount of the Debtor's First Mortgage Bonds were issued in the 1916 reorganization for new money. Commencing in 1921, additional First Mortgage Bonds have been issued for [581] capital expenditures, all with the approval of the Commission under Section 20a of the Transportation Act. Junior General and Refunding Mortgage Bonds have also been issued, with the approval of the Commission, for capital expenditures, and in turn pledged to secure notes for loans by Reconstruction Finance Corporation, hereinafter called RFC; The Railroad Credit Corporation, hereinafter called RCC; and A. C. James Co., hereinafter called ACJ. In addition, the Debtor has certain unsecured

unfunded obligations to its sole stockholder, Western Pacific Railroad Corporation, hereinafter called the Western Pacific Corporation, and to the latter's subsidiary, Western Realty Company (Ex. 105).

As a result, the capital structure of the Debtor as of January 1, 1937, was:

Equipment obligations	$ 2,408,190
First Mortgage 5% Bonds	49,290,100
Accrued Interest	8,214,766
RFC Note	2,963,000
Accrued Interest	426,753
Secured by pledge of $10,750,000 General and Refunding Bonds.	
RCC Note	2,482,148
Accrued interest	114,156
Secured by pledge of $4,000,000 General and Refunding Bonds.	
James Note	4,999,800
Accrued interest	749,870
Secured by pledge of $4,249,500 General and Refunding Bonds.	
Unsecured obligations to Western Pacific Corporation (including $56,667 to its subsidiary, Western Realty Company) including interest	7,245,274
Preferred Stock	28,300,000
Common Stock	47,500,000

[582]

C. Objective of the Reorganization.

The objective of the reorganization is to create a sound capital structure, which will restore the credit of the property and enable it to perform its public function, and which at the same time, through the character and basis of exchange of the new securities, will provide for the distribution of

income of the reorganized company in accordance with the relative priorities of the various classes of the Debtor's securities.

A prospective debtor's credit lies in the state of mind of his prospective creditors. Railroad credit must therefore depend upon the state of mind of the prospective investors in railroad bonds. The Bondholders' Committee is acting for a substantial number of life insurance companies and other institutions which in the past have been among the principal investors not only in the securities of the Debtor but in the securities of other American railroads.

This case is the first involving a major railroad in reorganization to come before the Commission under Section 77. The action of the Commission in respect of the treatment of First Mortgage Bonds heretofore issued under the Commission's aegis for very recent capital expenditures will have a decisive effect, not merely upon the credit of the Debtor and other railroads in reorganization, but upon the credit of all American railroads.

The Commission should, and it is believed will, approach the problem involved in this proceeding in the spirit expressed by the Commission's own decision in the O'Fallon case as follows (Excess Income of St. Louis & O'Fallon Ry. Co., 124 I. C. C. 3, 30):

> "The end in view, as we have stated, is the maintenance of an adequate national railway transpor- [583] tation system. Such a system,

so long as it is privately owned, obviously cannot be provided and maintained without a continuous inflow of capital. Obviously, also, such an inflow of capital can only be assured by treatment of capital already invested which will invite and encourage further investment."

D. Summary of the Bondholders' Plan and the Bureau Plan.

That the commission may have in this brief a summary comparison of the Bondholders' Plan and the Bureau Plan, the following table is presented showing the capitalizations, charges and distribution of new securities under the two plans: [584]

1 2 3 2 2 5 2 5
7 4 0 7 5 0
4 2 6 7 5 3
5 2 0 5 3 7

Interest					8,214,766 (100%)	$ 8,214,766 (100%)		
R. F. C. Note				2,963,600 (100%)			107,500 (317%)[2]	
R. C. C. Note				2,482,148 (100%)			40,000 (105%)	
A. C. J. Note						$ 4,999,500 (100%)	42,495 (74%)	
Western Pacific R. R. Corp.							339,995[3] (Warrants)	
For New Money	10,000,000	10,000,000					Not less than 150,000 nor more than 300,000	
Total	19,858,020	10,000,000	19,716,040	~~19,716,040~~ 54,735,248	27,930,806	~~39,574,060~~ 13,214,566	No less than 339,995 shares nor more than 489,995 shares	
Fixed Interest Charges	794,320	400,000		2,169,410 ~~788,640~~		660,728. ~~1,478,703~~		
Contingent Interest Charges			985,802					
Preferred Dividends					1,675,848			

1 $2,048,190 undisturbed both plans. Annual charges thereon amount to $86,473.

2 No par value shares are taken at $100 each in computing these percentages.

3 150,000 shares were covered by warrants for stock allotted to new money; 189,995 shares are allotted to RFC, RCC and ACJ and the warrant price is such as to pay off the RFC Note, RCC Note and ACJ Note.

4 Both plans give the opportunity to provide the new money first to Western Pacific Corporation, then to RFC, RCC and ACJ as a group, and then to the First Mortgage bondholders. The Bureau Plan, however, makes no distinction in the terms offered to the diverse classes of the Debtor's security holders, and in order to make the successive offerings equivalent to an underwriting and insure the raising of the new money, the Bondholders' Plan makes the second and third offerings progressively more favorable to the respective offerees.

II.

Both the total capitalization and the character of the new securities proposed by the Bondholders' Plan provide a sound capital structure, compatible with the public interest, and permit due recognition of the rights of each class of securityholders, while both the total capitalization and the character of the new securities proposed by the Bureau Plan are so drastically restricted as to impair railroad credit in a manner not compatible with the public interest, and as to prevent due recognition of the rights of the respective classes of securities. (See Exceptions 1 to 25.)

A. The Statutory Requirements.

Section 77 requires that a railroad reorganization plan shall be "compatible with the public interest." It also requires that it shall be "fair and equitable," that it shall "afford due recognition to the rights of each class of creditors and stockholders," that it shall "not discriminate unfairly in favor of any class of creditors or stockholders," and that it shall "conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders."

As the Bureau's proposed Report points out (p. 36), Section 77 provides no standards by which the public interest shall be determined, with the sole exception that it requires that a plan shall "provide for fixed charges * * * in such amount that, after

due consideration of the probable prospective earnings of the property in light of its earnings experience and all other relevant facts, there [585] shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof."

The Bondholders' Committee concedes, indeed asserts, that, notwithstanding this lack of specification of standards, the new capitalization must be "sound" and that the Commission should not approve a capitalization which does not bear a reasonable relationship to *all* the relevant factors and "give reasonable opportunity to function efficiently and continuously as a going concern." It asserts, however, that any determination by the Commission which takes regard only of past earnings and those which can be expected in the *immediate* future, and which disregards the other relevant factors is itself not compatible with the public interest.

It is just as important "in the public interest" that a railroad property shall not be grossly undercapitalized in a reorganization proceeding as it is important that it shall not be over-capitalized. It is just as important "in the public interest" that the new securities to be issued by the reorganized company shall not be so restricted in their rights, either as to principal or as to income, as to make it appear that the Commission has no confidence in American railroads, as it is important that the character of the securities shall not be such as to impose a hopeless debt burden or give to equity

securities such impossibility of future return that they will be mere tokens for stock market speculation.

Section 77 was not intended to abrogate as to railroad reorganizations the Biblical injunction to be temperate in all things.

Neither the railroad industry as a whole nor the Western Pacific in particular is obsolete. The railroads generally, and Western Pacific itself, will have need of future capital. The public policy of the United States is [586] that that capital shall be furnished by private investors. But private investors cannot be expected to furnish that capital if the Commission is to impose standards of capitalization in reorganization to which not even the soundest of the American railroads today conform, and which indicate to prospective investors that the cycle from a First Mortgage bond issued with the approval of the Commission, and sold at a price approved by the Commission, to stock under a reorganization plan prepared by the Commission itself is a matter of approximately two decades.

B. The total capitalization contemplated by the Bondholders' Plan is not excessive; that contemplated by the Bureau Plan is unduly low. (See Exceptions 1 to 5.)

The total capitalization proposed by the Bondholders' Plan is less than that proposed either by the Debtor's Plan or by the James Plan. It contemplates securities having a par value of $69,-

553,056, plus 339,995 shares of Capital Stock without par value.*

In contrast to this, the Bureau Plan limits the capitalization to $91,406,510, in securities all of par value.

Were the character of the new securities which the Bureau Plan offers for the present First Mortgage Bonds, and the terms of that offer, such as to recognize the priority of those Bonds as against other creditors, the bondholders would not be directly aggrieved by this drastic reduction in total capitalization, since the amount is large enough to meet all the bondholders' prior claims. However, as will hereinafter be pointed out, the Bureau Plan uses this small permitted capitalization as a justification, first, for refus- [587] ing to permit the creation of priority securities, even preferred stock, adequate in amount to recognize the bondholders' priorities, and second, for unduly limiting the amount of permissible fixed and contingent interest obligations in the guise of maintaining a conservative debt ratio.

The Bondholders' Committee's further interest in the imposition of this low total capitalization lies

---

*A possible additional maximum of 150,000 shares of Common Stock without par value is provided for issue in connection with the underwriting of the $10,000,000 of new money, but, as pointed out in the January, 1937, brief on behalf of the Bondholders' Committee, it is not believed that the issue of this additional 150,000 shares will prove to be necessary.

in the fact already pointed out that if the Commission is to have such a pessimistic attitude toward railroad properties, private investors cannot be expected to look with favor upon railroad securities.

As of December 31, 1935, the investment in the properties of the Debtor's system less accrued depreciation aggregated $146,940,649, and the Commission's valuation for rate making purposes of those properties aggregated $144,619,851 (Exs. 11, 29, 30, 59). Approximately $3,700,000 expended in connection with the Debtor's rehabilitation program will represent an addition to both these items (Ex. 38).

This means that the Bondholders' Plan contemplates that the aggregate new securities having par value shall represent but 46% of such investment and but 47% of the Commission's valuation, and that even if the no par value Common Stock be treated as having a capital value of $100 per share, the total capitalization will aggregate but 69% of such investment and but 70% of the Commission's valuation.

In finding that this seemingly conservative total capitalization proposed by the Bondholders' Plan is not compatible with the public interest, and proposing that total capitalization, all with par value, shall be limited to but 61% of investment less depreciation and but 62% of the Commission's valuation, [588] the proposed Report has imposed standards which, if applied to other American railroads, would demonstrate that even those capital struc-

tures generally regarded as the most sound violate the standards of public interest. Approval of the suggested standards by the Commission will constitute such a shock to railroad credit as to render doubtful the ability of any railroad hereafter to sell any securities on a favorable basis, particularly if issued for more than 50% of future additions and betterments.

C. The aggregate of First Mortgage Bonds and fixed charges contemplated by the Bondholders' Plan are well within all statutory requirements; those proposed by the Bureau Plan are unduly low. (See Exceptions 6 to 12.)

The institutional investors represented by the Bondholders' Committee regard it as important that the Commission adopt standards of reorganization which will permit them to retain their investments in the railroad field as well as to invest some of their funds in that field in the future. They are therefore interested in having as large a part of their present investment remain a First Mortgage fixed charge as sound principles will permit, and they are alarmed at the pessimism with respect to the future of American railroads indicated by the relationship of fixed charges to past and present earnings which the Bureau Plan requires to constitute the "adequate coverage" required by Section 77.

1. The Debtor's "earnings experience."

The consolidated net income of the Debtor's system available for interest on funded debt for the

years 1926-1930 was reported as follows (Ex. 29, S. 9): [589]

1926	$4,759,282
1927	2,647,494
1928	2,964,371
1929	2,529,846
1930	1,552,487

Such income for the depression years and for 1936 as reported, as adjusted by the Bureau, and as adjusted as required by "relevant facts" hereinafter discussed, was as follows (Ex. 29, S. 8, 9; Ex. 39; Report pp. 21, 39):

	As Reported	As Adjusted by Bureau	Adjusted in Light of "Relevant Facts"
1931	186,708 Deficit	850,000 Deficit	460,350
1932	252,706	400,000 Deficit	489,075
1933	674,007	None	1,175,628
1934	1,084,244	500,000	1,418,527
1935	805,589	250,000	1,495,803
1936	181,102	1,766,682	1,902,033
Average 1931-1935	525,967	100,000 Deficit	1,007,876

The difference between the 1936 earnings as stated by the Bureau, and those here asserted, represents solely the failure of the Bureau to add back $135,401 representing amortization of bond discount charged against reported earnings. This apparently was an oversight as the proposed Report recognizes the propriety of such an adjustment (pp. 20, 39).

While the proposed Report does not state exactly how its adjusted earnings for the years 1931-1935, inclusive, were arrived at, its discussion indicates that they were computed as follows: [590]

	1931	1932	1933	1934	1935
Reported Earnings (Ex. 29, S. 9)	$186,708 Def	$252,706	$674,007	$1,084,244	$805,589
Add:					
Amortization Bond Discount (Report, P. 20, 39)	140,000	140,000	140,000	140,000	140,000
	46,708 Def	392,706	814,007	1,224,244	945,589
Deduct:					
Social Security & Retirement Taxes (Report, P. 20)	488,633	365,498	331,149	257,345	275,000
Deficiency in Normal Maintenance	314,659	427,208	482,858	466,899	420,589
	804,392	792,706	814,007	724,244	695,589
Adjusted earnings (Rep., P. 39)	850,000 Def	400,000 Def	None	500,000	250,000

Adjusted earnings (Rep., P. 39)	850,000 Def	409,000 Def	None	500,000	250,000

For reasons hereinafter explained, it is submitted that the Bureau's adjustment is erroneous and that a true picture of the "earnings experience" of the Debtor can be arrived at only by the following adjustments:

	1931	1932	1933	1934	1935
Reported Earnings (Ex. 29, S. 9)	$186,708 Def	$252,706	$ 674,007	$1,084,244	$ 805,589
Add:					
Amortization of Bond Discount (Ex. 29, S. 23, 28)	124,323	130,599	134,462	134,500	135,517
Rehabilitation Expenditures (Ex. 29, S. 8, 9)	122,735				436,036
RR. Retirement Taxes (Exs. 58, 59)				97,683	51,593
Northern California Extension (Ex. 39)	400,000	400,000	400,000	400,000	400,000
Total	460,350	783,306	1,208,469	1,716,427	1,282,735
Deduct:					
Credit RR Retirement Taxes					149,267
Deficiency in Normal Maintenance (Based on 33% maintenance ratio)		294,231	32,841	297,900	183,665
Adjusted Earnings	460,350	489,075	1,175,628	1,418,527	1,495,803

Considering first the necessary additions to reported income:

The Bureau computation adds back to reported earnings for amortization of bond discounts a flat $140,000 for each of the years concerned (Report, pp. 20, 39). While this is the approximate amount, the immediately foregoing table sets forth the exact amount. [591]

The Bureau computation fails to add anything back during these years for rehabilitation expenditures, although it concedes the propriety of such an adjustment (R. p. 21), and makes an adjustment on that score of the 1936 reported earnings. With reference to this item for 1935, the proposed Report states (p. 21) that "no substantial amount of expenditures was made on account of the rehabilitation program in 1935."

The fact (Ex. 29, S. 8) is that the rehabilitation expenditures in 1935 (equipment and 100 miles of heavy rail) were $436,036. The record likewise indicates that in 1931 the amount of expenditures made in an effort to overcome existing deferred maintenance amounted to $122,735 (Ex. 29, S. 9; Ex. 34; Report, p. 19). The foregoing amounts, therefore, on the principles established by the proposed Report, should have been added back, and are so added in the immediately foregoing table.

While the Bureau computation dealt, on the side of deductions, with the item of Social Security and Railroad Retirement taxes, and the exact method of its computation is difficult to determine from the

Report, proper accounting would seem to require adding back to reported earnings for 1934 and 1935 the amounts charged for those taxes in those years, and deducting from 1935 reported earnings the amount credited on the books of the Debtor in that year. Accordingly, this adjustment has been made in the foregoing computation.

The Bureau's analysis of "earnings experience" also overlooks the fact that during a part of the period analyzed, the Northern California Extension, a substantial revenue producer, was not even in operation. That line commenced operation November 10, 1931, and it was not until some time thereafter that the Debtor began to [592] realize substantial additions to its revenues arising from that Extension. Indeed, the Report recognizes (p. 20) that the earning power of the Extension is not reasonably reflected in the earnings reported for 1932 and 1933, but its computation makes no allowance for that fact.

Since, therefore, the reported past earnings of the Debtor represent the "earnings experience" of only a part of the property to be embraced in the system of the Debtor as reorganized, a fair picture of such "earnings experience" must include an adjustment by adding to reported earnings an amount reasonably to be expected from the Northern California Extension after that line has been in use sufficiently long to have become a fully seasoned and developed route.

In referring to the earning capacity of the Northern California Extension, Mr. Elsey, President of the Debtor, said in part (Ex. 39):

> "In order to make a true and accurate estimate of the earning power of the Western Pacific Railroad Company, restated retroactively for the period 1930 to 1934, inclusive, it would be necessary in the judgment of the undersigned to increase in each of said years the income available for the payment of fixed charges by an amount not less than $500,000, which would represent the difference between the net income actually received from the Northern California Extension during the years referred to and the net income which can reasonably be expected from this line during a similar period after the line has been in use long enough to have become a fully seasoned and developed route."

It is clear from Mr. Elsey's statement that the same would hold true for the year 1935, his comments having been confined to the years 1930 to 1934 because his Exhibit 39 [593] deals with certain phases of the Report of the Commission's Bureau of Accounts which was filed as a part of the record on August 6, 1936. That Report covers the years 1930-1934. It will be noted that in Mr. Elsey's judgment earnings available for fixed charges should be increased by not less than $500,000 per year. However, in order to be conservative, that amount has been reduced 20%, or to $400,000, in the computation above suggested.

Considering next the necessary deductions from reported income:

In making its computation, the Bureau adjusted the past earnings downward to take into account the expense of recently enacted legislation such as the Social Security tax and the tax under the Railroad Retirement Act. Assuming that any such deduction would be justifiable, the Bureau's adjustment seems to have used the rates provided for in the 1935 Act (p. 20). Those rates are substantially higher than those for the next ten years as required by the 1937 Act. It appears, too, that in computing the Social Security tax the maximum rate has been used for each of the years instead of the sliding scale of rates provided for in the Act. Accordingly, even were some such deduction proper, the deductions made by the Bureau are approximately some $75,000 to $150,000 per annum too large.

But it is submitted that no such deduction should have been made.

These items, of course, must be taken into account with respect to *future* earnings, but it presents a wholly erroneous picture of "earnings experience" to attempt to apply them to past earnings for years in which they were not in effect without taking into account any credits which may be expected in the future to offset them for the years in which they will be in effect. To make such a deduction, without making the offsetting credits, as does the Bureau, [594] necessarily assumes that increased costs,

therefore make improper the deduction of those taxes from past earnings to determine "earnings experience." Among these factors are: the continued increase in earnings which has resulted from the opening of the Dotsero Cutoff, the probability of increased business resulting from the proposed entry of the Burlington into the reorganization of the Denver & Rio Grande, the Debtor's principal connection on the East, and the reduction in transportation costs and maintenance expenditures due to the rehabilitation program.

The Bureau's adjustment also made deduction from reported earnings to reflect the admitted deficiencies in the normal maintenance in the depression years (Rep., pp. 38, 39). That this factor requires an adjustment is conceded, but it is believed that the manner of its computation by the Bureau was erroneous. [596]

The Report is silent as to the amounts of such adjustment and the manner in which such amounts were determined. However, by working from the known to the unknown, it is readily determined that the Bureau deducted for maintenance, in 1931, $314,659, in 1932, $427,208, in 1933, $482,858, and in 1934, $466,899. Since the Report is silent upon the amount of the adjustment for Social Security and Railroad Retirement taxes in 1935, we have been unable to determine accurately the amount of the deduction made by the Bureau either for such taxes or for deficiency in maintenance. The sum of the two deductions is ascertainable, the amount thereof being

$695,589. Assuming $275,000 to be the deduction for the Social Security and Railroad Retirement taxes (a wholly reasonable assumption) the amount of deduction in respect of maintenance would be $420,589.

A simple mathematical calculation reveals that the ratio of the Bureau's normal maintenance to operating revenues in each of the depression years closely approximated 36%. In only one year prior to 1936 has the System's maintenance ratio equalled or exceeded 36%. In 1929 such ratio was 36.677%. In that year the Debtor and its subsidiaries, Sacramento Northern and Tidewater Southern, were in the midst of a vast rehabilitation program. Maintenance expenditures in 1929 aggregated $6,828,740, of which $1,305,681 were in connection with the program (Ex. 29, S. 9). This rehabilitation program was started in 1927 and continued through 1930 with a slight carry-over in 1931 (Ex. 29, S. 9). The average maintenance ratio of the System during the 1927 to 1930 period was 35.6%. It seems quite clear, therefore, that the Bureau's figures for normal maintenance, which represent a maintenance ratio of 36%, are decidedly too high and that the deductions made by the Bureau for the defi- [597] ciency in normal maintenance were excessive. This is particularly true when due consideration is given to the effect of System expenditures of $10,105,138 made for rehabilitation in the years 1927 to 1931, inclusive, of which $6,087,193 were charged to capital accounts (Ex. 29, S. 21, 24, 27).

resulting from such legislation, could not in the past have been offset, and cannot in the future be offset, by increased revenues, resulting from increased rates or otherwise. In so assuming, it plainly erred.

It can hardly be doubted that neither Congress nor the Commission would have imposed these burdens on the railroads during the depression years or that both Congress and the Commission contemplate that the cost of these additional burdens shall in some manner be compensated by increased revenues. It therefore produces a wholly unfair picture of the "earnings experience" to deduct from reported earnings the theoretical costs of these items without taking into account on the side of gross revenues the probable compensating factors.

That increased costs resulting from Federal and State legislation and from wage increases may have to be compensated by an increase in rates has been publicly recognized by at least one member of the Commission. Speaking on September 1, 1937, at Salt Lake City at the 49th annual meeting of the National Association of Railroad and Utilities Commissioners, Commissioner Lee, as quoted by the press, said:

> "We must make the best of the situation in which we find ourselves. We are tied up with the railroads and they must earn enough to pay their expenses and something additional.
>
> "We in the West, are very much interested in our freight rates, and it is necessary that

they be made as low as reasonably possible. However, the fact must not be overlooked that a great part of the expenses of the railroads is a matter over which they have but little, if any, control.

"Congress imposes expenses upon them and so do the states. It is not my function or purpose to [595] offer any criticism of our national or state authorities in the enactment of legislation which results in increasing the expenses of the railroads. It is to be expected that there would be disagreement as to the advisability of such measures. I do not propose to go into that. But I am interested in the level of railroad rates which our producers have to bear, and I am interested in carrying out the mandate of Congress that this country be afforded adequate and efficient railroad transportation service.

"The point I want to make is that the railroads will include in the rates which they impose every dollar they are required to spend. If increases in their operating expenses are made necessary, we must expect that such increased expenses will be reflected in the rates we will have to pay."

Quite apart from any possible increase in rates, there are other factors which in the future will tend to offset the application of the Social Security tax and the Railroad Retirement Act tax and which

The record shows that, after the completion of the rehabilitation program in 1938, and on the basis of estimated earnings for 1939 and 1940, a normal maintenance ratio will approximate 30% (Ex. 29, S. 2). Witness Engelbright testified that a maintenance ratio of 33% would more than take care of normal maintenance (R. 236).

A conservative adjustment for the item of subnormal maintenance would, therefore, seem to be effected by a computation on the basis of a normal 33% ratio. This basis has been used in the adjustment above suggested, resulting in deductions of $294,231 in 1932, $32,841 in 1933, $297,900 in 1934, and $183,665 in 1935. No deductions were required in 1931, expenditures in that year for maintenance, exclusive of rehabilitation, having amounted to $5,052,625, and the maintenance ratio in respect thereof having been 34.02%.

Accordingly, in determining whether there is "adequate coverage" for the proposed fixed charges of the Debtor as reorganized, the "earnings experience" of the Debtor should be taken as indicated by the figure set forth in the last column on page 11, rather than by the figures taken by the proposed Report.

Both the Bondholders' Plan and the Bureau Plan contemplate that $2,048,190 of equipment obligations outstanding as of January 1, 1937, and involving fixed charges of $86,473, shall remain undisturbed. [598]

The Bondholders' Plan contemplates that in addition there shall be issued in the reorganization $10,000,000 of First Mortgage 4% Bonds to provide the necessary new money and $9,858,020 First Mortgage 4% Bonds to provide 20% of the principal amount of the present First Mortgage debt. The Bondholders' Plan therefore contemplates total fixed charges of $880,793.

It will be noted that these fixed charges were more than three times covered by the average earnings of the years 1926 to 1930, inclusive, that they were materially more than covered by the average earnings as properly adjusted for the years 1931 to 1935, inclusive, and, that after making such adjustments, they were covered with a margin of 61% in 1934, of 70% in 1935, and of more than 115% in 1936.

Certainly these fixed charges contemplated by the Bondholders' Plan have the "adequate coverage" based on "earnings experience" which Section 77 requires.

The Bureau Plan, on the other hand, permits, in addition to the equipment obligations, the issue in the reorganization, of but $10,000,000 First Mortgage 4% Bonds to provide new money, thus permitting fixed charges limited to the low amount of $486,473.

This means that the Bureau Plan requires for compliance with the test of "adequate coverage" based on "earnings experience," average earnings for the years 1926 to 1930, inclusive, of 5.94 times

the proposed fixed charges, average earnings, as adjusted, for the years 1931 to 1935, inclusive, of 2.07 times, average earnings, as adjusted, for the years 1934 to 1936, inclusive, of 3.30 times, and earnings for the year 1936 of 3.91 times.

Certainly the imposition of any such limitation upon permissible fixed charges goes far beyond the requirements of "adequate coverage" based on "earnings experience." [599]

Again, the application of any such standard generally would indicate that a substantial number of railroads generally regarded as conservatively capitalized, and as having a conservative ratio of debt to stock, are in need of reorganization.

For example, the fixed charges of the Pennsylvania were covered by average earnings for the years 1934 to 1936, inclusive, only 1.34 times, those of the Santa Fe only 1.68 times, and those of the Burlington only 1.40 times.

Again, the fixed charges of the Pennsylvania were covered by earnings for the year 1936 only 1.49 times, those of the Santa Fe only 1.77 times, those of the Burlington only 1.54 times and those of the Union Pacific only 2.51 times.

Thus the example of these eminently sound roads supports the "adequacy" and conservatism of the "coverage," based on "earnings experience," of the fixed charges proposed by the Bondholders' Plan and demonstrates the extreme reduction of fixed charges contemplated by the Bureau Plan.

Not only is there no necessity, from the standpoint of earnings experience, that the First Mortgage obligations and fixed charges should have the large coverage which the Bureau Plan requires, but in the light of the experience of the last two years, it may well be doubted whether the Bondholders' Plan itself did not reduce the proposed fixed charges materially below those required by the rule of "adequate coverage".

2. "Probable prospective earnings".

When the problem of the permissible amount of fixed charge obligations is approached from the standpoint of "probable prospective earnings", whether for the imme- [600] diate future or for the long term future, the unfairness of the proposals of the Bureau Plan becomes increasingly apparent, and the blow of those proposals to railroad credit increasingly aggravated.

The consolidated income available for interest as estimated in the forecast last filed by the Debtor in this proceeding was as follows (Ex. 38):

1936	$1,521,386
1937	2,180,586
1938	2,738,886
1939	3,365,836
1940	3,769,836

These figures are lower than those used in the proposed Report (p. 21) which are those from Statement 2 of Exhibit 29, an Exhibit revised by Exhibit 38, from which the above figures were taken.

The proposed Report gives little credence to these estimates, characterizing them as resting "upon uncertainties" (p. 16) and as "unduly optimistic" (p. 22). Of course, all estimates for the future must involve some uncertainties. It was because the Bondholders' Committee believed that the estimates of the officers of the Debtor might be "unduly optimistic" that the Bondholders' Plan contemplated the very low amount of fixed charges which it does.

However, whereas in June, 1936, the officers of the Debtor estimated that the 1936 system earnings available for interest would aggregate $1,521,386 and that those for 1937 would aggregate $2,180,586, the earnings actually realized in 1936 (after the adjustments conceded by the proposed Report to be proper, pp. 20, 21, 39) aggregated $1,902,033, or 25% in excess of the Debtor's estimate, while those for 1937, based on actual experience to Sep-
[601] tember 1, 1937, are now expected to aggregate $2,600,000, or 20% in excess of the Debtor's estimate.

It would therefore seem that not only the proposed Report, but even the Bondholders' Committee, were unduly pessimistic and that the proposed Report is unjustified in characterizing the estimates as "unduly optimistic".

The fixed charges contemplated by the Bondholders' Plan clearly have "adequate coverage * * * after due consideration of the probable prospective earnings". They are covered by the now probable

1937 earnings with a margin of 194% and by the average estimated earnings for the years 1937 to 1940, inclusive, by a margin of 254%.

The Bureau Plan, however, requires that fixed charges shall be limited to an amount which will be covered by the now probable 1937 earnings with a margin of 434% and by the estimated earnings for the years 1937 to 1940, inclusive, with a margin of 541%. Again the standard of "adequate coverage * * * after due consideration of the probable prospective earnings," imposed by the Bureau Plan goes far beyond that prescribed by Section 77 and is such as to shock the confidence of the investor in the future of railroad securities.

But again, the proposed Report seeks to justify its pessimistic attitude toward future earnings coverage by suggesting adjustments for various items of expense such as taxes under the recent Federal legislation and probable wage increases, without giving any recognition to probable offsetting factors such as the hope of recapture of substantial amounts of traffic from motor trucks, increased rates which the Commission must necessarily authorize to meet rising costs and the possibility that the growth of California territory served by the Debtor's system, including recently constructed branches, and the revenue producing possibilities of the Dotsero Cut-[602] off and the Northern California Extension may have been under-estimated rather than over-estimated. The actual experience of the last two years (1936 and 1937) would seem to indicate this latter factor to be a probability.

3. No reduction of the fixed charges contemplated by the Bondholders' Plan is necessary to effect the sale in the reorganization of $10,000,000 First Mortgage 4% Bonds at par.

The Bureau Plan, as already indicated, limits the new First Mortgage Bonds to those to be sold to provide the $10,000,000 of necessary new money, and then accentuates its hopelessness as to the investment character of railroad bonds by adding (p. 52), "To facilitate the sale of the bonds at par, it is recommended that the plan provide that 10 shares of the new Common Stock be given to the purchaser of each $1,000 principal amount of the new bonds." This Common Stock bonus constitutes approximately one-third of the entire equity in the Debtor's property as reorganized, subject only to prior securities aggregating $61,338,290 in principal amount and to $2,753,818 in total prior charges, most of the latter having also (unnecessarily, as will hereinafter be pointed out) been made non-cumulative.

There is not the slightest evidence in the record to support either the inference that the First Mortgage Bonds contemplated by the Bondholders' Plan would not be saleable at par or that any such bonus would be necessary to support the sale at par of such a First Mortgage bond as that contemplated by the Bureau Plan.

The fixed charges under the Bondholders' Plan constitute but 46% of the actually realized available income [603] for 1936 and but 34% of that now

estimated for 1937. Its First Mortgage Bonds will constitute a first lien at the rate of but $8,665 per mile of the Debtor's system and of but $12,450 per mile of main line first track.

The Bureau Plan limits the First Mortgage Bonds to but $4,365 per system mile and $6,270 per mile of main line first track, with fixed charges of but 25% of available income for 1936 and 18% of that now estimated for 1937.

That, but for the injury to railroad credit which would result from the imposition of the standards contemplated by the Bureau Plan, bonds of the character proposed by the Bureau Plan would not only not require the exaggerated Common Stock bonus proposed by the Bureau Plan to enable them to bring par, but would actually command a premium without any such bonus, is evidenced by the record of recent sales on the New York Stock Exchange of comparable bonds.

The following bonds, which are outstanding in amounts in excess of $10,000,000, and which, although because they have been outstanding for substantial periods of time and have become qualified as legal investments for savings banks, are otherwise comparable for the present purpose, are but a few instances of bonds recently selling on an interest yield basis of 4% or less. They had as to 1936 income the following earnings coverage and are outstanding at the following rates per mile of road covered by their lien. [604]

4% Bonds	Last sale, week ending Sept. 23	Outstanding and pledged including prior liens per mile of road ①	Times interest earned on issue in 1936 ①	Times fixed charges earned in 1936 ①

The Bondholders' Committee believes that the foregoing facts establish the conservatism of the provisions of the Bondholders' Plan with respect to First Mortgage Bonds and fixed charges and that the Commission should approve those provisions of the Bondholders' Plan without modification.

It should also be pointed out in this connection that the Bondholders' Plan itself provides for the adjustment of the coupon rate upon the $10,000,000 of First Mortgage Bonds to be sold to provide the new money, in the light of money conditions at the time of the sale and that it also provides, as will be more specifically discussed later in this brief (infra, pp. 44-45), insurance of the raising of the new money by a sliding scale of offers to the Debtor's [605] securityholders in inverse order of their priority, and by provisions for underwriting.

D. The total interest charges, both fixed and contingent, contemplated by the Bondholders' Plan are conservative and compatible with the public interest, in the light of both "earnings experience" and "probable prospective earnings". (See Exceptions 13 to 14.)

The Bondholders' Plan contemplates Income Mortgage 5% Bonds, with contingent interest of $985,802, which, when added to the fixed charges, results in total fixed and contingent interest charges of $1,866,595.

The Bureau Plan contemplates Income Mortgage 4% Bonds, with contingent interest of $788,642 and

a total interest charge, fixed and contingent, of only $1,275,115.

The total charges contemplated by the Bondholders' Plan were thus actually realized in 1936 and will, it is now estimated, be exceeded in 1937 by 39%. The coverage provided by the estimated earnings for the years 1938, 1939 and 1940 will range from a margin of 47% to a margin of 102%, so that within a very few years the indicated coverage by "probable prospective earnings" will be a ratio in excess of the 50% margin required by the laws of the State of New York to qualify bonds as savings bank investments.

The Bureau Plan permits contingent interest charges only to an amount which, with fixed interest charges, was more than covered in both 1934 and 1935, was covered with the savings bank margin of more than 50% in 1936, and it is estimated will be earned twice over in 1937.

The general imposition in reorganization proceedings of such standards would in many cases not only require complete elimination of capital stocks and substantial elimination of junior bonds recently issued with Com- [606] mission approval, but would require the substantially complete conversion into stock of many senior liens heretofore regarded as prime investments. Such a drastic conversion of debt into stock would constitute an added blow to railroad credit generally, which it is submitted is not "compatible with the public interest."

E. The Income Mortgage Bonds proposed by the Bureau Plan are not of a character either compatible with the public interest or permitting due recognition of the priority of the present First Mortgage Bondholders. (See Exceptions 15 to 18.)

1. Interest rate.

Although the present First Mortgage Bonds bear interest at 5% per annum and the Bondholders' Plan contemplates that the Income Mortgage Bonds shall bear 5% interest, the Bureau Plan reduces the rate to but nominally 4%. If the bondholders are to be required to surrender their fixed charge return which is prior to that of all other classes of securityholders, they should not be required to make the additional sacrifice of accepting a 25% reduction in the nominal rate of their contingent return when, as already demonstrated, neither "earnings experience" nor "probable prospective earnings" indicate any necessity for such a reduction.

The Commission should therefore approve the coupon rate of 5% upon the Income Mortgage Bonds to be issued in the reorganization.

2. Their non-cumulative character.

One provision with respect to the Income Bonds made in the Bureau Plan works such an injustice upon the In- [607] come bondholders that it must have been an oversight on the part of the Bureau. The Bureau Plan (pp. 41, 43) provides that the interest on the Income Bonds shall be determined and be payable for each six months income period ending June 30 and December 31 and that such

interest shall be "cumulative only against such available net income for the income period in respect of which such interest is payable." That this makes the Income Bonds wholly noncumulative on the basis of six months rests is indicated by the title of "Non-cumulative Income Mortgage 4% Bonds" given on page 46 of the Report. This provision would make the nominal 4% rate actually but a 2% rate, for the income of the Debtor is seasonal, being realized almost wholly in the last six months of the year (R. 290). The income for the periods ending June 30 and December 31 for each year since 1927, adjusted only to eliminate amortization of bond discount in each year and to eliminate expenditures of rehabilitation program in 1936 and 1937 was as follows:

	Jan.-June	July-Dec.	Calendar Year
1927	562,140	2,221,117	2,783,257
1928	19,155	3,052,136	3,071,291
1929	627,732	2,015,374	2,643,106
1930	918,305 def.	2,588,372	1,670,067
1931	904,451 def.	841,168	63,283 def.
1932	813,830 def.	1,196,438	382,608
1933	437,703 def.	1,245,476	807,773
1934	234,756	983,254	1,218,010
1935	192,483 def.	1,133,474	940,991
1936	225,664 def.	2,127,697	1,902,033
1937	213,381		

It is obvious, therefore, particularly when account is taken of the fact that, under both the Bondholders' Plan and the Bureau Plan, income can be taken for the Capital [608] Fund before it is applied to the payment of interest on the Income Bonds, that the holders of Income Bonds could,

even in the best years, receive for the first six months interest period little, if any, return. Accordingly the bonds would really be 2% bonds. This means, of course, that they could never attain a market value in excess of 50% of their par value, if that, and that the Bureau Plan, through this provision, in effect permanently confiscates, for the benefit of junior securities of the Debtor, one-half of the 40% of principal allotted in Income Bonds, or 20% of the total principal of the First Mortgage Bondholders' present claim.

But "due recognition" of the present bondholders' rights requires a further right of accumulation of interest on the new Income Bonds.

The proposed Report states (p. 22) that the Debtor's volume of traffic, and therefore, of course, its earnings, "is subject to wide fluctuations." It was to take care of these fluctuations that the Bondholders' Plan provided that the interest on the Income Mortgage Bonds shall be cumulative for the limited period of three years.

As more fully pointed out in the January, 1937, brief of the Bondholders' Committee, the Bondholders' Committee recognized the dangers which lie in making contingent interest fully cumulative and therefore recognized, in the preparation of the Bondholders' Plan, that the amount of contingent interest contemplated by that Plan was such as to make it unwise that that interest be fully cumulative. But unless income bond interest, however it may be limited in annual amount, is made cumula-

tive for the limited period of three years as provided in the Bondholders' Plan, the loss due to the fluctuation in earnings which the proposed Report points out, falls upon the [609] present First Mortgage Bondholders. Interest lost in one year as a result of the non-cumulative provision would be gone forever. Though low earnings might be more than offset in subsequent periods of high earnings, the benefit of those high earnings could not recoup the losses of the Income Mortgage Bondholders but would enure progressively downward to the lower classes of the Debtor's securities, ultimately redounding to the sole benefit of the Common Stock. This is unfair to the Income Bonds and, particularly when coupled with the suggested 4% nominal coupon rate, would prevent the Income Bonds' ever selling at par. As hereinafter pointed out (infra, pp. 39-41, 50-53), this violates the "law of the land" as to "due recognition" of the rights of the present bondholders as enunciated by many decisions of the United States Supreme Court and expressly recognized in the proposed Report.

The Bondholders' Committee therefore urges that the Commission adopt the provision of the Bondholders' Plan that interest on the Income Bonds shall be cumulative for some limited period and that any period less than three years would be unfair to the Income bondholders.

3. Authorized amount.

The proposed Report seems to indicate (p. 40 and p. 42) the belief of the Bureau that the Income

Mortgage Bonds should be available for future financing.

While the Bondholders' Plan did not so provide, the Bondholders' Committee would have no objection to modifying the Bondholders' Plan by opening the Income Mortgage for future financing under conservative restrictions; indeed, the Bondholders' Committee thinks this a wise suggestion. [610]

F. The rights of the Preferred Stock contemplated by the Bondholders' Plan provide fairer treatment of the present bondholders than the rights of the Preferred Stock contemplated by the Bureau Plan, and are compatible with the public interest. (See Exceptions 19 to 22.)

The rights of the new Preferred Stock are defined in substantially the same manner in the Bondholders' Plan and in the Bureau Plan except that (1) the dividend rate provided in the Bondholders' Plan is 6% while that provided in the Bureau Plan is 5%, (2) the Sinking Fund is taken out of available net income after Preferred dividends under the Bondholders' Plan while it is taken out of available net income before Preferred dividends under the Bureau Plan, and (3) under the Bondholders' Plan Preferred Stock is given the right, until its earning power has been established, to elect a majority of the Board of Directors, whereas under the Bureau Plan the voting power of each share of Preferred Stock is wholly pari passu with that of each share of Common Stock.

The Bondholders' Committee believes that the bondholders are entitled to a 6% dividend on the Preferred Stock in any year in which the earnings suffice to pay that dividend. The Bureau's own analysis of the situation indicates the Bureau's belief that there will often be years in which dividends on this stock will not be earned. Since the dividend is non-cumulative except to the extent that it is earned, dividends not earned in any year are lost forever. To compensate for the failure to pay dividends in years of low earnings, the Bondholders' Committee urges that the Commission should permit the payment of a 6% dividend in years of high earnings. [611]

While it is true that the Preferred dividends under the Bondholders' Plan will exhaust the consolidated available net income estimated for the immediate future, there is no reason of public policy preventing the payment of substantially all the income possible in the immediate future to the present First Mortgage Bondholders in those years in which such income is realized. The bondholders today have a claim ahead of all other securityholders for fixed interest every year at the rate of 5% upon their bonds. For several years they cannot hope to receive anything like that return. To provide that in years of prosperity the deficits of the lean years shall be partly compensated by the payment of the additional rate of 1% on that part of their present investment which is to be commuted into Preferred

Stock seems not only not violative of the public interest, but demanded by all reasons of equity.

The Bondholders' Committee also believes that it is unfair to the bondholders to pay off the Income Bonds issued to them by depriving them of any current return on that part of their present investment which is commuted into Preferred Stock. Accordingly, it believes that the placing of the Sinking Fund ahead of the Preferred Stock dividend as provided in the Bureau Plan rather than behind it as provided in the Bondholders' Plan does not "accord due recognition" to the rights of the bondholders.

The Bondholders' Committee also believes that in view of the fact that the Preferred Stock represents the prior and major interest in the property, the right to elect a majority of the Board of Directors should be vested in the Preferred Stock until its earning power has been established. In view of the facts that the Common Stock and Preferred Stock are so nearly equal in number of shares and that the Preferred Stock will be held by widely scattered holders while large blocks of the Common Stock, con- [612] stituting a large majority thereof, will be held by RFC, RCC, ACJ and Western Pacific Corporation, the Bureau Plan will result in practical control of the Board being vested in those having the most remote and least valuable interest in the property. For reasons which were fully argued in its January, 1937 brief (pp. 27-31), the Bondholders' Committee believes that

the public interest, as well as due recognition of the prior rights of the respective securityholders, requires the adoption of the provision of the Bondholders' Plan with respect to the Preferred Stock voting power.

However, if after its fair consideration of the problem, the Commission shall disagree with the Bondholders' Committee and shall support the position of the Bureau Plan in respect of these three differences in the rights of the Preferred Stock, the Bondholders' Committee does not believe that modification of the Bondholders' Plan upon these points alone would make it unacceptable.

G. The amount of Preferred Stock contemplated by the Bureau Plan is insufficient to permit due recognition of the prior rights of the present bondholders. (See Exceptions 19 and 23.)

The amount of Preferred Stock to be issued under the Bondholders' Plan is $27,930,800, while the amount contemplated by the Bureau Plan is $29,574,060. This difference is due to the fact that the Bondholders' Plan allots Preferred Stock for 40% of the principal of the present bondholders' claims and for all the interest to the effective date of the Plan, while the Bureau Plan allots Preferred Stock for 60% of the principal of the claims and Common Stock for the interest. [613]

For the reasons argued in full in the January, 1937, brief of the Bondholders' Committee (pp. 67-80) and set forth in the proposed Report itself (p. 52), the law of the land requires "that holders

of the Debtor's First Mortgage Bonds should receive securities of a higher rank than the other creditors, at least to the extent that existing conditions will permit."

The proposed Report, however, expresses the view that the total stock contemplated by the very limited capitalization permitted by the Bureau Plan should be divided substantially equally between Preferred and Common Stock. The result is that not enough Preferred Stock is permitted to provide for the present bondholders' interest.

This claim for interest, as the proposed Report correctly finds (p. 53), is entitled to the same priority over the claims of other creditors of the Debtor as the principal of the debt, and the quotation from the proposed Report above set forth recognizes the right of the bondholders to receive priority securities for that interest, "at least to the extent that existing conditions will permit."

The Bondholders' Committee submits that there is no necessity for an equal division of the stock capitalization between Preferred and Common and that even if the limited capitalization contemplated by the Bureau Plan is adhered to, the division of the stock should provide a sufficient amount of Preferred Stock to permit the recognition of the bondholders' claim for interest in priority securities. This can do no possible harm to the capital structure in view of the fact already pointed out that dividends not earned on the Preferred Stock do not accumulate and therefore can never constitute a

burden to the Debtor as reorganized or in any way adversely affect its credit. There are no "existing conditions" which do not permit such recognition of the bondholders' rights. [614]

H. The shares of Common Stock to be issued in the reorganization should be without par value as contemplated by the Bondholders' Plan rather than of the par value of $100 each as provided by the Bureau Plan. (See Exceptions 19 and 24.)

There are wide differences of opinion not only between the Bondholders' Committee and the Bureau but also between the Bondholders' Committee and other creditors and the Western Pacific Corporation, the sole stockholder of the Debtor, as to the aggregate amount at which the properties of the Debtor should be capitalized in reorganization. It would therefore seem advisable to assign no par value to whatever number of shares of Common Stock may be issued in the reorganization to represent the residual value of the property after deducting the par value securities down through the Preferred Stock, rather than to attempt to place an exact dollar mark on the aliquot part of the residue represented by each share.

Quite apart, however, from avoiding unnecessary conflicts of opinion, the use of $100 par value shares for the Common Stock in the present situation will prevent any reasonable probability that the Common Stock can ever be used as a financing medium.

The Common Stock under both the Bondholders' Plan and the Bureau Plan is to bear $3.00 a share

dividends after the Preferred dividends and thereafter is to participate with the Preferred Stock on a share-for-share basis. It will require earnings much greater than are now visible for a stock with these dividend rights to attain a market value equal to the par value of $100 which the Bureau Plan assigns. Under the laws of California, where the Debtor is organized, shares of a railroad corporation can- [615] not be sold at less than their par value. The Bondholders' Committee submits that not only is it compatible with the public interest, but that public interest requires, that the Commission should facilitate, rather than obstruct, the use of Common Stock to provide future financing even though the market may require it to be sold at a price below $100 per share. This the Commission can do by the very simply expedient of permitting the shares to be without par value.

If the Commission adopts the view of the Bondholders' Committee that sound capitalization permits the creation of sufficient Preferred Stock to cover all of the bondholders' claims, including that for interest, thus obviating the necessity of the use of Common Stock for any part of the bondholders' claims, the Bondholders' Committee does not have any substantial interest in the number of shares into which the common capital is divided. If, however, the Commission does not adopt that view, then problems as to distribution of the common capital, which are hereinafter discussed (infra, pp. 47-50), may make advisable an increase in the number of

shares into which the common capital shall be divided. Such an increase, of course, can be made without getting into the question of total dollar valuation if, as suggested, the shares are without par value.

Furthermore, if the Commission, while approving the general framework of the Bondholders' Plan, should feel that the number of shares of Common Stock provided for by the Bondholders' Plan is too large, then, of course, the Bondholders' Plan may easily be modified by reducing proportionately all the allotments of Common Stock which it contemplates. Here again elimination of a par value for the Common Stock will eliminate ground for objection to the ultimate Plan. [616]

I. Contingency Reserve Fund; Capital Fund; and Sinking Fund. (See Exception 25.)

The Bondholders' Plan contemplates a Contingency Reserve Fund, to be maintained at $500,000, as an emergency fund to take care of lean periods and prevent defaults due to rapidly falling earnings. The Bureau Plan provides for no such fund. The Bondholders' Committee does not feel that such a fund is indispensable.

Both the Bondholders' Plan and the Bureau Plan provide for a Capital Fund to come out of income after fixed charges. The Bondholders' Plan, however, contemplates that the Capital Fund shall be on the basis of annual rests with permissible use of $500,000 in respect of each year to and including 1940, $1,000,000 in respect of the years 1940 to

1945, both inclusive, and thereafter at the rate of 3% of consolidated gross revenues. The Bureau Plan, on the other hand, provides a flat Capital Fund to be maintained at $1,000,000, with an appropriation of not more than $500,000 in any year.

The Bondholders' Committee believes that the Capital Fund suggested in the Bondholders' Plan is better adapted to the needs of the property than the Capital Fund proposed by the Bureau Plan, particularly in the event of dollar inflation, resulting in rapidly increasing costs, which will have to be offset by increased revenues. The fixing of the Capital Fund at a flat dollar amount under such circumstances might result in an inadequate Fund, whereas the situation would automatically be taken care of under the provision that the Capital Fund shall be a percentage of gross. However, the Bondholders' Committee does not believe this to be a vital point of difference.

The Bondholders' Plan contemplates a Sinking Fund which shall come out of available net income after payment of Preferred dividends, while the Bureau Plan pro- [617] vides that it shall be taken before Preferred dividends. On the other hand, the Sinking Fund provided by the Bondholders' Plan is twice as large as that provided by the Bureau Plan. While again the Bondholders' Committee believes that its proposal is preferable, it does not believe that the suggested change in position of the Fund would constitute an obstruction to consummating a reorganization, assuming that such change

in position were compensated by a reduction in the amount of the Fund as proposed by the Bureau Plan.

III.

The Bondholders' Plan "affords due recognition to the rights of each class of creditors and stockholders" and "does not discriminate unfairly in favor of any class"; while the Bureau Plan in several respects fails to "afford due recognition" to such rights and in several respects does "discriminate unfairly in favor of" junior creditors and the Western Pacific Corporation, the sole stockholder, and against the present First Mortgage Bondholders. (See Exceptions 6 to 9, 15 to 17, 19 to 22, 26 to 28.)

The proposed Report correctly finds, and the Bureau Plan is correctly predicated upon the conclusion, that the First Mortgage is a first lien upon substantially all the valuable assets of the Debtor. The proposed Report also correctly recognizes that the well-established decisions of the Supreme Court and the lower Federal courts with respect to reorganizations in equity govern the relative treatment of different classes of securityholders in a railroad reorganization under Section 77, and that [618] accordingly the "holders of the Debtor's First Mortgage bonds should receive securities of a higher rank than other creditors, at least to the extent that existing conditions will permit" (p. 52).

The proposed Report, however, fails to recognize the equally well-established rule of law that "to the extent that existing conditions" do not "permit" prior creditors to receive a *qualitative* preference in new securities (i.e., securities ranking in priority as to assets and income over those allotted junior interests) the prior creditors' position must be recognized by a *quantitative* preference (i.e., by giving them securities of the same rank as those given junior interests, but greater in amount per unit of claim or upon more favorable terms). Kansas City Terminal Ry. v. Central Union Trust Co., 271 U. S. 445.

Furthermore, while the proposed Report expressly recognizes the fundamental rule of priority, the Bureau Plan gives it but formal observance. Observance must be in substance and not merely in form. The prior securities allotted to the prior creditors must give to the prior creditors a reasonable opportunity to recoup their investment in priority to the recoupment of the junior investment. The rule would not be complied with, for example, by allotting to prior creditors (here the First Mortgage Bondholders), to use an extreme illustration, non-cumulative contingent interest and dividend securities bearing 2% current return.

The Bondholders' Committee, in the preparation of the Bondholders' Plan, made an earnest and sincere attempt, after thorough consideration, to work out a Plan which would give fair substantive recognition to the rights of each class of creditors and

stockholders of the Debtor, and which would not discriminate unfairly in favor of any class, even the First Mortgage Bonds. The affirmative [619] arguments in support of the Bondholders' Plan in that respect will be found at pages 81 to 92, inclusive, of the January, 1937, brief of the Bondholders' Committee. Those arguments seem to go wholly unanswered in the proposed Report, the Bureau apparently treating them as irrelevant in view of the fact that its conception of the future earning power of the Debtor resulted in the reduction of capitalization and the restriction of security rights already discussed.

The failure of the Bureau Plan to comply with the requirements of Section 77 with respect to the recognition of the rights of the relative classes of securityholders arises very largely out of this unnecessarily drastic view of the permissible capital structure. However, were such a view well founded, the resultant damage to existing securityholders should fall in much less degree on First Mortgage Bondholders, and in much greater degree upon junior securityholders, than is provided by the Bureau Plan.

A. The terms upon which the Bureau Plan proposes to raise new money unfairly discriminate in favor of Western Pacific Corporation (perhaps RCC) and against the First Mortgage Bondholders. (See Exception 26.)

As already pointed out, the Bureau Plan denies to the present First Mortgage Bondholders any par-

ticipation in fixed charges or in the new First Mortgage in order to permit the creation of new First Mortgage Bonds so limited in amount in relationship to both assets and earnings of the Debtor that the bonds themselves are clearly worth more than par, and then for the wholly unfounded reason of insuring their sale at par, couples with the $10,000,000 of such new First Mortgage Bonds 100,000 shares of new Common Stock (representing one-third of the entire common capital) and offers this "package" to [620] the Western Pacific Corporation at a price lower than the worth of the bonds alone.

The Bureau Plan purports to allot the offer to the Western Pacific Corporation, not in its capacity as a stockholder, but in its capacity as an unsecured creditor, for $7,188,607. The proposed Report then adds the further statement (p. 56) "The provision for the participation by the unsecured creditor would not discriminate either against the First Mortgage Bonds or the other secured creditors because such unsecured creditor must contribute $1,000 in cash for each $1,000 bond and 10 shares of new Common Stock received."

It is a strange conception that the payment of $1,000 for a bond worth more than $1,000 *plus* a share in the equity both potentially and actually presently valuable is any *contribution* at all. The result is that the creditor lowest in rank, which is also the sole stockholder of the Debtor, upon buying bonds worth more than the price paid, receives

Common Stock for its claim at the rate of $139 for each $100 of its claim—while the Bureau Plan at the same time proposes that the bondholders shall receive Common Stock for their concededly prior interest at the rate of $100 in Common Stock for each $100 interest and purports to allot to the junior secured creditors (RFC, RCC and ACJ) Common Stock in the aggregate at the rate of $100 for each $100 of such junior claims.

This is on its face an unfair discrimination in favor of the Western Pacific Corporation.

The problem is, however, complicated by the fact that the claim in respect of which the Bureau Plan purports to permit this Western Pacific Corporation subscription to new money has been assigned to RCC as collateral for the RCC note (Ex. 9). If, therefore, the subscription right constitutes an additional participation of RCC in the [621] reorganized Debtor, it constitutes a discrimination in favor of RCC and against the bondholders.

In Appendix C to the January, 1937, brief of the Bondholders' Committee, there was set forth a detailed study of the new securities which had been issued to provide new money in every major railroad reorganization from 1894 to 1936. That study evidenced the fact that in no previous reorganization has new money been given such favorable terms as are proposed by the Bureau Plan, whether the new money was furnished by stockholders or by junior creditors. Yet many of those reorganizations have been severely criticized by responsible learned

authorities on reorganization probelms as unduly favorable to the junior interests which were given the subscription rights there involved. See Moulton and Associates, The American Transportation Problem (1933), pp. 336-348.

The only justification for permitting junior interests to participate in such a reorganization as is here involved is that they may afford a market which will take securities at a higher price than they could otherwise be sold in the hope of preserving existing investments. The bonds offered to provide new money, if offered to the junior interests, whether in their capacity as stockholders or junior creditors must therefore be securities which are at least not worth substantially more than the price at which they are offered. It is in the difference between the lower market value of the new money securities and the higher price paid that justification can be found for permitting junior interests to retain a position in the reorganized property when drastic sacrifices of the character here tendered in the Bondholders' Plan are accepted by the bondholders.

There is in the record no evidence to support the implication of the proposed Report that the First Mortgage Bonds which it proposes require any bonus to effect their [622] sale at par. Whatever evidence there is in the record on this subject is to the contrary. The First Mortgage Bonds proposed for new money under the Bondholders' Plan are part of substantially twice as large an issue as is

contemplated by the Bureau and therefore, as already pointed out, have substantially less, although still "adequate", coverage by "earnings experience" and "probable prospective earnings." Yet counsel for the Bondholders' Committee stated both orally and in the January, 1937, brief that it was the belief of the Bondholders' Committee that those bonds were saleable at substantially par.

The Commission has an ample fund of practical knowledge of this sort of problem to know, without more evidence, that the bonds proposed by the Bureau Plan are in fact worth more than par and do not require any such bonus. The Bureau Plan therefore creates a substantial gift to the Western Pacific Corporation (or its assignee) at the expense of the First Mortgage Bondholders in violation of "the law of the land."

The Bondholders' Committee believes that this problem should be dealt with as provided in the Bondholders' Plan, which gives to the Western Pacific Corporation an opportunity to preserve an interest in the equity, but upon terms which do not grossly discriminate in favor of the Western Pacific Corporation and against the First Mortgage Bondholders.

In this connection, it should be pointed out that the successive offerings of the new money "package" to the junior creditors and then to the First Mortgage Bondholders, provided for in the Bureau Plan, is wholly illusory and ineffective. These successive offerings, under the Bureau Plan, are upon

exactly the same terms as the offering to the Western Pacific Corporation. The [623] purpose of such successive offerings is to insure the provision of the new money if it is not provided upon the prior offerings. The only possible reason for the failure of a prior offering would be that the securities offered were not worth the offering price. It is therefore a futile gesture to make an offering of the already rejected securities, upon no better terms, to the senior interests.

This latter problem was taken care of in the Bondholders' Plan by providing an original offering to the Western Pacific Corporation upon terms which were believed would make the "package" worth approximately the offering price, but improving the terms to each successive offeree. Under such an arrangement, if the market did not justify the Western Pacific Corporation in accepting the offering, then the better terms of the offering to RFC, RCC and ACJ would, it was believed, make the offering attractive to those offerees. If, however, market conditions were so adverse as to make that offering not attractive, then the terms were improved in order to make it attractive to the First Mortgage Bondholders. To safeguard against the possible contingency that not even this offer would be adequate to induce the First Mortgage Bondholders to provide the new money, the Bondholders' Plan provided for an underwriting, subject to the approval of the Commission and the Court, and also permitted adjustment of the rate upon the new

First Mortgage Bonds to be offered, in the light of market conditions existing at the time of the actual offer. These provisions the Bondholders' Committee believes are wise and fair and should be adopted by the Commission. However, their elimination would not be fatal to acceptance of the Plan.

The terms upon which the Bureau Plan proposes to offer the new money First Mortgage Bonds and bonus [624] Common Stock contain another unfair discrimination which, although it involves only a small amount and does not directly affect the bondholders, should be remedied by the Commission in order to obviate the vulnerability of the ultimate Plan to justifiable attack. The Bureau Plan provides that the new money "package" shall be offered to the Western Pacific Corporation as an unsecured creditor, and then adds (p. 55) "The claim of the Western Realty Company should be canceled." The unsecured claim of the Western Realty Company ranks pari passu with that of the Western Pacific Corporation. The Western Realty Company is therefore entitled to participate ratably with the Western Pacific Corporation in accordance with the amounts of their respective claims. While the Western Realty Company stock is wholly owned by the Western Pacific Corporation, counsel is advised that it has been pledged to Curtis Southwestern Corporation. This provision of the Bureau Plan, therefore, is a violation of Section 77 as against Western Realty Company and the pledgee of its stock. This defect, of course, is purely formal and not substan-

tive, and can be remedied by providing that any offering to unsecured creditors shall be proportionately to the Western Pacific Corporation and to the Western Realty Company. While the January, 1937, brief of the Bondholders' Committee indicated that it was the intent of the Bondholders' Plan that the offering to the Western Pacific Corporation covered, and should be allocated to, the unsecured claims of both the Western Pacific Corporation and the Western Realty Company, the Bondholders' Plan is itself not sufficiently clear on this point and should be modified to obviate the risk here pointed out. [625]

B. The Bureau Plan unfairly discriminates in favor of RFC, RCC and ACJ, and also in favor of Western Pacific Corporation, and against the First Mortgage Bondholders by allotting to these junior interests new Common Stock at a higher rate per $100 of claim than is allotted to the bondholders for their prior claim for interest. (See Exception 27.)

The proposed Report correctly finds that the bondholders' position, including their claims for interest, is entirely prior to the position of all the junior creditors, secured and unsecured (pp. 46-49, 52-53). As already pointed out, this priority should be maintained in the reorganization through a *qualitative* preference of the new securities allotted to the bondholders in respect of their interest. This claim, therefore, should be recognized in new Preferred Stock.

If, as the bondholders believe is not at all the case, the situation does not so permit, but requires that the bondholders shall accept Common Stock for the part of their claim represented by interest, then "the law of the land" requires a *quantitative* preference, viz. that the Common Stock so allotted shall be at a rate per $100 of the interest claim greater than the rate per $100 of claim at which Common Stock is allotted to junior creditors. No amount of multiplication of collateral junior to the First Mortgage Bonds can result in raising the junior RFC Note, RCC Note and ACJ Note or the unsecured claims of the Western Pacific Corporation to a position, as to each $100 of the claims, of equality with, or priority to, the bondholders' prior claim for interest.

Yet the Bureau Plan, while giving to the bondholders new Common Stock at the rate of $100 par value for each $100 of the claim for interest, gives to the RFC Note new [626] Common Stock at the rate of $198 for each $100 of that claim as of January 1, 1937, and to the RCC Note new Common Stock at the rate of $96 for each $100 of its claim, exclusive of anything which it may get as assignee of the Western Pacific Corporation's unsecured claim, and if the rights of RCC as such assignee are included, Common Stock at the rate of $481 for each $100 of the claim represented by the RCC Note. It also gives to Western Pacific Corporation as an unsecured creditor $139 new Common Stock for each $100 of its unsecured claim.

If the Commission will allot Preferred Stock for the bondholders' interest, then the Bondholders' Committee has no interest in the question as to how much stock is allotted to the junior creditors within the limits of the Bondholders' Plan or as to the distribution of that stock among those creditors, except its interest that the Plan shall be valid, and, therefore, not subject on its face to rejection by the Court.

If, however, Common Stock is to be issued for the bondholders' interest, then no Plan can comply with "the law of the land" which does not give to the bondholders for their interest Common Stock on more favorable terms per $100 of claim than are given to any class of junior creditors. The most favorably situated junior creditor is RFC. If, therefore, RFC is to receive approximately 2 shares of new Common Stock for each $100 of its claim, the First Mortgage Bondholders must be given more than 2 shares of Common Stock for each $100 of their claim for interest. On the other hand, if the bondholders are to be required to accept 1 share of new Common Stock, for each $100 of their interest claim, then RFC must be allotted something less than 1 share, of new Common Stock for each $100 of its claim. [627]

And since RFC, RCC and ACJ must, as the proposed Report correctly finds, participate as among themselves in proportion to their collateral, the participations allotted to RCC and ACJ in respect of their Notes must be proportionately less than the

participation allotted to RFC. Again, let the Bondholders' Committee repeat that if the bondholders are removed from this discrimination by the issue of Preferred Stock for their interest claims, they have no interest in any discrimination as between the junior creditors provided the junior creditors agree among themselves so that no one of them can make the discrimination the basis for an attack on the Plan.

The relationships between RFC, RCC and ACJ are extremely complicated, as pointed out in the January, 1937, brief of the Bondholders' Committee (pp. 7, 85-87). It was to meet those complications in a manner which would not give any one of those parties the basis for an attack upon the Plan that the Bondholders' Plan provided the device of escrow certificates, which exactly recognize the relative rights of those three parties inter se as well as the ultimate right of redemption of the Western Pacific Corporation. Those provisions have been criticized as unduly complicated by counsel for some of the junior creditors concerned. Counsel for the Bondholders' Committee recognize the complicated character of the provisions, but point out that (in the absence of agreement among the junior creditors) that complication is necessitated by the very complication of the relationships. The Bondholders' Committee would be glad indeed to have the provisions for escrow certificates eliminated if any way can be found for such elimination, without simultaneously opening up a well-founded basis for at-

tack on the Plan by the very counsel who utter the criticism. [628]

C. The limitations imposed by the Bureau Plan upon total First Mortgage Bonds, total Preferred Stock, rates of annual return on Income Bonds and Preferred Stock, and accumulation of Income Bond interest, taken together, impose such sacrifices upon the present First Mortgage Bondholders, all of which ultimately redound to the benefit of the new Common Stock, as to constitute an unfair discrimination against the First Mortgage Bondholders and in favor of RFC, RCC, ACJ and the Western Pacific Corporation as the principal recipients of the new Common Stock.

Each of these limitations and its result has already been separately discussed in the discussion of the proposed capital structure. Each one is serious, but taken in the aggregate, their cumulative effect is to destroy any possibility that the bondholders will ever recoup their investment, while at the same time creating and granting to junior interests new Common Stock which, not suffering in lean years but profiting in prosperous years, will have substantial value.

The participating feature of the New Preferred Stock is important if the bondholders are adequately to be compensated for these sacrifices which the Bureau plan imposes upon them. However, in the light of the Bureau's views of future earnings the possibility of such participating feature ever

becoming effective is so remote as not adequately to compensate the bondholders for such sacrifices.

D. The Bureau Plan discriminates unfairly against the present bondholders in favor of junior interests in granting to each share of Common Stock equal voting power with each share of Preferred Stock in the election of directors. (See Exception 22.)

This discrimination has already been adequately discussed (supra, pp. 32-34.) [629]

E. The Bureau Plan unfairly discriminates against the First Mortgage Bondholders in providing that the reorganization shall be effected, and the details of its carrying out determined, by a committee controlled by junior interests. (See Exceptions 28 and 31.)

As pointed out in the January, 1937, brief of the Bondholders' Committee (p. 91), and as recognized by the proposed Report (p. 58), it is impractical and would be unduly confusing to prescribe in the reorganization plan all the details of the reorganization. Accordingly, many of those details must be left to some representatives of the securityholders.

On the other hand, fair dealing with the securityholders requires that as many as possible of the important substantive points involved in the reorganization should be worked out and specified in the Plan. Recent Federal legislation, and recent regulations and reports issued by the Securities and Exchange Commission, have been concerned with in-

suring full disclosure to prospective purchasers of securities of the rights which those securities will have. The Bondholders' Plan accordingly endeavored to work out, in much greater detail than either the Debtor's Plan or the James Plan, specific definitions of the rights of the proposed new securities. The Bureau Plan seems lacking in specification on important substantive points. To obviate any justifiable basis for such a criticism of the ultimate Plan, the Bondholders' Committee urges that before the Commission publicly announces the Plan which it will approve, it give to all the interested parties an opportunity to confer with its representatives and work out the provisions of the ultimate Plan in sufficient detail to make to the securityholders an adequate disclosure of what they are voting upon. Legal [630] and financial documents, which are necessarily somewhat complicated, cannot well be drafted in formal public hearings.

But even when the ultimate Plan is worked out with reasonable specification, many details will remain for determination in the course of the consummation of the reorganization. This determination the Bondholders' Plan committed to the Bondholders' Committee itself in view of the paramount interest of the bondholders in the property. The Bureau Plan, however, commits the determination of these questions to a committee of three, one nominated by the Bondholders' Committee, one by RFC, RCC and ACJ as a group, and one by the Western Pacific Corporation.

The proposed Report finds that the Western Pacific Corporation's holdings of Preferred and Common Stock of the Debtor have no value and are entitled to no participation. The Western Pacific Corporation's claim as an unsecured creditor has been pledged to RCC. The anomalous result is thus produced that one of the three members of this reorganization committee will be the nominee of a party which will have no interest whatsoever in the reorganized property. If, as may be claimed by RCC, this right of nomination attaches to the unsecured claim which the RCC holds as pledgee, the equally anomalous result will follow that two of the three members of the proposed committee will represent a group of junior creditors, to whom, under the provisions of the Bureau Plan itself, there is allotted only a minority of the voting stock of the reorganized Debtor.

The members of the Bondholders' Committee have no personal desire to perform the work of a reorganization committee, and they have no objection to representation on the reorganization committee of the junior creditors, or even of the Western Pacific Corporation, if it provides [631] the new money on proper terms. The Bondholders' Committee cannot, however, recommend to the bondholders acceptance of any Plan on which representatives of the First Mortgage Bondholders, chosen as the Commission may determine, shall have less than a majority of the membership.

IV.

Any Plan which the Commission may approve should contain a provision, permitted by subsection (b) (5) of Section 77, for the protection of dissenting classes of the Debtor's securityholders by "the sale of all * * * the property of the Debtor * * * at not less than a fair up-set price" and "the distribution of * * * the proceeds derived from the sale thereof, among those having an interest therein." (See Exceptions 29 and 30.)

The Bondholders' Plan contained provisions (1) requiring the consent of two-thirds of the bondholders as a condition precedent to the confirmation of the Plan, and (2) requiring as to any other class of securityholders as to which less than the statutory two-thirds assents, the sale of the property of the Debtor at a fair up-set price, the use of all assenting securities in the purchase of such property, and the distribution of the proceeds of such sale to the dissenting securityholders of the dissenting classes in accordance with their interests therein.

The proposed Report rejects, and the Bureau Plan omits, both provisions.

For the reasons set forth in the January, 1937, brief of the Bondholders' Committee, it is believed that the first of these provisions is wise, that its inclusion will facilitate [632] rather than obstruct a reorganization, and that any attempt to exercise the coercive power purported to be granted by Sec-

tion 77 can only result in long litigation and indefinite delay in the reorganization. Counsel for the Bondholders' Committee have advised that in their opinion this coercive provision is unconstitutional as against dissenting members of a dissenting class, unless that class is otherwise protected as hereinafter suggested. The Bondholders' Committee, however, does not, at this time, press further its point as to the first of the omitted provisions.

However, the Bondholders' Committee believes that unless the second of the suggested provisions is included in any Plan which the Commission may approve and, the first provision having been omitted, the second provision is also extended to cover the bondholders as a possible dissenting class, the practical situation in the Western Pacific case will make impossible any reorganization without interminable litigation, if not entirely prevent reorganization.

It also believes that if the Commission takes the construction of Section 77 which the proposed Report has taken, the most severe condemnation of the critics of Section 77 as to its unworkability will have been confirmed by the Commission.

The provision purporting to give the Commission and the Court the power to force a Plan upon a class of creditors, particularly mortgage bondholders, which as a class has dissented from the reorganization, would seem to be clearly unconstitutional under the decisions of the United States

Supreme Court. Louisville Joint Stock Land Bank v. Radford, 295 U. S. 555. See also: In re Tennessee Publishing Co., 81 F. (2d) 463; Continental [633] Illinois National Bank & Trust Co. v. Chicago, R. I. & P. Ry. Co., 294 U. S. 648.

Even if the Commission does not agree with this conclusion, it would seem wise that the Commission should not adopt a construction of Section 77 which raises a doubt as to the constitutionality of the procedure attempted to be taken in the reorganization.

Furthermore, the compulsory provision itself does not permit the exercise of the power of coercion purported to be granted unless the Court finds that such rejection (i. e., by the dissenting class) "is not reasonably justified in the light of the respective rights and interests of those rejecting it and all the relative facts". The rejection of a Plan by more than one-third of the bonds (and the Bureau Plan in anything like its present form would be so rejected) is strong prima facie evidence that the Plan is not fair or equitable and that the rejection is reasonably justified. This fact alone would seem to make advisable in the public interest the inclusion of a constitutional method of fixing the rights of the dissenting members of a class which, as a class, dissents by failing to give the statutory two-thirds assent.

The proposed Report rejects the argument of counsel for the Bondholders' Committee that sub-

section (b) (5) expressly authorizes the inclusion of the suggested provision providing for the protection of the dissenting members of a dissenting class through a sale at a fair up-set price. The only argument contained in the proposed Report for its conclusion is that Section 77 contemplates "that reorganization shall be accomplished through confirmation of a Plan, or that the proceedings should be dismissed." To the fact stated in that argument comsel for the Boudholders' Committee do not at all dissent. Of [634] course the Plan must be confirmed. But when it is confirmed (under the coercive provision of Section 77 if any class dissents), one of the provisions of the confirmed Plan should be the suggested and expressly authorized "means for the execution of the Plan", viz., "the sale of all * * * the property of the Debtor * * * at not less than a fair upset price", for the protection of the dissenting class. If, at such sale, the property is purchased by assenting classes, the reorganization will proceed with the issue of securities contemplated by the Confirmed Plan. If, on the other hand at such sale, the property is purchased by a dissenting class, the assenters will, under this provision of the Confirmed Plan, receive their proportionate part of the proceeds of sale. The dissenters in the latter case will own the property and will have to recapitalize it in accordance with Section 20(a) of the Transportation Act. Thus, as to non-assenting members of non-assenting classes, the unconstitutional features of the coercive provision will

have been obviated by providing for them a conventional and clearly constitutional means of realizing the value of their interest in the Debtor's property. Failure to include this provision will destroy the validity of any plan; its inclusion will save the Plan.

An examination of the legislative history of the 1935 amendments to Section 77 will show that this provision of sub-section (b) (5) was inserted for the express purpose of dealing with the constitutional question raised by the inclusion of the coercive provision and for the purpose of enabling those who desire to have a reorganization which will vest marketable title in the reorganized property and validate the securities which may be issued in the reorganization, to have a means of so doing by a judicial sale of the sort here suggested. What "sale of all the property of the Debtor * * * at not less than a fair up-set price" [635] could there possibly be, under a confirmed Plan, other than a sale of the sort contemplated by this provision of the Bondholders' Plan?

Any other construction of sub-section (b) (5) will leave subsection (b) (5) wholly without meaning, and it is a fundamental rule of construction that even as between two apparently conflicting provisions of any Act, effect must be given to both to the extent that such effect can be given. Even if sub-section (b) (5) and the provisions respecting confirmation of a Plan have any apparent conflict (which it is submitted they do not have), effect can

be given to each of the provisions by taking the construction urged by the Bondholders' Committee.

V.

Summary of modifications in the Bondholders' Plan acceptable to the Bondholders' Committee.

Throughout this brief various suggestions have been made as to modifications which might be made of the Bondholders' Plan to meet criticisms which are made, or to be implied, from the proposed Report. It may clarify the Commission's dealing with the problem if those modifications are summarized.

That the Bondholders' Committee indicates these possible modifications is not to be taken as any indication either that the Bondholders' Committee believes that they are wise, or even justified, or that the Bondholders' Committee believes that with them the acceptance of the Plan by the bondholders will not be materially more difficult to obtain.

If the Commission after weighing all the arguments in its judicial capacity decides that the following modifica- [636] tions of the Bondholders' Plan are necessary, the Bondholders' Committee is desirous of cooperating to facilitate the reorganization and, accordingly, would recommend the acceptance of the plan with such modifications:

1. Open the Income Mortgage to provide for future financing through Income Bonds.

2. Reduce the dividend rate upon the Preferred Stock from 6% to 5%.

3. Eliminate the provision giving the Preferred Stock power to elect a majority of the Board of Directors.

4. Reduce the number of shares of Common Stock to such number as the Commission may require, provided that the distribution of such shares shall remain in the proportions provided in the Bondholders' Plan.

5. Eliminate the Contingency Reserve Fund.

6. Make the Sinking Fund payable out of available net income before Preferred dividends, but, as provided in the Bureau Plan, reduce it to an annual ½ of 1% Fund instead of a 1% Fund.

7. Change the provision for the Capital Fund to the provision contained in the Bureau Plan.

8. Clarify the provision respecting the offering of new securities to provide new money by providing that it shall be made to the unsecured creditors (i. e., the Western Pacific Corporation or its assignee, and the Western Realty Company) proportionately to the amounts of their respective claims.

9. Eliminate the provision for successive offerings of the new money First Mortgage Bonds and [637] bonus Common Stock successively to the junior secured creditors and the First Mortgage Bondholders, upon progressively more favorable terms to the offeree, and

also the provision for ultimate underwriting; and substitute a provision that the exact terms of the offering as to both the interest rate to be borne by the new money First Mortgage Bonds and the amount of Common Stock to be included as a bonus shall be determined by the reorganization committee with the approval of the Commission and the Court at the time the offering is to be made, and shall be such that the "package" will be worth approximately the par of the First Mortgage Bonds.

10. Eliminate the provision for escrow certificates, so that RFC, RCC and ACJ will directly receive Common Stock. This modification, however, is unwise unless all these creditors agree upon the distribution of the new Common Stock as among themselves.

11. Provide that the reorganization committee shall be constituted of such number of members, not more than 5, as the Commission may determine, but a majority of whom shall be elected by the bondholders in any manner which the Commission may prescribe.

12. Eliminate the provision requiring the consent of two-thirds of the bondholders to the confirmation of the Plan, but extend the provision for protecting a dissenting class through a judicial sale at a fair up-set price to include the bondholders as a class. [638]

VI.

In view of the great importance of the principles involved in this proceeding, not only with respect to the investment of institutional bondholders in the Western Pacific, but also with respect to railroad reorganizations generally, oral argument before the full Commission is requested by the Bondholders' Committee.

Respectfully submitted,

CRAVATH, DE GERSDORFF,
SWAINE & WOOD,

Attorneys for Frederick H. Ecker, John W. Stedman and Reeve Schley, as a Committee as aforesaid, 15 Broad Street, New York, N. Y.

ROBERT T. SWAINE,
LITTLETON GROOM,
Of Counsel. [639]

EXCEPTIONS OF BONDHOLDERS' COMMITTEE TO PROPOSED REPORT OF THE BUREAU OF FINANCE.

The Bondholders' Committee hereby makes and presents the following exceptions to the Report proposed herein by the Bureau of Finance:

1. The Report errs in its recommendation (p. 38) that the Commission should not approve the debt structure proposed in the Bondholders' Plan as compatible with sound financing and the public interest.

2. The Report errs in not recommending that the Bondholders' Plan, including the debt structure provided for therein, be approved by the Commission as complying with all the requirements of Section 77 and as being compatible with the public interest.

3. The Report errs in recommending (pp. 59-61) a Plan of Reorganization for the Debtor providing for a total capitalization and for new securities of a character not compatible with the public interest and not permitting due recognition of the rights of each class of securityholders.

4. The Report errs in its recommendation (pp. 44, 46) that the capitalization of the reorganized company should be limited to $91,406,510 par value of securities.

5. The Report errs in not recommending approval by the Commission of the capitalization of the reorganized company contemplated by the Bondholders' Plan.

6. The Report errs in its recommendation (pp. 39-40) that fixed interest-bearing bonds issued in the reorganization be limited in aggregate principal amount of $10,000,000 "and that no other fixed interest obligations be permitted". [640]

7. The Report errs in failing to recommend that new First Mortgage Bonds be allotted to the present First Mortgage Bondholders for a portion of their claim.

8. The Report errs in its conclusion (p. 39) that no fixed charges in excess of $500,000 should be authorized or approved.

9. The Report errs in not recommending approval by the Commission of the aggregate fixed charges contemplated by the Bondholders' Plan.

10. The Report errs in its analysis (pp. 19-22) of the Debtor's "earnings experience" and of the "probable prospective earnings" of the reorganized company.

11. The Report errs in its essential conclusion that the First Mortgage Bonds contemplated by the Bondholders' Plan, together with the shares of stock included therewith, would not be salable at par of the bonds.

12. The Report errs in its recommendation (p. 52) that "10 shares of new common stock be given to the purchaser of each $1,000 principal amount of new bonds", proposed in the Bureau Plan in order "to facilitate the sale of the bonds at par".

13. The Report errs in its recommendation (pp. 42-43) that the total of fixed and contingent interest charges plus sinking fund requirements and the capital fund of the reorganized company should not be more than the earnings of the Debtor available for interest in 1936.

14. The Report errs in not recommending that, in view of the Debtor's earnings experience and probable prospective earnings, the total fixed and contingent interest charges contemplated by the

Bondholders' Plan be approved as compatible with the public interest. [641]

15. The Report errs in recommending (pp. 43, 59) the issuance to present First Mortgage Bondholders of new Income Mortgage Bonds which are not of a character compatible with the public interest or permitting due recognition of the priority rights of the present First Mortgage Bondholders.

16. The Report errs in recommending (p. 43) that the annual interest rate on the Income Mortgage Bonds shall be 4%, and in failing to recommend approval by the Commission of a rate of 5% as contemplated in the Bondholders' Plan.

17. The Report errs in recommending (pp. 41, 43) that interest on the new Income Mortgage Bonds shall be noncumulative determined on semi-annual rests ending June 30 and December 31 in each year.

18. The Report errs in not recommending that interest on the Income Mortgage Bonds shall be cumulative as against three years income, as provided in the Bondholders' Plan.

19. The Report errs in its conclusion (p. 44) that the maximum amount of new Preferred and new Common Stock to be issued in the reorganization may not exceed 295,740 3/5ths shares and 300,682 1/5th shares, respectively, of a value of $100 each.

20. The Report errs in not recommending that the amounts and character of the Preferred Stock and Common Stock contemplated by the Bond-

holders' Plan be approved by the Commission as compatible with the public interest.

21. The Report errs in recommending (pp. 44-45) Preferred Stock bearing a dividend rate of 5% and in failing [642] to recommend approval by the Commission of a rate of 6% as contemplated in the Bondholders' Plan.

22. The Report errs in recommending (p. 46) that each share of Preferred Stock have equal voting power with each share of Common Stock and in failing to recommend that the Preferred Stock be given the right to elect a majority of the Board of Directors of the reorganized company as contemplated in the Bondholders' Plan.

23. The Report errs in its recommendation (p. 53) that the unpaid interest on present First Mortgage Bonds be commuted into new Common Stock and in failing to recommend that such interest be commuted into Preferred Stock as contemplated in the Bondholders' Plan.

24. The Report errs in recommending (p. 44) that the new Common Stock should be of a par value of $100 each and in failing to recommend that such stock should be without par value as contemplated by the Bondholders' Plan.

25. The Report errs in its recommendations (pp. 40-42) respecting (1) Contingency Reserve Fund; (2) Capital Fund; and (3) Sinking Fund, and in failing to recommend the approval by the Commission of the provisions of the Bondholders' Plan respecting such funds.

26. The Report errs in recommending a Plan which provides for the raising of new money on terms discriminating unfairly in favor of The Western Pacific Railroad Corporation and against the present First Mortgage Bondholders.

27. The Report errs in recommending a Plan which discriminates unfairly in favor of the junior creditors and against the First Mortgage Bondholders by allotting [643] to the junior creditors new Common Stock at a higher rate per $100 of claim than that allotted to the present First Mortgage Bondholders for their prior claim for interest.

28. The Report errs in its recommendation (p. 59) as to the constitution of the Reorganization Managers and in failing to recommend approval by the Commission of the provisions respecting Reorganization Managers contained in the Bondholders' Plan.

29. The Report errs in its conclusion (p. 57) that the provision of the Bondholders' Plan requiring its acceptance by or on behalf of the holders of at least two-thirds in principal amount of the First Mortgage Bonds of the Debtor is not in accordance with the provisions of Section 77, and in failing to recommend that such provision be approved by the Commission.

30. The Report errs in its conclusion (p. 58) that the provision of the Bondholders' Plan providing for the sale of the property of the Debtor in case of failure to obtain necessary assents is not in accordance with the provisions of Section 77 and

in failing to recommend that such provision be approved by the Commission as being not only in accordance with the provisions of Section 77, but expressly permitted and contemplated by subsection (b)(5) of Section 77.

31. The Report errs in recommending a Plan which fails to set forth many important substantive points with sufficient detail to enable security-holders to know on what they are voting.

[Endorsed]: Filed Oct. 5, 1939. [644]

Before the Interstate Commerce Commission
Finance Docket No. 10913.

In the Matter of THE WESTERN PACIFIC RAILROAD COMPANY, Debtor.

THE RAILROAD CREDIT CORPORATION, Intervening Petitioner.

PETITION FOR MODIFICATION

To the Interstate Commerce Commission:

The Railroad Credit Corporation (hereinafter referred to as the R.C.C.), an intervenor in the above entitled proceeding, respectfully petitions the Interstate Commerce Commission under the provisions of Subsection (d) of Section 77 of the Federal Bankruptcy Act as amended, to modify its Report and Order herein dated October 10, 1938, as set out in Paragraph A of this petition, or alternatively as suggested in Paragraph B hereof, and in support of said petition represents:

A

That the Report and Order herein of the Interstate Commerce Commission, dated October 10, 1938, err in material respects, both in fact and in law, and do not conform to the requirements of Section 77 of the Federal Bankruptcy Act as amended, and should be modified, as hereinafter set forth:

1. Paragraph A of said Order directs that the effective date of the plan reported in said Order (hereinafter referred to as the I.C.C. Plan) shall be July 1, 1938.

The employment of an arbitrary effective date earlier than the actual date of reorganization would result in the payment of interest upon interest that [646] has accrued during the pendency of the Section 77 proceeding, in a case where, as in the Western Pacific, new bonds are to be issued in satisfaction of existing bonded indebtedness. While it is doubtless proper to fix an arbitrary cut-off date for the purpose of determining relative amounts of claims as of such date, an arbitrary effective date can not be so employed as to affect substantive rights. Even an approved and confirmed plan can not act upon substantive rights retroactively. No plan has yet been approved or confirmed herein. It is possible that no plan ever will be approved and confirmed in this proceeding. Pending the final adoption and consummation of a plan, or other disposition of this proceeding, the R.C.C., in pursuance of a substantive right, has applied,

and it has a duty to apply in future, income and proceeds of collateral to or towards the payment of the principal of or interest upon the debt secured, in accordance with the principles twice declared by District Courts of the United States in proceedings under Section 77 of the Federal Bankruptcy Act as amended, to which proceedings the R.C.C. was a party and in which its rights, as herein discussed, were in issue (New Haven Reorganization, printed record p. 2903; St. L. S. W. Reorganization, printed record p. 3533). The rights of the R.C.C. in this respect are not dependent upon the action of any court but exist by virtue of the general law of pledges and the guarantees of the Fifth Amendment to the Constitution. (See also The Railroad Credit Corporation v. Hawkins, 80 F. (2d) 818; cert. den. 298 U. S. 667). The R.C.C. has a positive duty to apply such income and proceeds as aforesaid; such funds, when so applied, become the property of the R.C.C. subject to the terms and provisions of the Marshalling and Distributing Plan, 1931, and are distributed by the R.C.C. from time to time in accordance with said terms and provisions. The R.C.C. cannot be required to suspend the performance of its duties under said Marshalling and Distributing Plan, 1931, on the chance [647] (uncertain of fulfillment) that any particular plan will ultimately become effective. The alternative, under the I.C.C. Plan, would seem to be an order directing the R.C.C., upon the actual effective date, which may be years hence if it does occur, to return funds which

it has received as income or proceeds, applied on the debt secured, and distributed to the participating carriers under said Marshalling and Distributing Plan, 1931. Manifestly such an order, if issued, would not be sustained on appeal. It is significant that the loans made by the R.C.C. to the Debtor, and upon which the R.C.C.'s claim herein is based, were made prior to the enactment of said Section 77.

The I.C.C. Plan should either omit all references to an arbitrary effective date, or include the provision hereinafter proposed under subparagraph 7.

2. Paragraph C of said Order directs that the capitalization shall be an aggregate sum of $93,726,517 (treating no-par-value common stock at $100 per share).

The Report states (sheets 40-41), "It will be observed that, insofar as the capitalization of a reorganized company is concerned, Section 77 contains no limitations other than that the fixed charges of the company shall be adequately covered by the probable earnings available therefor; and the plan as a whole shall be compatible with the public interest. The public interest is not defined, but it would seem obvious that to be compatible with the public interest, the plan must provide a capital structure for the reorganized company which will give it a reasonable opportunity to function efficiently and continuously as a going concern. This requires that the capitalization should not exceed a *conservative appraisal* of the assets to be taken over by the re-

organized company, and that proposed charges, whether fixed or contingent, be within the probable earning power." (Italics supplied). [648]

Again, at sheets 50-52, the Commission's Report says, "It is obvious, therefore, that based on the most optimistic estimate of earnings of record, the capitalization of the reorganized company must be maintained within strict limits if any material return on its capital stock is to be expected and the shares of its stock are not to become mere tokens for stock market speculation. It is true that considered alone, the data pertaining to the rate-making value of the debtor's property, and its investment, would support capitalizations approximating those proposed in the three plans" (viz. $74,270,738, exclusive of no par stock, to $124,259,367, inclusive of such stock taken at $100 per share).

Mr. Commissioner Miller in a partly dissenting opinion said (sheet 72), after quoting the sentence last above quoted, "With this conclusion I can not agree but am strongly of the view that the capitalization should be generally on the basis of original cost less depreciation amounting to something over $120,000,000, which is about the same as is proposed in two of the three plans referred to in the above quotation. The no-par-value common stock may have little or no market value when the company is reorganized, but the issuance in the neighborhood of $30,000,000 more than the majority authorize would give the present stockholders a chance to participate in the future profits of the reorganized company."

There is no practical or legal necessity for taking the no-par-value stock at $100 per share in computing capitalization—to do so is only to run up the *apparent* capitalization. It would be more accurate to treat it in this instance as having a merely nominal value, which would leave the capitalization at its real level under the I.C.C. Plan, of roundly $63,000,000.

It may generally be in the public interest (though the point is not without doubt, because of the strong arguments contra) that capitalization should be based on a "conservative appraisal" and kept "within strict limits"; but even if this be true, in this instance, these tests should not be so applied as to [649] destroy property rights. The Supreme Court said in Louisville Joint Stock Land Bank v. Radford, 295 U. S. 555 (1935), "* * * * * the Fifth Amendment commands that, however great the Nation's need, private property shall not be thus taken even for a wholly public use without just compensation. If the public interest requires, and permits, the taking of property of individual mortgagees in order to relieve the necessities of individual mortgagors, resort must be had to proceedings by eminent domain; so that, through taxation, the burden of the relief afforded in the public interest may be borne by the public." Assets of the Debtor may not be diverted or withheld from those entitled to them, whether creditors or stockholders.

The R.C.C. holds in pledge, among other items of collateral, certain bonds of the Debtor. Although as

this Commission pointed out in its report (sheet 56), with respect to the status of these bonds, "final adjudication of this and similar questions must be made by the Court," this Commission has nevertheless determined the question adversely to the R.C.C. and treated those bonds as being virtually worthless. Admittedly a legal question, it would seem that it should have been referred to the court for determination and alternative treatments proposed subject to subsequent judicial determination. The limited record before the Commission establishes some value in those bonds. The I.C.C. Plan also treats as worthless the claim of the Western Pacific Railroad Corporation, which the R.C.C. holds in pledge. If the capitalization were not so restricted it would be possible to provide for this claim as well as for the secured note holders. Capitalization in a reorganization should be *fair:* there is no warrant for making it either conservative or excessive. If it is less than *fair,* it diverts assets of the Debtor from creditors who are entitled to them. This is the sort of thing condemned by the Supreme Court. [650]

The I.C.C. Plan should provide for adequate capitalization to permit participation by all parties entitled to share in the capital assets of the Debtor; and in the distribution of said capital assets through the allocation of new securities ("share in the consideration to be distributed in reorganization"; "and equitable share in the debtor's assets": Kuehner v. Irving Trust Co., 299 U. S. 445, 1937) due recognition be given (or suitable provision be made

for such recognition contingent upon subsequent judicial determination of the issues) to the prior lien of the General and Refunding Mortgage, to the extent that such lien exists, and that recognition be given to other items of collateral pledged by the Debtor.

3. Paragraph I (2) directs the establishment of a capital fund amounting to $1,000,000, by annual instalments of not to exceed $500,000.

However desirable generally, a capital fund in this instance is unnecessary and deprives junior creditors of earnings to which they are entitled. It is not clear that it is even desirable in the case of this debtor: since the proposal for a capital fund was first made, ten millions have been spent improving the property of the Debtor: no such fund, sterlizing a substantial part of the assets of the Debtor, should now be required.

Other persuasive arguments against such a fund are stated or referred to in the separate opinions herein of Mr. Commissioner Eastman (concurred in by Mr. Commissioner Aitchison), and of Mr. Commissioner Miller.

The I.C.C. Plan should restrict the capital fund to $500,000, with instalments of not exceeding $250,000, or eliminate it entirely.

4. Paragraph J (3) provides for the treatment of the secured notes of the R.C.C., R.F.C., and A. C. James Company.

For principal and interest (computed only to July 1, 1938), these [651] creditors are offered.

159,462 shares of no-par common stock (out of a total authorized issue of 500,000 shares, with 313,703 shares being issued at date of reorganization) divided between them on the basis of their respective holdings of the Debtor's General and Refunding bonds. No account is taken of other collateral. The value of this stock, as it is set up in the I.C.C. Plan, is best indicated by noting that although the Commission computes future earnings at about $500,000 per annum, it has nevertheless set up charges ahead of dividends on the common stock such that it will be necessary to have earnings available for interest and dividends, in the sum of $4,318,035 before even 3% can be paid on the common stock. This is a wholly unwarranted diversion of income (comparable to the diversion of capital assets, above discussed) from the General and Refunding Mortgage bonds to the First Mortgage bonds. Here again it would seem that if a proper allocation cannot be made without a judicial determination of the relative priorities, either the question should be referred to the Court and allocation held up until a decision is rendered, or the allocation should be so made that it can be adjusted to such ultimate judicial determination. The parties did not make a full presentation of their case upon this issue in the hearings before this Commission because it could not be settled here. It is unfair for the Commission to pre-judge the issue upon an incomplete record, and to act upon its protem finding as though it were final.

The additional offer of "warrants" to purchase new first mortgage bonds adds nothing. This provision, more fully treated in subsection 6 (infra), appears to be made to avoid possible technical objections.

The I.C.C. Plan should contain an alternative provision based on the assumed establishment of a prior lien as claimed by the Trustee of the General and Refunding Mortgage, or leave the matter open until after determination of the respective liens by the Court; and it should also give due recognition to other collateral pledged by the Debtor. A more equitable division of income [652] should be evolved.

5. Paragraph J (4) dismisses the claims of the Western Pacific Railroad Corporation as being without value.

The lack of value is due to the unwarranted diversion of capital assets and income, as above stated.

The I.C.C. Plan, modified as hereinabove proposed, in subparagraph 2, would necessarily make adequate provision for these claims.

6. Paragraph K deals with warrants to purchase new first mortgage bonds at their face value.

That it was not seriously contemplated that these warrants would be exercised by the R.C.C., R.F.C. and A. C. James Company is apparent from the fact that subsequent provision is made for the possible exercise of such warrants by the present first mortgage bondholders in case the first three creditors do not act, and failing in that, for a loan from the R.F.C. secured by new first mortgage bonds.

The marketability of the new first mortgage bonds is hardly enhanced by the provisions for using them as collateral in the event that no one is willing to buy them.

The warrants will have no value unless the terms upon which the bonds are to be issued are such as to make them worth more than their face amount, within the period of 45 days after date of reorganization. It is apparent from the certificate of incorporation of the R.C.C. that the R.C.C. could not exercise the warrants allocated to it. Whether or not it could sell such warrants within 45 days of the actual effective date of the plan, which, if it does occur, will be at an indefinite date in the future, is at this time a matter of pure speculation. It may truly be said of the warrants that they are thus made tokens for speculation in reorganization. If the new first mortgage bonds will be worth [653] more than their face amount at date of reorganization, a creditor's right of participation in the "profit" should not be dependent upon its corporate power to exercise warrants for purchase, or upon its ability to sell such warrants in a 45 day period. It would be unfair and inequitable to compel a creditor, especially a creditor dealing with trust funds, to embark upon such a speculation, even to the extent of assenting to a plan that involved its acceptance of such warrants, unless its claim against the Debtor were otherwise fully provided for. Neither is it fair or equitable to offer to creditors

terms which may be accepted by some but cannot be accepted by others.

This does not seem to be either a sound basis or method for the issue of new securities, however good they may be; neither does it seem to be a fair method, from the standpoint of other creditors.

The proposal for the issue of such warrants should be eliminated from the I.C.C. Plan, and other provision made for the creditors affected thereby.

7. Paragraph N provides, first, for the release and cancellation of existing mortgages, and for the surrender to the reorganized company of "all funds on deposit with the debtor's mortgage trustees," and of "all collateral pledged under the mortgage," free from existing liens; also of all collateral pledged by the debtor with the R.C.C., R.F.C. and A. C. James Company. (A further provision respecting the R.C.C. will be discussed below.)

It is clear that "the right to retain a lien until the debt secured thereby is paid is a substantive property right which may not be taken from the creditor consistently with the Fifth and Fourteenth Amendments to the Constitution" (Security-First National Bank v. Ridge Land & Navigation Company, 85 F. (2d) 557, C.C.A. 9, 1936). There can be no obligation upon the trustee under the General and Refunding Mortgage to surrender cash, deposited securities and other collateral, or to release the lien of that mortgage, until the bonds [654] thereunder have been satisfied, to the extent at least

that the mortgage assets will permit. Similarly there can be no duty upon the R.C.C. to release its pledge unless and until pledge assets have been devoted to the satisfaction of its claim.

The I.C.C. Plan should be limited in accordance with the foregoing.

Paragraph N then proceeds to require the R.C.C. to release and surrender to the new company, the distributive shares of the Debtor under the Marshalling and Distributing Plan, 1931, "from and after the effective date of the plan," that is to say, the arbitrary date of July 1, 1938, and further provides that "any proceeds from such shares applied by The Railroad Credit Corporation to the payment of principal and/or interest of and upon the obligations of the debtor after the effective date of the plan, unless such application shall have been made by authority of the Court of competent jurisdiction, shall be turned over to the reorganized company."

In the absence of a voluntary acquiescence by the R.C.C., which has not been given, these provisions are completely unwarranted and cannot be supported in Court. The rights of the R.C.C. do not rest upon a court order and the R.C.C. cannot be required to seek a court order as a condition precedent to the exercise of its rights.

It may be noted in this connection that the claim of the R.C.C., as classified by the reorganization court, constitutes an entire class of claims. Where the statutory majority of an affected class dissent from a plan, the court may confirm the plan only

if it finds, inter alia, that the plan provides fair and equitable treatment for the rights and interests of those rejecting it and that their rejection is not reasonably justified in the light of the respective rights and interests of those rejecting it and all the relevant facts. [655].

Not only is the R.C.C. entitled as pledgee to receive and apply the distributive shares of the Debtor, but under the terms of the Marshalling and Distributing Plan, 1931, to which both the R.C.C. and the Debtor are parties, the R.C.C. has the right and is in duty bound not to pay distributive shares in cash to participating carriers that have borrowed from and are indebted to the R.C.C., but instead to credit such shares upon such indebtedness. In view of the origin and purpose of the R.C.C., and the benefits derived from it by the Debtor and the First Mortgage bondholders of the Debtor, it would be most unfair and inequitable, even if it were lawful, as it is not, to require the R.C.C. to subject its rights to the provisions of Paragraph N.

Unless the arbitrary effective date is eliminated, as hereinabove proposed in subsection 1, the I.C.C. Plan should be modified by inserting therein the following provision which is contained in the order of this Commission (by Division 4) in Chicago Great Western Railroad Company Reorganization, F.D. No. 10772, decided August 4, 1938: "Nothing in the foregoing and other provisions herein with respect to The Railroad Credit Corporation is intended to

limit or in any manner affect the right of that Corporation to apply, in its discretion, the income on and proceeds of the collateral held by it, to or towards the payment of the principal, or interest, or both, of or upon its claim against the Debtor prior to the consummation of the reorganization."

8. Paragraph O declares that the approval and confirmation of the plan shall in no wise disturb or alter the right and interest of the R.F.C. and the R.C.C. in collateral pledged with them by parties other than the debtor.

Obviously the R.C.C. will not accept out of hand a plan which does not adequately provide for its claim, especially when acceptance would cut off the security of collateral pledged with it by third parties. Whether such security [656] is cut off or not is dependent upon established principles of law which cannot be altered by any provision in an order of this Commission.

The I.C.C. Plan treats the $4,000,000 principal amount of Debtor's General and Refunding Mortgage bonds held in pledge by the R.C.C. as though they were pledged with it by the Debtor: the record shows that $2,000,000 principal amount of said bonds were pledged with the R.C.C. by the A. C. James Co. Obviously the R.C.C. cannot surrender said bonds without the consent of the A. C. James Co. Under the terms of Paragraph O, the R.C.C. would not be required to surrender them. Paragraph N would not apply though presumably it

was intended to. The R.C.C. has previously suggested a simple method of meeting this difficulty, viz., the proposal of plan equivalents for General and Refunding bonds. If all parties assent to the I.C.C. Plan these mechanical details, which affect substantive rights, can be readily worked out; otherwise they will prove stumbling blocks.

The I.C.C. Plan should recognize and make provision for this situation by the method herein proposed.

B

That as a result of extensive negotiations between the representatives of the Debtor, the First Mortgage Institutional Bondholders Committee, Reconstruction Finance Corporation, A. C. James Company, and The Railroad Credit Corporation, on November 30, 1938, a compromise plan of reorganization for the Debtor was tentatively agreed upon by all the conferees except one, who indicated that while his client might not assent to said plan, it might not oppose it. A copy of said compromise plan in outline is attached hereto, marked Exhibit A. Although said compromise plan does not give effect to the legal rights of The Railroad Credit Corporation and does give preferential treatment to the First Mortgage bondholders and the R.F.C., in the opinion of your Petitioner, [657] nevertheless The Railroad Credit Corporation tentatively assented to said plan as a compromise, in the hope and expectation that a speedy termination of the Western

Pacific Railroad Company reorganization might this be brought about, avoiding further delay, litigation, and expense. Said compromise plan now appears to have been abandoned, at least for the present. A compromise plan will avoid the many complexities that have arisen in this proceeding, but such a plan, to become effective, must be accepted by all parties in interest. It will be noted that the capitalization after reorganization under the compromise plan will be $94,647,981, if the non-par common stock is set up on the basis of issue.

Your Petitioner believes that said compromise plan would still be acceptable, as a compromise, to all the parties that tentatively assented thereto, and that further negotiation, or minor modification by this Commission, would result in acceptance thereof by all parties in interest.

Wherefore, The Railroad Credit Corporation prays that the Order of the Commission herein, dated October 10, 1938, and the Report accompanying said Order, be modified in the several respects hereinabove set forth in paragraph A, and in such other respects as may be necessary to give effect thereto, and as may be approved by this Commission; or, alternatively, and preferably, that said Order and Report be so modified as to give effect to the aforesaid compromise plan hereinabove referred to in paragraph B, and attached hereto as Exhibit A, with such amplification and such further

modification thereof, if any, as may be agreed to by the parties in interest, and approved by this Commission.

Respectfully submitted,

THE RAILROAD CREDIT CORPORATION,
Intervening Petitioner.
By D. WILLARD, JR.
Vice President and General Counsel.

Washington, D. C.,
December 9, 1938. [658]

CERTIFICATE OF SERVICE

I hereby certify that I have this day served the foregoing document upon all parties of record in this proceeding, by mailing a copy thereof properly addressed to each party.

Dated at Washington, D. C., this 9th day of December, 1938.

D. WILLARD, JR.,
Vice President and General Counsel,
The Railroad Credit Corporation.
Office and P. O. Address:
228 Transportation Building,
17th and H Streets, N. W.,
Washington, D. C. [659]

EXHIBIT A TO PETITION OF THE RAILROAD CREDIT CORP.

[Endorsed]: Filed Oct. 5, 1939. [660]

Before the Interstate Commerce Commission
Finance Docket No. 10913

In the Matter of
THE WESTERN PACIFIC RAILROAD COMPANY REORGANIZATION

PETITION FOR MODIFICATION OF THE COMMISSION'S REPORT AND ORDER OF OCTOBER 10, 1938, ON BEHALF OF RECONSTRUCTION FINANCE CORPORATION [661]

Petition for Modification

Comes now Reconstruction Finance Corporation (hereinafter called Reconstruction), an intervener in the above-entitled proceeding, and respectfully petitions the Interstate Commerce Commission (hereinafter called the Commission) to modify its Report and Order herein, of October 10, 1938, and in support of said petition respectfully shows:

I.

Contemporaneously herewith the Committee (hereinafter called the Committee) representing certain institutional holders of First Mortgage Bonds of The Western Pacific Railroad Company (hereinafter called the Debtor), acting under a group agreement dated as of September 1, 1936, and consisting of Frederick H. Ecker, Chairman, John W. Stedman, and Reeve Schley, are petitioning the Commission for a modification of said Report and Order. The modifications proposed by the Committee

are set forth in the [662] Committee's Modified Plan, which it is annexing to its petition.

II.

The provisions affecting Reconstruction in said modified plan meet with the approval of Reconstruction.

III.

Reconstruction has the following objection, among others, to the plan approved by the Commission in its report and order herein dated October 10, 1938:

> Pursuant to the approval of the Commission granted in its report and certificate of November 10, 1938, in Finance Docket No. 12213, Reconstruction, as of December 1, 1938, loaned to the Debtor's Trustees the sum of $9,902,921.95, taking in evidence of such loan, by way of discount from face value such as to make the yield on the Trustee's Certificates next hereinafter mentioned from the date thereof to the date of maturity 4 per cent, Certificates of the Debtor's Trustees in the aggregate principal amount of $10,000,000, dated December 1, 1938, maturing December 1, 1939, and bearing interest by their terms at the rate of 3 per cent per annum, payable semi-annually. [663]
>
> As appears from the foregoing, the $10,000,000 of Trustees' Certificates have been acquired by Reconstruction since the date of the Commission's report and order herein of October

10, 1938, approving a plan. The Commission's approval of the acquisition by Reconstruction of said $10,000,000 of Trustees' Certificates was also granted, on November 10, 1938, in Finance Docket No. 12213, subsequent to the Commission's report and order herein of October 10, 1938, approving a plan.

As required by the terms of the Commission's report and certificate in Finance Docket No. 12213, said $10,000,000 of Trustees' Certificates "rank as expenses of the administration by the court of the property of the Western Pacific" and as such "constitute, equally with other expenses of administration, a direct charge and lien on all property held by the applicants as such Trustees".

These Certificates, therefore, are secured by a lien prior to any of the Debtor's mortgages. They constitute an obligation of the Trustees and "expenses of administration".

Under the Commission's plan (page 2 of order of October 10, 1938), $10,000,000 of new First Mortgage Bonds [664] are to be sold to provide the money to pay off these Trustees' Certificates or are to be pledged "with such additional amount of such bonds as may be necessary to be pledged under a $10,000,000 short-term note" as security for a loan of $10,000,000 to be obtained for the same purpose. The new First Mortgage Bonds in question are

to bear interest at the rate of 4 per cent but the Commission's plan provides "that interest accruing for a period not exceeding five years from the effective date of the reorganization, or any portion thereof, on such bonds shall accumulate and payment thereof shall be made only at such times as earnings are available therefor". In other words, the interest on such bonds, although cumulative if unpaid, is not to become a fixed charge until five years from the effective date of the reorganization.

In the opinion of Reconstruction the provisions of the Commission's plan above referred to do not constitute a feasible method of refinancing the $10,000,000 of Trustees' Certificates which Reconstruction now holds.

Reconstruction respectfully submits that any approved reorganization plan should provide a feasible method of refinancing the $10,000,000 of Trustees' Certificates which [665] Reconstruction now holds. The Commission's plan proposes (pages 1 and 2 of the order) that the new First Mortgage Bonds provided for therein shall have a maturity of fifty years and be part of an authorized issue of bonds limited to $50,000,000. If Reconstruction should take, either in evidence of a loan or as collateral for a loan made to pay off said $10,000,000 of Trustees' Certificates which it now holds, the new First Mortgage Bonds provided for in the Commission's plan, Reconstruction's present security would be subject to dilution and impairment.

Paragraphs (d) and (e) of Section 77 of the Bankruptcy Act apparently require the liquidation in cash of Trustees' obligations. A reading of those paragraphs clearly indicates that the term "creditors" as used throughout refers to creditors of the debtor and not to creditors of the debtor's trustees. This is made even clearer by a provision in paragraph (e) to the effect that the court shall approve the plan (previously approved by the Commission) if satisfied, among other things, that "the plan provides for the payment of all costs of administration". This certainly includes Trustees' Certificates of indebtedness authorized by the court, and in the instant case, the Certificates by their [666] terms are "expenses of administration" by the court.

In setting forth the above objection to the Commission's plan, Reconstruction is not to be deemed as waiving other objections thereto which it may wish to urge, upon a rehearing herein before the Commission, or in the Court.

IV.

It is respectfully submitted that the modifications of the Commission's plan suggested by the Committee offer Reconstruction better treatment of its claim of $2,963,000 (on which there will be interest accrued and unpaid as of January 1, 1938, amounting to $899,870), representing loans made by Reconstruction pursuant to the prior approval of the

Commission granted in the Commission's reports and certificates of February 24, 1932 in Finance Docket No. 9151, and of June 23, 1932 and February 25, 1933 in Finance Docket No. 9448, than does the Commission's plan. Under the modifications proposed by the Committee Reconstruction will receive the following:

$1,185,200 income mortgage 4½% bonds (being 40% of the principal of its claim);

$1,777,000 5% preferred stock, Series A (being 60% of the principal of its claim); and

[667]

13,498 shares of common stock (being common stock at the price of 66-⅔ per share or 100% of its accrued and unpaid interest).

Under the Commission's plan Reconstruction will receive 90,255½ shares of common stock.

V.

In consideration of the effectuation of a plan providing for the treatment of said claim as proposed in the Committee's modifications, Reconstruction is willing, subject to the approval of the Commission, not to insist on its rights under Section 77 of the Bankruptcy Act that the $10,000,000 of Trustees' Certificates which it holds be paid in cash, but instead, subject likewise to the Commission's approval, to take in exchange for said $10,000,000 of Trustees' Certificates, $10,000,000 of new First Mortgage Bonds bearing fixed interest at the rate

of 4 per cent per annum, maturing in 25 years and having the other terms, provisions and conditions set forth in the Committee's modified plan. Reconstruction respectfully submits that, as a matter of fairness and equity, it is entitled to at least as good treatment, in respect of its claim of $2,963,000 and accrued interest, as is offered in the Committee's modified plan, if it takes, for the $10,000,000 of Trustee's Certificates which it holds, new securities instead of cash. [668]

Wherefore, Reconstruction prays that the Commission's Report and Order herein, of October 10, 1938, be modified by the approval of the Committee's modified plan; and that if such modified plan be not approved, the Commission's plan, nevertheless, be modified, to make adequate provision to meet the objection thereto set forth above and such other objections thereto as Reconstruction may urge, at a rehearing which, in such event, the Commission is asked to grant in these proceedings; and that the Commission enter such further order or orders in the premises as to it may seem just and reasonable.

Dated: Washington, D. C., December 9, 1938.

Before The
Interstate Commerce Commission
Finance Docket No. 10913
In the Matter of
The Western Pacific Railroad Company Reorganization

PETITION OF THE WESTERN PACIFIC RAILROAD COMPANY UNDER SUBSECTION (d) OF SECTION 77 OF THE BANKRUPTCY ACT FOR A MODIFICATION OF REPORT AND ORDER OF THE COMMISSION AND FOR A FURTHER HEARING

This Petition of The Western Pacific Railroad Company, herein sometimes called the Debtor, respectfully shows to the Interstate Commerce Commission:

First: That the Plan of Reorganization of The Western Pacific Railroad Company approved by the Interstate Commerce Commission in its Report and Order dated October 10, 1938, is unjust, inequitable, fails to afford due recognition to the rights of stockholders, discriminates unfairly in favor of certain creditors and fails to conform to the requirements of the law of the land re- [671] garding the participation of the various classes of creditors and stockholders in the particulars hereinafter specified, among others not specified in the interest of brevity.

Second: The basic injustice (we use the language of the Statute without implication of disrespect to the

Commission) lies in the proposal of the Commission (we believe without statutory authority) to limit the capitalization of the reorganized Company to $93,726,517, including 313,703 shares of no par value stock valued for purposes of the Plan (we believe unnecessarily and arbitrarily) at $100 per share, thereby *transferring* to senior interests (who do not seek such transfer) all equity in the property which measured by the constitutional right of presently invested capital to earn a fair return exceeds $45,863,938—the excess being the difference between the Commission's valuation under 19a stated as of December 31, 1935, at $139,600,455, and that part of the proceeds of sale of $10,000,000 principal amount of Trustees' Certificates expended for capital improvements, the greater part of which expenditures were made subsequent to that date.

Third: In the preparation of its case for presentation to the Commission the Debtor estimated earnings available for interest of the property for the years 1936-1940, as follows:

1936	$1,521,386
1937	2,180,586
1938	2,738,886
1939	3,365,836
1940	3,769,836

[672]

That these were estimates of minimum prospective earning power and were designed to show (and were offered for no other purpose) that an annual

fixed charge of $1,027,036 was ultra conservative. That the properties of the Debtor have been placed in condition for exceptionally economical and efficient operation at a cost of $10,000,000, thereby substantially completing an earlier program of $18,000,000; that new and highly promising channels of trade have been opened up (including the Northern California Extension and the Dotsero Cut-Off) which have vastly improved the potential earning power of the property and rendered obsolete earnings studies and estimates based upon predepression traffic. That if the Commission asserts the power under Section 77 of limiting capitalization on the basis of its own estimate of prospective earnings (a power we earnestly insist the Commission does not have and may not exercise) then in equity and good conscience it should permit the case to be reopened to receive evidence as to probable maximum earning power and not treat as a ceiling the conservative estimate of minimum earning power offered by the Debtor on the totally different issue of a safe fixed charge.

Fourth: A strikingly inequitable feature of the Plan approved by the Commission (unjustifiable under any accepted legal principle) is in the use of no par value stock of the reorganized Company as an elastic currency for adjusting creditor claims—$77.25 in paying the accumulated interest on First Mortgage Bonds, $40.00 in paying the principal and interest of the claim of Reconstruction Finance Corporation, $76.70 in paying the principal and

interest of the claim of The Railroad Credit Corpora- [673] tion, and $172.25 in discharging the claim of A. C. James Company. Much has been said by pseudo economists in favor of an elastic currency, but none has yet ventured to suggest that the same currency be given four different values in settling four different debts at the same time and place.

Fifth: The Plan fails to give any recognition to the rights of the Debtor's unsecured creditors and stockholders, although the valuation placed by the Commission upon the Common Stock of the reorganized Company in fixing capitalization at $93,726,517 demonstrates mathematically the existence of a substantial equity even upon a valuation of only $93,726,517—a valuation which we are confident would be held confiscatory by the Court.

Sixth: That under the Plan approved by the Commission, provision is made (a) for an annual capital fund of $500,000 and a sinking fund of $197,160, a total of $697,160. This amount capitalized at 4% would provide an additional capitalization of $17,429,000, which belongs and should be credited to the equity and which if represented by new Common Stock (valued at $100. a share) alone provides sufficient additional Common Stock to discharge $7,809,639 of non-negotiable debt to The Western Pacific Railroad Corporation and Western Realty Company and permits an allotment of nearly $10,000,000. of new stock to the present stockholding interests of the Debtor. This adjustment may be made

without departure from the principles underlying the Commission's Report and Order.

Seventh: That unless the Commission will modify the proposed Plan so as to give substantial recognition to the true value of the rehabilitated Western Pacific [674] railroad the inevitable alternative is long litigation which ought to be avoided in the interest of the railroad industry and those unfortunate creditors and stockholders who believed that capital invested in the property would be given a square deal. That various modifications of the Commission's Plan have been discussed by counsel representing all creditor interests (except the very large amount of First Mortgage Bonds not represented by the Stedman-Schley-Haggerty Committee) and while no accord was reached in these discussions it is, nevertheless, the judgment of the Debtor that if the Commission or Division 4 will meet all parties in a conference and will in such conference undertake to mediate and reconcile the differences between the parties, a Plan ought readily be evolved which would be acceptable to reasonable men and could be promptly carried into effect without litigation and without further discredit to Section 77 of the Bankruptcy Act.

Wherefore, the petitioning Debtor, The Western Pacific Railroad Company, respectfully prays for an order modifying the Plan so as to give due recognition to the rights of the Debtor's unsecured creditors and stockholders through the authorization of additional capital stock out of a total capitaliza-

tion of not less than $120,000,000. or, in the alternative, reopening this proceeding for further testimony and argument.

Respectfully submitted,

In the Matter of
WESTERN PACIFIC RAILROAD COMPANY REORGANIZATION

PETITION OF IRVING TRUST COMPANY, AS TRUSTEE UNDER GENERAL MORTGAGE, FOR MODIFICATION OF COMMISSION'S REPORT DATED OCTOBER 10, 1938; AND BRIEF IN SUPPORT THEREOF [677]

PETITION OF IRVING TRUST COMPANY, AS TRUSTEE UNDER GENERAL MORTGAGE, FOR MODIFICATION OF COMMISSION'S REPORT DATED OCTOBER 10, 1938

The petition of Irving Trust Company respectfully shows, on information and belief:

Your petitioner is a New York corporation, and is Successor Trustee under the General and Refunding Mortgage of Western Pacific Railroad Company, dated January 1, 1932, under which there are outstanding $18,999,500 principal amount of bonds.

This petition relates only to the failure of the plan proposed by the Commission to give any recognition to the valuable collateral held by the General Mortgage Trustee which is admittedly free

from the lien of the First Mortgage. By that plan, the First Mortgage bondholders receive income-mortgage bonds and preferred stock for the full amount of their bonds, plus common stock for their accrued interest, while the creditors secured by General Mortgage bonds receive only common stock, in proportion to their holdings of bonds. This petition is concerned with the primary [678] question of priority between creditors, rather than with such matters as total capitalization, and terms of new securities, on which the creditors themselves will make their position known.

We do not in this petition ask modification of the report concerning the priority of lien on the Northern California extension, on the debtor's equity in rolling stock subject to leases, conditional sales agreements, or equipment trust agreements, or on non-carrier real estate. Although we disagree with the Commission's ruling that such items are subject to the entire First Mortgage as a first lien, we consider that review of these questions may best be had in the Court, in view of the statement in the Report (Sheet 56) that the Commission's determination of these questions is purely preliminary, and that final adjudication must be made by the Court.

Substantial property remains subject to the General Mortgage as a first lien, however, even if the items just mentioned be eliminated. The existence of *any* property subject to the General Mortgage and not to the First Mortgage, would make it improper to allot only common stock to the holders of

General Mortgage bonds, and to require at the same time, as the Commission's plan does (Report, Sheets 69-70), that all collateral now pledged under the mortgages be surrendered to the reorganized company free from lien.

When the properties on which the General Mortgage is *admittedly* a first lien are as substantial in relation to the debt secured as are those described below, it is manifest error not to provide for giving to the holders of General Mortgage bonds a proportionate share of securities equal in lien to any allotted to First Mortgage bondholders. The General Mortgage Trustee considers [679] that the Commission, in failing to make such provision, committed an inadvertent error, which it will itself desire to correct.

The Commission rightly states in its Report (Sheet 59) that (with certain exceptions here immaterial):

> *"there is no contention that the cash and collateral held by the trustee under the general and refunding mortgage are not free from the lien of the first mortgage".*

The Commission further recognized (Sheet 59) that "due recognition must be accorded to the rights of the creditors with whom are pledged general-mortgage bonds".

It is submitted that the Commission failed to give such "due recognition" to the holders of General Mortgage bonds, and that it overlooked the impor-

tance in relation to the amount of General Mortgage bonds and the debts secured thereby of the collateral on which the General Mortgage is a first lien; otherwise it could not have stated as it did (Sheet 60) that the First Mortgage bondholders should be considered as having a first lien "upon practically all the assets of the debtor" and should —without any qualification or exception—"receive securities of a higher rank than those allocated to other creditors".

The value of collateral admittedly free from the lien of the First Mortgage is substantial in relation to the debt secured by General Mortgage bonds.

The total principal amount of debts secured by General Mortgage bonds is approximately $10,500,000 (Exhibit 9). [680]

Collateral to the General Mortgage undisputedly free from the First Mortgage amounts at the very least to over $3,000,000—even after eliminating, among other things, the Northern California extension, equipment and non-carrier real estate, on which the Commission has given a preliminary decision contrary to the General Mortgage contentions, and the Deep Creek and Standard Realty & Development notes, on which the lien of the General Mortgage is disputed. With the inclusion of cash which is free from any mortgage the total which must be considered in determining what constitutes due recognition for the General Mortgage bondholders is over $4,000,000. This amount is made up as follows:

Cash in hands of General Mortgage Trustee (including all sums received to date)		$ 223,732
Note of Tidewater Southern Railway Company (Exhibit 126)		508,278
Stock of Tidewater Southern Railway Company, at I. C. C. valuation of assets (Exhibit 103; 82, p. 16; and 29, Statement No. 16, p. 4)		1,567,109
Central California Traction Company securities at book value to Western Pacific (Exhibit 103; and 82, p. 16):		
Bonds	$270,000.	
Preferred stock	264,715.	
Common stock	128,651.	663,366
Alameda Belt Line stock at book value to Western Pacific (Exhibit 103)		465,300
Total		3,427,785
To this may also be added the cash on hand at the institution of the reorganization proceedings, free from both mortgages (Rec. p. 586, adjusted to eliminate Tidewater Southern interest payments subsequently turned over to General Mortgage Trustee), amounting to		810,331
Total, including free cash		$4,238,116

[681]

Nor do the above totals include (1) various important pieces of real estate listed in the item of miscellaneous physical property at page 9 of our brief dated January 11, 1937 which were acquired subsequent to the 1915 reorganization, and are not governed by the same reasoning (assuming, which we do not admit, that the reasoning is valid) used by the Commission at Sheet 59 of its Report in holding the First Mortgage a lien upon non-carrier real estate owned before 1915; (2) industrial tracks

and spurs in respect of which no First Mortgage money was expended; (3) miscellaneous other property acquired from free funds (Rec. pp. 585, 690); nor (4) the twenty-three miles of branches or jointly owned tracks listed at pages 56 to 57 of our January 11, 1937 brief in respect of which no First Mortgage money was used. The figures above may therefore be regarded as stating the General Mortgage rights quite conservatively.

The amounts listed above are real values, and not mere book figures. The value of the cash is clear beyond question. And no one can say of any of the three roads whose securities are listed above (Tidewater Southern, Central California Traction and Alameda Belt Line) that economically its original construction was an ill-advised undertaking. (Cf. Report, Sheet 41.)

The Tidewater Southern is an important feeder to the Western Pacific (Rec. p. 109; Ex. 82, p. 16); described by Mr. Swaine as one of its "important" subsidiaries (Rec. p. 136). It contributes freight yielding a steady revenue averaging over $500,000 per year to Western Pacific (Exhibit 82, pp. 16-17; and Exhibit 27, Statement No. 4, p. 2). Its note, which regularly earns and pays the specified 5% interest, is surely worth face value. [682] The valuation of its stock is not based primarily upon book value, but is rested on this Commission's valuation of the property. This valuation is confirmed by the earnings record of the Company (Ex. 29, Statement No. 28). Its conservative character is

shown by the fact that the value shown by the Tidewater Southern books is nearly 50% higher than the figure listed above (Exhibit 82, p. 16).

The Central California Traction Company is likewise a line of strategic importance, in which Western Pacific could not well afford to lose its one-third share. As stated in Western Pacific's application to the R. F. C., it "has a special value to the applicant as a feeder and would be of value to any corporation which might succeed to the properties of the applicant" (Exhibit 82, p. 17; Rec. p. 165). It serves a rich fruit-producing area, originating much interstate and transcontinental traffic (Ex. 195, p. 32). It contributed freight yielding a revenue during the depression years of over $200,000 per year to the Western Pacific System (Rec. p. 165). The Central California Traction bonds continue to pay the stipulated 5% interest, the Reorganization Trustees considering it important not to permit any default thereon. If these bonds and stock, constituting part of the General Mortgage collateral, were liquidated on foreclosure by sale to Atchison and Southern Pacific, which own the other two-thirds of the line, the consequent loss of freight revenues to Western Pacific might be even more serious than the valuation given above indicates.

Alameda Belt Line is both a feeder and terminal line, owned jointly with The Atchison, Topeka & Santa Fe Railway, serving important docks and industries in Alameda (Ex. 29, Statement No. 33). Its ownership [683] is important to maintain the

debtor's equality with the Atchison in access to and traffic from Alameda.

It is fair to consider also the cash on hand at the time the proceedings were instituted as having a bearing on the rights of the General Mortgage bondholders. Although such cash is not subject to any mortgage (Pintsch Compressing Co. v. Buffalo Gas Co., 280 Fed. 830, 838—C.C.A. 2nd), it is by the same token available for creditors who are not secured; and to the extent that the First Mortgage is held by the Commission to be protected by a prior lien on the debtor's property and the General Mortgage is relegated to a subordinate position, this cash should in any equitable distribution of property be availed of to satisfy the general creditor or deficiency-judgment claim of the General Mortgage bondholders. The First Mortgage bondholders have no such general creditor position, since the Commission has found that the value of the property on which their mortgage is a lien is as great as the amount of their bonds.

The only argument made by the First Mortgage trustees (Brief dated January 9, 1937, p. 68) for not giving consideration to this free cash was that it had been used *subsequent* to the institution of these proceedings for maintenance and rehabilitation of the road. However, such application of funds against which the General Mortgage bondholders had a right prior to that of the First Mortgage bondholders cannot change the situation as it existed at the date of instituting the reorganization

proceedings, nor compel the Commission to disregard such cash in determining the rights of the General Mortgage bondholders. [684]

The earnings of the collateral admittedly subject to the General Mortgage are substantial in relation to the debt secured thereby.

The value of the securities on which the General Mortgage is admitted to be the first lien is supported also by their earnings.

Tidewater Southern in addition to paying 5% interest on its note, or approximately $25,400 per year, earns a substantial net income (Exhibit 29, Statement No. 28). Such income averaged approximately $47,000 from 1930 to 1935 inclusive, and was over $75,000 in the latter years. It has failed to meet interest charges in full in only three years between 1922 and 1935. (*Ibid.*) Its estimated income from 1936 to 1940, after note interest, averages over $75,000 per year (Ex. 29, Statements Nos. 3-7), which we believe will be borne out by the facts, since the estimates in the case of this road are based only upon existing traffic, and not upon any anticipated increases therein (Ex. 29, Statements Nos. 3 to 7). Some further indication of the earning power of Tidewater Southern is shown by the fact that it extinguished, in 1935, its entire bonded debt* (Ex. 29, Statement No. 1, Note 8), repaying to Western

*The note, its only remaining obligation, represents expenditures for additions and betterments to the line (Rec. p. 217).

Pacific a total of $129,921 during the years 1934 and 1935, and being left with cash on hand, on December 31, 1935, amounting to $153,192 (Ex. 29, Statement No. 13), against total current liabilities of $82,290 (Ex. 30). Income from Tidewater Southern represented more than 11% of the net income of the Western Pacific System as forecast for 1936 (Ex. 29, Statement No. 3). [685]

The Central California Traction bonds continue to pay their interest amounting to $13,500 per year.

The above figures indicate minimum earnings for this portion of the General Mortgage collateral of approximately $114,000 per year, without considering the amount which the other items of General Mortgage collateral (pp. 4-5, supra) contribute to the total Western Pacific earnings (as to which see, for instance, Exhibits 113, 115, 116). These latter items should contribute a considerable further sum.

In relation to the amount of General Mortgage debt, the earnings of the General Mortgage collateral are substantial, and may not be disregarded. No plan can be fair which requires the creditors secured by General Mortgage bonds to release their lien on collateral which earns such a substantial amount of money per annum, in exchange for nothing but common stock, which will produce no return unless system earnings return to the 1926 level (Report, Sheets 19, 55). [686]

Wherefore, it is respectfully requested that the Commission, pursuant to Section 77(d) of the Bankruptcy Act, modify its proposed plan of re-

organization so as to provide for the issuance to the General Mortgage bondholders of securities on a par with those awarded to First Mortgage bondholders, to the extent of the value of collateral on which the General Mortgage is admittedly a first lien.

Before the
Interstate Commerce Commission
Finance Docket No. 10,913

In the Matter of the
Western Pacific Railroad Company Reorganization

BRIEF IN SUPPORT OF FOREGOING PETITION

The facts supporting the General Mortgage Trustee's limited request for modification of the Commission's report are fully set forth in the foregoing petition, and will not be repeated here. It is sufficient for the present purpose to set forth briefly the legal considerations which require that recognition be given to the substantial actual value, and earnings, of the property admittedly free from the lien of the First Mortgage, and that securities of a rank equal to those given the First Mortgage bondholders be accordingly awarded to the General Mortgage bondholders.

A plan is not fair and equitable which denies recognition to the admittedly prior lien of the General Mortgage upon substantial property.

The statute (Sec. 77(d)) commands the Commission, in approving a plan, to determine that the plan will [689] meet the requirements of sub-section (e) of Section 77. That sub-section states among other things that the plan must be one which "is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders". (Sec. 77(e)(1)).

The requirement of a release of the substantial collateral which is subject only to the General Mortgage, while giving the creditors secured by the General Mortgage bonds nothing but common stock, preceded by new first mortgage bonds, new income bonds and new preferred stock, does not afford due recognition to their rights, but on the contrary discriminates unfairly in favor of the First Mortgage creditors.

If the General Mortgage and First Mortgage were foreclosed, the creditors secured by the General Mortgage would inevitably obtain (1) the items listed above (excluding free cash), and would also be entitled to (2) the debtor's equity of redemption in the property subject to the First Mortgage and (3) a deficiency judgment for any excess due on

their bonds, thus giving them rights as general creditors against the free cash above mentioned, and any other unmortgaged assets. The common stock allotted to the General Mortgage bondholders represents merely the equity in the Western Pacific property over and above the amount of the present First Mortgage. In other words, it constitutes recognition of only one of the three rights above mentioned of the General Mortgage bondholders, namely, the equity of redemption in the property subject to the [690] First Mortgage. Nothing is given in exchange for the first lien on other property, or in exchange for the general creditor position against the free cash.

Citation is hardly necessary to bulwark the statutory requirement of due recognition to the rights of each class of creditors. The statement in the Radford case (Louisville Joint Stock Land Bank v. Radford, 295 U. S. 555, 580) is nevertheless pertinent that the "right of the mortgagee to insist upon full payment before giving up his security has been deemed of the essence of a mortgage". This right cannot be taken away even under the bankruptcy power without some fair compensatory equivalent in recognition.

As was stated in In re Chicago & N. W. Ry. Co., 18 F. Supp. 932, 936 (N. D. Ill.):

> "Even a plan of reorganization should not be permitted to change the *relative* rights, interests and preferences of the persons interested in the estate of the debtor." (Italics ours.)

Principles similar to those on which we here rely were applied in an equity receivership case, in Guaranty Trust Co. v. Missouri Pacific Railway Co. (238 Fed. 812, E.D. Mo.). In a plan of reorganization of the Missouri Pacific railroad therein proposed, holders of so-called Series A bonds were found to be entitled to (1) a first lien upon property of a Missouri Pacific subsidiary, and (2) a general creditor position against Missouri Pacific as guarantor of the subsidiary's bonds. Under the plan, they were given a choice either on the one hand of retaining their mortgage security and losing their creditor rights, or on the other hand of abandoning their mortgage and being treated on a par [691] with general creditors of Missouri Pacific for the face amount of their bonds. The situation is similar to that in the present case, where the General Mortgage bondholders are required to give up their mortgage on properties where they have the first lien, and be treated only as second mortgagees. The court there held that the treatment proposed was unfair, and that the holders of Series A bonds should be entitled both to the benefit of their mortgage position, and also to their general creditor position for the deficiency, without being forced to surrender their mortgage position as a condition of recognition of their junior rights. The court stated (p. 819):

> "* * * the plan is so framed that, if they insist upon their mortgage security, they lose their rights as creditors under the contract. In

other words, the tender of preferred stock would not in that case be open to them for any part of their demands. On the other hand, if they accept the offer of preferred stock, they must abandon their mortgage. In that case they would get no more than a general creditor with no security whatever. These bondholders became creditors of the Missouri Pacific Company by virtue of its contract, irrespective of the Kansas City Northwestern mortgage, and, as such, their rights were equal to those of all general creditors, and superior to those of the stockholders. It does not seem equitable that, to maintain that parity and priority, they should be required to abandon their morfgage. Other general creditors, to whom preferred stock is offered, have nothing and give up nothing of security, but their proper relation to the old stockholders is fairly recognized.

The situation reduces itself to this: Whether those conducting the plan of reorganization decide [692] to include the Kansas City Northwestern Railroad in the new system or to exclude it, consideration should be given to the mortgage securing the series A bonds, and after the application of the value or proceeds of the mortgaged property determined by agreement or by foreclosure and sale the deficiency should have equitable recognition in the plan as a general debt."

To the same effect, see Note, 35 Col. L. Rev. 391, 394.

To put the matter another way, the General Mortgage Trustee here has both a senior position, on a par with the First Mortgage, and a junior position, behind the First Mortgage. The Commission has held that the senior position of the General Mortgage does not apply to as much property as the General Mortgage Trustee contended, but no one disputes that it does have a senior position, on a par with the First Mortgage, in respect of certain property. The fact that this property may be small in comparison with the property on which the First Mortgage has a senior position, does not justify disregarding it altogether, and giving the General Mortgage only a junior position, especially where the property on which it has a senior position is substantial in relation to the debts secured by the General Mortgage.

As respects the free cash, as well as the General Mortgage collateral free from the First Mortgage, there is also good authority that such free assets justify giving junior creditors some share in the prior lien bonds given on reorganization to senior encumbrances. (In re Barclay Park Corp., 90 F. (2d) 595, 597—C.C.A. 2nd.) In that case the court held that a plan was fair which, because of substantial assets free from the [693] first mortgage, subordinated the claims of the first mortgage bondholders to the extent of 25% of the principal to 25% of the claims of general creditors, and sub-

ordinated the first mortgage bondholders' claim for interest arrears to the entire principal of the general creditors' claims.

In order to be fair and equitable even on the legal basis which the Commission has adopted as respects disputed liens, the plan should give to General Mortgage bondholders a proportion of their claims in new income-mortgage bonds* according to the proportion (approximately 40%) which the value of collateral on which the General Mortgage is a first lien (plus a fair proportion, at least, of the free cash) bears to the total amount of the general mortgage claims. The Trustee takes no position respecting the division as between the three creditors holding General Mortgage bonds of the new income-mortgage bonds or other securities which would be thus allocated. Nor does it in any way acquiesce in the preliminary determination of the Commission with respect to priority of lien on the Northern California extension, the equipment, or the non-carrier real estate mentioned above.

CONCLUSION

The report of this honorable Commission dated October 10, 1938 and the plan of reorganization thereby approved should be modified so as to give to the holders [694] of General Mortgage bonds a

*Or the highest rank of such other securities as may be allotted to First Mortgage bondholders under any modified plan of reorganization.

fair proportion of their claims in new securities of the same type given to the First Mortgage bondholders under such plan.

Respectfully submitted,
H. C. McCOLLOM,
ORRIN G. JUDD,
Attorneys for Irving Trust Company, as Trustee under General and Refunding Mortgage of Western Pacific Railroad Company.

[Endorsed]: Filed Oct. 5, 1939. [695]

Before the
Interstate Commerce Commission
Finance Docket No. 10913.

In the Matter of
The Western Pacific Railroad Company,
Debtor.

PETITION OF A. C. JAMES CO., FOR MODIFICATION OF THE PROPOSED PLAN OF REORGANIZATION OF THE DEBTOR COMPANY, PROMULGATED BY THE COMMISSION BY ITS ORDER OF OCTOBER 10, 1938, AND FOR A REHEARING

The petition of A. C. James Co., a secured creditor, respectfully shows as follows:

I. Your petitioner is a corporation organized and existing under, and by virtue of, the laws of the State of Delaware, with its registered office in the State of Delaware at No. 900 Market Street, Wilmington, Delaware.

II. Your petitioner is a creditor of the debtor company in the principal amount of $4,999,800, together with unpaid accrued interest thereon at the rate of 5 per cent per annum from January 1, 1934, which unpaid interest to June 30, 1938 amounted to $1,124,955, or an aggregate debt on the date specified of $6,124,755. [697]

The consideration for said indebtedness was money loaned and advanced to the debtor company, now evidenced by three promissory notes of the debtor company, the principal amount, date, and date of Maturity of which are respectively as follows:

	Principal Amount	Date	Maturity
(1)	$4,504,000	March 28, 1932	March 28, 1935
(2)	347,000	March 28, 1932	March 28, 1935
(3)	148,800	May 31, 1932	May 31, 1935

The promissory note for $4,504,000, appearing at (1) above, was issued by the debtor company pursuant to authority granted by the Interstate Commerce Commission, in exchange for the Five Per Cent. Gold Debentures of the debtor company in like amount, issued under the Indenture dated as of July 1, 1930, made by and between the debtor company and the Chase National Bank of the City of New York, as Trustee. The debentures so ex-

changed evidenced cash advances, in like amount, which were made from time to time during the years 1931 and 1932, as follows:

February 27, 1931	$1,000,000
March 26, 1931	200,000
April 20, 1931	400,000
May 25, 1931	530,000
June 20, 1931	995,000
August 25, 1931	309,000
October 20, 1931	600,000
November 25, 1931	120,000
January 29, 1932	350,000
Total	$4,504,000

The promissory notes appearing at (2) and (3) above, were issued by the debtor company against cash advances in like amount on the dates stated.

[698]

The notes now held by your petitioner are secured as follows:

By $6,249,500 principal amount of the debtor's General and Refunding Mortgage Bonds, issued under an Indenture dated as of January 1, 1932, executed by the debtor company to The Chase National Bank of the City of New York, as Trustee, which General and Refunding Mortgage Bonds were deposited with and are now held by your petitioner; except that $2,000,000 principal amount of said General and Refunding Mortgage Bonds, at the request of the debtor company, were delivered by your petitioner to The Railroad Credit Corporation, to be held by said The Railroad Credit Cor-

poration as additional collateral against advances made to the debtor company by said The Railroad Credit Corporation; your petitioner retaining all its rights as lienor in and to said $2,000,000 principal amount of the debtor company's General and Refunding Mortgage Bonds, subject only to the prior rights which have accrued to The Railroad Credit Corporation as first lienor from the acts of the parties set forth.

The advances made by your petitioner to the debtor company were all made in 1931 and 1932, and were, in their entirety, applied to the costs of constructing the Northern California extension of the debtor company, which was built under the lien of the First Mortgage of the debtor company, and is an important source, present and prospective, of earnings to the debtor company.

A proof of claim was duly filed by your petitioner in the proceedings for reorganization of the debtor company, now pending in the District Court of the [699] United States for the Northern District of California, Southern Division (No. 26591-S).

By an order, entered August 20, 1935, by the District Court of the United States for the Northern District of California, Southern Division, in the proceeding for the reorganization of the debtor company (No. 26591-S), the above described claim of your petitioner was classified as a separate and distinct class for the purposes of Section 77 of the Bankruptcy Act, as amended.

III. On or about February 7th, 1936, the debtor company filed with the Commission a proposed Plan

of Reorganization. Hearings on the debtor company plan were initiated on March 23, 1936 and continued from time to time until December 9, 1936. In the course of these proceedings two additional plans were filed by parties to the proceeding, one of such plans having been submitted on behalf of your petitioner. On or about August 1, 1937, a proposed Report of the Bureau of Finance of the Commission was submitted to the parties to the proceeding. All parties, including your petitioner, filed exceptions thereto. On November 17, 1937, a hearing was held on these exceptions before the full Commission. On October 10, 1938, the Report and Order of the Commission, upon which a rehearing is now asked by your attorney, was handed down. This Report and Order of October 10, 1938, promulgates a Plan of Reorganization for the debtor company, which Plan differs in substantial respects from any of the plans theretofore submitted by parties to this proceeding.

IV. Your petitioner is advised and believes, and therefore alleges on information and belief, that the proposed Plan of Reorganization, as promulgated by [700] this Commission by its Report and Order of October 10, 1938, contains provisions which (a) are substantially prejudicial to its interests as a creditor and would, if put into effect, confiscate its property and deprive it of the protection assured to it, as a creditor, under the law of the land, (b) are incompatible with the public interest, and (c) are not authorized by Section 77 of the Federal Bank-

ruptcy Act, as amended, in the following respects and for the following reasons, among others:

A. The Plan promulgated by the Commission in its Report and Order of October 10, 1938, is objected to by substantially all classes of creditors.

Section 77 of the Bankruptcy Act was intended by Congress to expedite voluntary reorganizations of railroads. The Commission knows, or could readily learn by inquiry, that no single class of creditor or stockholder approves or accepts the plan which it has promulgated. Yet this plan, if certified by the Commission to the Court, will, under the provisions of Section 77 of the Bankruptcy Act, be submitted in due course to the creditors for acceptance or rejection.

We have here the extraordinary situation of the Commission, after almost eleven months of deliberation, promulgating a plan for ultimate submission to the creditors, for approval under the mechanics of Section 77, which plan is known at the outset to be objectionable to all, or substantially all, classes of creditors.

The Commission may fully understand the views of the interested creditors, but may construe the 1935 amendments to Section 77, and especially subsection (e), as amended, as contemplating the making effective of a plan of reorganization of a railroad property which [701] is not acceptable to any of the creditors or to the stockholders. Subsection (e), as amended, contains an express proviso, as follows:

"Provided, That, if the plan has not been so accepted by the creditors and stockholders, the judge may nevertheless confirm the plan if he is satisfied and finds, after hearing, that it makes adequate provision for fair and equitable treatment for the interests or claims of those rejecting it; that such rejection is not reasonably justified in the light of the respective rights and interests of those rejecting it and all the relevant facts: and that the plan conforms, * * *."

It may well be doubted whether Congress intended the quoted language as giving to the Commission and the Court the legal power to impose a plan of reorganization by coercion of all interested parties.

However, even though such were the legislative intent (and even though such intent could constitutionally be made effective), your petitioner respectfully submits that the Commission has completely failed to make the essential finding of fact upon which any such action by the Court could be taken.

The language quoted above from subsection (e) of Section 77 is immediately followed by that paragraph which provides the basis upon which the Commission shall find a value for the property being reorganized, to effect the purposes of the section.

The necessary implication is that there can be no coercion of entire classes of creditors, except on the basis of a finding by the Commission of the valua-

tion of the property against which their claims are asserted. Any other construction of subsection (e) would fly in the face of common sense and put substantial property [702] rights at the mercy of the current economic theories of an administrative body, without any effective protection through judicial review. How can the Commission or the Court decide what is "fair and equitable treatment" of admitted claims of creditors except upon the basis of a valuation of the property in which such creditors have an interest?

If the Commission does contemplate that the plan promulgated in its Report and Order of October 10, 1938 will be rejected by all classes of creditors, or, for that matter, by any one class of creditors, and subsequently be made effective by action of the Court under subsection (e) of Section 77, loss of time and additional expense to the parties in this proceeding will necessarily result if the Commission fails to incorporate in its report, at the time of certification of a plan to the Court, a finding as to valuation of the property in which the various classes of creditors claim an interest. This question of valuation is discussed below in other connections.

B. Your petitioner is prejudiced by the improper preferences proposed by the Commission for the benefit of Reconstruction Finance Corporation and The Railroad Credit Corporation.

Your petitioner advanced to the debtor company during 1931 and 1932 (during the depression) a total of $4,999,800. The advances were in cash and

enabled the debtor company to complete the Northern California Extension, now a factor of admitted importance in the earning power of the Company. Your petitioner was given, under Commission authorization, General and Refunding Mortgage bonds of the debtor company as [703] collateral, to the extent of 125% of principal amount of its advances.

At about the same time, functioning under Section 5 of the Reconstruction Finance Corporation Act, the Commission exacted from the debtor company, $10,750,000 face amount of such General and Refunding Mortgage bonds, as *part* collateral for advances of the Reconstruction Finance Corporation, which advances now stand at $2,963,000 principal amount. In other words, disregarding other substantial collateral, the Reconstruction Finance Corporation holds General and Refunding Mortgage bonds of the debtor, as collateral, to the extent of about 363% of the principal amount of its advances, as compared with the 125% furnished to your petitioner.

Carrying forward this solicitude for a coordinate agency of the Federal government, the Plan promulgated in the Report and Order of the Commission of October 10, 1938, gives to the Reconstruction Finance Corporation $9,025,550 in common stock (using the $100 per share value assigned by the Commission in its Report to this non-par value common stock) for its debt, principal and interest, of $3,612,181, while $3,556,000 of such common stock

is given to your petitioner, for its debt, principal and interest, of $6,124,755.

In addition, the Reconstruction Finance Corporation is to be permitted, under the terms of the Commission Report and Order, to retain the collateral for its claim which was furnished it by others than the debtor company. How this can be done against a protest of the party furnishing this other collateral is not made clear, but it does indicate the extraordinary solicitude of the Commission for the interests of the Reconstruction Finance Corporation. [704]

Your petitioner recognizes the special equities which affect the claim of the Reconstruction Finance Corporation. Public moneys were advanced through the Reconstruction Finance Corporation to the debtor company during the depression in an endeavor to save it from default on its fixed debt obligations. The moneys so advanced were used almost entirely to pay interest to the First Mortgage bondholders or to discharge taxes which were liens prior to the claims of the First Mortgage bondholders. The equities arising from the facts mentioned should be recognized in a reorganization (as should similar special equities affecting the claims of the Railroad Credit Corporation and your petitioner), but at the expense of all creditors of the debtor company, including First Mortgage bondholders, and not solely at the expense of your petitioner.

The legal aspects of the theory upon which the Commission seeks to justify its preferential treatment of the Reconstruction Finance Corporation claim as against the similar claim of this petitioner are discussed in Point II of the brief filed by this petitioner with the Commission on September 27, 1937.

Stated simply, the situation is this: The General and Refunding Mortgage bonds which are held by the Reconstruction Finance Corporation and your petitioner in widely varying ratios were never "issued" bonds. They were authorized by the Commission solely for use as collateral. The mere fact that the Commission required more pieces of paper to be issued to the Reconstruction Finance Corporation than to the petitioner, on loans made almost concurrently and for equally meritorious purposes, cannot multiply the debt claim of the Reconstruction Finance Corporation at the expense of [705] your petitioner. If debt claims could successfully be increased by the multiplication of pieces of paper taken from a necessitous debtor, the entire basis upon which the activities of loan companies in this country are conducted would be changed.

Even though the General and Refunding Mortgage bonds held by the three secured creditors were to be regarded as true collateral furnished by the debtor company (which it clearly is not) greater distributions to one creditor than to another could be justified only upon a showing that the value of the property of the debtor company in which its

creditors claim an interest is less than the total amount of the secured creditors claims.

Not only does the Report of the Commission fail to find that the value of the property of the debtor company is less than the total amount of the secured creditors' claims, but it expressly authorizes (Report, p. 60) $80,660,400 of securities for distribution to the First Mortgage bondholders and secured creditors, whose aggregate claims, principal and interest, on June 30, 1938, amounted to only $73,522,463.

Clearly, using approved capitalization as a yardstick, there is enough to discharge the debt claims of the three secured creditors (Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Co.), and hence no legal ground for a preference between them based on the relative amount of General and Refunding Mortgage bonds held by them.

It should be noted, however, that the Report of the Commission, at page 62, states that since it proposes to distribute only 159,462 shares of the non-par-value stock to the three secured creditors, "it would be inequitable to distribute such stock in the proportion that each claim bears to the total amount of such stock." [706]

The Commission's premise for such statement is, "Having found that 159,462 shares of common stock available for distribution are inadequate in value to satisfy the aggregate claims of the parties, * * *."

But the only value assigned by the Commission to this common stock is the value of $100 per share (Report, p. 60). So you have $15,946,200 of common stock to allot among three creditors whose aggregate claims, principal and interest, amount, as of June 30, 1938, to $12,317,842. Obviously there is no inadequacy.

Your petitioner respectfully submits that no plan of reorganization is equitable or legally sustainable which gives the Reconstruction Finance Corporation in common stock two and one-half times the amount of its actual debt, while giving to your petitioner only a little more than half the amount of its actual debt.

The theory upon which the Commission seeks to sustain preferential treatment of the Reconstruction Finance Corporation as against your petitioner leads it to give a like preferential treatment as against your petitioner to The Railroad Credit Corporation. To this preferential treatment your petitioner likewise objects, and on like grounds.

C. The Plan promulgated in the Commission's Report and Order of October 10, 1938, is invalid in that it fails to recognize the claims of the general creditors.

The debtor company has two general creditors. On June 30, 1938, the date used in the Report and Order of October 10, 1938, the debtor company owed to The Western Pacific Railroad Corporation for advances on open account the principal sum of $5,766,309, and for interest to that date the sum of $1,

843,061. The debtor [707] company also owed the Western Realty Company on the date, for like advances, the sum of $50,000 principal amount, and $10,417 of interest. No provision is made in the Plan promulgated by the Commission for these claims of general creditors.

In the Commission's Order there appears an express finding that these claims are without value (Par. 10, Order). There is nothing in the record before the Commission which supports such a finding. The valuation of the property of the debtor company, made by the Commission under Section 19a, amounts, with additions at cost to June 30, 1938, to approximately $145,000,000. As suggested by Commissioner Miller in his dissenting opinion, if all reasonable deductions for depreciation were applied, the net valuation would amount to at least $120,000,000. The aggregate of principal and interest as of June 30, 1938, of the secured claims, coming ahead of these general creditors (including equipment trusts and trustees' certificates), was only $85,488,580, leaving an excess of about $35,000,000, if weight is to be given the Section 19a valuation.

It should further be noted that it is rare indeed that a finding can be made that the claim of a general creditor against a corporation is completely without value, when the debtor company has $5,481,640.99 in current assets (Report and Order, p. 9).

Nor can the Commission sustain its finding of no

value for the interests of the general creditors by reference to the capitalization which the Commission is prepared to approve for the reorganized company. In its Report (p. 60) it expressly authorizes $80,660,400 of securities of the reorganized company for distribution among the creditors (other than holders of equipment [708] trusts and trustees' certificates). The aggregate claims of the First Mortgage bondholders and the secured creditors (such claims having priority as to the bulk of the assets of the debtor company) amount, as of June 30, 1938, to only $73,522,463. This leaves a clear excess for the general creditors of $7,137,937.

The cancellation of the interests of the general creditors in the property can be justified, if at all, only upon a finding both as to the value of that part of the property of the debtor company which is subject to liens, and as to the value of that part of the property of the debtor company which is clearly free from any lien. These findings the Commission has not made.

D. The plan promulgated by the Commission is invalid in failing to recognize any value for the stockholders in the property.

As stated under point C above, the 19a valuation, with additions to cost to June 30, 1938, amounted to upwards of $145,000,000. Deducting accrued depreciation, there would be a clear residue of more than $120,000,000. The debts of the debtor company, as of the same date, aggregate, principal and interest, $93,158,367. On the basis of the 19a valua-

tion there is an excess of approximately $27,000,000 for the equity.

However, the Commission is careful in its Report to designate the Section 19a valuation as a valuation "for rate purposes" and, by implication, to suggest that, for the purpose of Section 77 of the Bankruptcy Act, a valuation may be based purely on earning capacity.

There are several factors which should be noted in this connection. [709]

In the first place, subdivision (a) of Section 77 of the Bankruptcy Act, in stating the basis upon which valuations should be made, does not permit them to be grounded solely on earning power, but definitely requires conformance to the law of the land in valuation cases. A valuation made purely on an earnings basis would not, we are advised, furnish a proper and lawful basis upon which to legally terminate the interest of the stockholders in the debtor company.

In the second place, the record before the Commission shows, and the Report of the Commission recognizes, that the earnings record of the debtor company for the past ten years has been influenced by factors which make it difficult to gauge future earnings on the basis of the earnings of the immediate past. Some of these factors were: (a) the expenditure of approximately $18,000,000 during the period in question on the physical rehabilitation of the property of the debtor company; (b) the construction during that period of the Northern

California Extension, an addition which has greatly changed the traffic relationships of the debtor company and, admittedly, largely increased its future earning power; and (c) the construction of the Dotsero Cut-Off and the resultant increase of through traffic which will be routed to it from its principal eastern connection.

In the third place, it should be noted that the Commission has completely failed in its Report to make any valuation or appraisal for the property of the debtor company (other than its reference to the Section 19a valuation) either on the basis of earnings or any other basis. It has, to be sure, asserted a willingness to approve a capital structure not to exceed an aggregate amount of $93,726,517, but of this total $31,370,300 is [710] represented by the arbitrary allocation of a value of $100 a share to the no par value stock which is to be authorized. Your petitioner is advised that no par value stock has the essential and inherent characteristic of representing merely a fractional interest in property, and there is no more reason (except on the basis of a valuation of the property represented by such fractional shares) to allocate a value of $100 a share to proposed no par value stock than $200 a share, or $25, or $10.

Accepting, for the present purpose, the total value assigned by the Commission to the securities it proposes to authorize ($93,726,517), as reflecting its view as to an appropriate valuation of the property for the purposes of Section 77 of the Bankruptcy

Act, it is difficult to see how, on the record before the Commission, a reviewing court could sustain such valuation.

Not only is there a complete disregard of its Section 19a valuation, but the Commission, in its Report, is quite explicit as to how it arrives at the limitations it puts on the capitalized value of the property of the debtor company. The Report (page 40) states that Section 77 of the Bankruptcy Act provides that an approved plan shall be "compatible with the public interest". It states that "the public interest is not defined"; but interprets the phrase to require, among other things, "that the capitalization should not exceed a conservative appraisal of the assets to be taken over by the reorganized company and that proposed charges, whether fixed or contingent, be within its probable earning power."

On this basis the Commission proceeds to state, on page 41, quite a different proposition to the effect that consideration should be given to investment in the prop- [711] erty of the debtor company "only to the extent that such investment is justified by the probable earnings reasonably foreseeable for the future".

Without making any appraisal of the assets of the debtor company, however, the Commission then moves forward to the premise that it ought not to authorize a capital structure for a reorganized company which includes capital stock on which dividends are not reasonably likely to be paid. At page 51 of the Commission's Report, it states:

> "The capitalization of the reorganized company must be maintained within strict limits if any material return on its capital stock is to be expected and the shares of its stock are not to become mere tokens for stock market speculation."

There would seem to be an obvious missing middle in the above logical sequence. The doctrine that property rights should be taken away if one cannot foresee an immediate material return is the more extraordinary in this day and age when money in the bank and even short term government bonds are often held or purchased on a zero or even minus interest basis. On the same theory you could take away from the owners probably a quarter to a third of the improved real estate property in the City of New York without (in theory) violating due process of law.

Why should the Commission's theory, that a "material return" is to be assured or expected on the capital stock of the reorganized company, take the place of the "conservative appraisal of the assets to be taken over by the reorganized company", to which the Commission refers on page 40 of its Report? [712]

And why, above all, should the substantial rights of the stockholders in the property be disregarded, and in effect confiscated, on the basis of a mere theory of capitalization? Section 77 of the Bankruptcy Act may carry some ambiguities, but it cer-

tainly was not a condemnation statute. The phrase that shares of stock should not become "mere tokens for stock market speculation" was an impressive phrase, as first used by Senator Wheeler, and has a real significance, but it is hardly an adequate substitute for an appraisal, or an adequate basis for the appropriation of the property rights of the stockholders of the debtor company.

Your petitioner urges that any plan of reorganization certified by the Commission to the Court should recognize the interest of the stockholders of the debtor company, even though such recognition be given through the issue of no par value common stock, on which the Commission may not be able to say with confidence that dividends will be paid in the next five, ten, or twenty years.

E. Other objections to the Plan promulgated by the Commission.

In addition to the substantial features of the proposed plan of the Commission to which your petitioner objects, there are other less basic, but equally objectionable, features of the proposed plan.

For instance, the Commission Plan provides for $10,000,000 of first mortgage bonds, protected by a first lien upon all the assets of the company, and yet provides that these bonds should be income bonds for the first five years. [713]

It may fairly be assumed that all parties to the proceeding are prepared to accept a drastic limitation by the Commission, under the mandate of Section 77 of the Bankruptcy Act, upon the fixed

charges of the reorganized company so as to bring such charges well within the scope of its earning power. It is probable that no one party to this proceeding would reject a plan solely because it forced all existing creditors to accept income obligations for the entire existing debt. If, however, the property cannot, as a matter of sound financing, sustain a fixed charge of $400,000 a year upon the $10,000,000 of new money used to rehabilitate the property during the past three years, the Commission might well dismiss the proceeding under Section 77 and invite a proposal for the discontinuance of service to the public and a liquidation of the property of the debtor company.

The result of any such requirement in the plan is to make it quite impracticable to market the proposed 4% income bonds to the public during the first five years of their existence. In effect, it makes the Reconstruction Finance Corporation the only possible purchaser of such bonds and cannot but be detrimental to the credit of the reorganized company.

So too, objection might properly be made to the provisions for the selection of a Reorganization Committee and to other incidental features of the Commission Plan.

F. Practical Considerations.

If the plan of reorganization, in its present form, as set forth in the Report and Order of the Commission of October 10, 1938 is certified by the Commission to the [714] Court, it is at least doubtful

whether the reorganization of the debtor company under Section 77 will be expedited.

Under the unnecessarily drastic treatment of the interests of the creditors and of the stockholders it may be assumed: (a) that the secured creditors will necessarily ask the Court for a determination on the question of conflict of lien between the First Mortgage and the General and Refunding Mortgage, (b) that your petitioner will ask the Court for a determination of the value of the property of the debtor company (or a remission to the Commission for such valuation in the first instance) as a basis for asserting that the rights of general creditors are to be dealt with on the basis of actual debt, represented by the relative amounts of money advanced to the debtor company, and not on the basis of the number of pieces of paper issued by the debtor company to them, ostensibly as collateral, (c) that The Western Pacific Railroad Corporation as a general creditor and the Western Realty Company as a general creditor will ask the Court for a determination of value of the property of the debtor company as a basis for their assertion of a right to be recognized as creditors of the debtor company in any plan of reorganization, and (d) that The Western Pacific Railroad Corporation as owner of all the stock of the debtor company will ask the Court for a valuation of the property with a view to recognition of its interests.

If the Plan in its present form were to be certified to the Court and immediately submitted to the parties to the proceeding for a vote as to acceptance,

it may safely be assumed that substantially all the creditors will vote to reject the Plan. [715]

If, therefore, it is the desire of the Commission to expedite the reorganization of the debtor company, some other or different course should be followed.

If the Commission is prepared to assert, in all proceedings under Section 77 of the Bankruptcy Act, that the interests of creditors must be determined solely on the basis of the prospective earning power of the property of the debtor company, then the case of The Western Pacific Railroad Company constitutes a poor test case. It would be far better for the Commission to reject the various plans submitted to it by the debtor and creditors in this proceeding, and to postpone the approval of a plan of reorganization for the debtor company until it shall have had an opportunity to demonstrate what its real earning power is under normal conditions.

Only during the summer of 1938 did the rehabilitation program of the debtor company, which has involved the expenditure of approximately $16,000,000 in the last three years, reach its completion. This rehabilitation program had an obvious and substantial effect on the apparent earning power of the debtor company, both because it involved charging directly to operating expenses more than half the moneys so spent, and, also, because of the disruption of normal traffic and resultant increase of transportation expenses.

Furthermore, the Northern California Extension is only now in a position to demonstrate its full contribution to earnings of the debtor company, as

it has taken a considerable time for the flow of traffic to become firmly established.

If, however, the Commission is prepared to recognize that theories of capitalization ought not to be solely [716] determinative of the property rights of the creditors and is prepared to deal with the problem of the reorganization of the debtor company on a realistic basis, your petitioner believes that a plan of reorganization can be evolved which will meet with the acceptance of the necessary proportion of all parties at interest. While it is believed that the working out of such a plan acceptable to the parties would be clearly facilitated if the Commission were able, through suitable designees, to proceed by means of informal conferences with the parties at interest, it seems possible that an appropriate plan could be evolved by the parties themselves if freed from the limitations imposed by the somewhat drastic theories of capitalization which have heretofore been urged by the Commission.

In the event a further attempt is made to evolve, in the proceeding before the Commission, a plan acceptable to parties, your petitioner suggests that the Commission invite or require a full representation before it of the various parties at interest. In the proceedings thus far held there has been no formal representation before the Commission of the general creditors or the stockholders. Moreover, the First Mortgage bondholders have been represented only by a committee of Institutional Bondholders, and not by a public committee approved by the Commission under subsection (p) of Section 77

of the Bankruptcy Act. The importance of this is that, while the insurance companies may well hold approximately one-third of the outstanding First Mortgage bonds, their interests are in certain respects quite different from the interests of individual holders of First Mortgage bonds. For instance, the various plans submitted by the Institutional Bondholders Com- [717] mittee in this proceeding, show on their face that considerable importance is attached to holding in that Committee effective control of the reorganization, and of the reorganized company which may emerge from such reorganization. A committee acting for all the First Mortgage bondholders, qualified by the Commission under subsection (p) of Section 77 of the Bankruptcy Act, might well take a quite different point of view upon this question. Likewise, the extent and the manner of funding unearned interest, in connection with the reorganization, has quite a different aspect for the insurance company bondholder than for the individual bondholder, because of the different methods of income tax accounting applicable. In these and other respects, the Institutional Bondholders Committee is not an entirely adequate spokesman for the First Mortgage bondholders.

G. Reservation of right to file specific objections to any modified plan.

Your petitioner, having in mind that such plan as may finally be approved by the Commission and certified to the Court may differ in substantial re-

spects from the Plan of Reorganization, as set forth in the Report and Order of October 10, 1938, necessarily reserves the right to file with the Court specific objections to such plan as may be certified to the Court by the Commission, even though such objections might have been urged to the Plan of October 10, 1938, and are not.

Wherefore, your petitioner prays the Commission, in the alternative, that it either modify the Plan set forth in the Report and Order of October 10, 1938 in the [718] respects indicated above, or reopen the matter for a reasonable period in order that a plan acceptable to the interested parties may be evolved. Your petitioner further prays that in the event the Commission grants an oral argument upon this, or other petitions for rehearing on the Report and Order of October 10, 1938, that your petitioner be granted the right to be heard in person or by counsel at that time. And for such other and further relief as may seem to this Commission just and proper.

Dated: December 8, 1938.

A. C. JAMES CO.,
By WILLIAM W. CARMAN,
Vice-President.

ROBERT E. COULSON,
Attorney for Petitioner,
Office and P. O. Address,
40 Wall Street,
New York, N. Y. [719]

State of New York,
County of New York,—ss.

William W. Carman, being duly sworn, deposes and says that he is the Vice President of A. C. James Co. and as such is fully authorized to make this affidavit and that the foregoing statement of facts is true except as to those matters therein stated to be upon information and belief and as to those matters he believes it to be true.

WILLIAM W. CARMAN.

Subscribed and sworn to before me this 8th day of December, 1938.

Before the
Interstate Commerce Commission

Finance Docket No. 10913

In the Matter of
The Western Pacific Railroad Company
Reorganization.

PETITION FOR MODIFICATION OF THE COMMISSION'S REPORT AND ORDER DATED OCTOBER 10, 1938 ON BEHALF OF FREDERICK H. ECKER, JOHN W. STEDMAN AND REEVE SCHLEY, AS AN INSTITUTIONAL BONDHOLDER'S COMMITTEE

Come now Frederick H. Ecker, John W. Stedman and Reeve Schley, as a Committee representing a group of institutional holders of First Mortgage Bonds of The Western Pacific Railroad Company (hereinafter referred to as the Committee, the Railroad Company being hereinafter referred to as the Debtor), intervenors in the above-entitled proceeding, and respectfully petition the Commission to modify its Report and Order entered herein under date of October 10, 1938, as hereinafter set forth, and to grant a rehearing herein, and in support of said petition respectfully show:

I.

The Plan of Reorganization approved by the Report and Order entered herein under date of October 10, 1938 (received by the parties hereto Oc-

tober 18, 1938), which Plan is hereinafter called the Commission's Plan, is, as to several of its details, unacceptable to the Committee and, in the opinion of the Committee, will be unacceptable to a substantial majority of the holders of the Debtor's exist- [723] ing First Mortgage Bonds. The reasons for the objections of the Committee to the Commission's Plan are hereinafter in Article III set forth. The Committee is advised that the Commission's Plan is also unacceptable to each of the other classes of creditors and stockholders of the Debtor. Accordingly, in the opinion of the Committee and its counsel, any effort to consummate the Commission's Plan in the form embodied in said Report and Order will result in vigorous opposition from all classes of creditors and stockholders and will indefinitely delay the reorganization of the Debtor. On the other hand, most of the details of the Commission's Plan as to which the Committee has objection seem to affect only private rights of the parties and not the public interest, and as to such objections it would seem that they can be obviated without in any wise adversely affecting any matter of public interest. In so far as such objections go to questions in which there is a public interest, in the opinion of the Committee and its counsel, the modifications of the Commission's Plan required to obviate such objections are themselves all in the public interest.

II.

In the hope that the parties of record herein could and would agree upon a plan for the reorganization of the Debtor which might reasonably be expected to obtain the approval of the Commission and to be acceptable to all classes of creditors and stockholders of the Debtor, the Committee and its counsel, after October 18, 1938, entered into negotiations with the representatives of all such classes of creditors and stockholders.

Said negotiations failed to result in such an agreement primarily, in the opinion of the Committee and its counsel, because recognition of the rights of junior creditors and stockholders in a manner satisfactory to them would necessitate an aggregate capitalization larger than [724] that which said Report of the Commission indicated was likely to be approved by the Commission, and also would require, if the claims of the present bondholders were also to be given recognition in a manner satisfactory to them, the creation of a larger amount of Preferred Stock than said Report indicated the Commission was likely to approve. Should the Commission be willing so to increase the amount of Preferred Stock to be issued in the reorganization as to permit allocation of Preferred Stock for the claim of the existing First Mortgage Bondholders for interest, and at the same time slightly increase the number of shares of new Common Stock, without par value, to be issued, and also make the modifications as to the character of the

new securities hereinafter suggested, it is believed that unanimous agreement between the parties of record might still be effected.

Lacking such unanimous agreement, however, the Committee has developed modifications of the Commission's Plan which, while conforming substantially to the general capital structure provided for by the Commission's Plan, obviate the objections of the Committee to that Plan. These modifications of the Commission's Plan have been embodied in a complete plan, a copy of which is hereto annexed as Exhibit A (hereinafter called the Committee's Modified Plan) which, the Committee is advised, has the approval of Reconstruction Finance Corporation (hereinafter called RFC). The Committee believes that its Modified Plan "is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders;" and can, as a practical matter, be consummated without undue delay. [725]

III.

The objections of the Committee to the Commission's Plan, and the manner in which those objections are obviated by the Committee's Modified Plan, are as follows:

1. The Commission's Plan violates the rule laid down by the United States Supreme Court in Northern Pacific R. Co. v. Boyd, 228 U. S. 482, and cases following that case (hereinafter called the Boyd case rule), by allotting to creditors junior to the Debtor's existing First Mortgage Bondholders (hereinafter referred to as the junior creditors) new securities which give the junior creditors participation in the reorganized property in priority to full recognition of the existing priorities of the Debtor's existing First Mortgage Bonds.

The claim of the existing First Mortgage Bonds as of July 1, 1938, aggregated $61,204,621, all of which, as correctly found by the Commission's Report and Order, is secured by a lien upon substantially all the Debtor's property prior to the lien of any other of the Debtor's creditors. By the terms of the existing First Mortgage that claim bears fixed interest at the rate of 5% per annum, or $3,060,231 per annum.

The Commission's Plan requires the following diminution of the present First Mortgage Bondholders' existing rights to annual income and to assets:

(a) Upon no part of their claim are the existing First Mortgage Bondholders hereafter to receive fixed interest;

(b) in respect of that part of their claim representing 40% of the principal amount of the existing First Mortgage Bonds, the holders of said Bonds are to receive an annual rate of return of 4%, or 20% less than that to which

they are presently lawfully entitled; such rate is to be contingent upon [726] income; and to the extent that deficiencies of income exceed three years' interest at the reduced rate, the bondholders are wholly deprived even of the reduced rate of return;

(c) as to that part of their claim representing 60% of the principal of the existing First Mortgage Bonds, the holders of said Bonds are to be transferred from a creditor position to that of Preferred Stockholders. While their annual rate of return remains unchanged at 5%, such return is to be dependent wholly upon annual income and to the extent of any income deficiency in any year, is lost forever. Moreover, dividends on the Preferred Stock (though cumulative if earned) need not be paid unless the Board of Directors of the New Company deems it advisable so to do; and

(d) as to that part of their claim representing the accrued and unpaid interest on their bonds, the holders of the existing First Mortgage Bonds are not only to be transferred from a position of creditor to the position of stockholder, but the priority of that portion of their claim against the assets of the Debtor is to be taken away by the allotment of Common Stock in which, as will hereafter be pointed out, junior creditors are given allotments on a basis more favorable than the allotment made to the holders of existing First Mortgage Bonds.

The Commission's Plan provides no compensating factors (such as conversion or participating rights) to compensate the holders of existing First Mortgage Bonds for the drastic diminution of their rights, both as to income and as to principal, imposed upon them by the foregoing provisions of the Commission's Plan. In other words, the existing First Mortgage Bondholders are required, without being compensated therefor, to make large [727] sacrifices in the new securities which they receive, which sacrifices redound to the benefit of the junior creditors.

The Committee's Modified Plan obviates the foregoing objections of the Committee in the following manner:

(a) The interest rate upon the Income Bonds is made 4½%, thus reducing the minimum sacrifice of annual income on this part of the bondholders' claim from 20% of their present annual return to 10% of that return; and to compensate both for that sacrifice and for the contingent character of the interest and the three year limitation upon its cumulative character, the Income Bonds are made convertible into Common Stock of the New Company at the rate of 20 shares of Common Stock for each $1,000 bond;

(b) while the annual rate of dividends upon the Preferred Stock provided for in the Commission's Plan has not been changed, the Committee's Modified Plan, in order to compensate for the fact that the new Preferred Stock is

wholly non-cumulative except if earned, provides that, after dividends shall have been paid or declared or set apart for payment on the new Common Stock at the rate of $3 per share in respect of any year, each share of new Preferred Stock shall be entitled to share equally with each share of new Common Stock in any dividends paid or declared or set apart for payment in respect of such year; and

(c) the Committee's Modified Plan provides for an allocation of Common Stock whereby no junior creditor shall receive Common Stock for its claim upon a basis (i. e., at a price) more favorable than the basis (i. e., the price) at which Common Stock is allotted to holders of existing First Mortgage Bonds in respect of that part of their prior claim for which new Common Stock is allotted. The ob- [728] jection of the Committee with respect to the allocation of Common Stock under the Commission's Plan and the method of obviating that objection under the Committee's Modified Plan is further explained in the next succeeding paragraph 2 of this Article III.

2. The Commission's Plan erroneously treats General and Refunding Mortgage Bonds of the Debtor pledged to secure the notes to RFC, Railroad Credit Corporation (hereinafter called RCC), and A. C. James Company (hereinafter called

ACJ), as if such Bonds constituted a debt of the Debtor, and, as debt, were entitled to participation in the reorganization. In fact said Bonds have never been issued, have never become obligations of the Debtor, and constitute in law and in equity, not debt, but solely a method of dividing among the holders of the real debts (the notes, with interest, held by RFC, RCC and ACJ), for which said Bonds are pledged as collateral, whatever security may remain in the value of the Debtor's property after full payment of the existing First Mortgage Bonds, both principal and interest.

That security, as correctly found by the Commission, is junior to the First Mortgage. Hence no amount of multiplication of evidences of the security can lift the debt which it secures to a position entitling that debt to better treatment than is accorded any part of the debt represented by the First Mortgage Bonds.

The Commission's plan allots 3.13 shares of new Common Stock to that part of the existing First Mortgage Bondholders' claim representing the accrued and unpaid interest to July 1, 1938, amounting to $241.72 per $1,000 First Mortgage Bond. This makes the price at which new Common Stock is so allotted $77.25 per share.

The Commission's Plan allots 90,255½ shares of new Common Stock to the RFC claim, a debt aggregating to July 1, 1938, for both principal and interest, $3,612,181, [729] and no more. This makes the price at which new Common Stock is so al-

lotted $40 per share, or a price to a creditor junior to the First Mortgage Bonds of but 51.8% of the price at which the stock is allotted to the senior First Mortgage Bonds.

The Commission's Plan allots 33,646½ shares of new Common Stock to the RCC claim, a debt aggregating to July 1, 1938, for both principal and interest, $2,580,906, and no more, and which, because fewer General and Refunding Mortgage Bonds are pledged per $1,000 of the claim than are pledged to secure the RFC note, is entitled to still less favorable treatment than the RFC note. The price at which new Common Stock is thus allotted to RCC is $76.70 per share, again less than the price at which the stock is allotted to the senior First Mortgage Bonds.

The practical result of the allocation of the new securities by the Commission's Plan is that, when income distributable upon the new securities shall in any year have provided in full for the interest upon the RFC's present junior claim, the income so distributed to holders of existing First Mortgage Bonds will have recouped them to the extent of but 81% of the annual income to which they are presently lawfully entitled for that year.

Furthermore, when under such allocation the income distributable to the new securities held by existing First Mortgage Bondholders in any year fully recoups such Bondholders for the annual income to which they are presently lawfully entitled,

the income received upon the new securities allotted to the RFC claim will aggregate 2-1/7 times the annual interest to which the junior RFC claim is presently lawfully entitled.

The Committee's Modified Plan obviates these objections, as to RFC, by granting to RFC, in consideration of its provision of new money as hereinafter in Paragraph 8 of this Article III provided, treatment pari passu with holders of existing First Mortgage Bonds, and as to RCC, by allotting new Common Stock to holders of existing First [730] Mortgage Bonds, in respect of their claim, at the price of $66-2/3 per share and to RCC, in respect of its claim, at the price of $70 per share.

The provision of the Commission's Plan that Common Stock must be allocated as between RCC and ACJ in proportion to the amounts of General and Refunding Mortgage Bonds held by them respectively as collateral is, in the opinion of the Committee and its counsel, correct, and such proportionate allocation as between said two creditors is adhered to in the Committee's Modified Plan.

It will be noted that under the Committee's Modified Plan the changed treatment of the RFC claim results in the RCC claim and the ACJ claim receiving more shares of new Common Stock than are allotted to them under the Commission's Plan.

3. The Commission's Plan provides no definite and practical method of raising the necessary $10,000,000 of new money and further violates the rule

of the Boyd case by giving to RFC, a junior creditor, the privilege of providing the new money upon terms which will presumably be more favorable than those afforded to the senior First Mortgage Bonds.

The Commission's Plan provides for the issue against $10,000,000 of new money of $10,000,000 First Mortgage 4% Bonds maturing in fifty years with interest contingent on income, but fully cumulative, for five years and thereafter fixed. Such bonds probably are not marketable at their principal amount and accrued interest under the conditions affecting railroad credit today. The Commission's Plan provides for an offer of the Bonds at that price to the junior creditors and existing First Mortgage Bondholders, but in neither case are such creditors required so to purchase their proportion of the New Bonds as a condition of their participation in the reorganization. As a practical matter, therefore, the rejection of such offer is certain and its rejection will not in any wise, under the Commission's Plan, diminish the participation of the rejecting creditor in the new securities issuable under that Plan. [731]

The alternative method for furnishing the new money provided by the Commission's Plan is that RFC shall make a loan, the terms of which as to interest rate, maturity, and security, are left wholly undisclosed. Presumably, the terms are to be more favorable than those offered by the Commission's Plan to the senior First Mortgage Bondholders.

This creates a further violation of the rule of the Boyd case, through its unjust discrimination against a senior creditor in favor of a junior creditor.

This objection is obviated by the Committee's Modified Plan (along with the objection referred to in paragraph 2 above in so far as it affects the discrimination in favor of RFC) by providing that RFC, in consideration of its furnishing the new money by purchasing at their principal amount and accrued interest $10,000,000 4% First Mortgage Bonds having a maturity of 25 years and bearing fixed interest, shall receive, in respect of its present claim, treatment on the same basis as that received by holders of existing First Mortgage Bonds.

Under the conditions affecting railroad credit prevailing prior to January 1, 1938, the purchase upon such terms of said new First Mortgage Bonds would not, in the opinion of the Committee and its counsel, have afforded adequate consideration to support, as against holders of existing First Mortgage Bonds and other creditors of the Debtor, the treatment of the existing RFC note as thus contemplated. Under the conditions affecting railroad credit now prevailing, however, the purchase of said Bonds at said price will, in the opinion of the Committee and its counsel, furnish adequate consideration to support, as against both existing First Mortgage Bonds and existing junior creditors, such treatment of the RFC claim.

4. The Commission's Plan provides for a mandatory Capital Fund. In the opinion of the Committee and its counsel, this constitutes an undue restriction upon management and an undue prejudice to all holders of the new securities other than the new First Mortgage Bonds. The [732] Committee's Modified Plan therefore provides that appropriations to the Capital Fund shall be permissive.

5. The Commission's Plan rejected the proposal heretofore made by the Committee that the election of directors should be by cumulative voting in order to insure representation to all interests, and particularly to the holders of the new Preferred Stock, who will be chiefly the existing First Mortgage Bondholders. The record shows that ACJ, a junior creditor, also has substantial control of the Debtor's stock and also holds a substantial amount of existing First Mortgage Bonds. The Committee does not believe that it is fair or equitable to create a voting system under which a junior creditor who will receive for his junior claim Common Stock having a remote interest in income will, because he also owns or controls a minority of the existing First Mortgage Bonds, be able to elect the entire Board of Directors of the New Company. Accordingly, the Committee's Modified Plan provides for the election of directors by cumulative voting. It will be noted that under such a system of voting the present junior creditors, including ACJ, as holders of new Common Stock will also be assured

representation on the Board of Directors of the New Company.

6. The Commission's Plan does not create a capital structure adequate to provide for future capital expenditures and at the same time maintain a sound character.

The Commission's Plan provides that new First Mortgage Bonds in excess of the $10,000,000 to be issued in the reorganization for new money shall not be issued against future capital expenditures unless the income of the New Company available for fixed charges in a period of 12 consecutive calendar months within the 18 calendar months immediately preceding the date of authentication and delivery of the bonds equals or exceeds 1½ times the fixed charges including interest on the bonds then applied for. It provides no authorized Income Mortgage Bonds for use in future financing.

[733]

The foregoing provisions will prevent the issue of fixed charge obligations in periods of low earnings when the New Company would be unable to borrow except by the use of fixed interest bearing obligations (thus tending to induce insolvency) and, on the other hand, will permit the use of fixed interest bearing obligations during periods of high earnings when the capital structure should be so arranged as to encourage financing through Income Mortgage Bonds or Stock upon a reasonable basis.

A study of the earnings record and security issues of carriers now in receivership or Section 77 pro-

ceedings and of carriers generally regarded as having sound capital structures indicates that the provisions of the Commissioner's Plan would not have prevented the exaggerated debt of many of the present insolvent carriers, while, on the other hand, they would have resulted in the insolvency of several carriers whose capital structures generally are regarded as sound and which the Commission has certified are not in need of reorganization. (See Debtor's Brief dated May 31, 1938, before the Bureau of Finance in Chicago, Milwaukee, St. Paul and Pacific Reorganization, Finance Docket No. 10,882, pages 66-70.)

The Committee's Modified Plan obviates this objection by provisions which are the result of long study by representatives of institutional and other bondholders in this and other reorganization proceedings and which, it is believed, have now been so worked out as to avoid objections made to somewhat similar provisions in other reorganization cases.

7. The Commission's Plan provides that the Reorganization Committee which shall carry out the reorganization shall be composed of one person named by the First Mortgage Bondholders, one person by RFC, RCC and ACJ as a group (which, in view of the amount of collateral held by RFC, means RFC), and one person by the purchaser of the new First Mortgage Bonds (which, as a practical matter, means RFC). [734]

While there can be no doubt that RFC is entitled to representation on the Reorganization Committee, particularly if it provides the new money, the Committee does not believe that its position entitles it, and certainly the junior creditors as a class are not entitled, to two-thirds of the Reorganization Committee, as against the holders of approximately $62,000,000 senior claim of the existing First Mortgage Bondholders.

The Committee's Modified Plan therefore provides that the Reorganization Committee shall be composed of three persons designated by the holders of existing First Mortgage Bonds in such manner as the Commission may prescribe, one, by RFC and one, by RCC and ACJ jointly.

It will be noted that the Committee does not seek to name the representatives of the First Mortgage Bondholders to serve as the members of the Reorganization Committee but leaves the manner of their selection to the Commission's determination. The Committee, however, is insistent that a method of electing representatives of the First Mortgage Bondholders shall be adopted by the Commission which shall result in representation of the First Mortgage Bondholders by those whose interest lies solely in the First Mortgage Bonds and not by those whose real interest lies in a junior position.

8. The Commission's Plan does not provide adequate means for executing the Plan and, by eliminating the provisions originally suggested by the Committee for carrying out the Plan through a

sale at an upset price to be fixed by the Court, will create a cloud on title of the New Company and make questionable the marketability of the new First Mortgage Bonds, even to RFC.

The Committee's Modified Plan obviates this objection through a provision for a sale at an upset price to be fixed by the Court which is materially different in form from that originally suggested by the Committee, and which the Committee believes avoids all the objections made to similar provisions in previous Reports of the Commission and its Bureau of Finance. [735]

The provision now contained in the Committee's Modified Plan

(a) is operative only after the confirmation of the Plan;

(b) is optional with the Court and not mandatory;

(c) creates no "coercion" against junior creditors, confining the possibility of such "coercion" to the invocation of the power of the Court under subdivision (e) of Section 77 to confirm the Plan as against classes of creditors having an interest in the property but not, as a class, accepting the Plan. The Committee's Modified Plan, in this latter respect, conforms to the Commission's overruling of the Committee's objection to such unqualified invocation of subdivision (e);

(d) gives to any dissenting class of creditors and to the stockholders a privilege (not given

in the absence of such a provision) either to buy the Debtor's property at such a sale or to procure other buyers and obtain the benefit of any price other buyers will pay. This privilege in the present case is not illusory, whatever might be said in other reorganizations, for the three classes of junior creditors and the sole stockholder, which have not already expressed approval of the Committee's Modified Plan, are three large corporations and between them undoubtedly financially able to provide funds, or obtain their provision by others, sufficient to purchase the property at such a sale; and

(e) contemplates the sale of the property as an entirety and not piece-meal in a manner to break up the Western Pacific System.

The inclusion of such a provision for sale of the Debtor's property is necessary if the reorganization is not [736] to be delayed indefinitely. The junior creditors and sole stockholder who are seeking to bring about such delay naturally oppose the inclusion in any Plan of such a provision because they know that, lacking such a provision, no acceptable title can be created in the New Company and that probably its new securities will not be marketable. Accordingly, by refusing to permit the inclusion of such a provision, expressly contemplated by subdivision (b) (5) of Section 77, the Commission's Plan facilitates obstruction, not only by those secured junior creditors who admittedly have an interest in the property, but also by the unsecured

creditors and sole stockholder whose interests the Commission has found to have no value.

9. The effective date of the Commission's Plan is July 1, 1938, a date already well past, in effect requiring the waiver by creditors of their interest accrued from that date to the present time. The Committee's Modified Plan substitutes January 1, 1939.

10. The Commission's Plan does not seem to the Committee and its counsel to be a complete Plan dealing with all the matters which are required to be dealt with before securityholders are asked to vote upon the Plan. Indeed, it is the impression of the Committee and its counsel that the Commission's Plan does not purport to be such a complete Plan. Since the Committee's Modified Plan does purport to be a complete Plan, it deals with various matters which are not dealt with at all by the Commission's Plan, but in a manner which it is believed will be unobjectionable both to the Commission and to the other classes of securityholders.

IV.

The Committee respectfully suggests that, in order to simplify and expedite the submission to the securityholders of the Plan, as finally approved, and the subsequent [737] proceedings under Section 77, the Commission should approve the Committee's Modified Plan in the form submitted herewith, with such modifications, if any, as the Commission may deem necessary or desirable; and that, if the Com-

mission deems any modifications necessary or desirable, the specific language of such modifications be incorporated in such Plan after conference with representatives of all the parties herein, so that there may be one complete document which constitutes the Plan, and that, so far as possible, unintentional erroneous expression may be avoided.

Wherefore, the Committee prays that the Report and Order of the Commission, dated October 10, 1938, be modified by the approval of the Committee's Modified Plan; that, if the Commission shall deem such a hearing necessary, a rehearing before Division 4 of the Commission be granted in the above-entitled proceeding; and that the Commission enter such further order or orders as to it may seem just and reasonable.

Dated New York, N. Y., December 8, 1938.

FREDERICK H. ECKER,
JOHN W. STEDMAN,
REEVE SCHLEY,
As a Committee representing a group of institutional holders of First Mortgage Bonds of The Western Pacific Railroad Company.

By LITTLETON GROOM,
Secretary.

CRAVATH, DE GERSDORFF, SWAINE & WOOD,
Attorneys for the Committee, as aforesaid, No. 15 Broad Street, New York City. [738]

State of New York,
County of New York—ss.

Littleton Groom, being duly sworn, deposes and says:

That he is the Secretary of the Committee referred to in the foregoing petition; that he has read the foregoing petition and knows the contents thereof; that the same are true as stated, except as to matters and things, if any, stated to be on information and belief; and that as to those matters and things he believes them to be true.

LITTLETON GROOM

Subscribed to in my presence and sworn to before me this 8th day of December, 1938.

(Notarial Seal) SAUL SCHNEIDERMAN, Notary Public, Kings County. Kings Co. Clk's No. 1149, Reg. No. 9486. N. Y. Co. Clk's No. 1, Reg. No. 9 S 816.

Commission expires March 30, 1939. [739]

EXHIBIT A

The Western Pacific Railroad Company

PLAN OF REORGANIZATION

Dated January 1, 1939

Effective Date, January 1, 1939

Proposed by the Committee representing Institutional Bondholders [740]

List of Certain Abbreviated Terms

A. C. J.—A. C. James Company.

Committee.—The Committee representing certain institutional holders of First Mortgage Bonds of the Company, acting under a group agreement dated as of September 1, 1936, and consisting of Frederick H. Ecker, Chairman, John W. Stedman and Reeve Schley.

Bankruptcy Trustees.—The Trustees now or hereafter operating the properties of The Western Pacific Railroad Company by appointment of the Court in the Reorganization Proceeding.

Commission.—The Interstate Commerce Commission.

Company or Debtor.—The Western Pacific Railroad Company.

Consummation of the Plan.—The transfer to the New Company, to the extent contemplated by the Plan, of the properties and assets of the Company.

Court.—The District Court of the United States for the Northern District of California, Southern Division.

Effective Date of the Plan.—The date from which interest shall run on the new securities provided in the Plan, namely, January 1, 1939.

First Mortgage Bonds.—Bonds issued under the First Mortgage dated June 26, 1916, from the Company to First Federal Trust Company and Henry E. Cooper, as Trustees (Crocker First National Bank and Samuel S. Armstrong, Successor Trustees) designated as the First Mortgage.

General and Refunding Bonds.—Bonds issued under the Mortgage dated January 1, 1932, from the Company to The Chase National Bank of the City of New York as Trustee (Irving Trust Company now Successor Trustee), designated as the General and Refunding Mortgage.

New Company.—The corporation, whether the Company or a new corporation, which shall acquire the greater part of the properties now held by the Bankruptcy Trustees and issue the new securities provided for by the Plan.

Plan.—This proposed plan of reorganization.

Reorganization Committee.—The Reorganization Committee appointed as herein provided.

R. C. C.—The Railroad Credit Corporation.

R. F. C.—Reconstruction Finance Corporation.

Reorganization Proceeding.—The pending proceeding under Section 77 of the Bankruptcy Act, as amended, before the Court involving the properties

of the Company (Docket No. 7,004), including also (unless the context otherwise indicates) the related proceeding before the Commission (Finance Docket No. 10,008).

W. P. Corp.—The Western Pacific Railroad Corporation, sole stockholder of the Company. [741]

I.

Present Capital Liabilities as of January 1, 1939 (including unpaid interest)

			Fixed Annual* Interest

Fund shall be applied to the redemption of the Income Mortgage Bonds, Series A, on the next succeeding interest payment date. All bonds so acquired shall be cancelled and no bonds may be issued to refund any such bonds.

D. Issue of Additional Income Mortgage Bonds.

Income Mortgage Bonds, in addition to those to be issued in the reorganization, may be issued from time to time to refund outstanding Income Mortgage Bonds or in lieu of First Mortgage Bonds, for the purposes and subject to the restrictions stated under "Issue of Additional First Mortgage Bonds" above, to the extent that First Mortgage Bonds are not issued for such purposes.

E. Restrictions Designed to Encourage Future Financing Through Stock and Restrictions on Pledges.

No Income Mortgage Bonds (other than those to be issued under the Plan) may be authenticated and delivered unless (1) the New Company shall have contracted forthwith to sell or pledge such bonds and (2) the Board of Directors of the New Company, by resolution adopted by two-thirds of the entire number of directors, shall have determined that, in the opinion of the Board, taking into account market and all other relevant conditions at the time, it is impracticable to provide the amount of money needed (a) by the sale of Preferred Stock at a price which would give a current dividend return of 6% or less, or (b) by the

sale of Common Stock at a price (not less than $50 per share) which would give a current dividend return (based on the regular dividend rate then in effect, or, if no regular dividend rate is in effect, on the average rate at which dividends shall have been paid during the last twelve calendar months) of 6% or less.

The Income Mortgage will also contain a covenant substantially to the effect that the excess of the aggregate principal amount of all Income Mortgage Bonds under pledge at any one time over the principal amount of all indebtedness so secured shall not exceed 10% of the aggregate principal amount of all Income Mortgage Bonds then authenticated and uncancelled.

F. Modification of Income Mortgage.

The Income Mortgage will provide, within conditions and limits to be therein prescribed, for the modification and alteration thereof and of the rights and obligations of the New Company and of the holders of the Income Mortgage Bonds thereunder, at any time by the concurrent action of the New Company and of the holders of not less than 66⅔% in aggregate principal amount of the bonds then outstanding; provided, however, that no such change or modification shall alter or impair the obligation of the New Company to pay the [747] principal of any bond without the consent of the holder of such bond. In the event of any unification of the properties of the New Company with the

II

Proposed Capitalization of the New Company

1. Summary

The capitalization proposed herein for the New Company is substantially as follows:

Title of Issue	Presently Issued	Interest or Dividends
Undisturbed Equipment Trusts, Baldwin Lease and Pullman Contract	$ 2,750,650	$ 94,202
First Mortgage 4% Bonds, Series A, due 1964	10,000,000	400,000
Total Annual Fixed Charges		494,202
Capital Fund		500,000
Income Mortgage 4½% Bonds, Series A, due 2014	20,901,240	940,556
Total Funded Debt	33,651,290	
Total Annual Charges (fixed and contingent) and Capital Fund		1,934,758
Income Mortgage Sinking Fund		104,506
Participating Preferred 5% Stocks, Series A (par value $100)	31,351,900	1,567,595
Total Annual Charges, Capital Fund, Sinking Fund and Preferred Dividend Requirements		3,606,859
Common Stock (without par value)	287,025 shs.	
Capitalization (Common at $100 per share)	$ 93,705,690	

2. First Mortgage Bonds

A. Lien of Mortgage.

The First Mortgage will be a lien, directly or through pledge of securities, subject only to liens upon equipment, on all the properties and assets owned by the New Company on the consummation of the Plan, including securities, equipment, and the equity in such equipment as is subject to equipment obligations. The First Mortgage will also be a lien on all similar property acquired by the New Company after the reorganization, except that (a) if the New Company shall acquire the properties of any other company (except a company which is a wholly owned railway subsidiary on January 1, 1939), constituting a Class I carrier as defined by the rules then in force of the Interstate Commerce Commission or other public regulatory bodies having jurisdiction at the time, such properties shall not be subject to the lien of the First Mortgage unless acquired in whole or in part by the use of First Mortgage Bonds or Income Mortgage Bonds, or moneys deposited under the First Mortgage or the Income Mortgage, and (b) if the New Company shall be consolidated with, or shall be merged into, or shall sell its assets substantially as an entirety to, any other company which at the time is a Class I carrier as defined as aforesaid, no properties theretofore owned or thereafter acquired by such other company shall be subject to the lien of the First Mortgage except properties thereafter acquired which shall be appurtenant or incident to

properties subject to the lien of the First Mortgage, or which shall be within the maintenance or replacement covenants of the First Mortgage, or which shall be acquired in whole or in part by the use of First Mortgage Bonds or Income Mortgage Bonds or moneys deposited under the First Mortgage or the Income Mortgage.

B. Issue Limited—Sinking Fund if Certain Limits Exceeded.

The amount of bonds issuable under the First Mortgage will be limited to $50,000,000.

The First Mortgage will provide (1) that on each May 1 when the aggregate principal amount of First Mortgage Bonds outstanding shall equal or exceed $20,000,000, the New Company will pay to the Trustee [743] under the First Mortgage as a Sinking Fund a sum equal to ½ of 1% of the maximum principal amount of First Mortgage Bonds theretofore at any one time authenticated and uncancelled; and (2) that on each May 1 when the aggregate principal amount of First Mortgage Bonds outstanding plus all other funded debt bearing fixed interest shall exceed either (a) 35% of the total capitalization of the New Company, determined as hereinafter provided, or (b) 50% of such total capitalization, less the principal amount of funded debt bearing contingent interest at the time outstanding, the New Company, in addition to the sums provided in Clause (1) of this Subdivision B to be paid, will pay into said Sinking Fund a sum equal to

50% of the Available Net Income of the next preceding calendar year that remains after providing for all Income Mortgage sinking funds and charges prior thereto (i. e., that remains after the deductions made pursuant to paragraphs (1), (2), (3), (4) and (5) of Subdivision G of Section 3 of this Article II; or after the provisions of said Subdivision G shall have ceased to be operative, 50% of net income as defined by the accounting rules or practice referred to in said Subdivision G). Such Sinking Fund shall be applied to the retirement of First Mortgage Bonds, by purchase in the open market or by call or tenders at not exceeding the redemption price (or in the case of bonds not redeemable, the principal amount and accrued interest), and whenever the amount in the Sinking Fund exceeds $50,000 and First Mortgage Bonds are not tendered or cannot otherwise be purchased at less than their redemption price, the funds then in the Sinking Fund shall be applied to the redemption of new First Mortgage Bonds on the next succeeding interest payment date. All bonds so acquired shall be cancelled and no bonds may be issued to refund any such bonds. First Mortgage Bonds and Income Mortgage Bonds outstanding shall be deemed to include all bonds authenticated and delivered to the New Company which shall not have been cancelled or assured of retirement through the deposit of cash. Funded debt shall include an amount equal to the capitalized value, at 5% per annum, of fixed rents payable for leased roads, other than terminal of

bridge properties; but shall not include (a) obligations (other than mortgage bonds or equipment trust obligations) maturing not more than two years after their date, or (b) obligations of longer maturity secured by pledge of bonds having a lien on property of the New Company except to the extent, if any, by which the principal amount of such obligations exceeds the principal amount of such bonds so pledged. Bonds guaranteed by the New Company as to interest or principal or both (other than bonds of a terminal or bridge company) shall be included in funded debt, but, in case of a joint and several guaranty with other corporations, only to the extent of the New Company's basic proportion of the principal liability. There shall be included in determining total capitalization only (a) obligations constituting funded debt, (b) stock having par value, at such par value, and (c) stock without par value, at $100 a share in case of the stock issuable under the Plan, and, in case of other stock, at the capital value at which such stock is carried on the books of the Company, not exceeding, however (except to the extent that earned surplus shall have been duly capitalized), the net amount received by the New Company on the issue thereof.

C. Issue in Series

The First Mortgage Bonds may be issued from time to time in different series, subject to such limitations and restrictions as may be specified in the First Mortgage, payable on such date or dates, in

such denomination, bearing interest at such rates and containing such provisions in regard to redemption, conversion, taxes, place or places and money or moneys of payment, registration and sinking funds and having such other characteristics as may be prescribed by the Board of Directors of the New Company at the time of issue, but with respect to the lien of the First Mortgage all equally secured. So long as any First Mortgage Bonds, Series A, shall be outstanding no additional First Mortgage Bonds shall be issued having a maturity earlier than January 1, 1964.

D. Bonds of Series A to be Issued in Reorganization.

$10,000,000 First Mortgage Bonds, Series A, are to be authenticated and issued in the reorganization for the purpose of providing the $10,000,000 of new money required in the reorganization.*

The Bonds of Series A shall be dated January 1, 1939, shall mature January 1, 1964, shall bear interest at the rate of 4% per annum, payable semi-annually, and shall be redeemable, in whole or in part, at any time [744] on thirty days' notice, at their principal amount and accrued interest, plus a premium of 3% of their principal amount if redeemed on or before December 31, 1941, 2½% if redeemed thereafter and on or before December 31, 1945, 2% if redeemed thereafter and on or before

*See Article III below.

December 31, 1949, 1½% if redeemed thereafter and on or before December 31, 1953, 1% if redeemed thereafter and on or before December 31, 1957, and ½% if redeemed thereafter and on or before December 31, 1960, and without any premium if redeemed on or after January 1, 1961.

E. Issue of Additional First Mortgage Bonds.

First Mortgage Bonds, in addition to those to be authenticated in the reorganization, may be authenticated from time to time: (a) to refund First Mortgage Bonds (excluding bonds issued solely by way of pledge, except as hereinafter provided) or outstanding obligations secured by First Mortgage Bonds to the extent so secured or obligations secured by prior lien on after acquired property; or (b) upon the deposit of new cash equal to the principal amount to be issued; or (c) to provide for, or to reimburse the New Company for, not exceeding 75% of expenditures made after December 31, 1938, but not more than three years prior to the date of such authentication (including expenditures for the acquisition or construction of new railroad equipment, free from other lien, but not including expenditures for the making of additions and betterments to equipment) which, under the accounting rules of the Interstate Commerce Commission or other federal regulatory bodies having jurisdiction in the premises, at the time in force, are properly chargeable to capital account; provided, however, that

(a) Except when bonds are authenticated in respect of new mileage (or securities representative thereof) or in respect of new equipment the said 75% shall be applied to the net amount of said capital expenditures after deducting therefrom, to such extent and on such basis as may be specified in the First Mortgage, credits to capital account after December 31, 1938;

(b) If any First Mortgage Bonds are authenticated or cash deposited under the First Mortgage is withdrawn to provide or reimburse for the acquisition of railroad equipment, a sinking fund shall be established (in addition to any other sinking fund then in effect for any series of First Mortgage Bonds) payable in equal annual instalments in an amount sufficient to retire (at par) within the expected efficient service life of such equipment (in no case to exceed fifteen years) a principal amount of First Mortgage Bonds equal to (1) the principal amount of bonds so authenticated or (2) the amount of deposited cash so paid;

(c) If any property is acquired subject to existing liens the amount of additional First Mortgage Bonds issuable therefor or issued to refund prior lien obligations thereon, together with the aggregate amount of existing liens to which such property is subject, shall not exceed 75% of the net cost thereof, including as part of such cost the amount of such existing

liens whether or not the indebtedness secured thereby is assumed by the New Company; and

(d) No bonds shall be issued on the basis of the acquisition of equipment under equipment trust obligations or any obligations for the deferred or serial payment of the purchase price for equipment, or on the basis of the retirement of any such obligations.

F. Restrictions Designed to Limit Future Financing through First Mortgage Bonds and Restrictions on Pledges.

The First Mortgage will contain a covenant substantially to the effect that no First Mortgage Bonds (other than those to be authenticated under the Plan) will be sold or pledged unless (1) the New Company shall have contracted forthwith to sell or pledge such bonds and (2) the Board of Directors of the New Company, by resolution adopted by two-thirds of the entire number of directors, shall have determined that, in the opinion of the Board, taking into account market and all other relevant conditions at the time, it is impracticable to provide the amount of money needed (a) by the sale of Income Mortgage Bonds having a maturity of twenty years or more at a price which would give a yield to maturity of 5% or less, or (b) by the [745] sale of Preferred Stock at a price which would give a current dividend return of 6% or less, or (c) by the sale of Common Stock at a price (not less than $50 per share) which would give a current dividend return (based on the regular divi-

dend rate then in effect, or, if no regular dividend rate is in effect, on the average rate at which dividends shall have been paid during the last twelve calendar months) of 6% or less.

The First Mortgage will also contain a covenant substantially to the effect that the excess of the aggregate principal amount of all First Mortgage Bonds under pledge at any one time over the principal amount of all indebtedness so secured shall not exceed 10% of the aggregate principal amount of all First Mortgage Bonds then authenticated and uncancelled.

3. Income Mortgage Bonds

A. Lien of Mortgage.

The Income Mortgage shall constitute a lien, subject to the lien of the First Mortgage, upon all property from time to time subject to the lien of the First Mortgage.

B. Issuable in Series.

The Income Mortgage Bonds may be issued, without limit as to aggregate amount or within such limit as may be specified in the Income Mortgage, from time to time, in different series, subject to such limitations and restrictions as may be specified in the Income Mortgage, payable on such date or dates, in such denominations, bearing interest at such rates and containing such provisions in regard to accumulation of interest, redemption, conversion, taxes, place or places and money or moneys of payment, registration and sinking funds, and having

such other characteristics as may be prescribed by the Board of Directors of the New Company at the time of issue, but with respect to the lien of the Income Mortgage all equally secured. No interest shall be mandatorily payable on Income Mortgage Bonds of any series (except at maturity or redemption) except out of Available Net Income, as hereinafter provided.

C. Income Bonds, Series A, to be Issued in Reorganization.

$20,901,240 of Income Mortgage Bonds, Series A, are to be authenticated and issued in the Reorganization, as set out in Articles IV and V below.

The Income Mortgage Bonds of Series A shall be dated January 1, 1939, shall mature January 1, 2014, shall bear interest at the rate of 4½% per annum, due and payable as hereinafter provided, and shall be redeemable, in whole or in part, on May 1 in any year, on thirty days' notice at their principal amount plus (a) full interest for the last preceding year and all unpaid accumulated interest for prior years and (b) interest at the rate of 4½% per annum from the last preceding December 31 to the redemption date.

The Income Bonds of Series A shall be convertible into shares of Common Stock, as at the time constituted, at any time at the rate of 20 shares per $1,000 principal amount of such Bonds.

Interest on Income Mortgage Bonds, Series A, accruing for each calendar year shall (up to the

limits of accumulation hereinafter specified) become absolutely due as a debt on December 31 in such year, but shall be payable on May 1 of the next succeeding year or thereafter as provided below. Such interest shall be mandatorily payable (except as hereinafter provided) only out of Available Net Income of the New Company that remains after providing for the Capital Fund and charges prior thereto (i. e., that remains after the deductions made pursuant to paragraphs (1) and (2) of Subdivision G of Section 3 of this Article II). All interest that comes due and is not paid on the next following May 1 shall accumulate up to the maximum amount of 13½% at any one time, but not beyond. Accumulated interest shall be mandatorily payable (a) whenever, and to the extent that, there is Available Net Income for any subsequent year remaining after the deductions made pursuant to said paragraphs (1) and (2) of Subdivision G (in which case such amount shall be paid on the next following May 1), or (b) in any event (whether earned or not) at [746] the maturity or on redemption of the Income Mortgage Bonds of Series A. For the purposes of the two sentences next hereinabove payments of interest shall be considered as applied to interest accrued for the last preceding calendar year before being applied to accumulations. The Board of Directors of the New Company may at any time, in its discretion, pay any interest accrued on the Income Mortgage Bonds, Series A,

even if not earned, out of any funds lawfully available therefor.

The Income Mortgage will provide for the payment on May 1 of each year while any Income Mortgage Bonds, Series A, are outstanding of an instalment of Sinking Fund, if earned, as, and in the amount, hereinafter specified. Such instalment shall be payable only out of Available Net Income for the last preceding calendar year that remains after paying interest on outstanding Income Mortgage Bonds (i. e., that remains after the deductions made pursuant to paragraphs (1), (2) and (3) of said Subdivision G). The amount of such instalment shall equal (a) ½ of 1% of the maximum principal amount of Income Mortgage Bonds, Series A, theretofore at any one time authenticated and uncancelled, plus (b) an amount equal to interest on all Income Mortgage Bonds, Series A, theretofore purchased or redeemed out of the Sinking Fund, calculated at the rate paid on said May 1 upon outstanding Income Mortgage Bonds of Series A. Such accruals of the Sinking Fund instalments shall not be cumulative. The Sinking Fund shall be applied, from time to time to the retirement of Income Mortgage Bonds, Series A, by purchase in the open market or by call for tenders at not exceeding their redemption price, and whenever the amount in the Sinking Fund exceeds $50,000 and Income Mortgage Bonds, Series A, are not tendered or cannot otherwise be purchased at less than their redemption price, the funds then in the Sinking

properties of any other company, the modifications hereinabove authorized may include provisions excluding in whole or in part the earnings from such other properties in determining Available Net Income and providing for the determination of such Available Net Income without the maintenance of separate accounts.

G. Determination and Application of Available Net Income.

Available Net Income shall be determined for each calendar year beginning with the year 1939, and continuing thereafter, so long as any Income Mortgage Bonds remain outstanding. When no Income Mortgage Bonds remain outstanding, the provisions of this Subdivision B shall cease to be operative.

Available Net Income for each such calendar year shall be determined by deducting all fixed charges of the New Company and its wholly owned railway subsidiaries accrued during such calendar year from the consolidated income of the New Company and its wholly owned railway subsidiaries available for fixed charges for such calendar year (determined in accordance with the accounting rules of the Interstate Commerce Commission or other analogous Federal authority having jurisdiction in the premises at the time in force, or, to the extent not governed by such accounting rules, in accordance with sound accounting practice), provided, however, that if the New Company shall not come

into ownership and possession of the properties now operated by the Bankruptcy Trustees on or before January 1, 1939. Available Net Income for any period after January 1, 1939, until the New Company comes into ownership and possession of such properties shall be computed as if the New Company had come into such ownership and possession on January 1, 1939 and had issued, as of that date, the new securities issuable under the Plan, other than the $10,000,000 of new First Mortgage Bonds, Series A, and in lieu of interest on such Bonds there shall be charged the amount of interest actually accruing during such period upon any then outstanding Trustees' Certificates or other obligations issued to provide funds for rehabilitation purposes.

Available Net Income shall be ascertained for each such calendar year, as the accounts shall be stated on the books of the New Company during such calendar year, without adjustments, except that: (1) in determining Available Net Income there shall not be deducted any amounts from the proceeds of the Trustees' Certificates issued for rehabilitation purposes, notwithstanding that under the accounting rules hereinbefore mentioned such expenditures may be chargeable as operating expenses; (2) if in respect of any calendar year the Available Net Income is a deficit, the amount of such deficit may, in the discretion of the Board of Directors of the New Company, be carried forward and be deducted in determining Available Net In-

come for the succeeding calendar year or calendar years until such deficit (or accumulated or remaining deficits) be extinguished by earnings which in the absence of such deficit or deficits, would be Available Net Income; and (3) debits or credits to adjust income in prior years shall be treated as income items for the year in which entered on the books whether cleared through income or profit and loss accounts, so far, but only in so far, as such debits and credits reflect cash receipts or disbursements in the year in which they are entered on the books.

Available Net Income for each calendar year shall be applied to the following purposes and in the following order:

(1) To the creation, if and when the aggregate principal amount of First Mortgage Bonds outstanding shall equal or exceed $20,000,000, of the Sinking Fund provided for in Clause 1 of Subdivision B of Section 2 hereinabove, in an amount up to, but not exceeding, in respect of any calendar year, ½ of 1% of the maximum principal amount of First Mortgage Bonds theretofore at any one time authenticated and uncancelled.

(2) If the Board of Directors of the New Company in its discretion shall so determine, Available Net Income of each calendar year may be applied to the creation of a Capital Fund to be applied to, or to provide for, or to reimburse the treasury of the New Company for, Capital Investments, as defined by the Interstate Commerce Commission Clas-

sification of Income, Profit and Loss and General Balance Sheet Accounts for Steam Roads, Accounts Nos. 701 Investment in road and equipment, 702 Improvements on leased railway property and 705 Miscellaneous physical property (or advances to subsidiaries for expenditures which, [748] if made directly by the New Company in respect of its owned or leased properties, would be charged to said accounts), or such substituted accounts as may at the time be in effect, to the extent that such Capital Investments have been made or contracted for during such calendar year or within three months thereafter, and including therein (but only to the extent that such payments during such calendar year shall exceed depreciation of equipment charged against income for such calendar year) payments made for new equipment, or initial and principal payments upon equipment leased under equipment trusts or purchased under conditional sale agreements and instalments of sinking fund provided for by paragraph (b) of Subdivision E of Section 2 of this Article II (relating to First Mortgage Bonds issued for equipment), provided, however, that

(a) The amount set aside in the Capital Fund out of Available Net Income of any calendar year shall not exceed $500,000 in respect of any calendar year, or such lesser sum as may be required, together with unappropriated accumulations in the Fund as of the close of the calendar year prior to that for which the

payment is to be computed, less charges for additions and betterments during said calendar year for which payment is to be computed, to bring the total in the Fund to $1,000,000; provided, however, that the Capital Fund shall not exceed $1,000,000 at any one time.

(b) The Capital Fund may be applied only to such part of the cost of Capital Investments as hereinabove defined as remains after deducting from such cost all retirements of roadway and structures charged against income in such calendar year;

(c) To the extent that expenditures are so provided for or reimbursed out of the Capital Fund, the Company shall not thereafter have the right to issue any bonds or other evidences of indebtedness or any stock ranking, as to either assets or dividends, in priority to, or on a parity with, the Preferred Stock of Series A to capitalize or reimburse such expenditures; provided, however, that such expenditures (if for purposes for which First Mortgage Bonds or Income Mortgage Bonds may be issued) may, within such limits, if any, as may be specified in the First Mortgage or the Income Mortgage, be used to supply, in whole or in part, the excess of capital expenditures required to be certified under either such mortgage over the principal amount of the bonds that may be issued under the terms thereof; and

(3) Any then remaining Available Net Income for any calendar year shall be applied to the payment on the next succeeding May 1, of interest on the then outstanding Income Mortgage Bonds (not including any thereof then held in any sinking fund) accrued during the last preceding calendar year, and of any accumulated unpaid interest thereon.

(4) Any then remaining Available Net Income for any calendar year shall be applied, so long as any Income Mortgage Bonds, Series A, are outstanding, to the payment on the next succeeding May 1, of the sinking fund instalment provided for in Subdivision C of this Section 3 (relating to Income Mortgage Bonds, Series A).

(5) Any then remaining Available Net Income for any calendar year may be applied to the creation of a sinking fund for Income Mortgage Bonds of series other than Series A, if any such sinking fund shall have been provided for at the time of the creation of any such series.

(6) Any then remaining Available Net Income for any calendar year shall be applied to the payment on the next succeeding May 1 of the instalment, if any, then due under the sinking fund provisions of Clause (2) of Subdivision B of Section 2 hereinabove (relating to First Mortgage Bonds when outstanding in excess of certain limits).

(7) Any then remaining Available Net Income for any calendar year may be applied to any proper corporate purpose of the New Company (except

dividends on the new Common Stock), including, if and to the extent that such dividends shall be declared by the Board of Directors of the New Company, the payment of dividends upon the Preferred Stock in respect of such year and of any accrued and unpaid cumulative dividends on the Preferred Stock; such dividends to be paid, except as hereinafter provided, on such date or dates in the next succeeding year as may be specified in the Certificate of Incorporation or By-Laws of the New Company, or in the certificates for the Preferred Stock. [749]

(8) Any then remaining Available Net Income for any calendar year may be applied to any proper corporate purpose of the New Company, including (but only after all accrued and unpaid cumulative dividends on the Preferred Stock to the end of such year shall have been paid, or declared and set apart for payment) dividends on the Common Stock.

No interest need be paid on Income Mortgage Bonds if the amount to be paid is less than ¼ of 1%. Any excess available for interest but not paid because of the foregoing provision shall be reserved and added to the income available for interest on the Income Mortgage Bonds for the next succeeding calendar year.

If there are outstanding Income Mortgage Bonds of different series, the amount applicable to interest on such bonds shall be distributed among the respective series in proportion to the unpaid inter-

est at the time accumulated on the bonds of such series, respectively.

Dividends may be paid on stock of any class (subject to the relative rights of the several classes of stock) out of the income of any calendar year prior to the close of such calendar year if, but only if, prior to the declaration of such dividends, the Board of Directors shall have determined that the Available Net Income for such year applicable for the purposes specified in the foregoing paragraphs (1), (3), (4), (5) and (6) will be more than sufficient to pay the amounts payable out of such Available Net Income pursuant to said paragraphs and such amounts shall have been deposited in trust for the purposes specified in said paragraphs. Dividends on Common Stock may be so declared only if, prior to such declaration, the Board of Directors shall have determined that the applicable part of Available Net Income for such year will be more than sufficient to pay the amount hereinabove specified for dividends (including accumulations) on the Preferred Stock and such amount shall have been deposited in trust for the purpose of paying such dividends.

4. Preferred Stock

A. Authorized Issue.

There will be authorized 750,000 shares of Preferred Stock, each of the par value of $100, of which 313,519 shares of Series A are to be issued in the

reorganization as set out in Articles IV and V below.

The additional authorized Preferred Stock not issued in the reorganization will be issuable from time to time in the discretion of the Board of Directors of the New Company, but (unless for purposes for which First Mortgage Bonds might otherwise have been issued) only after the concurring vote or consent of the holders of a majority of the outstanding Preferred Stock. So far as permitted by law, such additional Preferred Stock may be of Series A, or of any other series, one or more, and Preferred Stock of any such other series may bear dividends at such rate, cumulative or non-cumulative, may be redeemable or non-redeemable, convertible, or non-convertible, and may have such other rights and privileges and be subject to such limitations and restrictions, as may be from time to time determined by the board of directors prior to the issue of Preferred Stock of any such other series. If there are outstanding shares of Preferred Stock of different series, the earnings applicable to dividends thereon shall be apportioned among the respective series in proportion to the dividends accumulated on the shares of such series respectively.

B. Preference on Liquidation.

In any liquidation or winding up of the New Company, whether voluntary or involuntary, the Preferred Stock shall be entitled to receive, out of the assets of the New Company, its par value,

plus any accrued and unpaid cumulative dividends thereon, plus such premium, if any, as may be specified for any series, before any distribution shall be made on the Common Stock, but shall not be entitled to any further participation in such assets.

C. Voting rights.

Holders of Preferred Stock shall be entitled to one vote per share on all matters, except that in elections of directors, which shall be by cumulative voting, each holder of stock of either class shall be entitled to as many votes per share as the number of directors to be elected. [750]

The New Company shall not, without the vote or consent of the holders of at least two-thirds in par value of the outstanding new Preferred Stock, (1) create or permit to be created any mortgage or other lien upon any of its properties, excepting the new First Mortgage, the new Income Mortgage or purchase money liens (including equipment obligations) upon property hereafter acquired, given for not more than 75% of the purchase price of such property; (2) create or issue any bonds, notes or other evidences of indebtedness maturing more than two years from their date, except new First Mortgage Bonds and new Income Mortgage Bonds and except purchase money obligations given for not more than 75% of the purchase price of property hereafter acquired; (3) create any stock ranking, either as to assets or dividends, in priority to, or on a parity with, the new Preferred Stock, or

(4) permit any subsidiary, all of whose stock except directors' shares, shall be owned by the New Company, to create any mortgage or other lien upon any of its properties or issue any such bonds, notes or other evidences of indebtedness (except purchase money liens or obligations limited as aforesaid), or issue any additional stock of any class, unless the obligations secured by such mortgage or other lien or such other obligations or such stock shall be acquired by the New Company.

D. Preferred Stock, Series A.

The Preferred Stock, Series A, shall be entitled to receive all accumulated unpaid dividends and current dividends at the rate of 5 % per annum in respect of any calendar year before any dividends shall be paid or declared or set apart for payment on the Common Stock in respect of such year. Such dividends shall be cumulative to the extent earned in any calendar year but not paid; but such dividends shall otherwise be non-cumulative. For the purposes of the next preceding sentence hereinabove, Preferred Stock dividends shall be considered to be earned in any calendar year to the extent covered by the Available Net Income for such year that remains after providing for prior charges (i.e., that remains after the deductions made pursuant to paragraphs (1), (2), (3), (4), (5) and (6) of Subdivision G of Section 3 of this Article II); or after the provisions of said Subdivision G shall have

ceased to be operative, to the extent covered by net income (as defined by the accounting rules or practice referred to in said Subdivision G).

After dividends shall have been paid or declared or set apart for payment, on the new Common Stock at the rate of $3 per share in respect of any year, each share of Preferred Stock, Series A, shall be entitled to share equally with each share of new Common Stock in any dividends paid or declared or set apart for payment, in respect of such year.

The Preferred Stock, Series A, shall be redeemable, in whole or in part, at any time at its par value plus accrued and unpaid cumulative dividends, and proportionate dividend for the current year.

The holders of Preferred Stock, Series A, shall not have any preemptive right to subscribe to any additional issues of stock of any class or of securities convertible into stock of any class.

5. Common Stock

There will be authorized 1,000,000 shares of Common Stock, without par value, of which 287,025 shares are to be issued in the reorganization as set forth in Articles IV and V below and 418,025 shares shall be reserved for the conversion of Income Mortgage Bonds, Series A.

Holders of Common Stock shall be entitled to one vote per share on all matters except that directors shall be elected by cumulative voting as aforesaid.

So far as permitted by law, any vote or consent

by the holders of Common Stock, authorizing the issuance of additional shares of stock of any class or of securities convertible into stock of any class, may waive, on such terms and conditions, if any, as may be specified in such vote or consent, the preemptive right of all the holders of shares of Common Stock to subscribe to such additional shares or securities. [751]

III.

Reconstruction Finance Corporation and Provision of New Money

$10,000,000 of new money is required by the New Company for the purpose of retiring Trustees' Certificates issued to provide for the expenditures under the 1936, 1937 and 1938 rehabilitation program. Said $10,000,000 in new money is to be provided for by the sale at par and accrued interest to R. F. C. (subject to approval and authorization of the Interstate Commerce Commission and the delivery to R. F. C. of a legal opinion satisfactory to it as to the validity of the acquisition by the New Company of title to the properties of the Debtor and the validity of the new First Mortgage Bonds, Series A, and the new First Mortgage) of the $10,000,000 of First Mortgage 4% Bonds, Series A, due 1964, to be issued in the reorganization.

In consideration of R. F. C.'s providing said new money by so purchasing said First Mortgage Bonds, Series A, R. F. C.'s existing claim against

the Company, amounting as of January 1, 1939, to $3,862,870 ($2,963,000 principal and $899,870 interest) and represented by notes secured by General and Refunding Mortgage Bonds of the Company and other collateral, shall be provided for under the Plan in like securities and in like proportions as those given holders of the Company's existing First Mortgage Bonds; that is, R. F. C., upon purchasing at par and accrued interest said $10,000,000 of First Mortgage 4% Bonds, Series A, of the New Company, shall receive Income Mortgage 4½% Bonds, Series A, of the New Company for 40% of the principal of its said claim and 5% Preferred Stock, Series A ($100 par value) of the New Company for 60% of the principal of its said claim and Common Stock, taken at the price of $66⅔ per share, for 100% of the interest accrued and unpaid on its said claim. The amounts of securities of the New Company so to be received by R. F. C. are $1,185,200, principal amount, Income Mortgage 4½% Bonds, Series A, $1,777,800, par value, 5% Preferred Stock, Series A, and 13,498 shares of Common Stock.

IV.

Treatment of Existing Securities

1. Existing equipment trusts, Baldwin lease and Pullman contract, aggregating $2,750,050, shall remain undisturbed and shall be assumed by the New Company.

2. Holders of existing First Mortgage Bonds will receive for each $1,000 principal amount thereof, together with $266.66⅔ of interest accrued and unpaid thereon to January 1, 1939:

$400 Income Mortgage 4½% Bonds, Series A (being 40% of the principal amount of said existing Bonds);

$600 5% Preferred Stock, Series A (being 60% of the principal amount of said Bonds); and

4 shares Common Stock (being Common Stock taken at the price of $66⅔ per share for 100% of said accrued and unpaid interest).

3. R.F.C. will receive in respect of the $10,000,000 of new money provided for in Article III (or the surrender of Trustees' Certificates at their principal amount and accrued interest, to a like amount) and its existing claim in the principal amount of $2,963,000, together with $899,870 of interest accrued and unpaid thereon to January 1, 1939:

$10,000,000 New First Mortgage 4% Bonds, Series A (being 100% of said new money);

$1,185,200 Income Mortgage 4½% Bonds, Series A (being 40% of the principal of said claim);

$1,777,800 5% Preferred Stock, Series A (being 60% of the principal of said claim); and

13,498 shares Common Stock (being Common Stock taken at the price of $66⅔ per share for 100% of said accrued and unpaid interest).

[752]

4. R.C.C. will receive in respect of its claim in the principal amount of $2,445,610, together with $146,503 of interest accrued and unpaid thereon to January 1, 1939 (subject to the reduction of said amounts by the application, prior to the date of issue of the new securities under the Plan, of any proceeds from the distributive shares of the Company or its subsidiaries under the Marshalling and Distributing Plan, 1931):

37,030 shares Common Stock (being Common Stock taken at the price of $70 per share for 100% of the aggregate amount of said claim).

5. A. C. J. will receive in respect of its claim in the principal amount of $4,999,800, together with $1,249,950 of interest accrued and unpaid thereon to January 1, 1939:

39,340 shares of Common Stock (being an amount of Common Stock which bears to the amount of Common Stock allotted to the claim of R. C. C., the same proportion that the principal amount of General and Refunding Mortgage Bonds of the Company held by A. C. J. as collateral for said claim, bears to the principal amount of such Bonds held by R. C. C. as collateral for its claim).

6. Neither unsecured creditors nor stockholders shall be entitled to participate in the reorganization.

V

Distribution of New Securities

Existing Securities	New First Mortgage 4 %, Bonds, Series A	New Income Mortgage 4½ %, Bonds, Series A	New 5 %, Preferred Stock, Series A	New Common Stock
5% First Mortgage Bonds		$19,718,040	$29,574,100	197,157 shs.
R. F. C.

A. C. J. Collateral Note				39,340 shs.
Totals	$10,000,000	$20,901,240	$31,351,900	287,025 shs.

VI

Claims Not Affected by the Plan

The following claims are not affected by the Plan: (a) current liabilities of the Company incurred in the ordinary conduct of its business prior to the institution of the Reorganization Proceeding, which are entitled to priority over one or more of the mortgages of the Company, and (b) current liabilities and obligations of the Bankruptcy Trustees incurred during the Reorganization Proceeding. To the extent that such claims, liabilities or obligations are not paid by the Company or the Bankruptcy Trustees pursuant to order of the Court in the Reorganization Proceeding, they are to be paid in cash or assumed by the New Company. All such claims, liabilities and obligations may be adjusted or compromised and dealt with or paid or discharged by the New Company, all as may be determined by the Board of Directors of the New Company subject to approval by the Court.

The New Company shall be deemed to have assumed such of the contracts of the Company which are executory in whole or in part, including any executory leases and liabilities under guaranties, as shall have been affirmed by the Bankruptcy Trustees in the Reorganization Proceeding with the approval of the Court prior to the date of confirmation of the Plan, and also any executory contracts made by the Bankruptcy Trustees with the approval of the Court in the Reorganization Proceeding

which, by their terms, do not terminate at the conclusion of the Reorganization Proceeding. [753]

VII

Method of Executing the Plan

Existing mortgages on the Company's properties shall be released and cancelled, and all funds on deposit with the Trustees under the Company's mortgages representing sums paid from time to time to such Trustees for the release of properties, sale of scrap, and otherwise, and all collateral pledged under the Company's mortgages, shall be surrendered to the New Company free from liens of the Company's mortgages, after deductions therefrom of any amounts which the Court may find should be deducted under the provisions of such mortgages and consistent with this Plan. All collateral pledged by others than the Company as security for the Company's notes to R. F. C., R. C. C. and A. C. J. shall be surrendered to the pledgors thereof, and all collateral pledged by the Company as security for said notes shall be reduced to possession by the respective pledgees thereof, and shall be by them surrendered to the New Company and cancelled, except that R. C. C. shall not release or surrender any right or interest in the distributive shares of the Company or its subsidiaries under the Marshaling and Distributing Plan, 1931, but any proceeds from such distributive shares after the effective date of the Plan, shall become the property

of and be retained by the R. C. C., but to the extent to which received prior to the issue of the new securities under the Plan shall be applied in reduction of the claim of the R. C. C. in respect of which such new securities are to be issued at the rates provided in Article IV.

The Plan shall be carried out under the supervision of a Reorganization Committee consisting of five persons, three of whom shall be designated by holders of existing First Mortgage Bonds in such manner as the Commission may prescribe, one by R. E. C., and one by R. C. C. and A. C. J. jointly.

The Plan may be carried out either by re-vesting the properties formerly of the Company in the Company or by transferring said properties to a new corporation organized for the purpose, and the execution by the corporation in which said properties are vested of the new mortgages and the issue by it of the new securities contemplated by the Plan.

The method of carrying out the Plan shall be determined by the Reorganization Committee in its discretion, and the Reorganization Committee shall also determine, subject to the approval of the Court, the form, and, except as herein otherwise expressly provided, the provisions, of all mortgages, bonds, coupons, charters, by-laws, stock certificates, voting trust certificates, acceptances, assents, and all other instruments in the judgment of the Reorganization Committee necessary or desirable in connection with carrying out the Plan.

The Reorganization Committee may act by a majority of its members as from time to time constituted, at a meeting or in writing without a meeting. The Reorganization Committee may employ such agents, attorneys and others as it may deem desirable for the purposes of the Plan. The Reorganization Committee may from time to time delegate to others any power or discretion conferred upon it by the Plan; and the members of the Reorganization Committee shall not be liable for any action taken by them in good faith or by any person employed by the Reorganization Committee in good faith, or otherwise, except for their respective individual malfeasance or wilful neglect.

In case any class of creditors or stockholders shall not accept the Plan in accordance with Section 77, any party may nevertheless move the Court to confirm the Plan on the ground that the interests of such class of creditors have no value, or as the case may be, that the equity of such class of stockholders has no value, or on the ground that the Plan provides for payment in cash to such class of an amount not less than the value of their interests or equity, if any, in accordance with subdivision (c) of Section 77, through the sales hereinafter provided for in accordance with clause (5) of subdivision (b) of Section 77.

If so ordered by the Court, the Plan may be executed by a sale at public auction, at not less than a fair upset price as determined by the Court, of all or any part of the properties and assets of the Com-

pany, free from all liens or claims, other than those herein expressly stated not to be affected by the Plan. Upon any such sale, the properties and assets offered for sale may be purchased for the benefit of the New Company by the Reorganization Committee, or by a purchaser nominated by the Reorganization Committee, and in that event there shall be applied on account of the purchase price the distributive share, if any, of the proceeds of [734] such sale of all securities the holders of which shall have accepted the Plan, and the securities, though not accepting the Plan of all classes which, as a class, have accepted the Plan in accordance with Section 77. The Reorganization Committee or its representative may bid, at any such sale, such amounts as the Reorganization Committee may determine.

All properties and assets so sold which are purchased by the Reorganization Committee or its representative shall be transferred to the New Company.

In the event of any such sale, the Reorganization Committee may in its discretion sell all or any portion of the new securities distributable under the Plan in respect of securities of any creditor, if neither such creditor nor the class to which such creditor belongs shall have accepted the Plan in accordance with Section 77. The proceeds of any such sale, together with any other funds which, in the judgment of the Reorganization Committee, are available among the assets of the Debtor Estate or of the New Company may be used to pay the por-

tion of the purchase price payable in cash on any such sale.

Upon any such sale, non-assenting secured creditors of any class which, as a class, shall not have accepted the Plan in accordance with Section 77 and the unsecured creditors and the stockholders of either class shall be entitled to receive, in lieu of the securities, if any, otherwise issuable under the Plan, their aliquot proportion of the proceeds of such sale, after deducting therefrom all expenses of such sale and the amount which would be required to pay in full, of principal and unpaid interest accrued to the date of such sale, all creditors whose claims are prior in lien or superior in equity to the claims of such non-assenting secured creditors or the rights of such unsecured creditors or stockholders.

If any properties and assets are purchased at any such sale by others than the Reorganization Committee or its representative, security holders having an interest in such properties and assets shall be entitled, in accordance with the priorities of their respective interests, to receive, in lieu of the securities, if any, issuable to them hereunder, their aliquot portion of the proceeds of the sale of such property and assets, after deducting therefrom all expenses of such sale. In that event the Reorganization Committee shall, with the approval of the Commission and the Court, make such modifications in the Plan as may be appropriate under the circumstances.

VIII

Method of Giving Notice

Unless otherwise provided in Section 77 or any order or orders of the Court in the Reorganization Proceeding or of the Commission, whenever notice shall be required or permitted to be given under or pursuant to the Plan, such notice shall be given by publishing a copy of such notice once in each week on any secular day in each such week for two successive weeks in one newspaper published and of general circulation in the Borough of Manhattan, City and State of New York, and in one newspaper published and of general circulation in the City of San Francisco, State of California, and also (1) in case of notices to security holders who have accepted the Plan, by mailing such notice, postage prepaid, to the addresses of such security holders set forth in the acceptances signed by them; and (2) in case of notices to security holders who shall not have accepted the Plan, by mailing such notice, postage prepaid, to such security holders whose names and addresses appear on the books of the Company or of the New Company, as the case may be, but failure to mail any such notices, or delay in mailing any such notices, shall not invalidate the notice by publication above provided for, which alone shall be sufficient.

IX

Expenses of the Reorganization

All expenses in connection with the Plan and its consummation, and all costs of administration and

other allowances made by the Court in the Reorganization Proceeding, shall be paid by the New Company, subject to the provisions of Section 77, and shall constitute a charge upon the properties of the New Company as a cost of administration prior in lien to all new securities issued under the Plan. [755]

There shall be included in such expenses such reasonable compensation for necessary services rendered and reimbursement for actual expenses incurred in connection with the Reorganization Proceeding and the Plan by the Trustees under the mortgages, the Reorganization Committee, the Committee, and other parties in interest and the attorneys or agents of any thereof as may be approved by the Commission and the Court in the Reorganization Proceeding pursuant to Section 77, but no compensation shall be paid to members of the Committee for their services as such members.

X

Management

The Board of Directors of the New Company shall consist of not less than seven nor more than eleven members who shall be elected by the holders of the Preferred Stock and the Common Stock of the New Company at an election to be held not later than ninety days after the consummation of the Plan. Pending such election the Board of Directors shall consist of such persons as may be designated by the Reorganization Committee with the approval of the Court.

[Endorsed]: Filed Oct. 5, 1939. [756]

Before the
Interstate Commerce Commission

Finance Docket No. 10913

In the Matter
of
The Western Pacific Railroad Company
Reorganization

PETITION OF THE WESTERN PACIFIC RAILROAD COMPANY FOR REHEARING OF ITS PETITION FOR A MODIFICATION OF THE REPORT AND ORDER OF OCTOBER 10, 1938, AND FOR A MODIFICATION OF THE COMMISSION'S REPORT AND ORDER OF JUNE 21, 1939, AND FOR THE APPROVAL OF THE ANNEXED PLAN OF REORGANIZATION IN SUBSTITUTION FOR THE MODIFIED PLAN OF REORGANIZATION PROMULGATED BY THE COMMISSION. [757]

This Petition of The Western Pacific Railroad Company (herein sometimes called the "Debtor") filed pursuant to Rule XV of the Rules of Practice of the Interstate Commerce Commission as well as under Subsection (d) of Section 77 of the Bankruptcy Act, respectfully shows:

First: Following the hearing in this proceeding held January 20, 1939, certain parties undertook to negotiate an agreed-upon Plan of Reorganiza-

tion which might be acceptable to the Interstate Commerce Commission and susceptible of early consummation. These negotiations were delicate and protracted but on June 24, 1939, an agreement seemed imminent upon a Plan to be made effective as of January 1, 1939, providing for the following capital structure and allocation of new securities:

[758]

SUMMARY OF CAPITALIZATION OF NEW CORPORATION AND ALLOCATIONS OF NEW SECURITIES

Title of Issue	Presently Issued	Interest or Dividends
Undisturbed Equipment Trusts	$ 2,750,050	$ 94,202.00
First Mortgage 4% Bonds, Series A, due 1964 (to be taken by Reconstruction Finance Corporation in exchange for $10,000,000 Trustees' Certificates)	10,000,000	400,000.00
Income Mortgage 4½% Bonds, Series A, due 2014 (to be taken by holders of First Mortgage Bonds and by Reconstruction Finance Corporation for 50% of the principal of their debt)	26,126,550	1,175,694.75
Participating 5% Preferred Stock, Par Value $100.00 (to be taken by holders of First Mortgage Bonds and by Reconstruction Finance Corporation for 50% of the principal of their debt and by The Railroad Credit Corporation for 100% of the principal of its debt)	28,572,160	1,969,896.75
Total Funded Debt and Preferred Stock	$67,448,760	
Common Stock (without par value)		520,000 shares
To holders of First Mortgage Bonds	246,450	
Reconstruction Finance Corporation	16,850	
The Railroad Credit Corporation	2,745	
A. C. James Co.	72,350	
The Western Realty Company	365	
The Western Pacific Railroad Corporation as creditor and stockholder	181,240	520,000 shares

An outline of the foregoing Plan was submitted informally on that date to Division 4 of the Interstate Commerce Commission and request made for a reasonable delay in the pending proceeding to enable the negotiation of a complete agreement upon said Plan by all parties of record to the extent that they might lawfully agree thereon.

Second: Assents to said Plan were given by the following parties by the following described letters upon the terms and conditions and subject to the reservations therein stated:

The Railroad Credit Corporation, by letter addressed by its President, E. C. Buckland, to F. C. Nicodemus, Jr., dated June 28, 1939.

A. C. James Co., by letter addressed by its attorney, Robert E. Coulson, to Hon. Claude R. Porter, Interstate Commerce Commission, dated June 30, 1939.

The Western Pacific Railroad Corporation and The Western Pacific Railroad Company, by letter addressed by its counsel, F. C. Nicodemus, Jr., to Hon. Claude R. Porter, Interstate Commerce Commission, dated June 30, 1939.

Reconstruction Finance Corporation, by letter addressed by its Chairman, Jesse H. Jones, to Hon. Claude R. Porter, Interstate Commerce Commission, dated July 11, 1939.

The original of each of the above letters is in the files of the Interstate Commerce Commission.

The foregoing include all parties of record in this proceeding except (a) the Trustees under the First

Mortgage and the General and Refunding Mortgage of The [760] Western Pacific Railroad Company who are not authorized to represent holders of Bonds under such Mortgage for the purpose of accepting or rejecting any plan of reorganization, and (b) Frederick H. Ecker, John W. Stedman and Reeve Schley, as a Committee representing certain institutional holders of First Mortgage Bonds of The Western Pacific Railroad Company under a group agreement dated as of September 1, 1936, who asked for certain modifications of the Plan as the condition of their acceptance thereof or acquiescence therein.

Third: On July 24, 1939, the respective counsel for the above named Committee, for the A. C. James Co. and for The Western Pacific Railroad Corporation and The Western Pacific Railroad Company, agreed upon the modifications of the Plan asked by said Committee and on July 25, 1939, were in process of securing the approval thereof by their respective clients to the extent that they were authorized to approve the same when the Interstate Commerce Commission released its Report and Order dated June 21, 1939, modifying the Plan of Reorganization promulgated in its Report and Order dated October 10, 1938. The Plan so approved by counsel for the said Committee, for the A. C. James Co. and for The Western Pacific Railroad Corporation and The Western Pacific Railroad Company, differs from the earlier Plan referred to in paragraph First hereof slightly in mat-

ters of detail and in the following matters of substance:

(a) The maturity date of the new First Mortgage Bonds is changed from the year 1964 to the year 1989.

(b) The number of shares of Common Stock (without par value) is increased from 520,000 to 525,300 shares, which are allocated as follows: [761]

To holders of First Mortgage Bonds	262,875
To Reconstruction Finance Corporation	17,995
To Railroad Credit Corporation	2,930
To A. C. James Co.	72,350
To The Western Realty Company	365
To The Western Pacific Railroad Corporation, as creditor and stockholder	168,785

(c) The provision for the creation of a Reorganization Committee was recast so as to read: "The Plan shall be carried out under the supervision of a Reorganization Committee consisting of five persons, three to be selected by vote of the First Mortgage Bondholders in such manner as the Commission shall direct, one by R. F. C. (meaning Reconstruction Finance Corporation) and one by A. C. J. (meaning A. C. James Co.)"

A copy of the final proof of the Plan is hereto annexed as Exhibit A.

Fourth: Your petitioner avers that notwithstanding the release by the Interstate Commerce Commission on July 25, 1939, of its Report and Order dated June 21, 1939, modifying the Plan promulgated under its Report and Order dated October 10, 1938, the parties in interest may desire the Commission to certify to the Court in substitution for its modified Plan the Plan set forth in Exhibit A hereto (herein and in the annexed brief sometimes called the "agreed-upon Plan") for the following reasons:

(a) The agreed-upon Plan is susceptible of early consummation whereas the Commission's modified Plan could be made effective if at all only at the end of litigation which is almost certain to be protracted.

(b) Under the agreed-upon Plan, the existing First Mortgage Bonds in consideration of [762] concessions made to the junior creditors and stockholders secure the relinquishment of the following lien claims, among others, asserted by the Trustee of the General and Refunding Mortgage of the Railroad Company:

1. A first and paramount lien on an undivided half interest in the Northern California Extension representing a total investment of not less than $10,000,000.

2. A first and paramount lien upon the equity in equipment having a depreciated book value as of December 31, 1935, of $6,169,121.48.

Under the modified Plan of the Interstate Commerce Commission, holders of First Mortgage Bonds will receive 230,593 shares of Common Stock out of a total issue of 319,441 shares or 72.189% thereof whereas under the agreed-upon Plan they will receive 262,875 shares out of a total issue of 525,300 shares or 50.042% thereof. They also concede a preferred stock position to Railroad Credit Corporation for the principal of its debt. By making this concession to Railroad Credit Corporation and agreeing to an increase in the number of shares of Common Stock by the amount of 205,859 shares of which increased number of shares they themselves are allotted 32,282 shares—a net dilution as against the holders of First Mortgage Bonds of 173,577 shares—holders of First Mortgage Bonds avoid litigation and the delays and expense incident thereto and secure the complete relinquishment of the substantial lien claims specified above. Although these lien claims are resisted by the Trustees of the First Mortgage and by the Committee representing the institutional group of First Mortgage Bondholders, and although the Interstate Commerce Commission has determined these lien issues in favor of the First Mortgage and against the General and Refunding Mortgage, it [763] is obvious that the claims are substantial and of such character that they must be determined by a Court of last resort before it will be practicable either under the machinery provided by Section 77 of the Bank-

ruptcy Act or by equity foreclosure to make effective any Plan other than an agreed-upon Plan.

Fifth: The Board of Directors of The Western Pacific Railroad Corporation will recommend to its stockholders approval of the agreed-upon Plan in the form annexed hereto as Exhibit A and upon such acceptance by its stockholders, The Western Pacific Railroad Corporation and The Western Pacific Railroad Company will cooperate in every possible way to facilitate its early consummation.

Wherefore, your petitioner prays the Commission for a rehearing of its petition for a modification of the Report and Order of October 10, 1938, and for a modification of the Commission's Report and Order of June 21, 1939, and for the approval of the annexed Plan of Reorganization in substitution for the modified Plan of Reorganization promulgated by the Commission.

Answers to this Petition are required within ten days under Rule XV(b) of the Interstate Commerce Commission.

Respectfully submitted,

FRANK C. NICODEMUS, JR.,

Counsel, The Western Pacific Railroad Company,
40 Wall Street, New York City.

Dated, August 1, 1939. [764]

State of New York,
County of New York—ss.

Michael J. Curry, being duly sworn, deposes and says: That he is Vice-President of the above named petitioner, The Western Pacific Railroad Company; that he has read the foregoing petition and knows the contents thereof and verily believes it to be true in all respects.

MICHAEL J. CURRY.

Subscribed and sworn to before me this 1st day of August, 1939.

Commission expires March 30, 1940. [765]

Before the
Interstate Commerce Commission
Finance Docket No. 10913

In the Matter of THE WESTERN PACIFIC RAILROAD COMPANY REORGANIZATION

BRIEF IN SUPPORT OF THE FOREGOING PETITION

On August 2, 1935, four years ago tomorrow, The Western Pacific Railroad Company filed its petition for reorganization under Section 77 of the Bankruptcy Act. During the four years that have since elapsed, the property has been rehabilitated at a cost of $10,000,000 and is now an up-to-date property ripe for immediate reorganization.

On July 24, 1939, all parties of record or their counsel, as the result of negotiations which have been practically continuous since the final argument in this proceeding on [766] January 20, 1939, had agreed upon a Plan of Reorganization, a proof of which is annexed as Exhibit A to the foregoing petition.

On July 25, 1939, while counsel were in process of securing for filing with the Interstate Commerce Commission formal assents of their clients to the agreed-upon Plan, the Interstate Commerce Commission released its Report and Order dated June 21, 1939, which modified in detail but not in prin-

ciple the Plan of Reorganization promulgated by the Commission under its Report and Order of October 10, 1938.

No provision is made for the unsecured creditors and stockholders of the Railroad Company whose investment is threatened with extinction.

The Western Pacific Railroad Company, in order to make possible an early reorganization giving recognition to the investment of its junior creditors and stockholders and to avert unnecessary and wasteful litigation injurious to its property as well as to the entire railway industry, now asks that the Commission substitute the agreed-upon Plan for its own modified Plan and certify the agreed-upon Plan for the approval of the Court.

For convenience of comparison, the agreed-upon Plan and the Commission's modified Plan are set out in parallel columns: [767]

Title of Issue	Agreed-Upon Plan — Effective date January 1, 1939		Commission's Modified Plan — Effective date January 1, 1939	
	Capital Issue	Interest, dividend or other charge	Capital Issue	Interest, dividend or other charge
Undisturbed Equipment Trusts, Baldwin Lease and Pullman Contract	$ 2,750,050	$ 94,202.00	$ 2,750,050	$ 94,202.00
First Mortgage Bonds, Series A	10,000,000	400,000.00	10,000,000	400,000.00
Total Annual Fixed Charges		494,202.00		494,202.00
		300,000.00		500,000.00
Income Mortgage 4½% Bonds, Series A	26,126,550	1,175,694.75	21,219,075	954,858.00
Total Funded Debt	$38,876,600		$33,969,125	
Total Annual Charges (fixed and contingent) and Capital Fund		1,969,896.75		949,060.00
Income Mortgage Sinking Fund		130,632.75		106,093.00
Participating Preferred Stock, 5% Series (par value $100)	28,572,160	1,428,608.00	31,850,297	1,592,515.00
Total of Funded Debt and Preferred Stock	$67,448,760		$65,819,422	
Total Annual Charges, Capital Fund, Sinking Fund and Preferred Dividend requirements		3,529,137.50		3,647,670.00
Common Stock (without par value)	525,300 Shares		319,411 shares	

Under the agreed-upon Plan, the maturity of the new First Mortgage Bonds is 1989 whereas under the Commission's modified Plan the maturity date is 1964 and the Capital Fund is mandatory at $300,000 and permissive up to $500,000, whereas under the Commission's modified Plan the Capital Fund is mandatory at $500,000. The allotments of no par value Common Stock under the respective Plans are set out below.

Allottees of Common Stock	Agreed-Upon Plan	Commission's Plan
Holders of First Mortgage Bonds	262,875	230,593
Reconstruction Finance Corporation	17,995	15,788
The Railroad Credit Corporation	2,930	35,425
A. C. James Co.	72,350	37,635
The Western Pacific Railroad Corporation, as creditor	44,850	
The Western Pacific Railroad Corporation, as stockholder	123,935	
Western Realty Company	365	
Totals	525,300 shares	319,441 shares

[768]

For purposes of this brief we assume that all parties of record (except the mortgage Trustees who are not permitted either to accept or reject a Plan of Reorganization on behalf of their cestuis que trustent Bondholders) will in their answers to our petition reaffirm their adhesion to the agreed-upon Plan.

We also assume that the Interstate Commerce Commission will not hesitate to substitute the

agreed-upon Plan for its own modified Plan if convinced—

(a) that the agreed-upon Plan is compatible with the public interest;

(b) that the assents of record are sufficient to give reasonable assurance of acceptance of the Plan by the requisite percentages of the several classes of creditors and security holders;

(c) that the agreed-upon Plan is not unfair to any party in interest not represented by the parties of record who have assented to the Plan.

We shall briefly discuss these propositions in their order as stated.

(a) The agreed-upon Plan is compatible with the public interest.

The agreed-upon Plan differs from the Commission's modified Plan in only two aspects that could have any relation to the public interest—

(1) the allotment of Income Mortgage 4½% Bonds to holders of First Mortgage Bonds and to Reconstruction Finance Corporation for the principal of their debt is increased from 40% to 50% and the allotment of Preferred Stock is correspondingly decreased;

(2) the number of shares of Common Stock without par value is increased from 319,441 shares to 525,300 shares. [769]

Otherwise the capital structures under the two Plans are almost identical.

The increase of the allotment of Income Mortgage 4½% Bonds from 40% to 50% may be passed over without argument, because (1) a better balanced capital structure results; (2) better treatment is given to holders of First Mortgage Bonds and to Reconstruction Finance Corporation and (3) the allotment of equal amounts of Income Bonds and preferred stock for the principal of senior debt conforms to the Plan recently approved by both the Commission and the Court for the Chicago and Eastern Illinois Railway Company.

The increase in the number of shares of Common Stock (without par value) from 319,441 shares to 525,300 shares cannot be deemed to affect adversely the public interest.

The Commission's modified Plan provides for a capitalization of $97,763,522 calculating 319,441 shares of common stock without par value at $100 per share. As we understand it this capitalization reflects the amount of capital upon which the Commission estimates the future earnings may yield a return.

The agreed-upon Plan provides for a capitalization of $67,448,760 exclusive of 525,300 shares of common stock without par value to which no value is assigned but which if calculated at $50 per share will produce a capitalization *below* that provided for the in the Commission's modified Plan.

But it is neither necessary nor desirable to complicate our reorganization problem by attempting at this time to fix any stated value for the no-par value common stock. [770]

This question should be determined *after* reorganization and following a hearing to determine the composition of the initial balance sheet of the reorganized company in respect of which the Commission will retain all jurisdiction that it now has to prescribe a book value for such no par value stock predicated upon its estimate of the probable future earning power of the property. (Atlanta, Birmingham and Coast Railroad Company v. United States, 296 U. S. 33 (1935).)

(b) The assents of record are sufficient to give reasonable assurance of acceptance of the Plan by the requisite percentages of the several classes of creditors and security holders.

Each of the three secured creditors, i. e., Reconstruction Finance Corporation, The Railroad Credit Corporation and the A. C. James Co. is a corporation qualified to accept a Plan either under or in advance of formal submission in accordance with Section 77 of the Bankruptcy Act. Apart from these three secured creditors and the mortgage trustees who are sterilized by Section 77 the only parties in interest are (a) holders of First Mortgage Bonds and (b) The Western Pacific Railroad Corporation, as an unsecured creditor and the sole stockholder of The Western Pacific Railroad Company.

As explained at the oral argument on January 20, 1939, the acceptance of the Plan by The Western Pacific Railroad Corporation must be made subject to the subsequent approval of the stockholders of The Western Pacific Railroad Corporation; but the concentration of large amounts of this stock in the ownership of interests identified with the present management of the Railroad Company reasonably assures the prompt acceptance of the Plan by such stockholders. [771]

Approximately one-third of the outstanding First Mortgage Bonds are represented by the Committee for institutional holders of First Mortgage Bonds. Substantial additional amounts of First Mortgage Bonds are owned by The Western Pacific Railroad Corporation and are pledged to the Curtiss Southwestern Company and Central Hanover Bank and Trust Company and further amounts are held by interests closely identified with the management. With these large blocks of First Mortgage Bonds supporting the agreed-upon Plan, it is reasonable to anticipate almost unanimous support of other holders of First Mortgage Bonds. If the Plan is approved by the Commission and the Court, assents on behalf of the requisite percentage of First Mortgage Bonds seem a foregone conclusion.

(c) The agreed-upon Plan is not unfair to any party in interest not represented by the parties of record who have assented to the Plan.

It has been suggested that the Interstate Commerce Commission should hesitate to approve the

agreed-upon Plan unless and until satisfied that it is fair and equitable to holders of First Mortgage Bonds, approximately two-thirds of which are not represented of record by the Committee.

Apart from the increase in the allotment to holders of First Mortgage Bonds of 50% of the principal thereof in Income Mortgage 4½% Bonds instead of 40% as provided in the Commission's modified Plan and the use of preferred stock in adjusting the principal debt held by Railroad Credit Corporation, the only substantial change affecting holders of First Mortgage Bonds is in the increase of the number of shares of Common [772] Stock without par value from 319,441 shares to 525,300 shares and a reallocation of certain of the additional shares among the junior creditors and stockholders of the Railroad Company. This increase and reallocation of the Common Stock reduces the percentage of the entire issue allocated to First Mortgage Bonds from 72.189% to 50.042%.

For this concession to Railroad Credit Corporation and the relinquishment of 22.147% of the equity to the junior interests, holders of First Mortgage Bonds receive the following considerations, among others:

(a) assurance of an early, economical reorganization;

(b) avoidance of litigation which the Commission's modified Plan *forces* upon the junior interests whose equity of approximately $25,-

000,000 based upon the Commission's own 19-A Valuation is to be taken from them and transferred to senior creditors, largely to holders of First Mortgage Bonds;

(c) relinquishment of the lien claims of the secured creditors of the Railroad Company asserted by the Trustee under the General and Refunding Mortgage (1) to an undivided half interest in the Northern California Extension and (2) to the equity in equipment having depreciated book value as of December 31, 1935, of $6,169,121.48.

Any one of items (a), (b) and (c) is alone an adequate consideration for the concession to Railroad Credit Corporation and the relinquishment by holders of First Mortgage Bonds to the junior interests of 22.147% of the equity (which the Commission seems to regard as a remote equity) represented by the common stock of the reorganized company. It would unduly extend this brief to [773] discuss these items in detail or to emphasize the many points of resistance to the Commission's modified Plan which we think inevitable if it is certified to the Court.

A brief exposition of the lien claim asserted by the General and Refunding mortgage against the new north and south line known as the Northern California Extension will be sufficiently illustrative.

By the terms of the First Mortgage, the lien thereof extends to any newly acquired railway or extension constructed or acquired by the use of First Mortgage Bonds or their proceeds but does not attach to such railway or extension if financed independently of the First Mortgage.

The Northern California Extension was constructed at an approximate cost of $10,000,000 of which one-half was provided through the sale of First Mortgage Bonds and one-half by junior interests (who ultimately became pledgees of General and Refunding Mortgage Bonds), the project having cost double the amount of the original estimate.

If the extension had been constructed in two sections, one section financed through the First Mortgage, the other section through resources independent of the First Mortgage, there would be no lien controversy—the First Mortgage and the General and Refunding Mortgage each would have an uncontested lien on approximately one-half of the entire mileage.

The construction did not, however, take that form. Rights of way for practically the entire mileage were acquired at the outset and cash provided by sale of First Mortgage was expended indiscriminately over the whole project.

Upon this state of facts the trustees of the First Mortgage assert with apparent confidence a first and paramount lien on the entire Extension while the trustees of [774] the General and Refunding

Mortgage with equal confidence asserts a lien on an undivided half interest—a lien proportionate to capital which the junior interests put into the enterprise.

"Equity regards substance rather than form"—is one of the most favored maxims of the Equity Courts.

Looking only to substance and disregarding form as equity is wont to do no one can well question that *only* one-half of the Northern California Extension was constructed through funds provided under the First Mortgage.

It is not our purpose to suggest what is the correct determination of this lien question but merely to make clear that it contains the germ of a major lawsuit the outcome of which no one can possibly predict. Should a Chancellor (as he might readily do) accord to the General and Refunding Mortgage a lien upon an undivided half interest in this important property the result would probably be fatal to the Commission's modified Plan. It would be necessary to start de novo and to develop a basically different Plan—in all probability one involving partial if not complete liquidation of the junior secured debt collateralized by bonds issued under the General and Refunding Mortgage.

Settlement of this and other controversial issues is not only an adequate consideration for the recession to junior interests of the 22.147% of their own equity and the other concessions provided for in

the agreed-upon Plan but is a splendid result for the holders of First Mortgage Bonds.

It must be borne in mind that even after ceding 22.147% of the equity back to the junior creditors and stockholders of the Railroad Company the holders of the First Mortgage Bonds will still retain *two* shares of the [775] common stock of the reorganized company for each $100 of unpaid interest.

That so many railway properties remain in trustee-ship or receiver-ship is one of the criticisms of the railway industry to which there has been no answer. The reaction to that condition made possible the passage by the United States Senate of the coercive measure known as the Wheeler Bill. The progress of this legislation has been halted in the House. The strongest argument for its ultimate defeat would be one sound reorganization under the existing statute brought about through the co-operative effort of the railway industry and the Interstate Commerce Commission.

The Western Pacific security holders or their counsel have done their part. They have agreed upon a fair and equitable Plan that recognizes every interest in the property and forecloses no interest. They have done what the Chandler Act, the latest declaration of Congressional policy says they should do; they have themselves agreed upon a Plan.

Acceptance of this Plan by the Interstate Commerce Commission as a modification of its own

Plan would be a constructive act making possible a sound reorganization and a discharge of the property from the Court not later than December 1, 1939—the maturity date of $10,000,000 of Trustees' Certificates.

Respectfully submitted.

FRANK C. NICODEMUS, JR.,
Counsel, The Western Pacific
Railroad Company,
40 Wall Street,
New York City.

Dated, August 1, 1939. [776]

CERTIFICATE OF SERVICE

I hereby certify that on August 1, 1939, I served the foregoing document on all parties of record by mailing or delivering a true copy thereof to each of said parties.

FRANK C. NICODEMUS, JR.

[777]

EXHIBIT A

The Western Pacific Railroad Company

PLAN OF REORGANIZATION

Effective Date, January 1, 1939

[778]

List of Certain Abbreviated Terms

A. C. J.—A. C. James Company.

Committee.—The Committee representing certain institutional holders of First Mortgage Bonds of the Company, acting under a group agreement dated as of September 1, 1936, and consisting of Frederick H. Ecker, Chairman, John W. Stedman and Reeve Schley.

Bankruptcy Trustees.—The Trustees now or hereafter operating the properties of The Western Pacific Railroad Company by appointment of the Court in the Reorganization Proceeding.

Commission.—The Interstate Commerce Commission.

Company or Debtor.—The Western Pacific Railroad Company.

Consummation of the Plan.—The transfer to the New Company, to the extent contemplated by the Plan, of the properties and assets of the Company.

Court.—The District Court of the United States for the Northern District of California, Southern Division.

Effective Date of the Plan.—The date from which interest shall run on the new securities provided in the Plan, namely, January 1, 1939.

Existing First Mortgage Bonds.—Bonds issued under the First Mortgage dated June 26, 1916, from the Company to First Federal Trust Company and Henry E. Cooper, as Trustees (Crocker First National Bank and Samuel S. Armstrong, Successor Trustees) designated as the First Mortgage.

General and Refunding Bonds.—Bonds issued under the Mortgage dated January 1, 1932, from the Company to The Chase National Bank of the City of New York as Trustee (Irving Trust Company now Successor Trustee), designated as the General and Refunding Mortgage.

New Company.—The corporation, whether the Company or a new corporation, which shall acquire the greater part of the properties now held by the Bankruptcy Trustees and issue the new securities provided for by the Plan.

Plan.—This proposed plan of reorganization.

Reorganization Committee.—The Reorganization Committee appointed as herein provided.

R. C. C.—The Railroad Credit Corporation.

R. F. C.—Reconstruction Finance Corporation.

Reorganization Proceeding.—The pending proceeding under Section 77 of the Bankruptcy Act, as amended, before the Court involving the properties of the Company (Docket No. 7,004), includ-

ing also (unless the context otherwise indicates) the related proceeding before the Commission (Finance Docket No. 10,008).

W. P. Corp.—The Western Pacific Railroad Corporation, sole stockholder of the Company. [779]

II.

Proposed Capitalization of the New Company

1. Summary

The capitalization proposed herein for the New Company is substantially as follows:

Title of Issue	Presently Issued	Interest or Dividends
Undisturbed Equipment Trusts, Baldwin Lease and Pullman Contract	$ 2,750,050	$ 94,202.00
First Mortgage 4% Bonds, Series A, due 1989	10,000,000	400,000.00
Total Annual Fixed Charges		494,202.00
Capital Fund		300,000.00
Income Mortgage 4½% Bonds, Series A, due 2014	26,126,550	1,175,694.75
Total Funded Debt	$38,876,600	
Total Annual Charges (fixed and contingent) and Capital Fund		1,969,896.75
Income Mortgage Sinking Fund		130,632.75
Participating Preferred Stock, 5% Series (par value $100)	28,572,160	1,428,608.00
Total of Funded Debt and Preferred Stock	$67,448,760	
Total Annual Charges, Capital Fund, Sinking Fund and Preferred Dividend Requirements		3,529,137.50
Common Stock (without par value)	525,309 shs.	

2. First Mortgage Bonds

A. Lien of Mortgage.

The First Mortgage will be a lien, directly or through pledge of securities, subject only to liens upon equipment, on all the properties and assets owned by the New Company on the consummation of the Plan, including securities, equipment, and the equity in such equipment as is subject to equipment obligations. The First Mortgage will also be a lien on all similar property acquired by the New Company after the reorganization, except that (a) if the New Company shall acquire the properties of any other company (except a company which is a wholly owned railway subsidiary on January 1, 1939), constituting a Class I carrier as defined by the rules then in force of the Interstate Commerce Commission or other public regulatory bodies having jurisdiction at the time, such properties shall not be subject to the lien of the First Mortgage unless acquired in whole or in part by the use of First Mortgage Bonds or Income Mortgage Bonds, or moneys deposited under the First Mortgage or the Income Mortgage, and (b) if the New Company shall be consolidated with, or shall be merged into, or shall sell its assets substantially as an entirety to, any other company which at the time is a Class I carrier as defined as aforesaid, no properties theretofore owned or thereafter acquired by such other company shall be subject to the lien of the First Mortgage except properties thereafter acquired

which shall be appurtenant or incident to properties subject to the lien of the First Mortgage, or which shall be within the maintenance or replacement covenants of the First Mortgage, or which shall be acquired in whole or in part by the use of First Mortgage Bonds or Income Mortgage Bonds or moneys deposited under the First Mortgage or the Income Mortgage.

B. Issue Limited—Sinking Fund if Certain Limits Exceeded.

The amount of bonds at any time outstanding under the First Mortgage will be limited to $50,000,000.

The First Mortgage will provide (1) that on each May 1 when the aggregate principal amount of First Mortgage Bonds outstanding shall equal or exceed $20,000,000, the New Company will pay to the Trustee under the First Mortgage as a Sinking Fund a sum equal to ½ of 1% of the maximum principal amount of First Mortgage Bonds theretofore at any one time authenticated and uncancelled; and (2) that on each May 1 when the aggregate principal amount of First Mortgage Bonds outstanding plus all other funded debt bearing fixed interest shall exceed either (a) 35% of the total capitalization of the New Company, deter- [781] mined as hereinafter provided, or (b) 50% of such total capitalization, less the principal amount of funded debt bearing contingent interest at the time outstanding, the New Company, in addition to the

sums provided in Clause (1) of this Subdivision B to be paid, will pay into said Sinking Fund a sum equal to 50% of the Available Net Income of the next preceding calendar year that remains after providing for all Income Mortgage sinking funds and charges prior thereto (i.e. that remains after the deductions made pursuant to paragraphs (1), (2), (3), (4) and (5) of Subdivision G of Section 3 of this Article II; or after the provisions of said Subdivision G shall have ceased to be operative, 50% of net income as defined by the accounting rules or practice referred to in said Subdivision G). Such Sinking Fund shall be applied to the retirement of First Mortgage Bonds, by purchase in the open market or by call for tenders at not exceeding the redemption price (or in the case of bonds not redeemable, the principal amount and accrued interest), and whenever the amount in the Sinking Fund exceeds $50,000 and First Mortgage Bonds are not tendered or cannot otherwise be purchased at less than their redemption price, the funds then in the Sinking Fund shall be applied to the redemption of First Mortgage Bonds on the next succeeding interest payment date. All bonds so acquired shall be cancelled and no bonds may be issued to refund any such bonds. First Mortgage Bonds and Income Mortgage Bonds outstanding shall be deemed to include all bonds authenticated and delivered to the New Company which shall not have been cancelled or assured of retirement through the deposit of cash. Funded debt shall include an amount equal to the

capitalized value, at 5% per annum, of fixed rents payable for leased road, other than terminal or bridge properties, but shall not include (a) obligations (other than mortgage bonds on equipment trust obligations) maturing not more than two years after their date, or (b) obligations of longer maturity secured by pledge of bonds having a lien on property of the New Company except to the extent, if any, by which the principal amount of such obligations exceeds the principal amount of such bonds so pledged. Bonds guaranteed by the New Company as to interest or principal or both (other than bonds of a terminal or bridge company) shall be included in funded debt, but, in case of a joint and several guaranty with other corporations, only to the extent of the New Company's basic proportion of the principal liability. There shall be included in determining total capitalization only (a) obligations constituting funded debt, (b) stock having par value, at such par value, and (c) stock without par value, at $100 a share in case of the stock issuable under the Plan, and, in case of other stock, at the capital value at which such stock is carried on the books of the Company, not exceeding, however (except to the extent that earned surplus shall have been duly capitalized), the net amount received by the New Company on the issue thereof.

C. Issue in Series.

The First Mortgage Bonds may be issued from time to time in different series, subject to such limitations and restrictions as may be specified in the

First Mortgage, payable on such date or dates, in such denominations, bearing interest at such rates and containing such provisions in regard to redemption, conversion, taxes, place or places and money or moneys of payment, registration and sinking funds and having such other characteristics as may be prescribed by the Board of Directors of the New Company at the time of issue, but with respect to the lien of the First Mortgage all equally secured.

D. Bonds of Series A to be Issued in Reorganization.

$10,000,000 First Mortgage Bonds, Series A, are to be authenticated and issued in the reorganization for the purpose of providing the $10,000,000 of new money required in the reorganization.*

The Bonds of Series A shall be dated January 1, 1939, shall bear interest at the rate of 4% per annum, payable semi-annually, and shall be redeemable, in whole or in part, at any time upon thirty days' notice, at their principal amount and accrued interest, plus a premium of 1/10th of 1% of their principal amount for each six months, or fraction thereof, from the date of redemption to the date then fixed for their maturity as hereinafter provided. The Bonds of Series A shall mature January 1, 1989, provided, however, that if while any Bonds of Series A shall be outstanding additional Bonds shall be issued under the First Mortgage having a

*See Article III below.

fixed maturity earlier than January 1, 1989, then the Bonds of Series A shall mature on the earliest date at which any such additional Bonds so issued shall mature. [782]

E. Issue of Additional First Mortgage Bonds.

First Mortgage Bonds, in addition to those to be authenticated in the reorganization, may be authenticated from time to time: (a) to refund First Mortgage Bonds (excluding bonds issued solely by way of pledge, except as hereinafter provided) or outstanding obligations secured by First Mortgage Bonds to the extent so secured or obligations secured by prior lien on after acquired property; or (b) upon the deposit of new cash equal to the principal amount to be issued; or (c) to provide for, or to reimburse the New Company for, not exceeding 75% of expenditures made after December 31, 1938, but not more than three years prior to the date of such authentication (including expenditures for the acquisition or construction of new railroad equipment, free from lien, but not including expenditures for the making of additions and betterments to equipment) which, under the accounting rules of the Interstate Commerce Commission or other federal regulatory bodies having jurisdiction in the premises, at the time in force, are properly chargeable to capital account; provided, however, that

(a) Except when bonds are authenticated in respect of new mileage (or securities representative thereof) or in respect of new equipment the said 75% shall be applied to the net amount of said capi-

tal expenditures after deducting therefrom, to such extent and on such basis as may be specified in the First Mortgage, credits to capital account after December 31, 1938;

(b) If any First Mortgage Bonds are authenticated or cash deposited under the First Mortgage is withdrawn to provide or reimburse for the acquisition of railroad equipment, a sinking fund shall be established (in addition to any other sinking fund then in effect for any series of First Mortgage Bonds) payable in equal annual instalments in an amount sufficient to retire (at par) within the expected efficient service life of such equipment (in no case to exceed fifteen years) a principal amount of First Mortgage Bonds equal to (1) the principal amount of bonds so authenticated or (2) the amount of deposited cash so paid;

(c) If any property is acquired subject to existing liens the amount of additional First Mortgage Bonds issuable therefor or issued to refund prior lien obligations thereon, together with the aggregate amount of existing liens to which such property is subject, shall not exceed 75% of the net cost thereof, including as part of such cost the amount of such existing liens whether or not the indebtedness secured thereby is assumed by the New Company; and

(d) No bonds shall be issued on the basis of the acquisition of equipment under equipment trust obligations or any obligations for the deferred or serial payment of the purchase price for equipment;

or on the basis of the retirement of any such obligations.

F. Restrictions Designed to Limit Future Financing through First Mortgage Bonds and Restrictions on Pledges.

The First Mortgage will contain a covenant substantially to the effect that no First Mortgage Bonds (other than those to be authenticated under the Plan) will be sold or pledged unless (1) the New Company shall have contracted forthwith to sell or pledge such bonds and (2) the Board of Directors of the New Company, by resolution adopted by two-thirds of the entire number of directors, shall have determined that, in the opinion of the Board, taking into account market and all other relevant conditions at the time, it is impracticable to provide the amount of money needed (a) by the sale of Income Mortgage Bonds having a maturity of twenty years or more at a price which would give a yield to maturity of 5% or less, or (b) by the sale of Preferred Stock at a price which would give a current dividend return of 6% or less, or (c) by the sale of Common Stock at a price (not less than $50 per share) which would give a current dividend return (based on the regular dividend rate then in effect, or, if no regular dividend rate is in effect, on the average rate at which dividends shall have been paid during the last twelve calendar months) of 6% or less.

The First Mortgage will also contain a covenant substantially to the effect that the excess of the aggregate principal amount of all First Mortgage Bonds under pledge at any one time over the principal amount of all indebtedness so secured shall not exceed 10% of the aggregate principal amount of all First Mortgage Bonds then authenticated and uncancelled. [783]

3. Income Mortgage Bonds

A. Lien of Mortgage.

The Income Mortgage shall constitute a lien, subject to the lien of the First Mortgage, upon all property from time to time subject to the lien of the First Mortgage.

B. Issuable in Series.

The Income Mortgage Bonds may be issued, without limit as to aggregate amount or within such limit as may be specified in the Income Mortgage, from time to time in different series, subject to such limitations and restrictions as may be specified in the Income Mortgage, payable on such date or dates, in such denominations, bearing interest at such rates and containing such provisions in regard to accumulation of interest, redemption, conversion, taxes, place or places and money or moneys of payment, registration and sinking funds, and having such other characteristics as may be prescribed by the Board of Directors of the New Company at the time of issue, but with respect to the lien of the Income Mortgage all equally secured. No interest shall

be mandatorily payable on Income Mortgage Bonds of any series (except at maturity or redemption) except out of Available Net Income, as hereinafter provided.

C. Income Bonds of Series A to be Issued in Reorganization.

$26,126,550 of Income Mortgage Bonds, Series A, are to be authenticated and issued in the Reorganization, as set out in Article IV below.

The Income Mortgage Bonds of Series A shall be dated January 1, 1939, shall mature January 1, 2014, shall bear interest at the rate of 4½% per annum, due and payable as hereinafter provided, and shall be redeemable, in whole or in part, on May 1 in any year, on thirty days' notice at their principal amount plus (a) full interest for the last preceding year and all unpaid accumulated interest for prior years and (b) interest at the rate of 4½% per annum from the last preceding December 31 to the redemption date.

The Income Bonds of Series A shall be convertible into shares of Common Stock, as at the time constituted, at any time at the rate of 15 shares for $1,000 principal amount of such Bonds.

Interest on Income Mortgage Bonds, Series A, accruing for each calendar year shall (up to the limits of accumulation hereinafter specified) become absolutely due as a debt on December 31 in such year, but shall be payable on May 1 of the next succeeding year or thereafter as provided below. Such interest

shall be mandatorily payable (except as hereinafter provided) only out of Available Net Income of the New Company that remains after providing for the Capital Fund and changes prior thereto (i.e., that remains after the deductions made pursuant to paragraphs (1) and (2) of Subdivision G of Section 3 of this Article II). All interest that comes due and is not paid on the next following May 1 shall accumulate up to the maximum amount of 131½%, but not beyond. Accumulated interest shall be mandatorily payable (a) whenever, and to the extent that, there is Available Net Income for any subsequent year remaining after the deductions made pursuant to said paragraphs (1) and (2) of Subdivision G (in which case such amount shall be paid on the next following May 1), or (b) in any event (whether earned or not) at the maturity or on redemption of the Income Mortgage Bonds of Series A. For the purposes of the two sentences next hereinabove payments of interest shall be considered as applied to interest accrued for the last preceding calendar year before being applied to accumulations. The Board of Directors of the New Company may at any time, in its discretion, pay any interest accrued on the Income Mortgage Bonds, Series A, even if not earned, out of any funds lawfully available therefor.

The Income Mortgage will provide for the payment on May 1 of each year while any Income Mortgage Bonds, Series A, are outstanding of an instalment of Sinking Fund, if earned, as, and in the

amount, hereinafter specified. Such instalment shall be payable only out of Available Net Income for the last preceding calendar year, that remains after paying interest on outstanding Income Mortgage Bonds (i.e., that remains after the deductions made pursuant to paragraphs (1), (2) and (3) of said Subdivision G). The amount of such instalment shall equal (a) ½ of 1% of the maximum principal amount of Income Mortgage Bonds, Series A, theretofore at any one time authenticated and uncancelled, plus (b) an amount equal to interest on all Income Mortgage Bonds, Series A, theretofore purchased or redeemed out of the Sinking Fund, calculated at the rate paid on said May 1 upon outstanding Income Mortgage Bonds of Series A. Such [784] accruals of the Sinking Fund instalments shall not be cumulative. The Sinking Fund shall be applied from time to time to the retirement of Income Mortgage Bonds, Series A, by purchase in the open market or by call for tenders at not exceeding their redemption price, and whenever the amount in the Sinking Fund exceeds $50,000 and Income Mortgage Bonds, Series A, are not tendered or cannot otherwise be purchased at less than their redemption price, the funds then in the Sinking Fund shall be applied to the redemption of the Income Mortgage Bonds, Series A, on the next succeeding interest payment date. All bonds so acquired shall be cancelled and no bonds may be issued to refund any such bonds.

D. Issue of Additional Income Mortgage Bonds.

Income Mortgage Bonds, in addition to those to be issued in the reorganization, may be issued from time to time to refund outstanding Income Mortgage Bonds or, in lieu of First Mortgage Bonds, for the purposes and subject to the restrictions stated under "Issue of Additional First Mortgage Bonds" above, to the extent that First Mortgage Bonds are not issued for such purposes.

E. Restrictions Designed to Encourage Future Financing Through Stock and Restrictions on Pledges.

No Income Mortgage Bonds (other than those to be issued under the Plan) may be authenticated and delivered unless (1) the New Company shall have contracted forthwith to sell or pledge such bonds and (2) the Board of Directors of the New Company, by resolution adopted by two-thirds of the entire number of directors, shall have determined that, in the opinion of the Board, taking into account market and all other relevant conditions at the time, it is impracticable to provide the amount of money needed (a) by the sale of Preferred Stock at a price which would give a current dividend return of 6% or less, or (b) by the sale of Common Stock at a price (not less than $50 per share) which would give a current dividend return (based on the regular dividend rate then in effect, or, if no regular dividend rate is in effect, on the average rate

at which dividends shall have been paid during the last twelve calendar months) of 6% or less.

The Income Mortgage will also contain a covenant substantially to the effect that the excess of the aggregate principal amount of all Income Mortgage Bonds under pledge at any one time over the principal amount of all indebtedness so secured shall not exceed 10% of the aggregate principal amount of all Income Mortgage Bonds then authenticated and uncancelled.

F. Modification of Income Mortgage.

The Income Mortgage will provide, within conditions and limits to be therein prescribed, for the modification and alteration thereof and of the rights and obligations of the New Company and of the holders of the Income Mortgage Bonds thereunder, at any time by the concurrent action of the New Company and of the holders of not less than 66⅔% in aggregate principal amount of the bonds then outstanding; provided, however, that no such change or modification shall alter or impair the obligation of the New Company to pay the principal of any bond without the consent of the holder of such bond. In the event of any unification of the properties of the New Company with the properties of any other company, the modifications hereinabove authorized may include provisions excluding in whole or in part the earnings from such other properties in determining Available Net Income and providing for the determination of such Available Net Income without the maintenance of separate accounts.

G. Determination and Application of Available Net Income.

Available Net Income shall be determined for each calendar year beginning with the year 1939, and continuing thereafter so long as any Income Mortgage Bonds remain outstanding. When no Income Mortgage Bonds remain outstanding, the provisions of this Subdivision G shall cease to be operative.

Available Net Income for each such calendar year shall be determined by deducting all fixed charges of the New Company and its wholly owned railway subsidiaries accrued during such calendar year from the consolidated income of the New Company and its wholly owned railway subsidiaries available for fixed charges for such calendar year (determined in accordance with the accounting rules of the Interstate Commerce Commission or other analogous Federal authority having jurisdiction in the premises at the time in force, or, to the extent not governed by such accounting rules, in accordance with sound accounting practice); provided, however, that if the New Company shall not come into ownership and possession of the properties now operated by the Bankruptcy Trustees on or before January 1, 1939, Available Net Income for any period after January 1, 1939, until the New Company comes into ownership and possession of such [785] properties shall be computed as if the New Company had come into such ownership and possession on January 1, 1939 and had issued, as of that date, the new securi-

fies issuable under the Plan, other than the $10,000,000 of new First Mortgage Bonds, Series A, and in lieu of interest on such Bonds there shall be charged the amount of interest actually accruing during such period upon any then outstanding Trustees' Certificates or other obligations issued to provide funds for rehabilitation purposes.

Available Net Income shall be ascertained for each such calendar year, as the accounts shall be stated on the books of the New Company during such calendar year, without adjustments, except that: (1) if in respect of any calendar year the Available Net Income is a deficit, the amount of such deficit may, in the discretion of the Board of Directors of the New Company, be carried forward and be deducted in determining Available Net Income for the succeeding calendar year or calendar years until such deficit (or accumulated or remaining deficits) be extinguished by earnings which in the absence of such deficit or deficits, would be Available Net Income; and (2) debits or credits to adjust income in prior years shall be treated as income items for the year in which entered on the books whether cleared through income or profit and loss accounts, so far, but only in so far, as such debits and credits reflect cash receipts or disbursements in the year in which they are entered on the books.

Available Net Income for each calendar year shall be applied to the following purposes and in the following order:

(1) To the creation, if and when the aggregate principal amount of First Mortgage Bonds outstanding shall equal or exceed $20,000,000, of the Sinking Fund provided for in Clause 1 of Subdivision B of Section 2 hereinabove, in an amount up to, but not exceeding, in respect of any calendar year, ½ of 1% of the maximum principal amount of First Mortgage Bonds theretofore at any one time authenticated and uncancelled.

(2) To the creation of a Capital Fund to be applied to, or to provide for, or to reimburse the treasury of the New Company for, Capital Investments, as defined by the Interstate Commerce Commission's Classification of Income, Profit and Loss and General Balance Sheet Accounts for Steam Railroads, Accounts Nos. 701 Investment in road and equipment, 702 Improvement on leased railway property and 705 Miscellaneous physical property (or advances to subsidiaries for expenditures which, if made directly by the New Company in respect of its owned or leased properties, would be charged to said accounts), or such substituted accounts as may at the time be in effect, to the extent that such Capital Investments have been made or contracted for during such calendar year or within three months thereafter, and including therein (but only to the extent that such payments during such calendar year shall exceed depreciation of equipment charged against income for such calendar year) payments made for new equipment, or initial and principal payments upon equipment leased under equipment trusts or

purchased under conditional sale agreements and instalments of sinking fund provided for by paragraph (b) of Subdivision E of Section 2 of this Article II (relating to First Mortgage Bonds issued for equipment), provided, however, that

(a) The annual amount set aside in the Capital Fund shall be $300,000, which amount shall be cumulative, provided, however, that (1) if the Board of Directors of the New Company in its discretion shall so determine, additional amounts not exceeding $200,000 in respect of any calendar year may be set aside in the Capital Fund, and (2) the amount in the Capital Fund unappropriated shall not exceed $1,000,000 at any one time.

(b) The Capital Fund may be applied only to such part of the cost of Capital Investments as hereinabove defined as remains after deducting from such cost all retirements of roadway and structures charged against income in such calendar year;

(c) To the extent that expenditures are so provided for or reimbursed out of the Capital Fund, the Company shall not thereafter have the right to issue any bonds or other evidences of indebtedness or any stock ranking, as to either assets or dividends, in priority to, or on a parity with, the Preferred Stock, 5% Series, to capitalize or reimburse such expenditures; provided, however, that such expenditures (if for purposes for which First Mortgage Bonds

or Income Mortgage Bonds may be issued) may, within such limits, if any, as may be specified in the First Mortgage or the Income Mortgage, be used to supply, in whole or in part, the excess of capital expenditures required to be certified under either such mortgage over the principal amount of the Bonds that may be issued under the terms thereof; and [786]

(3) Any then remaining Available Net Income for any calendar year shall be applied to the payment on the next succeeding May 1, of interest on the then outstanding Income Mortgage Bonds (not including any thereof then held in any sinking fund) accrued during the last preceding calendar year, and of any accumulated unpaid interest thereon.

(4) Any then remaining Available Net Income for any calendar year shall be applied, so long as any Income Mortgage Bonds, Series A, are outstanding, to the payment on the next succeeding May 1, of the sinking fund instalment provided for in Subdivision C of this Section 3 (relating to Income Mortgage Bonds, Series A).

(5) Any then remaining Available Net Income for any calendar year may be applied to the creation of a sinking fund for Income Mortgage Bonds of series other than Series A, if any such sinking fund shall have been provided for at the time of the creation of any such series;

(6) Any then remaining Available Net Income for any calendar year shall be applied to the pay-

ment on the next succeeding May 1 of the instalment, if any, then due under the sinking fund provisions of Clause (2) of Subdivision B of Section 2 hereinabove (relating to First Mortgage Bonds when outstanding in excess of certain limits).

(7) Any then remaining Available Net Income for any calendar year may be applied to any proper corporate purpose of the New Company (except dividends on the new Common Stock), including, if and to the extent that such dividends shall be declared by the Board of Directors of the New Company, the payment of dividends upon the Preferred Stock in respect of such year and of any accrued and unpaid cumulative dividends on the Preferred Stock; such dividends to be paid, except as hereinafter provided, on such date or dates in the next succeeding year as may be specified in the Certificate of Incorporation or By-Laws of the New Company, or in the certificates for the Preferred Stock.

(8) Any then remaining Available Net Income for any calendar year may be applied to any proper corporate purpose of the New Company, including (but only after all accrued and unpaid cumulative dividends on the Preferred Stock to the end of such year shall have been paid, or declared and set apart for payment) dividends on the Common Stock.

No interest need be paid on Income Mortgage Bonds if the amount to be paid is less than ¼ of 1%. Any excess available for interest but not paid because of the foregoing provision shall be reserved and added to the income available for interest on

the Income Mortgage Bonds for the next succeeding calendar year.

If there are outstanding Income Mortgage Bonds of different series, the amount applicable to interest on such bonds shall be distributed among the respective series in proportion to the unpaid interest at the time accumulated on the bonds of such series, respectively.

Dividends may be paid on stock of any class (subject to the relative rights of the several classes of stock) out of the income of any calendar year prior to the close of such calendar year if, but only if, prior to the declaration of such dividends, the Board of Directors shall have determined that the Available Net Income for such year applicable for the purposes specified in the foregoing paragraphs (1), (3), (4), (5) and (6) will be more than sufficient to pay the amounts payable out of such Available Net Income pursuant to said paragraphs and such amounts shall have been deposited in trust for the purposes specified in said paragraphs. Dividends on Common Stock may be so declared only if, prior to such declaration, the Board of Directors shall have determined that the applicable part of Available Net Income for such year will be more than sufficient to pay the amount hereinabove specified for dividends (including accumulations) on the Preferred Stock and such amount shall have been deposited in trust for the purpose of paying such dividends.

4. Preferred Stock

A. Authorized Issue.

There will be authorized 750,000 shares of Preferred Stock, each of the par value of $100, of which 285,722 shares of a 5% Series are to be issued in the reorganization as set out in Article IV below.

The additional authorized Preferred Stock not issued in the reorganization will be issuable from time to time in the discretion of the Board of Directors of the New Company, but (unless for purposes for which First Mortgage Bonds might otherwise have been issued) only after the concurring vote or consent of the [787] holders of a majority of the outstanding Preferred Stock. So far as permitted by law, such additional Preferred Stock may be of the 5% Series issued upon this reorganization, or of any other series, one or more, and Preferred Stock of any such other series may bear dividends at such rate, cumulative or non-cumulative, may be participating or non-participating, may be redeemable or non-redeemable, convertible or non-convertible, and may have such other rights and privileges and be subject to such limitations and restrictions, as may be from time to time determined by the board of directors prior to the issue of Preferred Stock of any such other series.

B. Preference on Liquidation.

In any liquidation or winding up of the New Company, whether voluntary or involuntary, the Preferred Stock shall be entitled to receive, out of

the assets of the New Company, its par value, plus any accrued and unpaid cumulative dividends thereon, plus such premium, if any, as may be specified for any series, before any distribution shall be made on the Common Stock, but shall not be entitled to any further participation in such assets.

C. Voting Rights.

Holders of Preferred Stock shall be entitled to one vote per share on all matters, except that in elections of directors, which shall be by cumulative voting, each holder of stock of either class shall be entitled to as many votes per share as the number of directors to be elected.

The New Company shall not, without the vote or consent of the holders of at least two-thirds in par value of the outstanding new Preferred Stock: (1) create or permit to be created any mortgage or other lien upon any of its properties, excepting the new First Mortgage, the new Income Mortgage or purchase money liens (including equipment obligations) upon property hereafter acquired, given for not more than 75% of the purchase price of such property; (2) create or issue any bonds, notes or other evidences of indebtedness maturing more than two years from their date, except purchase money obligations given for not more than 75% of the purchase price of property hereafter acquired; (3) create any stock ranking, either as to assets or dividends, in priority to, or on a parity with, the new Preferred Stock, or (4) permit any subsidiary,

all of whose stock except directors' shares, shall be owned by the New Company, to create any mortgage or other lien upon any of its properties or issue any such bonds, notes or other evidences of indebtedness (except purchase money liens or obligations limited as aforesaid), or issue any additional stock of any class, unless the obligations secured by such mortgage or other lien or such other obligations or such stock shall be acquired by the New Company.

D. Preferred Stock, 5% Series.

The Preferred Stock, 5% Series, shall be entitled to receive all accumulated unpaid dividends and current dividends at the rate of 5% per annum, in respect of any calendar year before any dividends shall be paid or declared or set apart for payment on the Common Stock in respect of such year. Such dividends shall be cumulative to the extent earned in any calendar year but not paid; but such dividends shall otherwise be non-cumulative. For the purposes of the next preceding sentence hereinabove, Preferred Stock dividends shall be considered to be earned in any calendar year to the extent covered by the Available Net Income for such year that remains after providing for prior charges (i.e., that remains after the deductions made pursuant to paragraphs (1), (2), (3), (4), (5) and (6) of Subdivision G of Section 3 of this Article II); or after the provisions of said Subdivision G shall have ceased to be operative, to the extent covered by net income as defined by the accounting rules or prac-

tice referred to in said Subdivision G). If there are outstanding shares of Preferred Stock of different series, the earnings applicable to dividends thereon shall be apportioned among the respective series in proportion to the dividends accumulated on the shares of such series respectively.

After dividends shall have been paid or declared or set apart for payment, on the new Common Stock at the rate of $3 per share in respect of any year, each share of Preferred Stock, 5% Series, shall be entitled to share equally with each share of new Common Stock in any dividends paid or declared or set apart for payment, in respect of such year.

The Preferred Stock, 5% Series, shall be redeemable, in whole or in part, at any time at its par value plus accrued and unpaid cumulative dividends, and proportionate dividend for the current year.

The holders of Preferred Stock, 5% Series, shall not have any preemptive right to subscribe to any additional issues of stock of any class or of securities convertible into stock of any class. [788]

5. Common Stock

There will be authorized 1,250,000 shares of Common Stock, without par value, of which 525,300 shares are to be issued in the reorganization as set forth in Article IV below and 522,531 shares shall be reserved for the conversion of Income Mortgage Bonds, Series A.

Holders of Common Stock shall be entitled to one vote per share on all matters except that directors shall be elected by cumulative voting as aforesaid.

So far as permitted by law, any vote or consent by the holders of Common Stock, authorizing the issuance of additional shares of stock of any class or of securities convertible into stock of any class, may waive, on such terms and conditions, if any, as may be specified in such vote or consent, the preemptive right of all the holders of shares of Common Stock to subscribe to such additional shares or securities.

III.

Reconstruction Finance Corporation and Provision of New Money

$10,000,000 of new money is required by the New Company for the purpose of retiring Trustees' Certificates issued to provide for the expenditures under the 1936, 1937 and 1938 rehabilitation program. Said $10,000,000 in new money is to be provided for by the sale at par and accrued interest to R. F. C. (subject to approval and authorization of the Interstate Commerce Commission and the delivery to R. F. C. of a legal opinion satisfactory to it as to the validity of the acquisition by the New Company of title to the properties of the Debtor and the validity of the new First Mortgage Bonds and the new First Mortgage) of the $10,000,000 of First Mortgage 4% Bonds, Series A, due 1989, to be issued in the reorganization.

As consideration for R. F. C.'s providing said new money by purchasing said First Mortgage Bonds, R. F. C.'s existing claim against the Company, amounting as of January 1, 1939, to $3,-

862,870 ($2,963,000 principal and $899,870 interest) and represented by notes secured by collateral junior to the existing First Mortgage Bonds of the Company, shall be provided for under the Plan in like securities and in like proportions as those given holders of the Company's existing First Mortgage Bonds.

The New Company will enter into an agreement with R. F. C. that so long as R. F. C. shall own $5,000,000 of said First Mortgage Bonds, the New Company will not, without the prior consent of R. F. C., issue bonds under the First Mortgage in excess of the aggregate principal amount at any one time outstanding of $20,000,000.

IV.

Treatment of Existing Securities

1. Existing equipment trusts, Baldwin lease and Pullman contract, aggregating $2,750,050, shall remain undisturbed and shall be assumed by the New Company.

2. Holders of existing First Mortgage Bonds will receive for each $1,000 principal amount thereof, together with $266,66⅔ of interest accrued and unpaid thereon to January 1, 1939:

$500 Income Mortgage 4½% Bonds, Series A (being 50% of the principal amount of existing Bonds);

$500 Preferred Stock, 5% Series (being 50% of the principal amount of said Bonds); and

Five and one-third shares of Common Stock, without par value.

3. R. F. C. will receive in respect of the $10,000,000 of new money provided for in Article III (or the surrender of Trustees' Certificates at their principal amount and accrued interest, to a like amount) and its existing claim in the principal amount of $2,963,000, together with $899,870 of interest accrued and unpaid thereon to January 1, 1939:

$10,000,000 New First Mortgage 4% Bonds, Series A (being 100% of said new money);

$1,481,500 Income Mortgage 4½% Bonds, Series A (being 50% of the principal of the said claim);

$1,481,500 Preferred Stock, 5% Series (being 50% of the principal of the existing claim); and

Seventeen thousand nine hundred and ninety-five shares of Common Stock, without par value. [789]

4. R. F. C. will receive in respect of its claim in the principal amount of $2,445,610, together with $146,503 of interest accrued and unpaid thereon to January 1, 1939:

$2,445,610 Preferred Stock, 5% Series (being 100% of the principal of said claim); and

Twenty-nine hundred and thirty Shares of Common Stock without par value.

Subject to reduction by the application, prior to the date of issue of the new securities under the Plan, of any proceeds from the distributive shares of the Company or its subsidiaries under the Marshaling and Distributing Plan, 1931.

5. A. C. J. will receive in respect of its claim in the principal amount of $4,999,800 together with $1,249,950 of interest accrued and unpaid thereon to January 1, 1939:

Seventy-two thousand three hundred and fifty shares of Common Stock, without par value.

6. W. P. RR. Corp. will receive in respect of its claim in the principal amount of $5,767,543, together with $1,980,429 of interest accrued and unpaid thereon to January 1, 1939:

Forty-four thousand eight hundred and fifty shares of Common Stock, without par value.

7. Western Realty Company will receive with respect of its claim in the principal amount $50,000, together with $11,667 of interest accrued and unpaid thereon to January 1, 1939:

Three hundred and sixty-five shares of Common Stock, without par value.

8. W. P. RR. Corp. will receive in respect to its equity in the Debtor, represented by the difference between the depreciated investment in the Debtor of $120,000,000 (approx.) and its aggregate debts as of January 1, 1939, with accrued interest, amounting to $95,698,299:

One hundred twenty-three thousand nine hundred and thirty-five shares of Common Stock of no par value.

V.

Claims Not Affected By the Plan

The following claims are not affected by the Plan: (a) current liabilities of the Company incurred in

the ordinary conduct of its business prior to the institution of the Reorganization Proceeding, which are entitled to priority over one or more of the mortgages of the Company, (b) current liabilities and obligations of the Bankruptcy Trustees incurred during the Reorganization Proceeding, and (c) expenses of reorganization allowed by the Court within the maximum limits fixed by the Commission. To the extent that such claims, liabilities or obligations are not paid by the Company or the Bankruptcy Trustees pursuant to order of the Court, they are to be paid in cash or assumed by the New Company, provided that any amounts so assumed by the New Company shall constitute a charge upon the properties of the New Company prior in lien to all new securities issued under the Plan. All such claims, liabilities and obligations may be adjusted or compromised and dealt with or paid or discharged by the New Company, all as may be determined by the Board of Directors of the New Company subject to approval by the Court.

The New Company shall be deemed to have assumed such of the contracts of the Company which are executory in whole or in part and which by their terms do not terminate at or prior to the conclusion of the Reorganization Proceeding, including any executory leases and liabilities under guaranties, as shall have been affirmed by the Bankruptcy Trustees with the approval of the Court, or shall not have been disaffirmed by the Bankruptcy Trustees, prior to the date of confirmation of the Plan, and

also any executory contracts made by the Bankruptcy Trustees with the approval of the Court which by their terms do not terminate at or prior to the conclusion of the Reorganization Proceeding.

VI.

Method of Executing the Plan

Existing mortgages on the Company's properties shall be released and cancelled, and all funds on deposit with the Trustee under the Company's mortgages representing sums paid from time to time to [790] such Trustees for the release of properties, sale of scrap, and otherwise; and all collateral pledged under the Company's mortgages, shall be surrendered to the New Company free from liens of the Company's mortgages, after deductions therefrom of any amounts which the Court may find should be deducted under the provisions of such mortgages and consistent with this Plan. All collateral pledged by others than the Company as security for the Company's notes to R. F. C., R. C. C. and A. C. J. shall be surrendered to the pledgors thereof, and all collateral pledged by the Company as security for said notes shall be surrendered to the New Company and cancelled, except that R. C. C. shall not release or surrender any right or interest in the distributive shares of the Company or its subsidiaries under the Marshaling and Distributing Plan, 1931, but any proceeds from such distributive shares after the effective date of the Plan, shall become the property of and be retained by the

R. C. C., but to the extent to which received prior to the issue of the new securities under the Plan shall be applied in reduction of the claim of the R. C. C. in respect of which such new securities are to be issued at the rates provided in Article IV.

The Plan shall be carried out under the supervision of a Reorganization Committee consisting of five persons, three to be selected by vote of the existing First Mortgage Bondholders in such manner as the Commission shall direct, one by R. F. C., and one by A. C. J. The selections shall be communicated to the Court for its consideration, and designated by the Court immediately upon confirmation of the Plan. Any vacancy which may occur in the Committee shall be filled through a new selection by the person or persons who had selected the retiring member.

The Plan may be carried out either by re-vesting the properties formerly of the Company in the Company or by transferring said properties to a new corporation organized for the purpose, and the execution by the corporation in which said properties are vested of the new mortgages and the issue by it of the new securities contemplated by the Plan.

Subject to any requirements of law and to the requisite approval of the Court and the Commission, the Reorganization Committee shall have the power to provide the method by which creditors and other interested parties may participate in the Plan, to determine the form, and, except as herein otherwise expressly provided, the provisions, of all mortgages,

bonds, coupons, charters, by-laws, stock certificates, voting trust certificates, acceptances, assents, and all other instruments in the judgment of the Reorganization Committee necessary or desirable in connection with carrying out the Plan, and to take all such action and to enter into such arrangements, financial and otherwise, as the Reorganization Committee may deem necessary or advisable, in order to consummate and carry into execution the Plan or any modification thereof.

The Reorganization Committee may act by a majority of its members as from time to time constituted, at a meeting or in writing without a meeting. The Reorganization Committee may employ such agents, attorneys and others as it may deem desirable for the purposes of the Plan. The Reorganization Committee may from time to time delegate to others any power or discretion conferred upon it by the Plan; and the members of the Reorganization Committee shall not be liable for any action taken by them in good faith or by any person employed by the Reorganization Committee in good faith, or otherwise, except for their respective individual malfeasance or neglect. The terms of any solicitation of deposits of securities or authorizations to represent shall be subject to the approval of the Commission.

In case any class of creditors or stockholders shall not accept the Plan pursuant to Section 77, any party may nevertheless move the Court to confirm the Plan on the ground that the interests of such

class of creditors have no value, or, as the case may be, that the equity of such class of stockholders has no value, or on the ground that the Plan provides for payment in cash to such class of an amount not less than the value of their interests or equity, if any, in accordance with subdivision (c) of Section 77, through the sales hereinafter provided for in accordance with clause 5 of subdivision (b) of Section 77.

If so ordered by the Court, the Plan may be executed by a sale at public auction, at not less than a fair upset price as determined by the Court, of all or any part of the properties and assets of the Company, all on such conditions and in such manner as the Court may direct. Upon any such sale, the properties and assets offered for sale may be purchased for the benefit of the New Company by the Reorganization Committee, and in that event there shall be applied on account of the purchase price the distributive share, if any, of the proceeds of such sale of all securities the holders of which shall have assented to the Plan, and the securities, though not assenting to the Plan, of all classes which shall have accepted the Plan. If the properties and assets of the Company so offered for sale are purchased at any such sale by others than the Reorganization Committee, the Plan shall be deemed inoperative except in so far as provision is made therein for the sale of the properties and assets of the Company at such sale as may be ordered by the Court. [791]

All properties and assets so sold which are purchased by the Reorganization Committee or its representative shall be transferred to the New Company.

In the event of any such sale, the Reorganization Committee may in its discretion sell all or any portion of the new securities distributable under the Plan in respect of securities of any creditor, if neither such creditor nor the class to which such creditor belongs shall have accepted the Plan. The proceeds of any such sale may be used to pay the portion of the purchase price payable in cash on any such sale.

Upon any such sale, non-assenting creditors of any class which shall not have accepted the Plan and the stockholders of either class shall be entitled to receive, in lieu of the securities, if any, otherwise issuable under the Plan, their aliquot proportion of the proceeds of such sale, after deducting therefrom all expenses of such sale and the amount which would be required to pay in full, of principal and unpaid interest accrued to the date of such sale, all creditors whose claims are prior in lien or superior in equity to the claims of such non-assenting creditors or the rights of such stockholders, provided that such non-assenting creditors and such stockholders shall have the right, if they shall notify the Reorganization Committee within a period of 30 days after the approval of such sale by the Court, to assent to the Plan and receive the securities allocated to them under the Plan in lieu of their aliquot share of the proceeds of such sale.

VII.

Construction of the Plan

The construction of the Plan by the Court shall be final and conclusive. The Court may cure any defect, supply any omission, or reconcile any inconsistency in such manner or to such extent as may be necessary or expedient in order to carry out the Plan effectively. Acceptance of the Plan shall include acceptance of the provisions of the Mortgage, the bonds issued thereunder in the reorganization, the stock certificates, and all instruments necessary and appropriate to the carrying out of the Plan, to the same effect as if the terms of such documents and instruments were set forth in full herein.

VIII.

Management

The Board of Directors of the New Company shall consist of not less than seven nor more than eleven members who shall be elected by the holders of the Preferred Stock and the Common Stock of the New Company at an election to be held not later than ninety days after the consummation of the Plan. Pending such election the Board of Directors shall consist of such persons as may be designated by the Reorganization Committee with the approval of the Court.

[Endorsed]: Filed Oct. 5, 1939. [792]

Finance Docket No. 10913

WESTERN PACIFIC RAILROAD COMPANY REORGANIZATION

Submitted August 3, 1939.

Decided September 19, 1939.

Upon further consideration of the record and the petition of the Western Pacific Railroad Company for modification of the plan for the reorganization of the Western Pacific Railroad Company approved October 10, 1938, as modified and approved on June 21, 1939, petition denied.*

Appearances as in prior reports.

REPORT OF THE COMMISSION ON CONSIDERATION OF PETITION FOR FURTHER MODIFICATION OF APPROVED PLAN OF REORGANIZATION.

By the Commission:

By our report and order issued October 10, 1938, in this proceeding, we approved a plan for the reorganization of the Western Pacific Railroad Company, hereinafter called the debtor, pursuant to the provisions of section 77 of the Bankruptcy Act, as amended, 230 I. C. C. 61. On December 30, 1938,

*Previous reports 207 I. C. C. 793, 230 I. C. C. 61, and 233 I. C. C. .....

pursuant to petitions filed by the debtor and certain intervenors for modifications of the plan we had approved, we reopened the proceeding for further consideration. On June 21, 1939, after having heard the parties on oral argument concerning the petitions, we issued our report and order approving a modified plan for the reorganization of the debtor.

On August 2, 1939, the debtor filed a petition for a rehearing of its petition for a modification of our report and order of October 10, 1938; and for a modification of the [793] modified plan of reorganization approved by our report and order of June 21, 1939, proposing therein a plan of reorganization, herein referred to as the new plan, in substitution of the modified plan approved by us on June 21, 1939.

By the new plan it is proposed to make the maturity date of the new first-mortgage bonds 1989 instead of 1974 and to make the capital fund mandatory at $300,000 and permissible up to $500,000 instead of mandatory at $500,000 as in the approved plan. It is proposed to increase the number of shares of no-par value common stock from 319,441 shares to 525,300 shares. Under the approved plan the common stock is allocated, 72.19 percent to the present first-mortgage bondholders, 4.94 percent to the Reconstruction Finance Corporation, hereinafter called the Finance Corporation, 11.09 percent to the Railroad Credit Corporation, hereinafter called the Credit Corporation, and 11.78 percent to the A. C. James Company. The new plan

would allocate 50.04 percent to the first-mortgage bondholders, 3.43 percent to the Finance Corporation, 0.56 percent to the Credit Corporation, 13.77 percent to the A. C. James Company, 8.51 percent to the Western Pacific Railroad Corporation in its capacity as a general creditor, 23.59 percent to the Western Pacific Railroad Corporation in its capacity as stockholder, and 0.07 percent to the Western Realty Company as a general creditor.

The new plan proposes $26,126,550 of new income-mortgage bonds, an increase of $4,907,475 over the $21,219,075 provided in the approved plan. Under the new plan the first-mortgage bondholders and the

[793-A]

Finance Corporation would each be given 50 percent of the principal of their securities in income-mortgage bonds and 50 percent in preferred stock, instead of 40 percent in income bonds and 60 percent in preferred stock as under the approved plan. It would not allocate any income bonds to the Credit Corporation and the A. C. James Company, whereas the approved plan allocated $154,111 and $163,724, respectively, to them.

Under the new plan $28,572,160 par value of preferred stock would be issued in lieu of the $31,850,297 under the approved plan. The decrease of $3,278,137 is accounted for by the new proportional basis, above described, for allocating income bonds and preferred stock to the first-mortgage bondholders and the Finance Corporation, by allocating $2,445,610 instead of $241,681 to the Credit Corporation, and by allocating none to the A. C. James Com-

pany instead of the $256,756 under the approved plan.

The fixed interest debt, $12,750,050, and the yearly interest charges thereon, $494,202 would be the same under the new plan as under the approved plan. The combined fixed-interest and contingent-interest debt under the new plan would be $38,876,600, compared with $33,969,125 under the approved plan. The yearly fixed-interest, capital fund, and contingent-interest charges under the new plan would be $2,169,897, compared with $1,949,060 under the approved plan. In this comparison it is assumed that the board of directors would exercise its discretion in favor of increasing the $300,000 mandatory amount of the capital fund under the new plan to the discretionary amount of $500,000. Under the new plan the yearly fixed-interest, [794] capital fund, contingent-interest, sinking fund for income bonds, and preferred stock dividend requirements would be $3,729,138, compared with $3,647,670 under the approved plan. Under the new plan the total capitalization would be $67,448,760 plus 525,300 shares of common stock without par-value, compared with $65,819,422 plus 319,441 shares without par-value under the approved plan.

The debtor states, as one of its reasons for presenting its petition at this time, that the new plan has been substantially agreed to by the parties. The Credit Corporation joins in the request of the debtor for the substitution of the new plan for the one approved. The A. C. James Company states that it

is willing to accept the proposals of the new plan on condition that it is promptly accepted by all other parties and approved by us, without waiving any of its rights heretofore raised, under any other plan. The committee representing institutional holders of about one-third in amount of first mortgage bonds of the debtor, in its answer to the petition states that in view of the approval by us of a plan of reorganization on June 21, 1939, it is now unable to recommend to the security holders which it represents, the compromise proposed in the new plan, although it was willing to do so prior to that order. It now opposes the reopening of the record of the proceedings before us and prays that the plan heretofore approved by us be certified to the court immediately.

The debtor explains in its brief accompanying its petition that acceptance of the plan by the Western Pacific Railroad Corporation must be made subject to the subsequent approval of the stockholders of that corporation, but that [794-A] concentration of large amounts of the stock in the ownership of interests identified with the present management of the debtor reasonably assures the prompt acceptance of the plan by such stockholders. It urges that our approval of the new plan would assure an early reorganization of the debtor and that it would forestall litigation likely to arise under the approved plan between the interests junior to the first-mortgage bondholders and the first-mortgage bondholders.

Conclusions

We are not satisfied that the mandatory feature of the capital fund should be reduced from $500,000 to $300,000. In both of our prior reports we found in effect that yearly contributions of $500,000 to the capital fund were essential to meet the debtor's requirements. In our report of June 21, 1939, we considered requests that the yearly contributions to the capital fund be reduced to $300,000. The debtor's petition does not offer to prove or set forth facts even tending to show that we were in error in our finding that the capital fund should be mandatory at $500,000.

The allocation of 8.54 percent of the new common stock to the Western Pacific Railroad Corporation, in its capacity as a general creditor, and 23.59 percent to it in its capacity as a stockholder, and 0.07 percent to the Western Realty Company as a general creditor would require a reversal of our findings that those interests have no value, or a finding that the concessions required of the senior interests are justified and are compensated by concessions to be made by the junior interests. This proposed sharing of common stock affects also our previous finding as to what constitutes fair and equitable treatment of part of the interests of [795] the first-mortgage bondholders. The debtor's petition does not set forth or offer to prove facts indicating that our findings with respect to these matters were erroneous or furnish any other basis for a finding

that the proposed new plan would be fair and equitable.

In our report of October 10, 1938, we found that the total annual fixed and contingent interest charges of the reorganized company, plus requirements for the capital and sinking funds, should not exceed $2,000,000 per annum. In our report of June 21, 1939, we modified that finding to the extent of approving a plan by which those annual charges would slightly exceed $2,000,000, viz, $2,055,155. Under the new plan those charges would be $2,300,530. There has been no showing or offer of proof of new facts or changed conditions that would warrant our modifying our basic finding to that extent.

We are not persuaded that there is justification for changing the relationship of fixed debt to total capitalization from that of the approved plan to that resulting from the capitalization under the new plan.

Nor do the responses we have received warrant our regarding the new plan as one agreed to by the parties.

For the reasons stated, the petition will be denied.

An appropriate order will be entered.

Eastman, Commissioner, concurring:

I agree, subject to the reservations in my expression of partial concurrence in connection with the prior report.

Commissioner Miller dissents.

Commissioners Aitchison and Splawn did not participate in the disposition of this proceeding.

[795-A]

ORDER

At a General Session of the INTERSTATE COMMERCE COMMISSION, held at its office in Washington, D. C., on the 19th day of September, A.D. 1939.

Finance Docket No. 10913

Western Pacific Railroad Company Reorganization

Investigation of the matters and things involved in the petition filed August 2, 1939, in the above proceeding, by The Western Pacific Railroad Company, debtor, for a rehearing on its petition filed December 9, 1938, for a modification of the report and order of the Commission of October 10, 1938, approving a plan for the reorganization of the debtor, for a modification of the report and order of the Commission of June 21, 1939, approving a modified plan for the reorganization of the debtor, and for the approval of a plan for the reorganization of the debtor in substitution for the modified plan of reorganization approved by the Commission on June 21, 1939, having been made, and the Commission having further considered the record and having, on the date hereof, made and filed a report containing its findings of fact and conclusions thereon, which report is hereby referred to and made a part hereof;

It Is Ordered, That the petition be, and it is hereby, denied.

By the Commission.

(Seal), W. P. BARTEL,
Secretary.

[Endorsed]: Filed Sept. 26, 1939. [796]

[Title of District Court and Cause.]

OBJECTIONS OF A. C. JAMES CO., TO COMMISSION PLAN OF REORGANIZATION, STATEMENT OF CLAIMS FOR EQUITABLE TREATMENT, AND PETITION FOR AMENDMENT OF SUCH PLAN TO CORRECT DEFECTS THEREIN.

To the Honorable A. F. St. Sure, Judge of the United States District Court for the Northern District of California, Southern Division:

A. C. James Co., a secured creditor of the debtor above named, hereby objects to the Plan of Reorganization of the debtor (hereinafter designated as the "Commission Plan") as promulgated by the Interstate Commerce Commission in its order in Finance Docket No. 10943, dated June 21, 1939, and presents its claims for equitable treatment, pursuant to the provisions of the order of this Court, dated November 8, 1939, and to the provisions of Sub-section (e) of Section 77 of the Bankruptcy Act, and does hereby represent to the Court and petition as follows: [853]

I. General Objections to Commission Plan.

Subject to the more detailed and specific objections and claims for equitable relief hereinafter set forth, your petitioner objects generally to the Commission Plan of June 21, 1939, on the ground:

(a) That the Commission Plan is not "fair and equitable" as to your petitioner within the purpose and express requirement of Section 77 of the Bankruptcy Act as amended, fails to give due recognition to the legal rights and equitable claims of your petitioner, and discriminates unfairly against your petitioner as a secured creditor in a separate class;

(b) That the Commission Plan is not "fair and equitable" to your petitioner and other creditors secured by the General and Refunding Mortgage of the debtor, in that said plan is based in part upon a determination by the Commission that the property of the debtor which is subject to the lien of the General and Refunding Mortgage but is free from the lien of the First Mortgage of the debtor, is insufficient in value to fully secure all the debts secured by the General and Refunding Mortgage, with interest, which determination is beyond the authority of the Commission under Section 77 of the Bankruptcy Act, is contrary to the evidence, and is contrary to law;

(c) That the Commission, while apparently adopting the valuation of the property previ-

ously found by it under Section 19 (a) of the Interstate Commerce Commission Act, and recognizing the undisputed investment in the property of the debtor heretofore made, has completely disregarded such valuation and such investment, without authority of law, and, in the Plan which it has originated and promulgated, seeks to im- [854]. pose a capital structure based not upon evidence of values, but on a mere estimate of future earnings and a theory that the Commission should not authorize a capital structure which includes capital stock on which dividends are unlikely to be paid in the near future; this capital structure unnecessarily produces gross discrimination as between various classes of investors in the property, including your petitioner, and results in a complete disregard of the legal rights and equitable claims of general creditors and equity owners in the property;

(d) That the Commission Plan is not in conformity with the law of the land and that the manner in which it was conceived and promulgated is without support under Section 77 of the Bankruptcy Act;

(e) That in numerous instances, the Commission in the course of the hearings before it, over the objections and exceptions of your petitioner, erred in its rulings respecting the competency and admissibility of evidence; with the result that the findings made and the conclu-

sions reached by the Commission and the plan of reorganization certified by it to this Court, as set forth in the Commission's order dated June 21, 1939, are in important respects based upon evidence which is incompetent, irrelevant and insufficient in law;

(f) That in sundry instances, more specifically set forth below, the Commission has made findings of fact which are unsupported by and contrary to the evidence presented and determinations of questions of law which are without justification under Section 77 of the Bankruptcy Act and in violation of the law of the land; and

(g) That in sundry other respects, more specifically set forth below, the Commission, by its Plan, unnecessarily and without authority in law, seeks to im- [855] pose burdens upon the several classes of creditors and investors whose legal and equitable interests in the property of the debtor are entitled to due recognition.

(h) That Section 77 of the Bankruptcy Act, as amended, as interpreted and applied in the Commission Plan is unconstitutional and void in that the Commission Plan takes from your petitioner valuable rights in the property of the debtor without just compensation, all in violation of the provisions of the Fifth Amendment to the Constitution of the United States, upon

which your petitioner relies and the provisions of which your petitioner respectfully invokes.

To all of which your petitioner objects, and presents its claims for equitable treatment, all as is set forth in detail and specifically below.

II. Petitioner's claim: Origin, evidence, security and purpose for which funds were used.

Your petitioner is a secured creditor of the debtor in the principal amount of $4,999,800, together with unpaid accrued interest thereon at the rate of 5 per cent per annum from January 1, 1934, which unpaid interest to January 1, 1939 (the effective date of the Commission Plan) amounted to $1,249,950, or an aggregate debt on the date specified of $6,249,750.

This indebtedness resulted from cash advances made by your petitioner to the debtor from time to time during the years 1931 and 1932. It was originally represented, pursuant to authority granted by the Interstate Commerce Commission, by Five Per Cent Gold Debentures of the debtor, which debentures had been issued under the Indenture dated as of July, 1930, made by and between the debtor [856] and The Chase National Bank of the City of New York, as Trustee.

The indebtedness is now evidenced by three promissory notes of the debtor, the principal amount, date, and date of maturity of which are respectively as follows:

	Principal Amount	Date	Maturity
(1)	$4,504,000	March 28, 1932	March 28, 1935
(2)	347,000	March 28, 1932	March 28, 1935
(3)	148,800	May 31, 1932	May 31, 1935

The notes now held by your petitioner are secured as follows: By $6,249,500 principal amount of the debtor's General and Refunding Mortgage bonds, issued under an indenture dated as of January 1, 1932, executed by the debtor to The Chase National Bank of the City of New York, as Trustee, which General and Refunding Mortgage bonds were deposited with and are now held by your petitioner; except that $2,000,000 principal amount of said bonds, at the request of the debtor, were delivered by your petitioner to The Railroad Credit Corporation, to be held by said The Railroad Credit Corporation as additional collateral against advances made to the debtor by said The Railroad Credit Corporation, your petitioner retaining all its rights as lienor in and to said $2,000,000 principal amount of the debtor's General and Refunding Mortgage bonds, subject only to the prior rights which have accrued to The Railroad Credit Corporation as first lienor from the acts of the parties set in this paragraph.

All these cash advances made by your petitioner to the debtor in 1931 and 1932 were applied by the debtor to the costs of constructing the Northern California Extension of the debtor, which has been held by the Interstate Commerce Commission (as-

suming a jurisdiction which is not clearly granted to the Commission under Section 77 of the [857] Bankruptcy Act, as amended, or elsewhere) to be subject to the lien of the First Mortgage of the debtor. Said Northern California Extension is an important source, present and prospective, of earnings to the debtor.

A proof of claim was duly filed by your petitioner in the above entitled proceedings for reorganization of the debtor.

By an order, entered August 20, 1935, this Court classified the above described claim of your petitioner as a separate and distinct class for the purposes of Section 77 of the Bankruptcy Act, as amended.

III. Status of debtor as to liabilities and assets on January 1, 1939.

The Commission Plan uses the basic date of January 1, 1939. The total liabilities of the debtor on that date, including the outstanding equipment trusts and leases, Trustees Certificates, First Mortgage bonds, claims of the secured creditors and claims of the general creditors, with interest in all cases accrued to January 1, 1939, as reported by the Commission, amounted in the aggregate to $95,699,502.

These obligations were subdivided as follows:

1. Existing Equipment Trusts, Leases and Contracts		$ 2,750,050
2. Trustees Certificates		10,000,000
3. First Mortgage Bonds:		
Principal	$49,290,100	
Interest	13,143,777	62,433,877
4. Claims of Creditors:		
Reconstruction Finance Corporation:		
Principal	$ 2,963,000	
Interest	899,870	3,862,870

[858]

The Railroad Credit Corporation:		
Principal	$ 2,445,610	
Interest	146,503	2,592,113
A. C. James Co.:		
Principal	$ 4,999,800	
Interest	1,249,950	6,249,750
The Western Pacific Railroad Corporation:		
Principal	$ 5,768,746	
Interest	1,980,429	7,749,175*
The Western Realty Company:		
Principal	$ 50,000	
Interest	11,667	61,667*

*These figures are from the books of the debtor.

Against these debts stands on the record before the Court, property of the debtor company which the Interstate Commerce Commission, under Section 19(a) of the Interstate Commerce Commission Act, had valued for rate purposes, with allowances for "the net costs of additions and retirements", to December 31, 1935, at $139,600,455 (Report of October 10, 1938, pages 24-25).

It is not denied that the depreciated investment of the property of the debtor company would amount to upwards of $120,000,000 (Record, Ex. 29, Statement 16, page 2; see also opinion of Commissioner Miller, Report of October 10, 1938, page 73).

Petitioner contends that the debtor is not insolvent, and that the property of the debtor represents an investment and present value substantially in excess of the total debts of the debtor with interest accrued to January 1, 1939.

The equity in the debtor represented by the excess of the investment in its property and its present value over and above its present debts constitutes an asset of The [859] Western Pacific Railroad Corporation, a Delaware corporation, which owns all the capital stock of the debtor, consisting of $28,300,000 of preferred stock, and $47,500,000 of common stock, all of which stock was issued in the 1916 reorganization of the debtor's operating predecessor, in exchange for first mortgage bonds previously outstanding as evidencing investment in the property now owned by the debtor.

IV. Relation of petitioner to other parties in interest in proceeding.

The only direct interest of your petitioner in securities of the debtor company is its interest as a secured creditor, set forth in Section II above. However corporations affiliated with your petitioner, and directors and officers of your petitioner, hold or control in the aggregate upwards of $9,000,000 principal amount of First Mortgage bonds of the debtor. In addition, corporations affiliated with your petitioner, and directors and officers of your petitioner, hold or control in the aggregate approximately 40% of the outstanding voting stock of The Western Pacific Railroad Corporation, which has a substantial claim as a general creditor against the debtor company and also owns all of the outstanding stock, preferred and common, of the debtor company.

V. Origin of Commission Plan and relation of the various parties thereto.

The Commission Plan is neither an "agreed-upon plan", nor a plan prepared and submitted to the Commission by any party in interest.

In the original proceedings before the Commission three plans were submitted to the Commission by parties to the [860] proceeding: (a) the Debtor Plan, under date of February 8, 1936; (b) the Institutional Bondholders Committee Plan, under date of September 28, 1936; and (c) the plan prepared and submitted by your petitioner, under date of October 26, 1936.

The Commission Plan, as finally promulgated in its Order of June 21, 1939, is not based upon any one of the three above-mentioned plans, but is substantially a plan which the Bureau of Finance of the Commission evolved independently and submitted to the parties in a tentative report on or about August 2, 1937.

After formal hearings, this Bureau of Finance plan, with minor modifications, was approved by the Commission in its Order of October 10, 1938.

When all the parties petitioned for a rehearing, the Commission re-opened the matter and made additional changes in its Plan of October 10, 1938, by adopting certain modifications in that plan urged upon it by counsel for the Institutional Bondholders Committee.

The Commission Plan, as finally promulgated in the Order of June 21, 1939, is satisfactory to the Institutional Bondholders Committee (representing institutions holding only 34.37% of the First Mortgage Bonds) because their full demands for modification in their interest, as asserted at the re-hearing before the Commission, were adopted by the Commission.

It is satisfactory to the Reconstruction Finance Corporation because of the substantial preferences granted to it in consideration of its services as an underwriter of the new First Mortgage bonds.

The Commission Plan is inequitable, discriminatory and unsatisfactory to every other party interested in the [861] property: secured creditors, gen-

eral creditors and equity owner. It cannot adequately protect the interests in the property, as a whole, in respect of future financing, future rate problems, and possible consolidations with other properties.

VI. Treatment accorded petitioner's claim under Commission Plan.

In the Commission Plan, your petitioner is allotted for its above stated claim, $163,724 of Income Mortgage 4½ Per Cent Bonds, Series A, $256,756 of 5 Per cent Preferred Stock, Series A, and 37,635 shares of Common Stock of the reorganized company. Such common stock is no par value stock and in the Commission Plan it is allotted to other creditors at prices varying from $57 to $62 per share. Using the highest price assigned by the Commission to such common stock, the total allotment of securities to your petitioner amounts to $2,753,850, against an aggregate claim of $6,249,750, or approximately 44 per cent of the face of said claim. Using the same valuation, no other secured creditor is allotted less than 100 per cent of its claim.

VII. Discriminatory and inequitable treatment of petitioner's claim as compared with claims of other secured creditors.

Your petitioner advanced to the debtor company during 1931 and 1932 (during the depression), a total of $4,999,800. The advances were in cash and enabled the debtor company to complete the Northern California Extension, now a factor of admitted

importance in the earning power of the Company. Your petitioner was given, under Commission [862] authorization, General and Refunding Mortgage bonds of the debtor company as collateral, to the extent of 125 per cent of principal amount of its advances.

At about the same time, functioning under Section 5 of the Reconstruction Finance Corporation Act, the Commission required from the debtor company $10,750,000 face amount of such General and Refunding Mortgage bonds as *part* collateral for advances by the Reconstruction Finance Corporation aggregating $2,963,000* principal amount. In other words, disregarding other substantial collateral, the Reconstruction Finance Corporation now holds under authority of the Commission General and Refunding Mortgage bonds of the debtor, as collateral, to the extent of about 363 per cent of the principal amount of its advances, as compared with the 125 per cent furnished to your petitioner.

Functioning under somewhat similar statutory provisions requiring approval by the Commission of advances to be made to railroads by The Railroad Credit Corporation, from the rate advance fund accumulated in its hands, the Commission similarly required collateral for The Railroad Credit Corporation advances to the debtor, which advances stood

---

*The original principal amount of this loan was $3,063,000, and the collateral required by the Commission therefore represented approximately 351% of the principal amount of the original loan.

as of January 1, 1939, at $2,445,610 principal amount, in a ratio considerably in excess of that authorized in the case of advances made by your petitioner.

The monies advanced to the debtor by The Railroad Credit Corporation were used in their entirety to pay unearned interest to the First Mortgage bondholders and interest on equipment trusts. The monies advanced by the Reconstruction Finance Corporation were also used in large part for the payment of interest to First Mortgage [863] bondholders and others, but in part for a portion of the costs of the Northern California Extension and other purposes (see Record, Ex. 36).

While the application of the monies advanced by The Railroad Credit Corporation and the Reconstruction Finance Corporation may well give rise to special equities in favor of The Railroad Credit Corporation and the Reconstruction Finance Corporation as against the First Mortgage bondholders, there is no ground for regarding such advances as having special characteristics entitling them to greater equitable consideration than the advances made almost contemporaneously by your petitioner to build the Northern California Extension.

The Commission has, however, in its Plan of June 21, 1939, treated these three creditors on quite dissimilar bases. The Reconstruction Finance Corporation is regarded, for the purpose of the Plan, on the same basis as if its debt was represented by First Mortgage bonds of the debtor company. This

is on the express ground (See page 9, Report of June 21, 1939) that such treatment is in consideration of the purchase by the Reconstruction Finance Corporation of $10,000,000 First Mortgage bonds of the reorganized company, the proceeds of which are to be used to pay off the Trustees Certificates, all of which are now held by the Reconstruction Finance Corporation. The new First Mortgage bonds in question are to be an exclusive first lien on property to be transferred to the reorganized company, representing an investment, after application of full depreciation, of upwards of $120,000,000. On the basis of the present operations of the debtor company, even under depression conditions, it appears probable that the fixed charges on the new First Mortgage bonds will be earned from two and a half to three times during the calendar year 1939. Yet the Commission has provided that, virtu- [864] ally as an underwriting fee for taking this $10,000,000 of new First Mortgage bonds in payment of an existing debt secured by Trustees Certificates, the Reconstruction Finance Corporation shall have its remaining claim as a secured creditor advanced to a preferred position equal to that of the old First Mortgage bondholders and infinitely superior to that of your petitioner.

The Commission has, in other situations, recorded itself as favoring a public offering of securities. Every consideration of equity would suggest that the new First Mortgage bonds in question first be offered for public bidding and, only in the event

that no responsible purchaser at par or better could be found, should the Reconstruction Finance Corporation be given, as an underwriter, an underwriting fee represented by special treatment of its claim as a secured creditor.

As to The Railroad Credit Corporation, the Commission allots to it, as against its claim of $2,445,610 principal amount, and $146,503 of interest thereon, $154,111 of Income Mortgage 4½ Per Cent Bonds, $241,681 of 5 Per Cent Preferred Stock and 35,425 shares of Common Stock (being common stock taken at the price of $62 per share).

The Commission Plan allots to your petitioner, as against its claim of $4,999,800 principal debt and $1,249,950 interest, $163,724 of Income Mortgage 4½% Bonds, $256,756 of 5 Per Cent Preferred Stock, and 37,635 shares of Common Stock without par value.

In other words, the Reconstruction Finance Corporation is to receive, under the Commission Plan, 100 per cent of the principal of its claim in the Income Mortgage bonds and Preferred Stock of the reorganized company, and the accrued interest on its claim in Common Stock at $57 a share. The Railroad Credit Corporation is to receive slightly over 16 per cent of its principal claim in Income Mortgage bonds [865] and Preferred Stock and the balance of principal and interest in Common Stock at $62 a share. But your petitioner is to receive only a little over 8 per cent of its principal claim in Income Mortgage bonds and Preferred Stock and, against

the balance of $5,829,270, 37,635 shares of Common Stock which, at $62 a share would cover only slightly more than 40 Per Cent of this balance.

While the General and Refunding Mortgage bonds, which are the sole collateral held by your petitioner, and part of the collateral held by the Reconstruction Finance Corporation and The Railroad Credit Corporation, are held in varying ratios, these bonds were authorized by the Commission solely for use as collateral in connection with the advances of the particular creditors concerned. The mere fact that the Commission required such excess collateral to be issued to the Reconstruction Finance Corporation and to The Railroad Credit Corporation as compared with your petitioner, on loans made almost concurrently and for equally meritorious purposes, cannot multiply the actual debt claims of the Reconstruction Finance Corporation or The Railroad Credit Corporation at the expense of your petitioner.

Even though the General and Refunding Mortgage bonds held by the three secured creditors were to be regarded as ordinary and usual collateral furnished by the debtor company (which they clearly are not), your petitioner contends that greater distribution to one creditor than to another in this proceeding could be justified only upon a showing that the value of the property of the debtor in which its creditors claim an interest is less than the total amount of the secured creditors' claims. The Commission has at all times failed to make any appra-

sal of the value of the property of the debtor company other than its appraisal under Section 19 (a) of the Interstate Commerce [866] Commission Act, which appraisal would indicate that the value of the property of the debtor company is substantially greater than all the debts of the debtor, including not only the claims of the secured creditors, but of the general creditors.

Your petitioner objects that the Commission Plan discriminates unfairly in favor of the Reconstruction Finance Corporation and The Railroad Credit Corporation, does not give due recognition to the rights of your petitioner, and does not conform to the requirements of the law of the land.

VIII. Inequitable treatment of secured creditors generally as compared with holders of First Mortgage Bonds.

All the monies advanced to the debtor by the Reconstruction Finance Corporation, The Railroad Credit Corporation and your petitioner, and now represented by the secured debt obligations of the debtor, were advanced during the depression years and used for the most part (a) to pay unearned interest to the First Mortgage bondholders; (b) to pay taxes and equipment trust obligations which were prior in lien to the First Mortgage bonds; and (c) to provide for the construction of the Northern California Extension, a valuable and essential integral part of the operating railroad property of the debtor.

Your petitioner contends that the General and Refunding Mortgage created by the debtor to provide security for these secured creditors was not subordinated to the lien of the First Mortgage as to all the property of the debtor, but, on the contrary, was intended to give, and did give, a first lien on substantial and essential parts of the operating properties of the debtor and on securities and equipment [867] of the debtor. In this connection reference is made to the objections filed herein by the Irving Trust Company, as substitute trustee of the General and Refunding Mortgage, and to the facts shown by the Record as to the large elements of the property of the debtor on which said General and Refunding Mortgage represents a first lien.

Neither in Section 77 of the Bankruptcy Act nor elsewhere, can be found a delegation to the Commission of the right to dispose of the complicated questions of law involved in the issues as to the conflicting liens of the First Mortgage and the General and Refunding Mortgage. Nor, as a practical matter, is the Commission equipped to decide these questions, which are essentially questions of local law. Section 77 contemplates that these questions should be decided by the Court. Yet the Commission has attempted to determine upon what assets the First Mortgage is a primary lien and upon what assets the General and Refunding Mortgage is a primary lien.

Your petitioner objects that the Commission, in determining the issues as to the conflicting liens of

the First Mortgage and the General and Refunding Mortgage, has received and relied upon incompetent evidence and has arrived at conclusions which are erroneous in law and unsupported by evidence. Your petitioner insists that the property of the debtor which is subject to the lien of the General and Refunding Mortgage but free from the First Mortgage of the debtor is sufficient in value to fully secure the debts of your petitioner and the other two secured creditors. In this connection your petitioner concurs in the objections filed herein by the Irving Trust Company, as substitute trustee under the General and Refunding Mortgage. [868]

Your petitioner contends that the Commission Plan should be modified so as to accord to The Railroad Credit Corporation, as well as to your petitioner, the same treatment that is accorded under the Plan to the holders of the existing First Mortgage bonds and to the Reconstruction Finance Corporation.

IX. Confiscatory and inequitable treatment of general creditors and equity under Commission Plan.

The Commission Plan not only fails to provide for more than approximately 44 per cent of the claim of your petitioner as a secured creditor, but expressly finds that the general creditors and stockholders of the debtor have no "interest" in the property. This finding is not based on any factual evidence presented to the Commission in the hearings

before its examiners, but upon the theory that the capitalization should be based solely upon a mere estimate of future earnings, made by the Commission's Bureau of Finance. No basis for this procedure can be found within the four corners of Section 77, nor is it sustained by the law of the land. The application of this theory, if approved and confirmed, would not only work substantial injustice to secured creditors, general creditors and the equity owners of this property, but would, if applied generally, be substantially prejudicial to the whole future of the railroad industry.

The Commission does not, in either its Report of October 10, 1938, or its Report of June 21, 1939, make any new determination of the value of the property to be taken over by the reorganized company. It does refer to, and apparently adopts, its valuation of the property of the debtor company, made by the Commission under Section 19 (a) of the Interstate Commerce Commission Act, which amounted, with allowances for "the net costs of additions and [869] retirements" to December 31, 1935, to $139,600,455. (Report of October 10, 1938, pages 24-25).

It is not denied that the depreciated investment in the property of the debtor company would amount to upwards of $120,000,000 (Record, Ex. 29, Statement 16, page 2; see also opinion of Commissioner Miller, Report of October 10, 1938, page 73).

The total debts running against the debtor, including the outstanding equipment trusts and leases, Trustees Certificates, First Mortgage bonds, claims

of the secured creditors and claims of the general creditors, with interest in all cases accrued to January 1, 1939, amounted in the aggregate to $95,699,502.

Your petitioner contends that the depreciated investment in the property used or useful in the public service should be, under the law of the land and the requirement of equitable treatment of the various interests in the property, the primary measure in determining the limits of the capital structure of the reorganized company, and that any drastic reduction in such capitalization based solely on the present reduced earnings of the enterprise in an attempt to assure dividends on the common stock of the reorganized company is inequitable and without support in law.

The effect of the Commission Plan is to transfer to other creditors of the debtor part of the interest which your petitioner has in the property of the debtor as a creditor and the entire interest in the property of the debtor which the general creditors of the debtor (The Western Pacific Railroad Corporation and Western Realty Company) have, as well as all of the interest represented by the stock of the debtor company, all of which is held by The Western Pacific Railroad Corporation. [870]

It is contended by your petitioner that not only do the secured creditors and the general creditors have a real and substantial "interest" in the property of the debtor company, but the stockholders have a like interest. These interests of the general creditors and stockholders might, of course, be ter-

minated, because of the recent inability of the property to earn its fixed charges, by foreclosure of the respective liens of the First Mortgage and General and Refunding Mortgage. But in a reorganization under Section 77 of the Bankruptcy Act creditors are entitled to insist that fair values, and not forced sale values, should be used in determining the capitalization of the reorganized company and the securities to be given each class of creditors.

This principle is recognized in the brief of the United States, amicus curiae, which was largely relied upon by the United States Supreme Court in Case v. Los Angeles Lumber Products Company, decided November 6, 1939 (84 L. Ed. 22), at pages 16 and 17 of the brief:

> "In cases of liquidation no one questions the right of senior security holders to full payment before any distribution of assets to junior interests. Reorganization is an alternative for liquidation in the event of financial failure. It seeks to substitute going concern values for the forced sale values of liquidation, with the object of yielding greater ultimate returns to the senior interests, and allowing wider participation if the values permit. But it presents no occasion or excuse for a different treatment of priorities in disregard of senior contract rights. * * *"

First National Bank of Cincinnati v. Flershem, 290 U. S. 504;

In re Dutch Wooderaft Shops, 14 Fed. Supp. 467. [871]

The Commission is empowered under Section 77 to determine the value of the property of the debtor and certify the same to the Court for its approval, and, in determining such value, the Commission is empowered to give due consideration to the earning power of the property, but, expressly, it must give that effect to "the present cost of reproduction new, and less depreciation, and original cost of the property and the actual investment therein as may be required under the law of the land."

Your petitioner respectfully submits that under the established law of the land no interest of a creditor or stockholder can be disregarded in the formulation of a plan of reorganization under Section 77, except on the basis of an appraisal of the property. In this case the Commission has made no appraisal except its undisputed appraisal under Section 19 (a) of the Interstate Commerce Commission Act, on the basis of which the general creditors and the equity owners all have a substantial interest in the property of the debtor.

For the reasons above stated your petitioner has throughout the proceedings before the Commission and in the plan which it submitted to the Commission for consideration, consistently urged that no

plan of reorganization of the debtor company can be held to be fair or equitable, consonant with the purposes of Section 77 and consistent with the law of the land, unless recognition is given to the interests of the general creditors and the equity owners, and, further, that such recognition should be determined primarily on the basis of the actual investment in the property, less accrued depreciation. [872]

X. Capitalization theory of the Commission fallacious and without support in law.

The basic fallacy in the Commission Plan lies in its drastic and unnecessary wiping out of private rights in an unrealistic adherence to a mere theory of capitalization, which theory of capitalization finds no support in the language of Section 77 or elsewhere.

The Commission spells out its theory for partially or entirely disregarding substantial interests in the property in its Report of October 10, 1938, which is referred to and adopted in its Report of June 21, 1939 (See page 7, Report, June 21, 1939).

The Report of October 10, 1938, (page 40) states that Section 77 of the Bankruptcy Act provides that an approved plan should be "compatible with the public interest". It states that "public interest is not defined", but interprets the phrase to require, among other things, "that the capitalization should not exceed a conservative appraisal of the assets to be taken over by the reorganized company,

and that proposed charges, whether fixed or contingent, be within its probable earning power."

Without regard to logical connection, the Commission proceeds to state, on page 41 of its Report of October 10, 1938, what it apparently deems to be a corollary to the foregoing proposition, to the effect that consideration should be given to the investment in the property of the debtor company "only to the extent that such investment is justified by probable earnings reasonably forseeable for the future."

Having thus touched lightly on the question of investment in the property, the Commission then moves forward to the conclusion that it ought not to authorize a capital [873] structure for the reorganized company which includes capital stock on which dividends are not reasonably likely to be paid. At pages 51-52 of its Report of October 10, 1938, the Commission states:

> "the capitalization of the reorganized company must be maintained within strict limits if any material return on its capital stock is to be expected and the shares of its stock are not to become mere tokens for stock market speculation. It is true that considered alone, the data pertaining to the rate-making value of the debtor's property, and its investment, would support capitalizations approximating those proposed in the three plans" (those proposed by the parties to the proceeding). "We have hereinbefore stated, however, the reasons why,

in our opinion, those factors can not be of controlling importance in a determination of the capital structure for the reorganized company" (apparently referring to its argument as summarized above).

The Commission has never tried to explain further why its theory that a material return should be assured or expected on the capital stock of the reorganized company should, "in the public interest", take the place of "a conservative appraisal of the assets to be taken over by the reorganized company", to which the Commission refers on page 40 of its Report of October 10, 1938. Any justification that might be grounded on the argument that, if common stock of the reorganized company pays immediate dividends, it may prove a channel for future financing is completely negatived by the fact that the operation of the Commission theory at the present time is to disregard the substantial rights of secured creditors, general creditors and stockholders in the property and, in effect, to confiscate these rights on the basis of a mere theory of capitalization. No one thing could more clearly and certainly destroy common [874] stock as a vehicle for future financing of railroad properties than this proposed action of the Commission.

At a hearing before the Special Subcommittee on Bankruptcy and Reorganization of the Committee on the Judiciary of the House of Representatives

on June 21, 1939, Chairman Eastman of the Interstate Commerce Commission stated:

> "Any estimate of the future earnings of a railroad can at best be no more than an 'educated guess', but there has never been a time in the history of the country when it has been more difficult to make such a guess than now. Anything remotely approaching accuracy is impossible."

At a later point in his testimony he stated:

> "To deprive thousands of investors who in the past have put their savings into railroad securities of all hope of recoupment is a very serious step, for if our capitalistic society is to succeed, it demands as scrupulously fair treatment of investors as of labor."

While Section 77 gives the Commission the express power to limit fixed charges provided by a plan which comes before it, there is nowhere in Section 77 such express power vested in the Commission to limit the total capitalization of the reorganized enterprise solely to insure that dividends will be paid on the capital stock which it authorizes. Even more clearly it may be asserted that there is complete absence of power given to the Commission to declare the interest of a creditor of the debtor without value solely on the basis of such a theory of capitalization.

Your petitioner contends that Section 77 of the Bankruptcy Act is not a condemnation statute and

objects that the Commission's theory of capitalization results in dis- [875] crimination as between the various classes of investors in the property, including your petitioner; and results in confiscation of the legal and equitable claims of unsecured creditors and stockholders, all of which is contrary to the law of the land.

XI. Special factors affecting future earnings of this property not given adequate weight by Commission.

In addition to the general objection which may fairly be urged to the cutting off of existing property rights and interests on the basis of a mere estimate of future earnings, there are special factors existing as to this property which render the Commission procedure particularly unfair and inequitable.

The Commission estimate of future earnings is based upon an examination of the earnings record of the property during recent years. The Commission estimate is substantially less than the estimates of the management as to future earnings, which appear in the record before the Commission.

Three special factors exist which render the earnings record of this particular property for the past ten or twelve years an unsatisfactory guide or spring-board for an estimate of future earnings.

When new investment came into the stock of this property some twelve years ago, the management soon found that the property required substantial

improvement and rehabilitation for efficient operation. All dividends were immediately stopped and a program of improvement and rehabilitation promptly started. When this program was interrupted by the 1929 depression, approximately $8,000,000 had been spent, of which, under Commission accounting [876] rules, almost half was charged as operating expense. When the property came into trusteeship the improvement program was resumed. $10,000,000 was borrowed upon Trustee Certificates with the approval of the Court and this money expended to complete the program. Of the $10,000,000 so spent in 1936, 1937 and 1938, almost half was, under Commission accounting rules, charged as operating expenses.

The substantial effect of the termination of these special charges and the completion of the Rehabilitation Program on the earnings position of the debtor is evidenced by the fact that in the first nine months of 1939, while "Total Railway Operating Revenues" increased only $1,728,278.89 over the corresponding period of 1938, "Net Revenue from Railway Operations" increased by $2,473,531.51; That is, from a deficit of $656,594.23 in 1938 to an actual net of $1,816,937.28, in 1939.

Moreover, in 1931 and 1932, the Company built its Northern California Extension, a connection with the Great Northern Railway, which cost approximately $10,000,000. This addition has already resulted in an enormous improvement in the traffic

position of the property and has a large and, as yet, not fully measured relationship to the future earnings of the property. While this Northern California Extension was under construction, however, and while it was becoming seasoned as a channel for traffic, there was, of necessity, an additional and substantial burden of expense thrown upon the property, which necessarily distorted its earnings figures.

The third special factor having to do with the earnings record of the debtor is that during the depression there was put into operation the so-called Dotsero Cut-off on the Denver and Rio Grande lines, which greatly improved the facilities for traffic moving over the Western Pacific [877] through the Denver gateway and which, it is believed, will ultimately have an important and beneficial effect on the net earnings of the debtor property.

By reason of these special factors and general business conditions, progressive improvement in the earnings of the debtor's property is indicated.

Moreover, in recent months there have been substantial increases in traffic over the debtor lines, and over the lines of other carriers similarly situated. It is difficult, at the present time to adequately estimate the possible scope and extent of such traffic improvement, which has resulted in part from the impact of a general European war. Any estimate of railroad earnings made prior to the development of war conditions must be revised.

Terminating existing property rights and interests in the debtor on the basis of future earnings estimates based on the experience of the past ten or twelve years, in view of the factors set forth above, is clearly inequitable and prejudicial to the rights of creditors and stockholders.

XII. Objection to funding of accrued interest in common stock so as to give present First Mortgage bondholders control of the reorganized company.

The Commission Plan proposes to give to the First Mortgage bondholders 40 per cent of their principal claim in Income Mortgage 4½ per Cent. Bonds and 60 per cent of the principal amount of their claims in 5 Per Cent Preferred Stock. This Preferred Stock carries a participating feature which entitles the Preferred Stock, after receiving its 5 per cent dividend, to share equally with Common Stock in all distributed earnings of the enterprise after $3.00 per share per year have been paid on the Common Stock. [878]

The Commission then proposes to distribute to the First Mortgage bondholders, against interest accumulated since January, 1934, amounting to $13,143,777 (for the most part unearned by the debtor company during that period) securities for 100 per cent of this accrued and unpaid interest in the form of Common Stock taken at the price of $57.00 a share. This common stock to be issued to

the First Mortgage bondholders for accrued and unpaid interest would amount to 230,593 shares of Common Stock out of the total Common Stock authorized for the reorganized company of 319,441 shares; or more than 72 per cent of such total issue.

When the Western Pacific Railway Company, a predecessor company owning this property, was reorganized in 1916 the then existing debt to the First Mortgage bondholders was paid off in preferred and common stock of The Western Pacific Railroad Corporation, organized to hold all the stock of The Western Pacific Railroad Company, a new corporation organized to continue the operations of the railroad. As is the case at the present time, a large part of the mortgage debt of the predecessor company, the Western Pacific Railway Company, was held in 1916 by insurance companies and fiduciaries who were under legal compulsion to sell the stock so received within a reasonable time after it was received in exchange for the bonds previously held. In the case of the insurance companies, it was possible in most instances for them to obtain from the Superintendents of Insurance in the various states extension of time in which to sell such stock.

Complete control of the operations of the new enterprise was, by the method of reorganization adopted, vested in the prior bondholders, who had become involuntary stockholders. During the period from 1917 to 1927 approxi- [879] mately $18,000,000 was paid out in dividends to the preferred and com-

mon stockholders, as indicated by the following table:

Year	Common or Preferred		Dividend Paid
1917	Preferred		$ 2,062,500
1918	None		—
1919	Preferred		825,000
1920	Preferred		1,925,000
1921	Preferred		1,650,000
1922	Preferred		1,650,000
1923	Preferred		1,650,000
1924	Preferred		1,650,000
1925	Common—	$2,374,970	
	Preferred	2,078,450	4,453,420
1926	Preferred		1,650,000
1927	Preferred		412,500
1928 to 1938	None		
	Total		$17,928,420

When, in 1926 and 1927, interests affiliated with your petitioner acquired a substantial interest (upwards of 40 per cent) in the preferred and common stock of The Western Pacific Railroad Company, a survey was promptly made of the operating property. This survey disclosed that the expenditure of approximately $18,000,000 would be required to rehabilitate the operating property and to make additions and betterments necessary to put it in first class operating condition. Dividends on the stock were immediately discontinued and an improvement and rehabilitation program commenced. From 1927 up to the interruption of the program

in the 1929 depression approximately $8,000,000 was spent upon this program. The program was renewed in 1936 under the supervision of this Court, and the balance of approximately $10,000,000 was spent in 1936, 1937 and 1938 to complete the rehabilitation [880] program. Almost half of these expenditures were deferred maintenance charges, and were necessarily so treated under Commission accounting rules, and do not appear as capital items in the Commission's appraisal under Section 19 (a) of the Interstate Commerce Commission Act or in the investment account of the property of the debtor, elsewhere referred to in this statement.

Your petitioner contends that it is theoretically unsound, and has been demonstrated by experience in connection with this particular property to be unsound in practice, to put actual control of a railroad enterprise in the hands of those who have involuntarily become owners of equity stock and are under legal compulsion to market such stock within a reasonable period after its receipt by them. It is objected that, to the extent that interest is properly to be funded for the benefit of the First Mortgage bondholders, it should be funded in the same type of securities issued to them for their principal debt.

XIII. Commission Plan allows excessive accrued interest to Reconstruction Finance Corporation.

The Commission Plan proceeds on the theory that the Reconstruction Finance Corporation is entitled,

as of January 1, 1939, to accrued interest amounting to $899,870, which result apparently flows from the application of a straight 6% rate per annum to the principal debt to the Reconstruction Finance Corporation. The amount of interest actually due on January 1, 1939, to Reconstruction Finance Corporation, based on various authorized modifications of the 6% rate for various periods, as shown by the books of the debtor, is $723,864 (Record, Ex. 36). [881]

XIV. Commission Plan discriminates in favor of The Railroad Credit Corporation by permitting it to retain, after reorganization, debtor's interest in marshalling and distributing plan of 1931.

Under Subdivision (R) of the Commission's Order of June 21, 1939, The Railroad Credit Corporation is expressly authorized to retain, after the reorganization, all sums which may accrue upon the debtor's interest under the marshalling and distributing plan of 1931, although all other secured creditors are required to surrender their entire collateral. This preferential treatment of The Railroad Credit Corporation is inequitable and discriminatory as to your petitioner.

XV. Commission Plan imposes unnecessary limitations upon management through provision for mandatory rather than discretionary capital fund.

The Commission Plan provides (Order of June 21, 1939, Subdivision (L) Pages 17-18) for a com-

pulsory capital fund at the rate of $500,000 per year as a deduction from income. Under the capital structure proposed by the Commission no party to the proceeding could properly object to a discretionary capital fund in the amount stated. The past history of this property, to which reference is hereinabove made, emphasizes the importance of full provision for maintenance expenditures, even though necessarily chargeable to capital in part, before distribution of earnings to the investor. The attention of the Court is, however, directed to the objections to a compulsory capital fund, as distinct from a permissive capital fund, as well expressed by Chairman Eastman of the Interstate Commerce Commission in his dissenting opinions in this proceeding and in the Spokane International Railway, Company Reorgani- [882] zation, 230 Interstate Commerce Commission 81, 107. Your petitioner urges that the provision for a capital fund be modified to provide that such capital fund be a matter of managerial discretion within the limits specified by the Commission Order.

XVI. Sinking fund provisions of Commission Plan unnecessarily burdensome.

The Commission Plan provides for no sinking fund upon the proposed new First Mortgage bonds, unless and until the amount of new First Mortgage bonds outstanding be doubled, as compared with the amount presently to be issued.

It provides, on the contrary, that an immediate sinking fund, at the rate of ½ per cent of principal amount annually, be created as to the proposed Income Bonds to be issued to the present First Mortgage bondholders.

Your petitioner agrees that there is no need for a requirement of the present amortization of a fixed interest debt of only $10,000,000 on a railroad property representing an investment, less depreciation, of upwards of $120,000,000.

On the other hand, your petitioner objects that there is no necessity or justification for a provision that the Income Bonds be amortized. The effect of this sinking fund provision will necessarily be to reduce the possibility that the reorganized company will be able to finance its future needs by the marketing of additional preferred or common stock to meet future capital needs. The capital represented by existing First Mortgage bonds must necessarily be regarded as a permanent investment in the enterprise. Its gradual retirement from [883] earnings is not, as a practical matter, a feasible objective. The disadvantages to the reorganized company which will flow from any such impairment of the marketability of its capital stock issues far outweighs the advantage to the holders of the income bonds of a small sinking fund provision.

These considerations have especial weight in view of the fact that, as a matter of common knowledge, a substantial part of the present First Mortgage Bonds are held by institutions or trustees, who will

be compelled ultimately to dispose of any capital stock which they may receive in the reorganization, but will be permitted to continue to hold the income bonds received. Anything that militates against the marketability of the preferred stock to be issued to present First Mortgage bondholders in the reorganization will be definitely prejudicial to the position of those First Mortgage bondholders who find it necessary to market their preferred stock within a reasonable period of time after receipt thereof.

XVII. Division under Commission Plan of Securities as between Income Bonds and Preferred Stock unnecessarily burdensome to creditors.

On the same grounds set forth in the preceding paragraph, your petitioner contends that the Commission Plan is defective in allotting to existing First Mortgage bondholders 40 per cent of income bonds and 60 per cent of preferred stock. Since the bonds are income obligations, no future default on the part of the reorganized company will flow from a failure to meet interest payments on the income bonds, if such interest is unearned, any more than it will from a failure to declare dividends. The Income Bonds, as provided in the Commission Plan, will not mature until [884] January 1, 2014. It is true that one may theoretically consider the contingency of providing for the maturity of these income bonds sixty-five years from the date of issue, while, in the case of preferred stock, no such contingency arises, yet this is a somewhat theoretical

basis on which to narrowly limit the proportion of income bonds which shall be issued in lieu of the existing First Mortgage bonds.

In the plan which your petitioner submitted to the Interstate Commerce Commission it was expressly provided, for the reasons hereinbefore set forth, that the entire First Mortgage debt should be retained in the form of debt on an income basis. Your petitioner still feels that that position is sound and in the substantial interest of a large class of present First Mortgage bondholders.

Your petitioner objects to the allocation proposed by the Commission and contends that at least 50 per cent of the existing First Mortgage debt should be refunded into income bonds and the remaining 50 per cent into preferred stock.

XVIII. Objection to interest rate for Income Bonds provided by Commission Plan.

In the original Commission Plan, as promulgated by its order of October 10, 1938, the Income Bonds were to carry interest at 4%. This was a realistic recognition of the present prevailing level of interest rates generally. At the rehearing before the Commission, upon motions made by the various parties, counsel for the Insurance Company Committee strongly urged an increase in this rate to 4½%, and this request was granted by the Commission in the modifications in its plan provided under its order of June 21, 1939. [885]

The maintenance of the 4 per cent interest rate on the proposed Income Bonds would improve the status of the preferred stock and common stock without corresponding detriment to those creditors who are given Income Bonds under the Commission Plan. So far as the present First Mortgage bondholders are concerned, any such reduction of the interest rate on the new Income Bonds, would be subject to possible recoupment in part through the participating feature of the preferred stock, issued to them for a substantial part of their claims, while the credit of the enterprise generally would be helped by the resulting reduction of contingent charges.

XIX. Alternative organization of new corporation contemplated by Commission Plan is unnecessarily expensive and burdensome.

The Commission Plan, Subdivision (R) Order of June 21, 1939, authorizes the reorganization committee, constituted under the Plan, to organize a new corporation to take over the properties of the debtor, or to recapitalize the debtor corporation, in its discretion. Whatever might be the merits of the organization of a new corporation under the old processes of equity reorganization, your petitioner submits that Section 77 permits and contemplates the substantial economies which will flow from the retention of the present corporate structure of the debtor, and its recapitalization to effect its reorgan-

ization pursuant to such plan as may ultimately be approved.

XX. Plea to the Court for correction of defects in Commission Plan.

Your petitioner is advised and believes that if this Court shall remove, or cause to be removed, by its recommendation to the Commission of appropriate amendments [886] to the Commission Plan, the defects in said Commission Plan, which are set forth above, such proposed Amended Plan would meet with the approval of the statutory percentage of each class of creditor and stockholder of the debtor. Moreover, the amendments necessary to remove such objections would not change the capital structure proposed under the Commission Plan for the reorganized company so as to increase fixed charges, or so substantially increase other securities, as to render such proposed Amended Plan fairly open to any finding by the Commission that it was not in the public interest.

There is set out below a comparison of the capital structure proposed under the Commission Plan and that which would exist under the amendments now proposed by your petitioner in Article XXII of this statement, as hereinafter set forth, to correct the defects set out above.

CAPITAL STRUCTURE OF REORGANIZED COMPANY

	Under Commission Plan	Under Proposed Amendments Thereof
Undisturbed Equipment Trusts and Leases	$ 2,750,050	$ 2,750,050
New First Mortgage 4% Bonds	10,000,000	10,000,000
New Income Mortgage 4% Bonds	21,219,975	37,481,302
New 5% Participating Preferred Stock	31,850,297	37,481,302
New Common Stock without par value	319,441	319,441

Under the proposed Amended Plan the present First Mortgage bondholders would have approximately 45 per cent of the voting power in the reorganized company and receive approximately 45 per cent of the equity earnings of the reorganized company after the payment of their Preferred Stock dividends and the payment of $3.00 a share on the Common Stock. [887]

XXI. Procedure for correction of Commission Plan.

The procedure contemplated by Section 77, where substantial amendments in a plan reported by the Commission seem to the Court to be necessary to meet the equitable claims of the parties and to conform such plan to the law of the land, is that the Court refer back to the Commission the Plan with recommendations for modifications, which recom-

mendations will, no doubt, be promptly accepted by the Commission. (See Louisiana and North West Railroad Company, Reorganization, 230 I. C. C. 171.)

At a hearing before the Special Subcommittee on Bankruptcy and Reorganization of the Committee on the Judiciary of the House of Representatives, on June 21, 1939, Honorable Joseph B. Eastman, now Chairman of the Interstate Commerce Commission, approved this procedure. In discussing a legislative proposal for the amendment of Section 77 of the Bankruptcy Act, Mr. Eastman said:

> "However, in most of the important reorganization cases now pending before the Commission the record has already been made, and the time thus consumed cannot now be saved. Any conclusions that the Commission may reach in these cases as to respective liens and priorities will be helpful to the judge as the equivalent of a report by a master, and the Commission will readily respond to adjustments of the plan to any different conclusions he may reach as to such matters."

XXII. Specific amendments proposed to Commission Plan.

Your petitioner respectfully requests that the Commission Plan be referred back to the Commission for modification so as to cure the defects set forth above, and by specifically modifying the Commission Plan as follows: [888]

(1) Amending Subdivision (B) of the Commission Plan, as it appears on page 2 of the Commission Order of June 21, 1939, by increasing the amount of new Income Mortgage 4½% Bonds from $21,219,075 to $37,481,302 and decreasing the rate for said bonds from 4½% to 4%; increasing the amount of new 5% Preferred Stock from $31,850,297 to $37,481,302.

(2) Amending Subdivision (J) of the Commission Plan, as it appears at pages 10 and 11, Order of June 21, 1939, so as to provide that the amount of such Income Mortgage Bonds, Series A, shall be $37,481,302, instead of $21,219,075 and that the rate upon such Bonds shall be 4% instead of 4½%; eliminating the provision for a sinking fund which appears as the next to last paragraph of Subdivision (J) on pages 12 and 13 of the Order of the Commission of June 21, 1939.

(3) Amending Subdivision (L) of the Commission Plan, as to the second numbered paragraph on page 17, Order of June 21, 1939, by inserting, after the word "creation" in the first line of the said paragraph number two, the phrase, "in the discretion of the board of directors of the reorganized company"; and amending the language of sub-paragraph (a) of said numbered paragraph two, appearing on page 18 of the Order of the Commission of June 21, 1939, by inserting in the second line

thereof, in lieu of the word "be" which appears as the fourth word in that line, the words "not be more than".

(4) Amending Subdivision (L) of said Commission Plan, at page 19 of the Order of June 21, 1939, by striking out numbered paragraphs 4 and 5 as to the sinking fund on Income Mortgage Bands and renumbering the remaining paragraphs on that page.

(5) Amending Subdivision (M) of the Commission Plan, at page 20, Order of June 21, 1939, by providing that 374,813 2/100 shares of Preferred Stock, Series [889] A, are to be issued in the reorganization in lieu of 318,502 97/100 shares.

(6) Amending Subdivision (N) of the Commission Plan at page 24, Order of June 21, 1939, by providing that 1,100,000 shares of Common Stock without par value, will be authorized instead of 1,000,000 shares, as therein set forth; and that 749,626 shares shall be reserved for Income Mortgage Bonds, Series A, instead of 424,382, as therein set forth.

(7) Amending Subdivision (O) of the Commission Plan appearing at pages 24 and 25 of the Commission Order of June 21, 1939, so as to read as follows:

"The ten million dollars First Mortgage Bonds, Series A, shall be offered at public bidding, and sold at the best price obtainable, but not less than the face amount plus ac-

crued interest thereon. In the event no bid is received of at least the face amount plus accrued interest for said bonds, said bonds shall be sold at their face amount plus accrued interest to Reconstruction Finance Corporation, subject to the approval of the Commission of such purchase in a separate proceeding, and in such event such reasonable underwriting fee as may be fixed by the Commission in said proceeding shall be paid by the reorganized company to Reconstruction Finance Corporation."

(8) Amending Subdivision (P) of the Commission Plan, appearing on page 25 to 27 of the Commission Order of June 21, 1939, to read as follows:

"P. The existing securities of the debtor shall be treated as follows:

"1. Existing equipment trusts, Baldwin lease, and Pullman contract, aggregating $2,750,050 shall remain undisturbed and shall be assumed by the reorganized company.

[890]

"2. Holders of existing First Mortgage bonds shall receive for each $1,000 of indebtedness, including interest accrued to January 1, 1939, $500 of new Income Mortgage 4 Per Cent Bonds, Series A, and $500 of 5 Per Cent Participating Preferred Stock, Series A.

"3. Reconstruction Finance Corporation shall receive for its existing claim of $3,686,-

864, which includes accrued interest to January 1, 1939, $1,843,432 of new Income Mortgage 4 Per Cent Bonds, Series A, and $1,843,432 of 5 Per Cent Participating Preferred Stock, Series A.

"4. The Railroad Credit Corporation shall receive for its existing claim of $2,592,113, which includes accrued interest to January 1, 1939, $1,296,056.50 of new Income Mortgage 4% Bonds, Series A, and $1,296,056.50 of 5% Participating Preferred Stock, Series A. This provision is subject to the reduction of said amounts, pro rata, by the application, prior to the date of actual issue of the new securities under the plan, of any proceeds from the distributive shares of the debtor or its subsidiaries, under the marshalling and distributing plan, 1931. Adjustment in cash for fractional shares or fractional parts of the smallest denomination of the new Income Mortgage 4% Bonds, Series A, shall be made.

"5. A. C. James Co. shall receive for its existing claim of $6,249,750, which includes interest accrued to January 1, 1939, $3,124,875 of new Income Mortgage 4% Bonds, Series A, and $3,124,875 of 5% Participating Preferred Stock, Series A.

"6. Western Realty Company shall receive for its unsecured claim of $61,667, which includes interest accrued to January 1,

1939, 617 shares of Common Stock without par value. [891]

"7. The Western Pacific Railroad Corporation shall receive for its unsecured claim of $7,749,175, 77,492 shares of Common Stock without par value.

"8. The Western Pacific Railroad Corporation shall receive for its holding of $28,300,000 in Preferred Stock and $47,500,000 in Common Stock of the debtor (being all the outstanding stock of each class) 241,332 shares of Common Stock without par value."

(9) Amending Subdivision (R) of the Commission Plan, appearing on pages 29 and 30 of the Commission Order of June 21, 1939, (a) by striking out the exception in the second paragraph of said Subdivision (R) which would permit The Railroad Credit Corporation to retain for its own benefit the proceeds of the distributive shares of the debtor and its subsidiaries under the marshalling and distributing plan, 1931, after the effective date of the Plan; (b) by providing that the Reorganization Committee shall consist of five persons, all to be approved by the Court, who shall be designated, one by the Insurance Company Committee, one by the Reconstruction Finance Corporation, one by The Railroad Credit Corporation, one by your petitioner, and one by The Western Pacific Railroad Corporation; and (c) by providing expressly that the reorganiza-

tion shall be carried out by the recapitalization of the debtor, rather than by the organization of a new corporation.

Wherefore your petitioner respectfully prays:

(a) That this Court return to the Commission, the Commission Plan with the recommendation that it be amended in the various respects specifically set out in Article XXII above; and [892]

(b) That, unless said Plan be so amended and corrected, said Commission Plan be disapproved as discriminatory and unfair and inequitable to your petitioner and to other parties in interest and not in conformity with the law of the land;

And for such other and further relief as to the Court may seem just and proper.

Dated: December 8, 1939.

[Endorsed]: Filed Dec. 8, 1939. [894]

[Title of District Court and Cause.]

OBJECTIONS OF THE WESTERN PACIFIC RAILROAD CORPORATION TO COMMISSION PLAN OF REORGANIZATION, STATEMENT OF CLAIMS FOR EQUITABLE TREATMENT, AND PETITION FOR AMENDMENT OF SUCH PLAN.

The Western Pacific Railroad Corporation (hereinafter designated "Corporation"), an unsecured creditor of the debtor, and owner and holder of all the issued and outstanding capital stock of the debtor, hereby objects to the modified Plan of Reorganization of the debtor (hereinafter designated the "Commission Plan"), approved by the Interstate Commerce Commission (hereinafter designated the "Commission") and certified to this Court, and presents its claims for equitable treatment, pursuant to the provisions of subdivision (e) of Section 77 of the Bankruptcy Act, as amended, and to the order of this Court filed herein November 8, 1939.

The Corporation's objections, generally stated, are that said Commission Plan is unfair and inequitable as to the Corporation, does not afford due recognition to the rights of unsecured creditors and stockholders of the debtor, discriminates unfairly in favor of certain classes of secured creditors, does not conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders as required by subdivision (e) of Section 77, and that said Section

77, as [896] interpreted and applied by the Commission, is invalid in that it deprives the Corporation of its property and of its interest in the property of the debtor without compensation and without due process of law, contrary to the provisions of the Fifth Amendment to the Constitution of the United States.

For a more detailed statement of said objections and of the claims of the Corporation for equitable treatment the Corporation represents to the Court and petitions as follows:

I. The Corporation's Claim as Unsecured Creditor.

The Corporation (a corporation organized under the laws of the State of Delaware) is an unsecured creditor of the debtor in the principal amount of $5,768,746. Interest accrued thereon to January 1, 1939 amounts to $1,980,429, making a total claim for principal and interest to January 1, 1939 of $7,749,175.

The indebtedness represents advances on open account, advanced by the Corporation to the debtor from time to time before the institution of the reorganization proceedings.

The Western Realty Company, a Colorado corporation, is an unsecured creditor of the debtor, its claim amounting to $50,000 principal with interest to January 1, 1939 of $11,667, a total of $61,667.

A proof of claim was duly filed by the Corporation in the above entitled proceedings for reorgan-

ization of the debtor. A similar proof of claim was likewise filed by The Western Realty Company.

By an order entered August 20, 1935 this Court classified the above described claim of the Corporation and the claim of The Western Realty Company as separate and distinct classes for the purposes of Section 77 of the Bankruptcy Act, as amended. The Corporation's claim was by such order classified as Class 10 and the claim of The Western Realty Company as Class 11. [897]

II. The Corporation's position as owner of the equity in the debtor's property.

The Corporation is the owner of all the outstanding stock of the debtor consisting of $28,300,000 par value of preferred stock and $47,500,000 par value of common stock. By the said order of August 20, 1935 the preferred stock was classified as Class 12 and the common stock as Class 13.

All of said stock, preferred and common, was issued in 1916, in connection with the reorganization of the predecessor company of the debtor and was issued in exchange for first mortgage bonds of said predecessor then outstanding. Said first mortgage bonds of said predecessor company represented money actually paid to said predecessor and used by it for capital expenditures in the construction, equipment and maintenance of the railroad properties.

The ultimate beneficial ownership of the unsecured claim against the debtor, and of the stock of

the debtor, owned by the Corporation, resides in the stockholders of the Corporation who are many thousands in number.

III. The Commission's treatment of the Corporation's claim as a general creditor and as sole stockholder of the debtor.

The Commission Plan makes no provision whatever for recognition of the unsecured claim of the Corporation (or of The Western Realty Company).

It makes no provision whatever for recognition of the equity of the Corporation as the owner and holder of all the outstanding stock, preferred and common, of the debtor.

IV. Objections of Corporation to Commission Plan.

Conceding that secured claims are entitled to full protection out of the assets of the debtor before unsecured claims, and that unsecured claims are entitled to like recognition in priority to stockholders, the Corporation's position is that there is no justification under Section 77 of the [898] Bankruptcy Act or under the law of the land for destroying or confiscating either the claims of general creditors or the equity of stockholders, unless the debtor is insolvent in the bankruptcy sense, that is, unless the aggregate of its property "shall not at a fair valuation be sufficient in amount to pay his (its) debts". (Bankruptcy Act, as amended, Section 1(19).)

(a) The Commission did not find that the debtor was or is insolvent in the bankruptcy sense. The undisputed evidence before the Commission, and the Commission's findings, show that the debtor was not insolvent.

(b) The total liabilities of the debtor on January 1, 1939, exclusive of the claims of the Corporation and The Western Realty Company, as reported by the Commission in its report of June 21, 1939, approving a modified plan, amounted to $87,888,660. This amount represents the aggregate of secured claims, and provision for this sum only is made in the Commission Plan. As already stated, no provision of any kind, whether by payment in cash or in allotment of securities, is made for either the unsecured creditors or the stockholders.

(c) The Commission did not in its proceedings make a new determination of the value of the debtor's property under the authority of subdivision (e) of Section 77. It did, however, refer in its report of October 10, 1938 to a final valuation theretofore made by it pursuant to Section 19(a) of the Interstate Commerce Act. Section 19(a) makes such valuation "prima facie evidence of the value of the property * * * in all judicial proceedings brought to * * * set aside * * * in whole or in part any order of the Interstate Commerce Commission". This valuation, with allowance for the net costs of additions and retirements, between valuation dates and December 31, 1935, amounted to $139,600,455 (230 I. C. C. Rep. 76). Between Jan-

uary 1, 1936 and December 31, 1938 this figure has been increased by the net cost of further additions less retirements. It is not disputed that the original cost of the debtor's property, less depreciation, would amount to more than $120,000,000. (R. Exh. 29, Statement 16, p. 2; see Op. [899] of Commissioner Miller, Rep. of October 10, 1938, 230 I. C. C. Rep. 108.)

It follows that the report of the Commission itself shows that the debtor's property has a value of many millions of dollars in excess of all claims, secured and unsecured, and that there remains a surplus of value to be applied to the stock of the debtor, and a fortiori to the payment or protection of unsecured claims.

(d) The Commission found (Rep. of October 10, 1938, 230 I. C. C. Rep. 101) that the "equity of the existing stock has no value" and that "the claims of the unsecured creditors, The Western Pacific Railroad Corporation and The Western Realty Company" have no value. It is upon these findings, apparently, that the Commission reached the conclusion that the holders of stock "are not entitled to participate in the plan" and that "no securities or cash should be distributed under the plan in respect of" the claims of unsecured creditors. The Corporation objects to these findings as without support in any evidence before the Commission. It objects, likewise, to the conclusions drawn from those findings as discriminatory, unjust and confiscatory as against the general creditors

and the holder of all the stock, and as not in conformity with the provisions of Section 77 or with the law of the land.

(e) In concluding that the claims of unsecured creditors and the equity of the stock were valueless, the Commission disregarded the valuation which it had made under Section 19(a) of the Interstate Commerce Act, which it apparently adopted in its report in this proceeding. It gave consideration solely to the earnings of the property, allowing no weight to other elements, to which, under subdivision (e) of Section 77, consideration would have been given if value had been separately ascertained in the present proceeding, i. e., all other relevant facts, as well as present cost of reproduction new and less depreciation and original cost of the property and the actual investment therein. Even with respect to "the earning power of the property, past, present and prospective", which is one [900] element under Section 77(e), the Commission did not comply with the statute. The report shows that the Commission, while purporting to estimate maximum prospective earnings, in reality took past earning history as virtually the only guide or index to value.

Past earnings over a period of years, taken alone, are not a sufficient basis for determining future earnings or value, particularly where, as here, the period considered is abnormal and not fairly indicative of the future because (a) it included years of severe depression affecting railroads as well as

business and industry generally; (b) during these years unusual rehabilitation costs were charged in large part to operating expense, thus distorting the earning picture; and (c) during these years the debtor constructed its Northern California extension at a cost of approximately $10,000,000. Until this extension was completed and until its contribution of earnings to the debtor's property had become settled and established the future earnings were not fairly indicated by the history of the period considered by the Commission.

(f) Under the Commission Plan all of the common stock authorized is allotted to secured creditors. In so far as this stock represents a value, present or prospective, in excess of the secured claims, such allotment results in transferring from the Corporation and The Western Realty Company, as unsecured creditors, and from the Corporation, as holder of all the stock of the debtor, their respective interests in the property.

(g) The Commission Plan erroneously computes accrued interest due the Reconstruction Finance Corporation at an amount $176,005 in excess of the true amount due under the agreement between the Reconstruction Finance Corporation and the debtor, as modified by these parties.

(h) For all the reasons hereinabove stated the Commission Plan does not comply with the provisions of Section 77(e) in that it is not "fair and equitable", it does not "afford due recognition to the rights of each class of creditors and stockhold-

ers", and particularly unsecured [901] creditors and stockholders. It "discriminates unfairly in favor of any class of creditors", i. e., in favor of secured creditors.

(i) For all the reasons hereinabove stated the Commission Plan does not conform to the requirements of the law of the land reagrding the participation of the various classes of creditors and stockholders. (Section 77(e).)

(j) For the same reasons the Commission Plan is in violation of the law of the land in that it deprives the unsecured creditors and the stockholders of their property without just compensation and without due process of law in violation of the Fifth Amendment of the Constitution of the United States.

V. The "public interest" does not justify the confiscation of property or the transfer of one person's property to another.

Section 77(d) requires that the plan approved by the Commission shall be "compatible with the public interest". Without undertaking here to analyze the attempt of the Commission in its report of October 10, 1938 (230 I. C. C. Rep. p. 87) to interpret and apply this provision, the Corporation urges that the "public interest", however defined, cannot justify the confiscation, without compensation, of the interest of unsecured creditors or stockholders, and the transfer of that interest to secured creditors where the property of the debtor

has a value in excess of the secured claims. (Louisville Joint Stock Land Bank v. Radford, 295 U. S. 555, 602, 79 L. Ed. 1593, 1611.)

VI. Amendments to Commission Plan Proposed and Requested by Corporation.

The Plan can and should be modified so as to give some protection to the unsecured claims and to the stock of the equity, without impairing the prior position of the secured claims. This could be accomplished by allotting to the secured claims, in lieu of the common stock allotted to them under the Commission Plan, additional income bonds and preferred stock in such amounts as would preserve and [902] protect their priorities. Common stock should be issued to the unsecured creditors and to the sole stockholder in such amounts and proportions as may be just. It may be that for some years the earnings will not be such as to permit the disbursement of much or anything in dividends. If, however, the earnings of the railroad should increase so as to give earning power to the common stock, fairness and equity require that the unsecured creditors and the stockholder should have a chance to get some benefit from those earnings after the preferred creditors are fully protected. It is not just, fair or equitable that any such possible or prospective increase over and above the proper protection of their claims should go to the secured creditors to the total exclusion of the general creditors and the stock equity. The suggested modifications

would fully protect the priorities of the secured creditors. Whatever value there would be in the common stock would be subordinate to the securities issued to the secured creditors and would not affect their rights.

The Corporation is not directly concerned with the proportions in which senior securities are allotted to the various secured creditors. That is a question which can best be presented by the secured creditors themselves. Since, however, there is a value over and above the amounts sufficient to satisfy all secured claims, that excess should be capitalized in the form of common stock of no par value and be allotted to the unsecured creditors and the holder of the stock of the debtor.

In order to interfere as little as possible with the Commission Plan, the Corporation suggests that the number of shares of common stock of no par value to be authorized shall be the number provided for in the Commission Plan, i. e., 319,441 shares. The Corporation requests and petitions that the plan be modified:

(a) By allotting to the secured creditors in lieu of common stock of the reorganized company additional income bonds and preferred stock in such amounts as will fully protect their true claims and priorities, and [903] that the amount of income bonds and preferred stock to be issued be increased accordingly;

(b) That the common stock consisting of 319,441 shares of no par value be allotted as follows:

To The Western Realty Company for its unsecured claim of $61,667—617 shares of such common stock;

To the Corporation for its unsecured claim of $7,749,221—77,492 shares of such common stock;

To the Corporation for its holding of $28,300,000 in preferred stock and $47,500,000 in common stock of the debtor—the balance of such proposed issue of common stock, amounting to 241,332 shares thereof.

Wherefore, the Corporation respectfully prays that this Court return to the Commission the Commission Plan with the recommendation that it be amended as hereinabove requested, and for such other and further relief as to the Court may seem just and proper.

M. C. SLOSS,
SLOSS, TURNER & FINNEY,
Attorneys for The Western Pacific Railroad Corporation. [904]

State of California,
City and County of San Francisco—ss.

M. C. Sloss, being duly sworn, deposes and says that The Western Pacific Railroad Corporation, named in the foregoing document, is a corporation organized under the laws of the State of Delaware, that it has no office and no officer within the State of California; that affiant is an attorney for said

Corporation, that he has been duly authorized to sign and verify the foregoing document on behalf of said Corporation, and that said document entitled "Objections of The Western Pacific Railroad Corporation to Commission Plan of Reorganization, Statement of Claims for Equitable Treatment and Petition for Amendment of Such Plan" is true except as to matters therein stated on information and belief and as to those matters he believes it to be true.

M. C. SLOSS.

My Commission Expires December 31, 1942.

[Endorsed]: Filed Dec. 8, 1939. [905]

[Title of District Court and Cause.]

OBJECTIONS OF THE RAILROAD CREDIT CORPORATION TO THE PLAN OF REORGANIZATION CERTIFIED BY THE INTERSTATE COMMERCE COMMISSION, AND STATEMENT OF CLAIM FOR EQUITABLE TREATMENT.

Now comes The Railroad Credit Corporation, a secured creditor of the Western Pacific Railroad

Company, Debtor, and, pursuant to the Order of this Court dated November 8, 1939, submits its *objections* to the Plan of Reorganization approved by the Interstate Commerce Commission by order dated June 21, 1939, and its *claims* for equitable treatment.

The detailed and specific objections of The Railroad Credit Corporation are that said Plan does not meet the requirements of subsection (e) of Section 77 of the Federal Bankruptcy Act as amended, in that:

1. Said Plan provides for an arbitrary "effective [907] date" that will be at least a year earlier than the actual effective date of a plan of reorganization herein (I. C. C. Order, Par. A), and fails to make adequate provision and adjustments for the application of proceeds and income from collateral security during the interim.

2. The Plan provides for a maximum capitalization that is so low as to be confiscatory, and diverts assets of the Debtor from junior creditors to senior creditors (I. C. C. Order, Pars. B and P-6). This situation is recognized in the Plan itself: the value of new common stock to be issued upon reorganization is treated for most purposes as being $50 per share (See Item 4, below), but for the purpose of computing capitalization, it is to be taken at $100 per share (I. C. C. Order, Par. D).

3. The Plan, though providing for a low capitalization, and leaving substantial assets uncapi-

talized, requires the establishment and maintenance of a capital fund, thus diverting income from some creditors, especially the collaterally secured creditors whose status the Plan proposes to change by shifting them in part from a creditor to an equity position (I. C. C. Order, Par. L).

4. The Plan further depreciates the standing accorded by it to existing collaterally secured creditors (a) by diverting income to sinking funds for both the new fixed and income mortgages (I. C. C. Order, Pars. D, J, and L); (b) by providing for the conversion of income bonds into common stock at the rate of 20 shares per $1,000, principal amount of such bonds (I. C. C. Order, Par. J); (c) by providing that new preferred stock shall share ratably with common stock in dividends declared in excess of 3% upon such common stock, and by other provisions (such [908] as sale price of new stock) of a like effect (I. C. C. Order, Par. M). The effect of such a course upon future financing is obvious.

5. The Plan authorizes 1,000,000 shares of no par common stock, but so restricts the issue thereof that no such stock is to be issued to unsecured creditors (I. C. C. Order, Pars. N and P, and Item 2, supra); and further requires that unsecured claims against the Debtor not entitled to priority over the first mortgage shall be canceled (I. C. C. Order, Par. R).

6. The Plan provides that the collaterally secured claim of the Reconstruction Finance Corpo-

ration "shall be provided for under the plan in like securities and in like proportions as those given holders of the debtor's first mortgage bonds" (I. C. C. Order, Pars. O and P). The treatment proposed for the claim of the Reconstruction Finance Corporation is fully justified on the basis of the collateral securing that claim, viz., general mortgage bonds of the Debtor, but not otherwise. The claims of The Railroad Credit Corporation and A. C. James Company, to the extent that they are secured by the same bonds, or equivalent value, are entitled to comparable treatment, but the Plan does not so provide (I. C. C. Order, Par. P). The securities to be issued for new money should stand on their own footing.

7. The Plan provides that the sale of $10,000,000 principal amount of new first mortgage bonds to Reconstruction Finance Corporation (on account of which Reconstruction is to receive preferential treatment in respect of its existing secured claim), shall be "subject to the approval and authorization of this Commission" (I. C. C. Order, Par. O). By this is meant that the [909] Reconstruction Finance Corporation, even though it is ready and willing to act (and even though said Plan has been assented to by the requisite amount of all affected security holders and has been approved and confirmed by the Court), will not be permitted to purchase said bonds upon any terms at date of reorganization or at any other time unless and until the Commission, in a separate proceeding which may

not be instituted until after final confirmation of the Plan, has approved such purchase by the Reconstruction Finance Corporation upon the record then made before it (I. C. C. Report dated June 21, 1939, sheet 9).

8. The Plan provides that certain collateral pledged by the Debtor as security for notes to the Reconstruction Finance Corporation, The Railroad Credit Corporation, and the A. C. James Company shall, for some undisclosed reason, be reduced to possession by the respective pledgees thereof, and shall be by them surrendered to the reorganized company and canceled, but it provides no machinery for such reduction to possession (I. C. C. Order, Par. R).

9. The Plan modifies in some degree the erroneous allocation of assets of the Debtor as between the first mortgage and the general mortgage (I. C. C. Report dated June 21, 1939, sheet 12), but otherwise perpetuates the error in the earlier report (dated October 10, 1938) wherein the Commission said, "We conclude that, for the purpose of determining the equity of plans of reorganization for the debtor, the lien of the general mortgage on the Northern California extension and various branches and spurs in question should be considered subject to the lien of the first mortgage. * * * We consider, for the purposes of a plan of reorganization, that * * * the [910] debtor's equity in that equipment (viz., rolling stock subject to leases, conditional-sale agreements, or equipment-trust

agreements) is subject to the lien of the first mortgage. We consider that the property characterized as non-carrier real estate is also covered by the lien of the first mortgage. * * * While due recognition must be accorded to the rights of the creditors with whom are pledged general-mortgage bonds, those creditors are not entitled to the same treatment as first-mortgage bondholders, who should be considered as having a first lien upon practically all the assets of the debtor" (I. C. C. Report decided October 10, 1938, sheets 58, 59 and 60). There is necessarily involved in these erroneous conclusions, the erroneous construction placed by the Commission upon certain provisions of the first mortgage, and the effects which were assumed to follow (id. sheets 56, 57).

Note: The Report of the I. C. C. (dated June 21, 1939) should have stated that the plan proposed by The Railroad Credit Corporation (sheets 2-8) was put forward as a *compromise* plan upon which it was believed that all parties would agree in order to expedite reorganization, and not as a plan which The Railroad Credit Corporation itself believed was fair and equitable from its own standpoint.

The claims of The Railroad Credit Corporation for equitable treatment are that the Plan should be so modified that:

(a) The Railroad Credit Corporation may be accorded treatment consonant with its status as a secured creditor, [911] and receive new securities representing a fair equivalent of the several items of collateral security pledged with it by the Debtor, or issued or created by the Debtor and pledged with it by third persons.

(b) The Railroad Credit Corporation may not be prejudiced in its holdings of collateral pledged with it by third persons, whether such collateral was issued or created by the Debtor or others; and The Railroad Credit Corporation may not be prejudiced in the application by it of income and proceeds of collateral pending the carrying out of a plan of reorganization herein.

(c) The priority of the general mortgage, as asserted in this proceeding by the Trustee under said mortgage will be recognized, and appropriate adjustments made in the allocation of assets of the Debtor, as between the general mortgage and the first mortgage, and, as a consequence, in the allocation of new securities to the holders of general mortgage and first mortgage bonds, respectively, and also in the allocation of new securities to The Railroad Credit Corporation.

(d) The capital structure will reflect the actual value of the property, regardless of the special or economic desirability of holding back a cushion of uncapitalized but capitalizable assets, to the end that the claims of the Western Pacific Railroad Corporation against the Debtor, which The Railroad

Credit Corporation holds in pledge, may duly share in the distribution of the assets of the Debtor upon reorganization.

(e) The income of the reorganized company may not be unduly diverted for the benefit of some creditors, to the prejudice of other creditors, whether by the establishment of unnecessary capital or sinking funds, or otherwise. [912]

Wherefore, The Railroad Credit Corporation prays that the Plan of Reorganization, as certified to the Court by the Interstate Commerce Commission, shall be disapproved and referred back to said Commission for further action in accordance with the provisions of Section 77 of the Federal Bankruptcy Act as amended, so as to give due effect to the rights and interests of The Railroad Credit Corporation as the same may be finally determined and decreed.

Respectfully submitted,

THE RAILROAD CREDIT CORPORATION,

By D. WILLARD, JR.

Vice-president and General Counsel.

Upon Appeals from the District Court of the United States for the Northern District of California, Southern Division.

PARKER PRINTING COMPANY, 545 SANSOME STREET, SAN FRANCISCO

[Title of District Court and Cause.]

OBJECTIONS OF THE WESTERN PACIFIC RAILROAD COMPANY, THE DEBTOR HEREIN, TO PLAN OF REORGANIZATION CERTIFIED TO THIS COURT BY THE INTERSTATE COMMERCE COMMISSION, AND CLAIM OF SAID DEBTOR FOR EQUITABLE TREATMENT.

The Western Pacific Railroad Company, the Debtor herein, pursuant to Subsection (e) of Section 77 of the Act of Congress commonly known as the Bankruptcy Act, and to the order of the Honorable A. F. St. Sure, Judge of this Court, filed herein November 8, 1939, hereby objects to the Plan of Reorganization of said Debtor approved by [914] the Interstate Commerce Commission on October 10, 1938 by its order bearing said date, as modified by the Report and Order of said Commission dated June 21, 1939, and thereafter certified to this Court pursuant to the provisions of said Subsection (e) of said Section 77 on the grounds that said Plan of Reorganization is unfair and inequitable, does not afford due recognition to the rights of each class of creditors and stockholders of the Debtor, discriminates unfairly in favor of certain classes of creditors and stockholders, and does not conform to the requirements of the law of the land regarding the participation therein of the various classes of creditors and stockholders of the Debtor, and for a more detailed and specific

statement of said Objections and of the claims of the Debtor for equitable treatment of its creditors and stockholders, the Debtor further states and shows to the Court as follows:

(a) The modified Plan of the Interstate Commerce Commission without warrant of law and without lawful evidence attempts to limit the capitalization of the reorganized Company (taking no par value stock at $100 per share) to $97,763,522, which is lower than (1) the cost of the Debtor's railroad property devoted to public use adequately depreciated, or (2) the value of its property as reported by the Interstate Commerce Commission pursuant to Section 15(a) of the Interstate Commerce Act together with capital expenditures between the valuation date and January 1, 1939, or (3) the value of the Debtor's property entitled to the protection of the Fifth Amendment to the Constitution of the United States. [915]

(b) The modified Plan of the Interstate Commerce Commission, without warrant of law and without lawful evidence attempts to exclude from any participation therein or in the distribution of securities of the reorganized Company thereunder and to treat as without value and extinguish or expropriate $7,809,639 of unsecured indebtedness, and $28,300,000 par value of Preferred Stock, and $47,500,000 par value of Common Stock of the Debtor, although after making whole all claims entitled to priority there is a residuum of property value or equity applicable thereto of not less than

$22,215,138 on any of the three bases specified in the preceding paragraph (a).

(c) The modified Plan of the Interstate Commerce Commission disregards Subsection (1) of said Section 77 which provides that the rights and liabilities of creditors and of all persons with respect to the Debtor and its property shall be the same as if a voluntary petition for adjudication had been filed and a decree of adjudication had been entered on the day the Debtor's petition was filed, which day was August 2, 1935, and without warrant of law and without lawful evidence provides for the issue to holders of First Mortgage Bonds of the Debtor and to secured creditors of the Debtor of shares of Common Stock of the reorganized Company in respect of many millions of dollars of interest accrued but unearned after said date thereby reducing the shares of such Common Stock fairly and equitably available for distribution to the Debtor's other creditors and stockholders.

(d) The modified Plan of the Interstate Commerce Commission attempts unlawfully to abridge or impair the [916] right of the reorganized Company to manage its own affairs by providing for a mandatory Capital Fund of $500,000 in each year regardless of the necessities of the property.

(e) The modified Plan of the Interstate Commerce Commission is an impracticable Plan unacceptable to the requisite percentages of creditors and stockholders of the Debtor entitled to participate therein and unless modified so as to afford fair

and equitable treatment to all classes of creditors and stockholders of the Debtor will precipitate litigation of many serious issues of law and fact such as the true valuation of the Debtor's property involving a judicial review and revision of the principles of valuation stated by the Interstate Commerce Commission in Texas Midland Railroad, 77 I. C. C. 1, and subsequent cases; the conflicting lien claims of the Trustees of the Debtor's First Mortgage and General and Refunding Mortgage in respect of the Northern California Extension representing an investment in excess of $10,000,000; the operation and incidence of the after-acquired property clauses of the Debtor's First Mortgage and General and Refunding Mortgage in respect of equipment representing an investment of many millions of dollars made subsequent to the execution and delivery of the First Mortgage; and other issues which the Supreme Court of the United States in its opinion in the case of Thomas K. Case, and others v. Los Angeles Lumber Products Company, Ltd., decided November 6, 1939, states are proper subjects of adjustment and compromise in proceedings under the Federal Bankruptcy Act.

As the concrete claim of the Debtor for fair and equitable treatment of its creditors and stockholders and [917] as a sound basis for the adjustment and compromise of serious issues of law and fact and the avoidance of wasteful litigation, the Debtor respectfully asks that this Court approve and recommit to the Interstate Commerce Commission,

together with a transcript of additional evidence in support thereof, the Plan of Reorganization annexed as Exhibit A to its Peti ion filed with the Interstate Commerce Commission on August 2, 1939.

Subject to possible modifications in detail which might readily be worked out in a pretrial conference under Rule 16 of the Rules of Civil Procedure, this Plan of Reorganization, which represents the result of conferences between substantial creditor and stockholding interests extending over a period of many weeks immediately prior to the release of the Interstate Commerce Commission's modified Plan, is one that should prove acceptable to the requisite percentages of the Debtor's creditors and stockholders and if supported by additional evidence deemed essential by the Interstate Commerce Commission should also prove acceptable to the Interstate Commerce Commission.

To the end that this Court may receive evidence to supply or correct any factual deficiencies in the record as certified by the Interstate Commerce Commission, attention is respectfully directed to the conclusions of said Commission in its Report and Order dated September 19, 1939, denying the Petition of the Debtor for the substitution of the above-mentioned Plan, Exhibit A, for the Commission's modified Plan. The Commission says:

(First Conclusion)

"We are not satisfied that the mandatory [918] feature of the capital fund should be

reduced from $500,000 to $300,000. In both of our prior reports we found in effect that yearly contributions of $500,000 to the capital fund were essential to meet the debtor's requirements. In our report of June 21, 1939, we considered requests that the yearly contributions to the capital fund be reduced to $300,000. The debtor's petition does not offer to prove or set forth facts even tending to show that we were in error in our finding that the capital fund should be mandatory at $500,000."

At the hearing on these Objections the Debtor will be prepared to present evidence showing that the Capital Fund should be wholly discretionary and that a mandatory Capital Fund of $500,000 is in excess of the probable requirements of a property recently rehabilitated at a cost in excess of $10,000,000.

The Commission further says:

(Second Conclusion)

"The allocation of 8.54 percent of the new common stock to the Western Pacific Railroad Corporation, in its capacity as a general creditor, and 23.59 percent to it in its capacity as a stockholder, and 0.07 percent to the Western Realty Company as a general creditor would require a reversal of our findings that those interests have no value, or a finding that the concessions required of the senior interests are justified and are compensated by concessions to

be made by the junior interests. This proposed sharing of common stock affects also our previous finding as to what constitutes fair and equitable treatment of part of the interests of the first-mortgage bondholders. The debtor's petition does not set forth or offer to prove facts indicating that our findings with respect to these matters were erroneous or furnish any other basis for a finding that the proposed new plan would be fair and equitable."

The Debtor maintains that the Interstate Commerce Commission has made no such finding of value as the amended Bankruptcy Act contemplates as the basis for excluding the Debtor's unsecured creditors and stockholders from [919] participating in the Plan of Reorganization certified to the Court and that no value of the Debtor's property has been certified to this Court under Subsection (e) of Section 77 of the Bankruptcy Act, and that the record contains no evidence or factual data to support such a finding, but even if such a finding had been made it is ineffectual for any purpose under said Subsection (e) unless and until affirmed by this Court. But said Commission here recognizes that such a finding is inappropriate if under an agreed-upon Plan of Reorganization in which doubtful issues of fact and law are adjusted and compromised, "the concessions required of the senior interests are justified and are compensated by concessions to be made by the junior interests".

At the hearing upon these Objections, the Debtor will be prepared to present evidence to show that 32.20% of the Common Stock proposed to be issued to the junior interests under the substitute Plan of Reorganization annexed as Exhibit A to its Petition filed August 2, 1939, is valued by the Interstate Commerce Commission under the modified Plan at $5,863,020, and that by conceding this amount in Common Stock of the reorganized Company to the junior interests, the senior interests will receive under the adjustment or compromise the following considerations, among others:

(1) Recognition of approximately $10,000,000 of interest accrued but unearned subsequent to August 2, 1935, and of doubtful validity as a provable claim under Subsection (1) of said Section 77.

(2) "Relinquishment of the substantial claim of the General and Refunding Mortgage to an undivided half [920] interest in the Northern California Extension representing an investment of more than $10,000,000.

(3) Relinquishment of the substantial claims of the General and Refunding Mortgage to a first lien on the equity in equipment valued at $6,179,121.48, and on $892,700.98 of free cash on hand on August 2, 1935, and other claims of like character.

Not only are these concessions by the junior interests to the senior interests adequate as a consideration for the concession by the senior interests to the junior interests of 32.20% of the Common Stock

of the reorganized Company valued by the Interstate Commerce Commission at $5,863,020, but the compromise and adjustment is one that this Court after hearing may find to be extremely favorable to the senior interests.

The Commission further says:

(Third Conclusion)

"In our report of October 10, 1938, we found that the total annual fixed and contingent interest charges of the reorganized company, plus requirements for the capital and sinking funds should not exceed $2,000,000 per annum. In our report of June 21, 1939, we modified that finding to the extent of approving a plan by which those annual charges would slightly exceed $2,000,000, viz., $2,055,155. Under the new plan those charges would be $2,300,530. There has been no showing or offer of proof of new facts or changed conditions that would warrant our modifying our basic finding to that extent.

We are not persuaded that there is justification for changing the relationship of fixed debt to total capitalization from that of the approved plan to that resulting from the capitalization under the new plan."

Whether the claims of the senior creditors should be settled by the allocation of income bonds and preferred [921] stock on the basis of 40% in income bonds and 60% in preferred stock or should

be settled through the issue of 50% of income bonds and 50% of preferred stock is a minor issue readily adjustable in conference. The Debtor objects to the allocation on the basis of 40% in income bonds and 60% in preferred stock on the ground that this adjustment is unfair and inequitable to the senior creditors and at the hearing will ask permission of the Court to offer additional evidence with respect to the earning power of the Debtor's property. Estimates of prospective earnings were offered by the Debtor solely on the issue of a conservative fixed interest charge. No estimates were offered as a basis for limiting capitalization or fixing the proportion of capitalization to be represented by Income Bonds. The Debtor contends that these subjects are not within the Commission's jurisdiction under Section 77 of the Bankruptcy Act.

In its fourth and final conclusion the Commission states:

> "Nor do the responses we have received warrant our regarding the new plan as one agreed to by the parties."

The Debtor recognizes that the agreement of the parties of record to accept the substitute Plan was inchoate at the time the Interstate Commerce Commission released its own modified Plan and that the Insurance Group Committee representing substantial holdings of First Mortgage Bonds of the Debtor failed to support the Debtor's petition filed August

2, 1939, asking that the said Commission approve and certify the substitute Plan to this Court in lieu of its own modified Plan. A pretrial under Rule 16 of the Rules of Civil Procedure offers this Committee a locus [922] penitentiae as well as an opportunity to propose constructive amendments designed to bring all parties together in support of a Plan of Reorganization that will be fair and equitable to all creditors and stockholders, will be in the public interest, and will avert costly and destructive litigation.

(f) The modified Plan of the Interstate Commerce Commission is predicated upon an erroneous determination of judicial questions specified in the preceding paragraph (e) all of which the Debtor asks be reviewed and determined by this Court in the exercise of its judicial authority under said Section 77 unless settled under sanction of this Court as "a normal part of the process of reorganization".

[Title of District Court and Cause.]

OBJECTIONS OF IRVING TRUST COMPANY, AS SUBSTITUTED TRUSTEE UNDER GENERAL AND REFUNDING MORTGAGE, TO PLAN OF REORGANIZATION APPROVED BY INTERSTATE COMMERCE COMMISSION ON JUNE 21, 1939.

[924]

Irving Trust Company is the Substituted Trustee under the General and Refunding Mortgage of The Western Pacific Railroad Company dated as of January 1, 1932, whereunder there are now issued and outstanding $18,999,500 principal amount of bonds. Pursuant to the provisions of the order of this Court dated November 8, 1939, it hereby objects, on behalf of the holders of bonds issued under said Mortgage, and on its own behalf, to the Plan of Reorganization approved by the Interstate Commerce Commission in its report and order in Finance Docket No. 10913, decided June 21, 1939, upon the following grounds:

I. On Behalf of the Holders of Said Bonds:

1. Said Plan of Reorganization is not fair and equitable and does not afford due recognition to the rights of the holders of bonds secured under said General and Refunding Mortgage and discriminates unfairly in favor of [925] the holders of bonds secured by the First Mortgage of The Western Pacific Railroad Company dated June 26, 1916.

2. Upon information and belief, said General and Refunding Mortgage bonds are pledged to se-

cure debts aggregating approximately $10,481,685.60, plus interest; and said General and Refunding Mortgage is a first lien prior to or on a parity with any lien of the First Mortgage upon properties of the Debtor greater in value than the debts secured by said General and Refunding Mortgage bonds; and the holders of General and Refunding Mortgage bonds are entitled to treatment in any reorganization plan on a parity with the treatment accorded to holders of First Mortgage bonds.

3. In its report in this matter dated October 10, 1938, the Interstate Commerce Commission stated as follows:

> "* * * While due recognition must be accorded to the rights of the creditors with whom are pledged general-mortgage bonds, those creditors are not entitled to the same treatment as first-mortgage bondholders, who should be considered as having a first lien upon practically all the assets of the debtor. It follows that holders of the debtor's first-mortgage bonds should receive securities of a higher rank than those allotted to other creditors, at least to the extent that existing conditions will permit."

The Plan proposed by the Commission and annexed to its said report dated October 10, 1938, provided that holders of existing First Mortgage Bonds should receive for each $1,000 principal amount of such bonds and accrued and unpaid interest thereon,

$400 of new income mortgage bonds, $600 of new preferred stock and 3.13 shares of new common stock, and that holders of General Mortgage Bonds should receive only new [926] common stock in satisfaction of their claims.

4. The report of said Commission dated June 21, 1939, modified its report dated October 10, 1938, in certain respects and allocated to the holders of General Mortgage Bonds a total of $732,010 of new income mortgage bonds and $1,147,955 of new participating preferred stock, in recognition of the admittedly prior lien of the General and Refunding Mortgage upon $223,732 of cash in the hands of the Mortgage Trustee and upon a note of Tidewater Southern Railroad Company for $508,278 and $1,147,955 par value of capital stock of Tidewater Southern Railroad Company pledged under the General and Refunding Mortgage.

5. The report of said Commission dated June 21, 1939, failed to give any recognition to the lien of the General and Refunding Mortgage, which this Trustee contends is prior to any lien thereon of the First Mortgage aforesaid, upon (a) the debtor's equity in rolling stock subject to lease, conditional sale or equipment trust agreement and having a value of over $6,000,000 above all amounts due thereon, (b) non-carrier real estate having a valuation of approximately $3,427,923.80 and (c) branch lines and jointly owned tracks aggregating approximately 23.33 miles in length, the Commission having previously, and erroneously, ruled in its report

dated October 10, 1938 (although recognizing that final adjudication of such questions must be made by the Court) that the properties last mentioned were subject to the lien of the First Mortgage.

[927]

6. The report of said Commission dated June 21, 1939 erroneously held that the prior lien of the General and Refunding Mortgage on stock and bonds of Central California Traction Company, having a book value of $633,367.10 and stock of Alameda Belt Line, having a book value of $465,300, had no material value, and refused to give any recognition thereto in determining the allocation of securities.

7. The report of said Commission dated October 10, 1938, was based on the conclusion that the lien of the General and Refunding Mortgage on that portion of the debtor's railway known as the Northern California Extension was subject to the prior lien of the said First Mortgage to the extent of the entire debt secured by the First Mortgage; and said report and Plan, dated June 21, 1939, was likewise based on that conclusion, and gave no recognition, in determining the allocation of securities, to the lien of the General and Refunding Mortgage upon said Northern California Extension. Upon information and belief, said Northern California Extension was constructed during the years 1930, 1931 and 1932 at a total cost of approximately $10,434,408, of which only $4,875,000 was supplied from the proceeds of the First Mortgage Bonds; only ap-

proximately one-half of the right of way upon which said Northern California Extension is constructed was acquired with proceeds of First Mortgage Bonds; and the actual value of said Northern California Extension is greatly in excess of the amount of proceeds of First Mortgage bonds used in the construction thereof. Upon information and belief, the First [928] Mortgage is entitled to a lien only upon the portion of said Northern California Extension which was constructed with the proceeds of First Mortgage Bonds, and only for the amount of the proceeds of First Mortgage Bonds which were used in its construction; and the General and Refunding Mortgage, which specifically describes said Northern California Extension as subject to the lien thereof, is entitled to a prior lien upon the portion of said Northern California Extension which was not constructed with the proceeds of First Mortgage Bonds and to a lien upon the balance of said Northern California Extension, subject only to a lien in favor of the First Mortgage Trustees for the amount of the proceeds of First Mortgage Bonds used in the construction thereof.

8. The report and Plan of said Commission dated June 21, 1939 gave no recognition to the fact that cash in the Debtor's possession on the date of institution of the reorganization proceedings amounting to $848,452.50 and miscellaneous notes, advances and unpledged securities having a book value of approximately $101,409.35, were not subject to the lien of any mortgage, and that there-

fore the creditors secured by General Mortgage Bonds were entitled to share in the distribution thereof and to receive securities of the same type issued to holders of First Mortgage Bonds on account of their share therein.

9. This Trustee, on behalf of the holders of bonds issued under the General and Refunding Mortgage, as its claim for equitable treatment, asserts that the holders of such bonds are entitled to receive securities of the same classes [929] and in the same proportions as may be awarded under the Plan to the holders of First Mortgage Bonds.

II. On Behalf of the Holders of Said Bonds and on Behalf of the Trustee Individually:

10. The Plan and report of said Commission dated June 21, 1939, provide for the payment of expenses of reorganization allowed by the Court within the maximum fixed by the Commission, and direct that existing mortgages on the debtor's properties be released and cancelled and all funds on deposit with the Trustees under said mortgages and all collateral pledged thereunder be surrendered to the reorganized company free from the liens of said mortgages, after deduction therefrom of any amounts which the Court may find should be deducted under the provisions of said mortgages and consistent with the Plan. The Commission in prior proceedings has held that the amount of compensation and expenses of mortgage trustees (including counsel fees), allowable under Section

77(c)(12) of the Bankruptcy Act, is to be restricted according to the extent to which such services have been of benefit to the Debtor's estate and to the reorganization plan; and the compensation fixed by the Commission for such services and expenses may be less than that to which the mortgage trustee would be entitled pursuant to its contract right under the General and Refunding Mortgage in respect of services and expenses in the administration of the trust under said Mortgage. [930]

11. No express provision is made in the report and plan of the Commission herein for the determination and satisfaction of this Trustee's lien under Article Eleven, Section 1(g), of the General and Refunding Mortgage upon property held under said Mortgage for its compensation and expenses (including counsel fees), in respect of services in the administration of the trust but which may not be covered by compensation within the maximum limits fixed by the Commission under Section 77(c)(12) of the Bankruptcy Act. The said Trustee's lien under the General and Refunding Mortgage is required by Section 77—particularly Section 77(b)(5) and Section 77(f)—to be fully provided for and satisfied by the reorganization plan before any property subject to be lien of said Mortgage may be transferred free and clear of said lien, and before the Trustee may be required to join in a transfer and conveyance of the mortgaged property or to release and cancel said mortgage. There should be contained in the reorganization

plan an express and clear provision for the satisfaction of said lien by the full payment thereof.

12. Said Plan finds that claims against the Debtor entitled to priority over any of its mortgages are not affected thereby, and provides that the Court may cure any defect, supply any omission or reconcile any inconsistency in such manner and to such extent as may be necessary or expedient in order to carry out the Plan effectively. This Trustee is uncertain as to whether said provision of the Plan would permit this Court, as a part of the presently [931] proposed Plan, to provide for the payment and discharge of said Trustee's lien, or whether it would be necessary for the Court to refer the proceeding back to the Commission for further action in respect of said lien. By either the one or the other of such methods, this Court should see that the reorganization plan as finally adopted herein shall provide for the full payment and discharge of said lien; and this Trustee asserts that it would be equitable and proper for the reorganization plan to provide for such payment and discharge without taking away from the creditors secured by the General and Refunding Mortgage bonds any of the new securities which would be distributable to them as such creditors and without deducting the amount of said Trustee's lien from the value of the security for such creditors.

Wherefore the Substituted Trustee respectfully prays: (a.) that this Court determine the lien of the General and Refunding Mortgage upon the

Debtor's property, and the Substituted Trustee's claim for equitable treatment; (b) that this Court disapprove the proposed reorganization plan as not fair and equitable to the holders of the debtor's General and Refunding Bonds; (c) that this Court, in order to cure defects, supply omissions or reconcile inconsistencies in the proposed Plan, or in order to have a new and proper plan, determine that the lien of the Substituted Trustee for compensation and expenses (including counsel fees), in so far as the same may not be covered by allow- [932] ances made within the maximum fixed by the Commission under Section 77(c)(12), shall be fully paid in cash from the funds in the hands of the Substituted Trustee; (d) that the Court refer the proceedings back to the Interstate Commerce Commission for further action in accordance with the rights of the creditors secured by the General and Refunding Mortgage bonds as asserted and to be asserted by this Trustee and as this Court shall determine; and (e) for such other and further relief as may be just and proper.

Dated: New York, December 5, 1939.

IRVING TRUST COMPANY,
as Substituted Trustee under General and Refunding Mortgage of The Western Pacific Railroad Company dated as of January 1, 1932,

[Title of District Court and Cause.]

OBJECTIONS TO COMMISSION PLAN OF REORGANIZATION, STATEMENT OF CLAIMS FOR EQUITABLE TREATMENT, AND PETITION FOR AMENDMENT OF SUCH PLAN TO CORRECT DEFECTS THEREIN.

To The Honorable A. F. St. Sure, Judge of the United States District Court for the Northern District of California, Southern Division:

The Western Realty Company, an unsecured creditor of the Debtor above named, hereby objects to the Plan of Reorganization of the Debtor (hereinafter designated as the "Commission Plan") as promulgated by the Interstate Commerce Commis-

sion in its order in Finance Docket No. 10913, dated June 21, 1939, and presents its claims for equitable treatment, pursuant to the provisions of the order of this Court, dated November 8, 1939, and to the provisions of Subsection (e) of Section 77, of the Bankruptcy Act, and does hereby represent to the Court and [934] petition as follows:

I. General Objections to Commission Plan:

Subject to the more detailed and specific objections and claims for equitable relief hereinafter set forth, your petitioner objects generally to the Commission Plan of June 21, 1939 on the ground:

(a) That the Commission Plan is grossly unfair and inequitable as to your petitioner, fails to give due recognition to the legal rights and equitable claims of your petitioner and discriminates unfairly against your petitioner.

(b) That although the Commission has adopted the valuation of the property of the Debtor previously found by it under Section 19 (a) of the Interstate Commerce Commission Act, and has recognized in making such valuation the undisputed investment in the property of the Debtor heretofore made, the Commission has nevertheless, in the plan which it has originated and promulgated, and without authority of law, completely disregarded such valuation and such investment, and proposes a capital structure based not upon evidence but upon unsupported theory; that the proposed capital structure promulgated by the Commission, ignoring

true values of railroad property, discriminates unfairly as between various classes of creditors, completely disregards the legal rights and equitable claims of the general creditors of the debtor, including your petitioner.

(c) That the Commission Plan is not in conformity with the law of the land, and is unauthorized by the provisions of Section 77 of the Bankruptcy Act.

(d) That the Commission Plan is grossly unfair to the unsecured creditors of the Debtor, including your petitioner, and to the equitable owners of the property, in that, although the valuation of the property of the Debtor is greatly in excess of its entire indebtedness, the Commission Plan appropriates the [935] entire excess to the overpayment of secured creditors and thereby the Commission Plan appropriates the property of your petitioner and others without due process of law and in violation of the law of the land.

To all of which your petitioner objects and presents its claims for equitable treatment, all as is set forth in detail and specifically below.

II. Petitioner's Claim:

Your petitioner is an unsecured creditor of the Debtor in the principal amount of $50,000 together with unpaid and accrued interest thereon at the rate of five (5) per cent per annum from July 18, 1930, which unpaid interest to January 1, 1939, (the effective date of the Commission Plan)

amounted to $11,666.68, or an aggregate debt on January 1, 1939, of $61,666.68.

The said indebtedness owned by the Debtor to your petitioner arises from an advance made on open account by your petitioner to the Debtor as follows:

On July 18, 1930, at the request of the Debtor, The Western Pacific Railroad Company, your petitioner advanced to the Debtor the sum of $100,000 in cash, to be repaid with interest thereon at the rate of five (5) per cent per annum; of this sum, the Debtor on July 1, 1931 repaid $50,000, leaving a balance due of $50,000; no part of said balance of $50,000 has been paid, and no interest on said indebtedness incurred July 18, 1930, has been paid, except interest to April, 1934.

A proof of claim was duly filed by your petitioner in the above entitled proceedings for reorganization of the Debtor.

By an order entered August 20, 1935, this Court classified the above described claim of your petitioner as a separate and distinct class for the purposes of Section 77 of the Bankruptcy Act as amended. [936]

III. Treatment Accorded Petitioner's Claim Under the Commission Plan:

The Commission finds that your petitioner's claim, and other unsecured claims not entitled to priority over existing mortgages are without value and that no securities or cash should be distributed

under the plan in respect to such claims. (Report of October 10, 1938 (230 I. C. C. 61, 100-101); Order of June 21, 1939, page 27.)

IV. Property of the Debtor and Rights Thereto and Therein:

Your petitioner is an unsecured junior creditor. Its claim against the debtor corporation is relatively a small one, though the recognition and fair treatment of said claim is no less important on that account to your petitioner.

It is the established law of the land, which your petitioner recognizes, that in proceedings under Section 77 of the Bankruptcy Act, the value of the property of the Debtor is available, first to satisfy the claims of secured creditors, according to their prior rights; second, to meet and satisfy the claims of unsecured, general creditors, and third to protect and preserve the interests and investment of the equity owners, if and to the extent that this may be possible.

Northern Pacific Rwy. Co. v. Boyd, 228. U. S. 482

Louisville Trust Co. v. Louisville Rwy. Co., 174 U. S. 674

Kansas City Terminal Ry. v. Central Union Trust Co., 271 U. S. 445

But it is equally, and without dispute, the law of the land that the entire property of the Debtor, at its fair and reasonable value, constitutes for the purposes of such proceedings a fund for the recognition and fair treatment of ALL creditors, of what-

ever class, and the stockholders, subject only to prior rights as among the interests represented. In the Boyd case, the Court held that no plan can be fair and equitable which endeavors to satisfy the interests of bondholders and [937] stockholders and squeezes out the legitimate claims of general creditors. And, where the Debtor is hopelessly insolvent, both in the equity sense and in the bankruptcy sense, and a plan of reorganization is proposed which undertakes to recognize the rights of stockholders at the expense of failure to meet fully the prior claims of bondholders, the Court will not approve such plan.

Case v. Los Angeles Lumber Products Co. Ltd., U. S. (decided Nov. 6, 1939)

But where in fact the valuation of the property, as in the instant case, exceeds by more than thirty per cent the aggregate of all creditors' claims, secured and unsecured, your petitioner respectfully insists that no plan which wholly ignores such excess, and which would distribute the entire property to prior secured creditors, can be, in fact or in law, "fair and equitable."

There is nothing clearer in our law than that, in any reorganization proceeding, wherein there is to be determined the capitalization of the reorganized company and the securities to be given to each class of creditors, each creditor is entitled to insist that the values employed for that purpose be fair and not forced sale values.

In the recently decided case of Case v. Los Angeles Lumber Products Co. Ltd.—U. S.—Nov. 6, 1939, a brief was filed by the United States, in the preparation of which the Solicitor General, Special Assistants of the Attorney-General, the Chief Counsel for the Interstate Commerce Commission and the Counsel and Attorneys for the Securities Exchange Commission participated. In that brief occurs the following significant passage, bearing on the proper interpretation of Sections 77 and 77 B:

> "In cases of liquidation no one questions the right of senior security holders to full payment before any distribution of assets to junior interests. [938] Reorganization is an alternative for liquidation in the event of financial failure. *It seeks to substitute going concern values for the forced sales values of liquidation with the object of yielding greater ultimate returns to the senior interests, and allowing wider participation if the circumstances permit.*" (Italics ours)

In re Dutch Woodcraft Shops—14 Fed. Supp. 467

First Nat. Bank v. Flershem—290 U. S. 504

Unsecured creditors of insolvent corporations are entitled to the benefit of the values which remain after lien-holders are satisfied, whether this is pres-

ent or prospective, for dividends or only for purposes of control.

Kansas City Terminal Rwy. v. Central Union Trust Co., 271 U. S. 445

So, in a case where the total value of the assets exceeded the bonded indebtedness of the debtor company, it was recently held by the Circuit Court of Appeals, Ninth Circuit, under Section 77B, that preferred stockholders were entitled to be included in the plan; that it was not unfair by reason of the fact that bondholders were to receive in new bonds one-half of the present amount of the face value of the bonds theretofore held by them, and the remaining one-half in new preferred stock; nor was the plan to be deemed unfair because the stockholders were permitted under it to continue the operation of the debtor's business. The bondholder, the Court holds, is entitled only to payment of the debt due him, principal and interest, and is not ordinarily entitled to take over the management of the business.

DuBois v. Consolidated Rock Products Co.—C. C. A., 9th Circuit, Nov. 4, 1939, CCH Bankruptcy Law Service, page 51671, par. 52118.

V. The Value of Debtor's Property:

We come then to the question, what is the value of the Debtor's property.

The valuation of the property of The Western Pacific [939] Railroad Company, made by the In-

terstate Commerce Commission under Section 19A amounted, with additions at cost to December 31, 1935, to $139,600,455 (Report of Commission, Oct. 10, 1938, p. 24-25, in these proceedings). With further additions and improvements, under the rehabilitation plan now being concluded, such valuation with additions at cost up to the present time would be considerably increased. Your petitioner respectfully directs the attention of the Court to the fact that the Commission in its Report and Order of October 10, 1938, and again in its Report and Order of June 21, 1939, refers to and apparently adopts and reaffirms its Section 19A valuation of the Debtor's property. The Commission does not, in either Report, make any other or different or new "appraisal" of the assets of the Debtor company. There is nothing in the record before the Commission which supports any other or different appraisal of the value of the assets of the Debtor.

The investment in the property of the debtor would, after the deduction of all accrued depreciation, amount to at least $120,000,000. (Record, Ex. 29, Statement 16, page 2, Dissenting Opinion of Commissioner Miller, pages 72-73, Report of October 10, 1938.)

Again this value of the Debtor's property, the total indebtedness due from the Debtor to all its creditors of every class, including the outstanding equipment trusts and leases, the Trustees Certificates, First Mortgage Bonds, and the claims of se-

cured creditors, with interest to January 1, 1939, in all such cases, amounts to $87,880,660.

On the basis of the only appraisal and valuation of the Debtor's property in the record before this Court, it would therefore seem perfectly clear that the assets of The Western Pacific Railroad Company exceed by more than $30,000,000 the aggregate of the claims of all lienholders. Your petitioner [940] asserts that by reason of this condition, not only the general creditors of the corporation but its stockholders as well have a real and substantial interest in the property of the Debtor.

It is true that, because of the recent and temporary inability of the Debtor, in common with a substantial number of the other railroads of the United States, to pay its fixed charges during a period of unparalleled depression, foreclosure of the liens of the First Mortgage and General and Refunding Mortgage would, perhaps, terminate the interest of general creditors and stockholders. Even in such an event, the Court will, because of the very nature of the property and the interests involved, give every consideration to the protection and preservation of the interests of minor and unsecured creditors and the equitable owners of the property. A railroad is not simply private property, but an instrument of public service. Railroad mortgages and trust deeds are ordinarily so large in amount that, on foreclosure, only the mortgagees and their representatives can be considered as possible purchasers. The character of a railroad's business,

and the public obligations which it assumes—obligations from which, unlike other private corporations, it can obtain no relief, or in the carrying out of which it cannot, like others, effect economies by curtailment of personnel or service, in times of business depression—these are factors which both require and justify a court of equity to look beyond the mere technical rights created by contract and recorded obligations, to give due weight to equitable and public considerations and to conserve, wherever possible, the interests of all parties who have any rights in the property, whether as mortgagee, creditor or mortgagor.

Louisville Trust Co. v. Louisville etc. Rwy. Co., 174 U. S. 674 [941]

Your petitioner contends that this represents the purpose and the meaning of Section 77 of the Bankruptcy Act, and that in the formulation of an equitable plan for reorganization under said Section, the interests of general creditors and stockholders should never be terminated or sacrificed unnecessarily. The intendment of the Act and the public interest in the healthy maintenance of its railroads alike require that every reasonable consideration be given to the preservation of such rights. And where, as here, the appraised investment value of the assets of the Debtor, fully depreciated, still exceeds by more than $30,000,000—i. e., by more than thirty per cent—the entire debt due lienholders of the Debtor, the interest of the general creditors, to

say nothing of the stockholders, is so substantial that your petitioner believes that no plan of reorganization can be held to be fair or equitable which takes no cognizance of such interests. The valuation made by the Commission, and referred to and apparently adopted by it in its Order of June 21, 1939, fairly represents and sets forth the present fair value of the Debtor's assets. Hence the interest of your petitioner, of The Western Pacific Railroad Corporation as the other unsecured creditor, and of the stockholders, involves $30,000,000 of the property of a railroad which is today better equipped and in better operating condition than ever before in its history.

It is significant that three plans of reorganization were submitted to the Commission, one by the Debtor itself, one by a committee representing certain institutional bondholders, and one by A. C. James Co., a secured creditor. In its proposed plan of reorganization the Debtor fixed the value of its properties as of January 1, 1936, on the Interstate Commerce Commission basis, at $143,500,000, and suggested a plan of reorganization involving $78,226,003 in bonds, and 300,000 shares of [942] common stock of no-par value, and recognizing and providing for every claim, secured or unsecured, and every stockholder.

The bondholders proposed a plan of reorganization which would have authorized a total of undisturbed equipment trust, etc., obligations, bonds and preferred stock amounting to $121,764,230 together

with 500,000 shares of common stock, without par value. This plan required immediate issuance of such obligations, bonds and preferred stock aggregating $69,553,050 and of not less than 339,995 shares of stock without par value. And the bondholders' plan provided for the issuance of securities escrow certificates or rights to all creditors of every class, and to the present stockholders of the Debtor.

A. C. James Co. proposed a total capitalization of $125,096,203, involving $77,596,203 in undisturbed obligations, bonds and preferred stock and $47,500,000 in common stock.

It is not without significance as to the true present value of the property of this railroad that (1) the company itself, (2) a group of bondholders involving institutions specializing in industrial investments, and (3) the largest individual creditor of the Debtor unite in proposing capital structures which, however they differed in details, agreed upon a present value of the property in excess of $120,000,000 and upon the possibility and equitable desirability of preserving the interests of lienholders, general creditors and the Debtor.

It was, perhaps, with these considerations in mind that Commissioner Miller, in dissenting from the plan proposed by the Commission in its Report of October 10, 1938, said: "I am strongly of the view that the capitalization should be generally on the basis of original cost less depreciation amounting to over $120,000,000, which is about the same

as is proposed in two of the three plans referred to * * *. The no-par-value common stock may have little or no market value when the [943] company is reorganized, but the issuance of in the neighborhood of $30,000,000 more than the majority would authorize would give the present stockholders a chance to participate in the future profits of the reorganized company."

VI. The Commission Plan, and Theory:

The Commission now proposes, and has certified to the Court a plan of reorganization of the Debtor company (Report of June 21, 1939, P. 13, Order P. 2, 3). The following table shows the capital structure proposed by the Commission's Report of October 10, 1938, (230 I. C. C. 61, 96), and the capital structure now proposed by the Commission:

	Oct. 10, 1938	June 21, 1939
Equipment obligations	$ 3,066,117	$ 2,750,000
1st Mtge. Bonds (4%)	10,000,000	10,000,000
Income Bonds	19,716,040 (4%)	21,219,075 (4½%)
Preferred Stock (5%)	29,574,060	31,850,297
Common Stock (No-par)	31,370,300 (a)	31,944,100 (b)

(a). 313,703 shares at $100 each

(b) 319,441 shares at $100 each

The proposed effective date of the initial plan of the October 10, 1938 report was fixed as of July 1, 1938. The effective date of the modified plan set forth in the Report of June 21, 1939 is fixed as January 1, 1939.

The attention of the Court is respectfully invited, first, to the differences apparent in these

two plans promulgated within eight months of each other. The 1939 plan involves a proposed total capitalization of the reorganized company $4,036,955 higher than could be sanctioned by the Commission just eight months before. It proposes to permit a total of undisturbed obligations, bonds and preferred stock $3,463,155 higher than the maximum which in October 1938 the Commission would approve. It permits the issuance of 5,738 additional [944] shares of common stock of no-par value, but which the Commission for the purposes of financing assumes to have a value of $100 each, thereby increasing the value of the total authorized common stock to the extent of $573,800. It proposes not only to increase by $1,503,035 the aggregate of the Income Bonds to be authorized to pay claims of present secured creditors, but it goes further and proposes an increase from 4% to 4½% in the interest rate to be paid thereon. It increases the interest payable annually to the holders of these Income Bonds from $788,641.60 to $954,858.38, and thereby adds to the charges to be paid out of earnings, before dividends can be paid, the sum of $166,216.78 over the maximum which in October 1938 the Commission thought wise.

These differences are respectfully urged upon the attention of the Court for the reason that they demonstrate clearly the fundamental fallacy of the basic, underlying theory upon which the Commission has promulgated its plan, a theory which your petitioner contends is without support in the law

of the land, unauthorized by the provisions of Section 77 of the Bankruptcy Act, and which would, if it were adopted as a standard for reorganization of the railroads of the country, result in wholesale destruction of investment values and drive investors out of the market for railroad securities.

This basic and confiscatory theory is simply that the Commission will not approve a capital structure in a plan of reorganization unless a material and immediate return on the common stock of the proposed reorganized company is to be expected. Upon this novel and startling "earnings theory" of capitalization the Commission Plan proceeds to appropriate $120,000,000 in sound values to the payment of secured liens amounting only to $87,888,660. The Report of the Commission (Oct. 10, 1938, page 40) states that Section 77 of the Bankruptcy [945] Act provides that the approved plan should be "compatible with the public interest." It states that "the public interest is not defined" in the Act, but it assumes that "the capitalization should not exceed a conservative appraisal of the assets to be taken over by the reorganized company, and that proposed charges, whether fixed or contingent, be within its probable earning power." The Commission then argues (page 41) that the capital structure of the reorganized company must be "realistically related" to its actual earning power, and concludes that consideration is to be given to the investment in the property "only to the extent that such investment is justified by probable earn-

ings reasonably foreseeable for the future." Conceding that "it is true that considered alone, the data pertaining to the rate-making value of the Debtor's property, and its investment, would support capitalizations approximating those proposed plans," (i. e. $125,000,000 to $150,000,000), the Commission nevertheless thinks "those factors cannot be of controlling importance" and holds that "the capitalization of the reorganized company must be maintained within strict limits if any material return on its capital stock is to be expected and the shares of stock are not to become mere tokens of stock market speculation." Making no reappraisal of the Debtor's property, and ignoring the valuation which the Commission itself has placed upon it (fixed as of Dec. 31, 1935 by the Commission Report of October 10, 1938, page 25) at $139,600,455, the Commission sets up a plan which deprives the general creditors and stockholders of this company of any interest or participation therein.

The basis for its conclusions lies, apparently, wholly in the statement of the earnings of the Debtor during the period 1926-1936, which, it states, provided consolidated net income for the payment of interest on funded debt as follows: (Report Oct. 10, 1938, p. 20). [946]

Year		Operating ratio Percentage
1926	$4,759,282	70.3
1927	2,674,494	79.2
1928	2,964,371	80.3
1929	2,529,846	83.2
1930	1,552,487	84.0
1931	186,708 (deficit)	91.0
1932	252,706	85.8
1933	674,007	83.0
1934	1,084,244	81.1
1935	805,589	83.7

But the background of these figures is of greater importance than the figures themselves. During that period this railroad in common with every other road, and every other corporation in the United States was confronted with the greatest business depression in the history of America. Dividends were discontinued and an improvement and rehabilitation program was undertaken. From 1927 to date a total of $16,600,000 was expended in the revision, renewal and rehabilitation of its properties and equipment, approximately half of which the Commission required to be charged as operating expenses. Of this $8,782,000 has been expended under the supervision of this Court since 1936, so recently that as yet the benefits of inevitable increased earnings are not fully realized. In 1931 and 1932 the company completed at a cost of approximately $10,000,000 its Northern California Extension, connecting with the Great Northern Railway and enormously increasing the ultimate, prospective income and net earnings of the Company. A very large portion of the present indebtedness of the company

results from these long-time, statesmanlike improvements and additions which must ultimately be reflected in enhanced business and earnings.

[947]

To assume that, in the depths of the greatest depression, any railroad should necessarily earn immediate net profit sufficient to carry fixed charges on these improvements is almost an absurdity. To argue that by reason of the Debtor's temporary inability to do so, the value of such additions to its assets must be written off as worthless and that future reasonable earnings cannot be expected to justify them is to fly in the face of the facts of our economic history. The facts are all in the record. The management of the Debtor, upon the basis of its performance, is entitled, you petitioner believes, to the confidence of the Court and the creditors whose interests are here involved. The earnings of the road are steadily increasing, under excellent management. In the first nine months of 1939 Total Railway Operating Revenue increased $1,728,278.89 as compared to the same months of 1938. Operating Expenses were reduced $745,252.62, resulting in a net gain in Revenue from Railway Operation of $2,473,531.51 in one year. Its properties are in better condition than ever before in its history. The country is steadily climbing out of the depression. The gross and net earnings, not of the Debtor alone, but of every major railroad in the country are increasing.

Yet in the face of these favorable conditions and increasing earnings, the Commission Plan

says, in effect, to the general creditors: "We were able in October 1938 to authorize the issuance of enough securities in the reorganized company to amount to more, taking the no-par value stock at $100, than the total claims of all the creditors, but we gave it all to the secured creditors. We more than paid their claims. We are now, in June 1939, more optimistic about the value of this property and its probable earnings. We are now able to make the authorized capitalization of the company $4,000,000 more than we thought we could last October. We can add nearly $3,500,000 to [948] undisturbed obligations, bonds and preferred stock. We can even increase the rate of interest to be paid on them $166,000 a year, to make them more valuable. And finally we are now sufficiently sure that the new shares of stock will not become "mere tokens of stock market speculation" that we can even grant an increase of nearly $600,000 worth of these shares. But we still cannot give you any interest in this company in payment of the money you advanced to aid in creating these values. We must give it all, regardless of $30,000,000 excess of value over secured debts, to the secured creditors. We want not only to pay them full, but to pay some of them more than the total principal and interest owned. (Report June 21, 1939, pages 13, 14). We therefore hold your claims without value."

VII. Section 77 and the Commission Theory:

Your petitioner contends that the limitation upon capitalization which is embodied in the plan now before the Court is not authorized and can-

not be justified by and specific limitation within the four corners of Section 77. The only limitation definitely indicated by the Act is to be found in Subsection (b) (4), which refers only to securities to be issued which set up fixed charges, "that, after due consideration of the probable prospective earnings of the property in the light of its earnings experience and all other relevant facts, there shall be adequate coverage of *such fixed charges* by the probable earnings available for the payment thereof." And in Subsection (e) the Act further requires that a plan of reorganization be approved only if, besides complying with the provisions of Subsection (b), "it is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes [949] of creditors and stockholders." It is contended by your petitioner that the provisions of Section 77 contemplate and require (1) that the capitalization of the reorganized company is to be determined only upon the basis of the appraised value of the property involved; (2) that "earnings" are not the only measure to be used for the purpose of determining the aggregate of new securities to be authorized; (3) that nothing in the Act authorizes or requires any restriction upon capitalization to insure common stock dividends; (4) that under the law of the land, wherever the property of the debtor exceeds in appraised value

the sum total of all the claims against it, no plan can be fair and equitable which accounts the claims of unsecured creditors and the interest of stockholders as worthless.

> "A proceeding under #77 is not an ordinary proceeding in bankruptcy. It is a special proceeding which seeks only to bring about a reorganization, if a satisfactory plan to that end can be devised. And to prevent the attainment of that object is to defeat the very accomplishment of which was the sole aim of the Section, and thereby render its provisions futile."
>
> Continental Illinois National Bank & Trust Co. v. Chicago, Rock Island & Pacific Rwy. 294 U. S. 648, 676

The unsoundness and unfairness of the "earnings theory" upon which the limitation of capitalization is fixed in the Commission Plan is nowhere better demonstrated than in a comparison of the Plan outlined and approved October 10, 1938, and the Plan approved June 21, 1939. If the Commission was right in Plan of 1938, no increase in capitalization could be sanctioned in 1939 except because increased earnings subsequent to October 1938 showed that the railroad could earn and pay interest and dividends on a larger capital structure. If the Commission is now right in adding $4,000,000 to the proposed capital structure, in June 1939, then quite obviously its "guess" as to the capitalization which prospective earnings would reasonably support, made in October 1938, was wrong.

[950]

On June 21, 1939, the date of the present Order of the Commission, the Chairman of the Commission, Mr. Eastman, appeared before the Special Subcommittee on Bank and Bankruptcy of the Committee on the Judiciary of the House of Representatives. He there made the following wise and pertinent statement:

> "Any estimate of the future earnings of a railroad can at best be no more than an 'educated guess,' but there has never been a time in the history of the country when it has been more difficult to make such a guess than now. Anything remotely approaching accuracy is impossible. . . . To deprive thousands of investors who in the past have put their savings into railroad securities of all hope of recoupment is a very serious step, for if our capitalistic society is to succeed, it demands as scrupulously fair treatment of investors as of labor."

Your petitioner contends that Section 77 nowhere implies or authorizes the setting up of a capital structure on this basis.

VIII. The True Basis of Value:

The primary measure contemplated by Section 77 for determining the limits of the capital structure of a company reorganized under that Section, and for the allocation and distribution to the creditors and stockholders of the debtor company, is simply the fair, reasonable depreciated value of the investment in the property which it employs in

rendering its services to the public and the nation. This property, so appraised and valued, constitutes a trust fund for the benefit and security of lien-holders, creditors and shareholders, alike, available subject to prior rights which the law recognizes and will enforce, for satisfying in an equitable manner the claims and interests of these parties. The law sanctions no drastic and arbitrary reduction or limitation of such a capital structure based entirely upon estimates of earnings derived not from the entire history of 22 years of operation, but drawn solely from the reduced earnings of a world wide depression period from which it is already emerging. [951]

Property rights do not disappear simply because no high return can be realized at present or guaranteed for the immediate future. And immediate and present payment of interest, dividends, or income is by no means the only, or even the most important index of value. Fortunes have been made, in every important city in America, by the purchase of unimproved land, upon which for many years the owners paid taxes without immediate income of any sort. Banks and shrewd private investors purchase short term government obligations with an exceedingly low interest rate, mere fractions of one per cent, at times. The proceeds of an insurance policy, left with the company, to bear a low rate of interest and payable for the life of the beneficiary may be of far more certain value than

the same money invested in an industrial enterprise paying three to four times as high an interest return. It is a matter of common knowledge that in the City of San Francisco within recent years, every one of the principal hotels was vacant and unused for a period of months, by reason of a temporary crisis caused by a strike of hotel employees. The value of the properties involved was not thereby wiped out in toto. As of the time of the filing of these objections, the municipal wharves and terminal facilities, as well as private terminals on both sides of San Francisco Bay have been idle for similar reasons. This does not necessarily mean a complete destruction of the value of the property. Temporary business crises affect the immediate earning power of invested capital, but investment values are to be determined, soundly, by reference only to long-term earnings under normal conditions.

The true value of a railroad in so far as it is affected by its earnings, is determined by what it has earned and can earn under reasonably normal conditions. What a railroad can earn in the future cannot, for this purpose, be determined by its earnings during an unprecedented depression and in the [952] abnormal circumstances resulting from the pendency of Section 77 proceedings.

IX. The Commission Plan and the Public Interest:

In the promulgation of its plan, the Commission refers to the phrase in Section 77, Subdivision

(d) which provides that the plan approved by the Commission shall be one that will, in *its opinion*, be "compatible with the public interest." This phrase is not repeated in Subdivision (e), but it appears perfectly obvious from the provisions of the latter section that if, upon hearing and consideration of objections to a proposed plan, the Court finds such plan wanting in respect to the standards set forth in Subdivision (e), modifications of the proposed plan may be made, and the plan *as modified* may still be entirely "compatible with the public interest."

And your petitioner insists, with all deference to the Commission, that a plan which wipes out 25% of the true value of the Debtor's property by a drastic and unnecessary forced reduction of capitalization, based upon earnings during a depression period only, is not compatible with the public interest. If, as here, such plan renders the legitimate, undisputed claims of general creditors and stockholders worthless, it is not fair and equitable, but confiscatory and discriminating.

The public interest is in no wise better served than by the preservation and protection of sound investment of private capital. No single thing could more clearly or certainly destroy the use of common stock as a means of financing railroad properties than the confirmation by the Courts of this unsound theory of the Commission. Railroad earnings are subject to the regulations and restructions imposed by the Commission. They are also subject, like the

earnings of other corporations, to the vicissitudes of business cycles. Because of the large capitalization necessarily required and the public nature of the service [953] rendered, it is peculiarly important and in the public interest that such investments, when made by the private investor, shall be in the nature of conservative, long-term investments. Security of investment coupled with a fair but by no means high return is to be desired. It is in the public interest, emphatically, that men shall be able to invest in, or extend credit to, the railroads of the land, who are more concerned with the safety of the investment than with the payment of dividends. There could be no more deadly blow to railroad credit than for the Commission to adopt, with the approval of the Courts; the position that, at the end of any downward cycle of business prosperity and decreased earnings, reorganization of railroads would be permitted upon a plan which, ignoring investment values and normal earnings on them, would render the claims of unsecured creditors and stockholders valueless. Safe extensions of credit to railroads would thereafter be impossible, except where secured by mortgages on the property. Common stock would disappear as a safe medium of investment and shares issued on whatever basis would indeed become "mere tokens of stock market speculation."

The principal here involved transcends the boundaries of the case now before this Court. It affects directly the welfare of every railroad in the country.

Your petitioner contends that there is nothing incompatible with the public interest, in the instant case, in a capitalization fairly based on the true values of the Debtor's property, by the structure of which the issue of bonds and preferred stock to the secured creditors might be authorized to the extent necessary to pay their claims and *in addition by authorizing the issue of common stock, of no-par value, sufficient fairly to satisfy the claims of the two general creditors and of the stockholders.* Since such shares are without par value, there is no reason why, except for the purpose of [954] equitable division among the claimants, any dollar amount of capitalization should be fixed thereon. The essential characteristic of common stock with no par value is simply that it represents a fractional interest in property, whatever the value of the property may be. The total number of such shares represents only the number of units into which the equity in the reorganized company is divided. Save for purposes of distribution to satisfy claims, there is no more reason to allocate a value of $100 to such proposed stock than $200, or $25, or $1. Nor is there any reason for assuming that such shares when issued must or should earn $3 per share, or $6, or any other amount. The shares in the aggregate represent the whole equitable ownership of the property. Their value is fairly and precisely determined by the division of the net earnings, after payment of bond interest, fixed charges and dividends on preferred stock, among the holders of such no-par-value stock.

"A plan of reorganization must meet two requirements: it should give to each creditor and stockholder the value of his interest in the property, and it should fully recognize the priority of claims."

In re Dutch Woodcraft Shops—14 Fed. Supp. 467

The primary right of unsecured creditors to the assets of an insolvent corporation remaining after lienholders are satisfied, must be adequately protected.

Kansas City Terminal Rwy. v. Central Union Trust Co. 271 U. S. 445

But this rule does not require the impossible and make it necessary to pay an unsecured creditor in cash, as a condition of stockholders retaining an interest in the property. His interest can be preserved by the issuance to him on equitable terms of shares of stock, preferred or common.

Northern Pacific Rwy. Co. v. Boyd, 228 U. S. 482, P. 508 [955]

And where a plan is not fair and equitable as a matter of law, it cannot be approved by the Court, even though the percentage of the various classes of security holders required for confirmation of the plan has consented.

"Congress has required both that the required percentages of each class of security holders approve the plan and that the plan be found to be fair and equitable. The former is not a

substitute for the latter. The court is not merely a ministerial register of the vote of the several classes of security holders. All those interested in the estate are entitled to the court's protection. . . . Every important determination by the court calls for an informed, independent judgement."

National Surety Co. v. Coriell, 289 U. S. 426, p. 436

See also Taylor v. Standard Gas & Elec. Co. 306 U. S. 307

and Case v. Los Angeles Lumber Products Company, Ltd.-U. S. (decided Nov. 6, 1939)

It is true that the three cases just cited arose and came before the court under Section 77B, but your petitioner believes and contends that the principles applied by the Supreme Court in interpreting Section 77B are essentially the same as the principles to be applied to the interpretation of Section 77, and to cases arising thereunder.

X. Treatment of Secured Creditors discriminatory and Unfair as to General Creditors:

Your petitioner believes and the valuation made by the Commission indicates that the value of the Debtor's property is $120,000,000. The Commission Plan proposes to turn over the property of the Debtor to the reorganized company upon a new capital structure, as follows:

Undisturbed Equipment Trusts and Leases	$ 2,750,050
New First Mortgage 4% Bonds	10,000,000
New Income Mortgage 4½% Bonds	21,219,075
New 5% Participating Preferred Stock	31,850,297
Total Securities Prior to Common Stock	$65,819,422

And 319,441 shares of Common Stock without par value. [956]

By the allocation of all of the bonds, preferred and common stock of the new company to the present secured creditors, the Plan appropriates the entire $120,000,000 of the Debtor's assets to the satisfaction of secured claims which involve but $87,880,660. Your petitioner contends that this involves an overpayment of the claims of secured creditors, and renders the proposed Plan unfair and inequitable as to all interests junior thereto, and is an appropriation of the property of your petitioner without due process of law and in violation of the law of the land.

Your petitioner contends that securities in the reorganized company should be authorized in an amount sufficient to equal in full the claims, including principal and interest, of the holders of existing first mortgage bonds, the Reconstruction Finance Corporation, the Railroad Credit Corporation, and A. C. James Company, in the form of new Income Bonds and Participating Preferred Stock and issued to each such class of secured creditors; that the value of the property still remaining, which would be approximately $32,000,000, should be al-

located to the general creditors and present shareholders, in the form of common stock without par value; that such common stock should be issued in payment of the claims of your petitioner and The Western Pacific Railroad Corporation as general creditors to be taken at $100 per share, and the residue of such shares then remaining should be issued to The Western Pacific Railroad Corporation as the owner of the preferred and common stock of the Debtor Company.

XI. Amendments to Plan Requested by your Petitioner:

Your petitioner respectfully asks that the Plan promulgated by the Commission be referred back to the Commission, as provided in Section 77 (e), for correction and modification in respect to the matters hereinabove set forth, and in [957] conformity with the law of the land, and particularly as follows:

1. By amending the Order of June 21, 1939, Subdivision B, page 2, to provide for the authorization of the New Income Mortgage 4% Bonds of the face value of one-half of the aggregate claims against the Debtor to January 1, 1939, including accrued interest, held by each of the secured creditors, including the present First Mortgage Bondholders, the Reconstruction Finance Corporation, the Railroad Credit Corporation and A. C. James Company; and for the authorization of new 5% Participating Preferred Stock of the face value

of one-half of the aggregate of the claims, including interest.

2. By amending the Order of June 21, 1939, Subdivision P, paragraph 2, 3, 4 and 5, to provide that the present First Mortgage Bondholders, the Reconstruction Finance Corporation, the Railroad Credit Corporation and A. C. Jones Company shall each receive for its existing claim, including accrued interest to January 1, 1939, new Income Mortgage 4% Bonds to the extent of one-half thereof, and new 5% Participating Preferred Stock to the extent of one-half thereof.

3. By amending Subdivision P, paragraphs 6 and 7, of the Plan, page 28, Order of June 21, 1939, to provide as follows:

P. 6—The Western Realty Company shall receive for its unsecured claim of $50,000, together with interest accrued thereon to January 1, 1939, in the sum of $11,667, 617 shares of common stock without par value; and The Western Pacific Railroad Corporation shall receive for its unsecured claim of $5,768,746 together with interest accrued thereon to Januray 1, 1939 in the sum of $1,980,475, 77,492 shares of comon stock without par value.

P. 7—The Western Pacific Railroad Corporation, as the owner of all of the 283,000 shares of the preferred stock, and all of the 475,000 shares of the common stock of the Debtor, shall receive for its holding 241,332 shares of common stock without par value.

Wherefore, your petitioner respectfully prays (a) that the Court return the Commission Plan to the Interstate [958] Commerce Commission with its recommendation that it be corrected and amended as herein set forth; (b) that unless said Commission Plan be so corrected and amended, it be disapproved by the Court as unfair, inequitable and discriminatory to your petitioner as well as to other parties in interest and as not being in conformity with the law of the land; and for such other and further relief as the Court may deem just and proper.

THE WESTERN REALTY COMPANY

[Endorsed]: Filed Dec. 8, 1939. [959]

[Title of District Court and Cause.]

STIPULATION AS TO FACTS NOT IN DISPUTE*

Whereas the Debtor has been in process of reorganization under Section 77 of the Federal Bankruptcy Act since August 2, 1935; and

Whereas hearings have been held before the Interstate Commerce Commission (hereinafter referred to as the Commission) and a Report and Order on Further Consideration approving a modified plan of reorganization for the Debtor [960] has been issued by the Commission under date of June 21, 1939; and

Whereas such plan of reorganization (hereinafter referred to as the Commission Plan) together with the record before the Commission has been certified to the Court herein; and

[Clerk's Note: *The Stipulation as to Facts not in Dispute has been amended to conform to Exhibit "N" thereto, Memorandum of Corrections and changes in 'Stipulation as to Facts not in Dispute'" and such Exhibit "N" will not be hereinafter set forth.]

Whereas the parties hereto desire to expedite the reorganization of the Debtor and to assist the Court in the determination of the issues before it by agreeing upon certain of the undisputed facts relating to such issues:

It is hereby stipulated and agreed by the parties to the proceedings herein:

1. For the purpose of aiding the Court in the determination of the issues, and for the purpose of any appeal, the parties hereto have entered into this Stipulation of Facts, which includes (a) facts which appear in the testimony and exhibits in the record certified to the Court by the Interstate Commerce Commission, and (b) additional facts not in dispute. Subject to the reservations hereinafter contained, the matters of fact hereinafter set forth may be treated by the Court as facts proved in open court. Notwithstanding this stipulation, the record in the proceedings before the Interstate Commerce Commission (Finance Docket No. 10913), and the exhibits filed therein, shall be a part of the record before this Court, and may be used by any party on argument or brief (free from the objection that any such facts from the Commission record or exhibits tend to limit, control or qualify facts herein set forth), and may be the basis of findings by the Court. The materiality, relevancy or [961] competency of any fact herein set forth may be disputed by any party, except that no objection based on the best evidence rule may be made. Any party may

call witnesses and offer any proof for the purpose of proving such additional facts as such party may see fit, free from the objection that such additional facts tend to limit, control or qualify facts herein set forth. All figures and statistical data are subject to check prior to the date set for the hearing in this proceeding. The Trustee under the General and Refunding Mortgage reserves the right to contend that it is not bound by any evidence offered before the Commission before it became a party to the proceedings before the Commission. [962]

2. The Debtor is a railroad corporation organized and existing under the laws of the State of California. On and prior to August 2, 1935, it was engaged in the operation of its railroad and properties as a common carrier of persons and property for hire in interstate and intrastate commerce in and between the States of California, Nevada and Utah, and was not a street, suburban or interurban electric railway. On August 2, 1935, and for more than six months prior thereto, it had its principal operating office in the City of San Francisco, in the State of California, in the Northern District of California, Southern Division.

3. On August 2, 1935, the Debtor filed its petition in the Court stating that it was unable to meet its debts as they matured and that it desired to effect a reorganization under Section 77 of the Federal Bankruptcy Act, as amended. Simultaneously therewith it filed a copy of said petition with the Interstate Commerce Commission. On said date the

Court, being satisfied that said petition complied with said Section 77 and had been filed in good faith, entered an order approving said petition as properly filed and authorizing and directing the Debtor, pending further order of the Court, to continue in possession of and to operate its railroad and properties wherever situate and otherwise to manage, operate and conduct its business subject to the supervision and control of the Court. Pursuant to said order and supplemental orders entered herein, the railroad and properties of the Debtor were operated by the Debtor as from August 1, 1935, to November 13, 1935.

4. On August 2, 1935, the Court entered an order which, among other things, restrained and enjoined all persons [963] and corporations holding collateral theretofore pledged by the Debtor as security for its notes or obligations from selling, converting or otherwise disposing of such collateral or any part thereof until further order of the Court. Said restraining order and injunction has not been modified or revoked.

5. On August 31, 1935, the Court entered an order that a hearing be held on September 23, 1935, for the appointment of one or more Trustees of the Debtor's property. Notice having been given and published as provided in said order, and said notice having been in accordance with the provisions of paragraph 1 of Subsection (*e*) of said Section 77, hearings were had before the Court on September 23, 1935, for the appointment of Trustees. After

said hearings, the Court on September 23, 1935, appointed T. M. Schumacher, chairman of the Executive Committee of the Debtor, Charles Elsey, President of the Debtor, and Sidney M. Ehrman, who within one year prior to the date of the order had not been an officer, director or employee of the debtor corporation, or of any subsidiary corporation, or any holding company connected therewith, as Trustees of the properties of the Debtor, said appointment to become effective as of the beginning of business on October 1, 1935, upon ratification thereof by the Interstate Commerce Commission as provided in Subsection (c) of said Section 77.

6. On September 30, 1935, said order was modified by an order of the Court to provide that appointment of said Trustees should be effective as of the beginning of business on the first day following the ratification of said appointments by the Interstate Commerce Commission. On October 30, 1935, the Interstate Commerce Commission entered its order ratifying the appointment of Messrs. Schumacher and Ehrman as Trustees. [964]

7. Thereafter, by order entered November 9, 1935, the Court fixed the amounts of the bonds of the Trustees and confirmed the appointment of Messrs. Schumacher and Ehrman as such Trustees. Thereupon, on November 13, 1935, the Trustees qualified and began, and have since continued, to operate the business of the Debtor, subject to the control of the Court and subject to the jurisdiction of the Interstate Commerce Commission.

8. By ex parte order entered August 20, 1935, the Court divided the creditors and stockholders of the Debtor into the following classes:

(1) First Mortgage 5% Bonds, hereinafter called the First Mortgage Bonds ($49,290,100), principal amount, issued under the First Mortgage executed July 14, 1916, as of June 26, 1916 (hereinafter called the First Mortgage) by the Debtor to First Federal Trust Company and Henry E. Cooper, Trustees (Crocker First National Bank of San Francisco and Samuel Armstrong, successor Trustees). Said bonds provide that interest shall be paid on the principal amount thereof at the rate of 5% per annum from the date of issue to the date of payment. No interest has been paid thereon since September 1, 1933, except $250.00 on Coupon No. 38 due March 1, 1935, paid November, 1935. Unpaid interest from September 1, 1933, to August 2, 1935, computed at 5% amounts to $4,730,480.42 and from August 2, 1935, to January 1, 1939, amounts to $8,413,546.24, or an aggregate of $13,143,776.66.)

(2) General and Refunding Mortgage Bonds, hereinafter called the Refunding Mortgage Bonds ($18,999,500 principal amount issued under the General and Refunding Mortgage executed February 29, 1932, as of January 1, 1932 (hereinafter called the Refunding Mortgage) by the Debtor to The Chase National Bank of the City of New York, Trustee (Irving Trust Company, successor Trustee). None of such Bonds has been issued except by way of pledge as hereinafter stated. The entire $18,-

999,500, principal amount, thereof are pledged as collateral under the loans of the Debtor held by A. C. James Co., Reconstruction Finance Corporation and The Railroad Credit Corporation. Said bonds provide that interest shall be paid on the principal amount thereof at the rate of 5% per annum from the date of issue to the date of payment. No interest has ever been paid thereon.)

(3) The Debtor's secured promissory notes to A. C. James Co. ($4,999,800, face amount. Said notes provide [965] that interest shall be paid on the face amount thereof at the rate of 5% per annum from the date of issue to the date of payment. No interest has been paid thereon since January 1, 1934. Interest from January 1, 1934, to August 2, 1935, computed at 5% amounts to $396,511.92 and from August 2, 1935, to January 1, 1939 (the effective date of the Plan) amounts to $853,438.08, or an aggregate of $1,249,950. Said notes are secured by the pledge of $6,249,500, principal amount, of Refunding Mortgage Bonds, Series A, of which $2,000,000, principal amount, are subject to the prior lien of The Railroad Credit Corporation as pledgee, A. C. James Co. having repledged said $2,000,000, principal amount, of such Bonds with the Railroad Credit Corporation as additional collateral security for the Debtor's note to the Railroad Credit Corporation.)

(4) The Debtor's secured promissory notes to Reconstruction Finance Corporation ($2,963,000, principal amount. Said notes provide that interest

shall be paid on the principal amount thereof at the rate of 6% per annum from the date of issue to the date of payment. No interest has been paid on said notes since November 30, 1933, January 26, 1934, December 25, 1933, December 29, 1933, and February 1, 1934, respectively. Interest from said respective dates to August 2, 1935, computed at 6%, amounts to $393,691, and from August 2, 1935, to January 1, 1939, to $506,179, or an aggregate of $899,869.98. Said notes are secured by the pledge of $10,750,000, principal amount, of Refunding Mortgage Bonds ($8,750,000, Series A and $2,000,000 Series B); by the pledge of voting trust certificates for 150,000 shares of Common Stock of the Denver and Rio Grande Western Railroad Company (being 50% of the outstanding voting stock of The Denver and Rio Grande Western Railroad Company) pledged with Reconstruction Finance Corporation by The Western Pacific Railroad Corporation, sole stockholder of the Debtor; and by second lien upon $2,000,000, principal amount, of Refunding Mortgage Bonds, Series A, pledged with The Railroad Credit Corporation).

(5) The Debtor's secured promissory notes to The Railroad Credit Corporation. ($2,445,609.88, principal amount. Said notes bear interest at varying rates from date of issue to the date of payment. No interest has been paid thereon since December 29, 1933. Interest from said date to August 2, 1935, computed at the rates provided in the notes amounts to, after deducting application of collateral re-

ceipts, $57,307.94 and from August 2, 1935, to January 1, 1939, to $88,006.29, or an aggregate of $145,314.23. Said notes are secured by the pledge of $4,000,000, principal amount, of the Refunding Mortgage Bonds ($2,000,000 Series A and $2,000,000 Series B), of which $2,000,000 principal amount, Series A, were repledged with it by A. C. James Co. In addition, such notes are secured by a second lien upon all the securities pledged with Reconstruction Finance Corporation as collateral security for notes of the Debtor held by Reconstruction Finance Corporation; by a first lien on the Debtor's distributive share in the fund established under the Marshalling and Distributing Plan, 1931; by a first lien on the advances from the Western Pacific Railroad Corporation to the Debtor [966] in the sum of $5,494,722; by a first lien on the advances made by the Western Pacific Railroad Corporation to Standard Realty and Development Company in the sum of $120,000; and by a lien on the advances made by The Western Pacific Railroad Corporation to Sacramento Northern Railway in the sum of $856,260, subject as to said latter advances to any and all rights and claims in respect thereof, if any, of the trustees or holders of any of the bonds issued under the First Mortgage).

(6) Equipment obligations to Baldwin Locomotive Works (assigned to Fidelity-Philadelphia Trust Company). $188,799, principal amount, outstanding as of January 1, 1939).

(7) Equipment Trust Certificates (Series B) under agreement dated March 1, 1923. (The Chase National Bank of the City of New York, Trustee. As of January 1, 1939, all of said Equipment Trust Certificates had been paid off and discharged or moneys for the payment thereof had been deposited with the Trustee under said Equipment Trust Agreement.)

(8) Equipment Trust Certificates (Series C) under agreement dated March 15, 1924. (The Chase National Bank of the City of New York, Trustee. As of January 1, 1939, all of said Equipment Trust Certificates had been paid off and discharged or moneys for the payment thereof had been deposited with the Trustee under said Equipment Trust Agreement.)

(9) Equipment Trust Certificates (Series D) under agreement dated May 1, 1929. (The Chase National Bank of the City of New York, Trustee. $365,000, principal amount, of such Certificates were outstanding as of January 1, 1939. $73,000, principal amount, of such Certificates were paid off at their maturity on November 1, 1939, or funds for the payment thereof had been deposited with the Trustee under said Equipment Trust Agreement.)

(10) The Debtor's obligations as to advances made on open account by The Western Pacific Railroad Corporation. (As of January 1, 1939, the sum of such advances was $5,768,791. No interest has been paid thereon since November 1, 1931. Interest on interest bearing portion of advances from said

date to August 2, 1935, computed at 5% amounts to $1,042,510.59, and from August 2, 1935, to January 1, 1939, to $937,918.52, or an aggregate of $1,980,429.11. Such advances are wholly unsecured.)

(11) The Debtor's obligations as to advances made an open account by the Western Realty Company. (As of January 1, 1939, the sum of such advances was $50,000. Such advances bear interest at the rate of 5% from the date of the making thereof to the date of payment. No interest has been paid thereon since May 1, 1934. Interest from said date to August 2, 1935, computed at 5% amounts to $3,131.94, and from August 2, 1935, to January 1, 1939, to $8,534.73, or an aggregate of $11,666.67. Such advances are wholly unsecured.) [967]

(12) The Debtor's Preferred Capital Stock. (As of January 1, 1939, there were outstanding 283,000 shares of the par value of $100 per share.)

(13) The Debtor's Common Stock. (As of January 1, 1939, there were outstanding 475,000 shares of the par value of $100 per share.)

(14) All other claims, obligations and liabilities of the Debtor not hereinabove specifically described. None of the foregoing claims or obligations is affected by any plan of reorganization proposed before the Commission, by the Commission Plan, or by any modification thereof proposed in the objections to said Commission Plan, except items (1), (2), (3), (4), (5), (10), (11), (12), and (13) enumerated above.

9. In addition to the claims against the Debtor hereinabove in paragraph 8 described, there were issued, pursuant to the order of the Court entered October 5, 1938, as supplemented by the order entered November 7, 1938, $10,000,000, principal amount, of Trustees' Certificates of Indebtedness, dated December 1, 1938, maturing December 1, 1939, bearing interest at the rate of 3% per annum and payable semi-annually as provided in said Certificates (said Certificates having been issued and disposed of at a discount from the par value thereof by an amount that, when added to the interest at said rate of 3% per annum from the date of issuance to the date of maturity, equals the amount of interest on said certificates for the same period at a rate of 4% per annum). Pursuant to the order of the Court entered November 29, 1939, the maturity of said [968] $10,000,000 of Certificates was extended by endorsement to December 1, 1940, said Certificates to bear interest at the rate of 4% per annum, payable monthly.

10. There were also issued, pursuant to the order of the Court entered January 27, 1937, $2,320,000, principal amount, of 3% Equipment Trust Certificates, Series of 1937, dated February 1, 1937 and maturing annually in the amount of $155,000 each February 1, 1938 to 1951, inclusive, and $150,000 on February 1, 1952. The proceeds of such Certificates, which were sold at slightly above par, were used as part payment for rolling stock purchased by the Debtor's Trustees. As of January

1, 1939, there were outstanding $2,165,000, principal amount, of such Certificates.

11. On August 20, 1935, the Court, pursuant to the provisions of Paragraphs (7) and (8) of Subsection (c) of said Section 77, by order fixed September 15, 1935, as the date on or before which all claims and interests of creditors and stockholders of the Debtor should be filed or evidenced. Said order provided the manner in which such claims and interests should be filed or evidenced and required the Debtor to give notice to the corporate trustees under the Debtor's mortgages and equipment obligations, to A. C. James Co., Reconstruction Finance Corporation, The Railroad Credit Corporation, The Western Pacific Railroad Corporation and The Western Realty Company, by mailing a copy of said order to such persons or corporations at their respective addresses as shown by the records of the Debtor, and by publication of a brief summary of the order in a newspaper of general circulation published in the City of San Francisco and in [969] a newspaper of general circulation published in the Borough of Manhattan, City of New York. Such mailing and publication having been duly made as provided in said order prior to September 1, 1935, verified statements of claims or interests were filed by or on behalf of the holders or pledgees of the First Mortgage Bonds, Refunding Mortgage Bonds, and equipment obligations, as provided in said order, by the trustees under the respective mortgages or agree-

ments under which such Bonds and obligations were issued, and by A. C. James Co., Reconstruction Finance Corporation, The Railroad Credit Corporation, The Western Pacific Railroad Corporation (both as a creditor and as the sole stockholder of the Debtor) and The Western Realty Company at the time and in the manner provided in said order.

12. The Debtor, pursuant to the provisions of Paragraph (4) of Subsection (c) of said Section 77, and within the time limit set by the Court, filed with the Clerk of the Court a list of all known bondholders and creditors of the Debtor and the amounts and character of their debts, claims and securities, and the last known post office address or place of business of each bondholder and creditor, and a list of all known stockholders of the Debtor, with the last known post office address or place of business of each, copies of which list were transmitted by the Clerk to the Interstate Commerce Commission as required by the General Orders in Bankruptcy of the United States Supreme Court.

[970]

13. By orders of the Court herein entered from time to time, the following have been given leave to intervene generally in this proceeding and to become parties hereto:

Crocker First National Bank of San Francisco and Samuel Armstrong, successors of First Federal Trust Company and Henry E. Cooper, as Trustees under the First Mortgage (the Trustees for the time being in office under

the First Mortgage, whether original or successors, being hereinafter sometimes called the First Mortgage Trustees);

The Chase National Bank of the City of New York, as Trustee under the Refunding Mortgage;

Irving Trust Company, successor to The Chase National Bank of the City of New York, as Trustee under the Refunding Mortgage (the Trustee for the time being in office under the Refunding Mortgage, whether original or successor, being hereinafter sometimes called the Refunding Mortgage Trustee);

Frederick H. Ecker, John W. Stedman and Reeve Schley, as a Committee representing a group of institutional holders of substantial amounts of the Debtor's First Mortgage Bonds (hereinafter referred to as the Institutional Bondholders Committee);

A. C. James Co.;

Reconstruction Finance Corporation;

The Western Pacific Railroad Corporation; and

The Western Realty Company. [971]

14. A Plan of Reorganization was filed by the Debtor with the Court and the Interstate Commerce Commission on February 8, 1936, within the time and in the manner prescribed by Subsection (d) of said Section 77. Pursuant to said Subsection (d), the Interstate Commerce Commission,

after due notice to all stockholders and creditors of the Debtor, given by publication on February 28, and March 6, 1936, in one newspaper of general circulation in the City of San Francisco and one newspaper of general circulation in the Borough of Manhattan, City of New York, held public hearings on March 23, April 21, September 28, October 26, November 19 and December 9, 1936. Said notice of hearing also provided that plans of reorganization might be filed at any time before, or with consent of the Commission, during the hearing, by the Debtor's Trustees, or by or on behalf of creditors having not less than 10 per centum in amount of any class of creditors, or by or on behalf of stockholders being not less than 10 per centum in amount of any such class, or with the consent of the Commission, by any party in interest. In addition to the debtor's Plan, a plan was filed with the Commission on September 28, 1936, on behalf of the Institutional Bondholders Committee and on October 26, 1936, on behalf of A. C. James Co., the Commission having consented to the filing thereof. At such hearings, opportunity was given to any interested party to be heard on said Plans.

15. On or about August 1, 1937, the Bureau of Finance of the Interstate Commerce Commission issued a proposed report containing a recommended plan of reorganization to which exceptions were filed by the Debtor, the Institutional Bond- [972] holders Committee, the First Mortgage Trustees, the Refunding Mortgage Trustee, A. C. James Co.,

Reconstruction Finance Corporation and The Railroad Credit Corporation. Oral argument on said exceptions to said proposed report was had before the Interstate Commerce Commission at Washington on November 17, 1937.

16. On October 10, 1938, the Interstate Commerce Commission issued its original report and order (hereinafter referred to as the Original Report and Order) approving a plan of reorganization. The Commission transmitted a copy of said Original Report and Order, under the seal of the Commission, to the Court, which was filed with the Clerk of the Court in this proceeding on October 21, 1938, and became a part of the record herein.

17. Thereafter, on December 9, 1938, the Debtor, the Institutional Bondholders Committee, the Refunding Mortgage Trustee, A. C. James Co., Reconstruction Finance Corporation and the Railroad Credit Corporation filed their separate petitions with the Interstate Commerce Commission for rehearing and modification of said Original Report and Order and the plan of reorganization approved therein. Answers to certain of said petitions were filed with the Commission by the First Mortgage Trustees and The Railroad Credit Corporation. Proposals for modification of the Commission's Plan of October 10, 1938, were attached to or contained in such petitions. A rehearing on the basis of these petitions was granted by order of the Interstate Commerce Commission entered December

30, 1938, and oral argument on said petitions was had before the Commission on January 20, 1939.

18. Under date of June 21, 1939, the Commission [973] issued its "Report and Order on Further Consideration" (hereinafter referred to as the Supplemental Report and Order) approving a modified plan of reorganization (hereinabove and hereinafter referred to as the Commission Plan). By its said report and order of June 21, 1939, the Commission modified the original report of October 10, 1938, and revoked and rescinded the original order of October 10, 1938. Said Supplemental Report and Order were issued by the Commission prior to certifying to the Court, as required by Subsection (d) of said Section 77, the plan of reorganization approved by the Commission together with a transcript of the proceedings before the Commission and of the report and order approving the plan.

19. On or about August 1, 1939, and prior to the certifying to the Court of the Commission Plan and the record before the Commission, the Debtor filed a petition for rehearing and modification of said Commission Plan. Answers thereto were filed by certain parties. Said petition was denied by the Commission by a report and order entered September 19, 1939. Said Debtor's petition, said answers, and said report and order of the Commission of September 19, 1939, constitute a part of the record before the Commission.

20. Pursuant to the requirements of said Subsection (d) of said Section 77, the Interstate Com-

merce Commission on or about September 28, 1939, certified to the Court said Commission Plan together with a transcript of the proceeding before it and a copy of said Supplemental Report and Order approving said Commission Plan, and the same were filed in this proceeding by the Clerk of the Court on October 4, 5 and 6, 1939, and became a part of the record herein. [974]

21. On November 8, 1939, the Court, pursuant to the provisions of Subsection (e) and of Clause 8, of Subsection (c) of Section 77 of the Bankruptcy Act, entered its order fixing the time within which objections to the Commission Plan and claims for equitable treatment might be filed herein, fixing the time within which applications might be filed for expenses and fees incident to the reorganization, and fixing December 8, 1939, as the date for the filing of such objections and claims for equitable treatment and petitions for an allowance for compensation for services rendered or for expenses (including reasonable attorneys' fees) incurred in connection with the proceeding and plan of reorganization up to and including October 31, 1939, and providing for the giving of due notice by the Debtor's Trustees to creditors and stockholders, or their representatives, and all other parties in interest.

22. Pursuant to said order of November 8, 1939, objections to said Commission Plan and Claims for equitable treatment were duly filed by or on behalf of the following parties in interest:

The Debtor;

The Institutional Bondholders Committee;

The Refunding Mortgage Trustee;

A. C. James Co.;

Reconstruction Finance Corporation;

The Railroad Credit Corporation;

The Western Pacific Railroad Corporation; and

The Western Realty Company.

23. Pursuant to said order of November 8, 1939, [975] petitions for an allowance for compensation for services rendered or for expenses (including reasonable counsel fees) incurred, in connection with the proceeding and plan of reorganization, up to and including October 31, 1939, were filed by the following persons, corporations and committees:

The Debtor and its counsel;

The Institutional Bondholders Committee and its counsel;

Crocker First National Bank of San Francisco, as Corporate Trustee under the First mortgage;

Samuel Armstrong, as Individual Trustee under the First Mortgage;

The Chase National Bank of the City of New York, as Trustee (until November 13, 1936) under the Refunding Mortgage;

Irving Trust Company, as successor Trustee under the Refunding Mortgage;

A. C. James Co. and its counsel; and

Reconstruction Finance Corporation.

Said petitions fully disclosed, so far as can now be ascertained, the maximum amounts to be paid by the Debtor or by any corporation acquiring its assets for expenses and fees incident to the proceeding and the plan of reorganization through October 31, 1939.

24. By various orders entered in this proceeding the Debtor or the Debtor's Trustees have been authorized to enter into various contracts, leases and equipment agreements and leases extending beyond the period of the reorganization proceeding. The Commission Plan [976] provides for the adoption of all such contracts, leases and equipment agreements and leases by the Reorganized Company (which may be the Debtor corporation or a new corporation), and, therefore, satisfies the conditions imposed by said Section 77 or by the Court with respect to said contracts, leases and equipment agreements and leases.

25. The Debtor owns or operates 1,207.51 miles of standard gauge railroad. A main line extends eastward 924.17 miles from Oakland, California, to Salt Lake City, Utah. The Northern California Extension extends northward 11.81 miles from Keddie to Bieber, California, with operating rights from Bieber to Hambone, California—46.38 miles—over the Great Northern Railway. In addition to said main line mileage and the Northern California Extension, the Debtor has approximately 131.66 miles of branch line mileage springing from the Oakland-Salt Lake City line.

26. The Debtor's branches and the mileage thereof are as follows:

Niles Jct. to San Jose, Cal.	23.07 miles
Carbona to Moy, Cal.	4.43 miles
Terminous Jct. to Terminous, Cal.	7.92 miles
Calpine Jct. to Calpine, Cal.	12.62 miles
Hawley to Loyalton, Cal.	12.79 miles
Gulling Jct. to Bridge 6, Cal.	2.41 miles
Reno Jct. to Reno, Nevada	33.11 miles
Main Line to Oregon Short Line, Wells, Nev.	1.18 miles
Ellerbeck to M. P. 371 and Dolomite, Utah	5.85 miles
Burmester to Warner, Utah	15.52 miles
North of Stockton to Stockton	5.90 miles
Glannvale to Bradford Winery	1.61 miles

[977]

Adelaide to Hutchinson's Mill	1.01 miles
Land to Bidwell Bar	2.02 miles
Spanish Creek (Peak) Spur	0.60 miles
Blairsden to Davies Mill	1.00 miles
Gerlach to connection with Pacific Portland Cement Company's railroad	6.02 miles
Total	131.66 miles

27. The Debtor also owns an undivided one-half interest in the following:

1. Tracks owned jointly with Southern Pacific Company in Oakland, Alameda County, California—total length—4.41 miles.

2. Track owned jointly with Southern Pacific Company near Niles, Alameda County, California—total length—0.24 miles.

3. Tracks owned jointly with Southern Pacific Company in San Jose, Santa Clara County, California—total length—0.36 miles.

4. Track owned jointly with California Fruit Exchange at Graeagle—total length—0.01 miles.

5. Track owned jointly with Southern Pacific Company at Reno, Washoe County, Nevada—total length—0.17 miles.

6. Track owned jointly with Oregon Short Line Railroad in Salt Lake City, Salt Lake County, Utah—total length—0.30 miles.

28. The Debtor also owns an undivided one-third interest in the following:

Tracks owned jointly with Southern Pacific Company and Sacramento Northern Railway in Sacramento County, California—total length—0.13 miles.

29. The Debtor also operates 4.2 miles of ferry service from Oakland to San Francisco and 183.13 miles of second main track, of which 182.91 miles between Weso and Alazon, Nevada, are owned by the Southern Pacific. The territory in which the second main track is operated is [978] known as the "Paired Track" district since the lines of the Debtor and the Southern Pacific are used as a double track railroad by both the Debtor and the Southern Pacific.

30. The Debtor also owns all the outstanding capital stock of Sacramento Northern Railway, an electrically operated standard gauge freight and passenger railroad, operating 276.2 miles of road serving and connecting San Francisco and Oakland

with various Sacramento Valley cities, principally Pittsburg, Vacaville, Sacramento, Woodland, Marysville, Colusa and Oroville. 9,995 shares of the capital stock of Sacramento Northern Railway of a par value of $999,500, together with $5,213,475, principal amount, of First Mortgage Bonds of Sacramento Northern Railroad and $4,524,744 face amount of notes of Sacramento Northern Railway are physically pledged under the Debtor's First Mortgage. The Debtor also holds obligations of the Sacramento Northern Railway as to advances made on open account to it by the Debtor in the sum of $4,348,356.42, which the First Mortgage Trustees claim are subject to the lien of the First Mortgage.

31. Through its ownership of more than 97% of the outstanding capital stock of the Tidewater Southern Railway, it controls that subsidary, which operates a standard gauge steam freight line aggregating 61.38 miles of road connecting Stockton with Manteca, Escolon, Modesto and Turlock in the San Joaquin Valley of California. All of the capital stock of said Tidewater Southern Railway owned by the Debtor (1,147,968 shares of the par value of $1 per share), together with a note of said Railway in the amount of $508,278.61 due March 1, 1945, and bearing interest at the [979] rate of five per cent. per annum, payable on March 1 and September 1 of each year, is physically pledged under the Refunding Mortgage.

32. The Debtor also owns all of the outstanding capital stock of Deep Creek Railroad Company

which, prior to its abandonment in July 1939, owned and operated a standard gauge steam railroad from Wendover to Gold Hill, Utah, a distance of 46.0 miles. The capital stock of Deep Creek Railroad Company (4,500 shares of par value of $100 per share) is physically pledged under the First Mortgage. A note of Deep Creek Railroad Company in the face amount of $45,000 is physically pledged under the Refunding Mortgage, but the lien created by said latter pledge is claimed by the First Mortgage Trustees to be subordinate to the lien thereon of the First Mortgage. The Debtor also holds obligations of Deep Creek Railroad Company as to advances made on open account to it by the Debtor in the sum of $128,230.40, which the First Mortgage Trustees claim are subject to the lien of the First Mortgage.

33. The Debtor also owns all the outstanding capital stock (except directors' qualifying shares) of Standard Realty and Development Company, which has various holdings of real property. Such capital stock (4,000 shares of the par value of $100 per share) is physically pledged under the First Mortgage. A note of Standard Realty and Development Company in the face amount of $251,273.07 is physically pledged under the Refunding Mortgage, but the lien created by said latter pledge is claimed by the First Mortgage Trustees to be subordinate to the lien of the First Mortgage. The Debtor also holds [980] obligations of Standard Realty and Development Company as to advances made on open

account to it by the Debtor in the sum of $363,310.86, which the First Mortgage Trustees claim are subject to the lien of the First Mortgage.

34. Jointly operated affiliated railroad companies are:

(a) The Salt Lake City Union Depot & Railroad Company (capital stock owned 50% by The Denver and Rio Grande Western Railroad Company and 50% by Debtor). The capital stock owned by the Debtor (996 shares of the par value of $100 per share) is physically pledged under the First Mortgage.

(b) Central California Traction Company, operating an electric freight railroad from Stockton to Sacramento, California, 53.78 miles (capital stock owned one-third by Atchison, Topeka & Santa Fe Railway Company, one-third by Southern Pacific Railroad Company and one-third by the Debtor). The capital stock of the Traction Company owned by the Debtor (2,642-2/3 shares of Preferred Stock and 967-2/3 shares of Common Stock, each class of the par value of $100 per share) and First Mortgage Bonds of the Traction Company in the principal amount of $270,000 are physically pledged under the Refunding Mortgage. The Debtor also holds obligations of the Traction Company as to advances made on open account to it by the Debtor in the sum of $208,346.47, which the Refunding Mortgage Trustee

claims are subject [981] to the lien of the Refunding Mortgage.

(c) Alameda Belt Line, operating 17.85 miles of terminal switching line in the city of Alameda on San Francisco Bay (capital stock owned one-half by Atchison, Topeka & Santa Fe Railway Company and one-half by the Debtor). The capital stock owned by the Debtor (4,656 shares of the par value of $100 per share) is physically pledged under the Refunding Mortgage. The Debtor also holds obligations of Alameda Belt Line as to advances made on open account to it by the Debtor in the sum of $71,975.55, which the Refunding Mortgage Trustee claims are subject to the lien of the Refunding Mortgage.

None of the above subsidiary or affiliated companies has filed a petition under Section 77 of the Bankruptcy Act nor is any of them being operated by a receiver.

35. The Debtor, a California corporation, was organized on June 6, 1916 and as of July 14, 1916, succeeded to the railroads and other properties of the Debtor's predecessor company, Western Pacific Railway Company, sold at foreclosure on June 28, 1916, at an upset price of $18,000,000 pursuant to a plan of reorganization dated December 15, 1915, a copy of which is annexed to a copy hereof filed with the Court, marked Exhibit A. Pursuant to

said foreclosure sale, said properties of said predecessor company on July 14, 1916 were conveyed to the Debtor by a deed dated July 1, 1916, which is referred to in Clause First of the Granting Clauses of the First Mortgage dated June 26, 1916.

36. Pursuant to said plan of reorganization of the [982] predecessor company two corporations were organized: (1) The Western Pacific Railroad Corporation, a Delaware corporation, as holding company, and (2) the Debtor as purchaser of said properties at said foreclosure sale, and owner thereof.

37. Upon incorporation, the Debtor had an authorized capital stock of $75,000,000, divided into $47,500,000 of Common Stock and $27,500,000 of Preferred Stock, consisting of 475,000 shares of Common Stock and 275,000 shares of Preferred Stock of the par value of $100 each, all owned by The Western Pacific Railroad Corporation. All of said capital stock was issued in the 1916 reorganization of the Debtor's predecessor in exchange for the predecessor's First Mortgage Bonds in the aggregate principal amount of $50,000,000, the proceeds of such Bonds having been used in constructing and equipping portions of the property now owned by the Debtor. An additional $800,000 par value of Preferred Stock was on December 17, 1929 issued and sold to The Western Pacific Railroad Corporation for cash at par.

38. In addition to the $75,000,000 of capital stock, the Debtor began operations in July, 1916,

with $20,000,000 of its First Mortgage Bonds outstanding. Said Bonds had been sold in connection with the reorganization of the Debtor's predecessor. The proceeds thereof, amounting to $18,0000,000, were used as follows:

$1,000,000 held in treasury for working capital.

$15,000,000 expended for capital purposes.

$2,000,000 expended for purpose (a) of paying incorporation expenses of Debtor and its parent company and the issuance of their securities, (b) compensation of trustees and counsel fees incurred in connection with foreclosure of prede- [983] cessor company's mortgage, (c) payment of distributive shares of non-participating first mortgage bondholders of the predecessor company (approximately $900,000), (d) reorganization expenses, and (e) expenses in connection with enforcement of claims against Denver and Rio Grande Railroad Company.

39. The balance of the authorized First Mortgage Bonds were issued at various times between 1921 and 1932 and were sold at varying prices, the highest being 99.75 and the lowest 85. The principal amount of the various issues, the year of issue, the price at which sold, the proceeds realized by the Debtor, and the general purpose of the issue, are as follows:

Year Issued	Face Amount	Price	Amount Realized	Purpose of Issue
1916	$20,000,000	90%	$18,000,000	Pay certain expenses of reorganization as specified in Plan, provide working capital and finance capital expenditures thereafter under Sec. 1 of Article Second of First Mortgage.
1921	$ 4,180,000	85%	$ 3,553,000	Purchase of Sacramento Northern Railroad properties through Sacramento Northern Railway.
1922	$ 3,000,000 of 6% bonds (only 6% bonds ever issued under the Mortgage and subsequently refunded—see below.)	97.7779%	$ 2,933,337	Retire outstanding Equipment Trust Certificates.
1925	$ 4,000,000	94.25%	$ 3,770,000	General Capital Purposes.
1926	$ 2,600,000	99.75%	2,593,500	General Capital Purposes. [984]
1927	$ 2,950,000	Portion Exchanged at par for outstanding 6% bonds; portion sold and discounted at 99.517%	$2,678,500 face amount sold; produced $2,665,562.84 cash; balance $271,500 exchanged for like amount of retired 6% bonds.*	Substitution of these 5% bonds for all of the Series "B" $3,000,000 6% bonds then outstanding in aggregate amount of $2,950,000.

* $271,500 face amount of 6% bondholders elected to receive in lieu of the redemption price of the 6% bonds, 5% bonds of the new issue of the same face amount, together with a cash premium of 3%.

Year Issued	Face Amount	Price	Amount Realized	Purpose of Issue
1929	5,000,000	97.50%	4,875,000	General capital purposes.
1930	572,800	99%	567,072	Purchase of San Francisco-Sacramento Railroad Company properties through Sacramento Northern Railway.
1930	5,000,000	97.50%	4,875,000	General Capital purposes of company and of subsidiary, Sacramento Northern Railway.
Various times 1931—1932	5,000,000	97.50%	4,875,000	To finance in part construction and/or acquisition of Northern California Extension.
1931	645,000	97.50%	628,875	General capital purposes.

40. As of January 1, 1939, the effective date of the Commission Plan, $49,290,100 principal amount of the First Mortgage Bonds were outstanding. The Debtor made payment of the interest on its First Mortgage Bonds until and including the instalment due September 1, 1933. By the terms of an extension agreement between the Debtor and holders of 86.58% in principal amount of the First Mortgage Bonds, [985] interest due in the year 1934 on such Bonds and aggregating $2,133,800 was extended to January 1, 1937. The interest maturing in 1934 on the notes of the Debtor held by A. C. James Co., Reconstruction Finance Corporation and The Railroad Credit Corporation, and principal and interest falling due during the calendar year

1934 on loans of The Western Pacific Railroad Corporation, were also extended to January 1, 1937, or to such date prior to January 1, 1937, as receivers should be appointed for the Debtor or a petition under Section 77 should be filed. No interest payment on the First Mortgage Bonds has been made since September 1, 1933. I. C. C. Exhibits 117 to 123, inclusive, are true copies of the documents constituting the Debtor's Extension Agreement of 1934.

41. In 1918, the Debtor issued $3,600,000 equipment Gold Notes, Series A, and sold the same at 97.049166, the total proceeds realized therefrom aggregating $3,493,770. The outstanding balance of these Notes was retired through the issue of a like face amount of 6% First Mortgage Bonds in 1922, which Bonds were refunded in 1927 by the issuance of $2,950,000 of 5% First Mortgage Bonds.

42. In addition to the aforesaid Equipment Gold Notes issued in 1918, the Debtor, prior to the filing on August 2, 1935, of its petition for reorganization under Section 77, issued the following Equipment Trust Obligations (I. C. C. Exhibits Nos. 57 and 105):

1923—$5,600,000 5½% Equipment Trust Certificates Series "B", sold at 97.25%; amount realized $5,446,000.

1924—$3,105,000 5½% Equipment Trust Certificates Series "C", sold at 100%; amount realized $3,105,000. [986]

1929—$1,095,000 5% Equipment Trust Certificates Series "D", sold at 97.25%; amount realized $1,064,887.50.

1931—$629,330 5% Equipment Obligations (commonly referred to as Baldwin Locomotive Works Lease) issued to Baldwin Locomotive Works in payment for new locomotives. Obligations assigned to Fidelity-Philadelphia Trust Company.

43. As of January 1, 1939, all of said Series B and Series C Equipment Trust Certificates (the final instalments of which matured on March 1, 1938 and December 1, 1938, respectively) had been paid off or cancelled, or funds for their payment had been deposited with the trustees under said equipment trusts. As of January 1, 1939, there were outstanding under the Series D Equipment Trust $365,000, principal amount, of Certificates. $73,000, principal amount, of such Certificates mature on each November 1 from 1939 to 1943.

44. As of January 1, 1939, there were outstanding under the Baldwin Locomotive Works Lease $188,799, principal amount, of Equipment Obligations. $31,466.50 of such obligations mature on each seventh day of January and July from 1939 to 1941.

45. As of January 1, 1939, there were outstanding unpaid instalments amounting to $30,311.35 under a Conditional Sale Contract covering the purchase of three lounge cars from the Pullman Company. Instalments thereunder are payable monthly

at the rate of four cents per mile, the minimum monthly instalment being $2,000.

46. As of January 1, 1939, there were also outstanding $2,165,000 principal amount, of 3% Equipment Trust [987] Certificates, Series of 1937. Such Certificates are a part of a total issue of $2,320,000, principal amount, of Certificates issued and sold at slightly above par by the Trustees pursuant to an order of the Court entered January 27, 1937. $155,000, principal amount, of such Certificates mature on each February 1 from 1939 to 1951, and $150,000 on February 1, 1952.

47. Since the year 1916 the Debtor has paid dividends as follows:

Year	Dividend Declared	Dividend Paid	Rate of Dividend
1916	None	None	None
1917	None	None	None
1918	None	None	None
1919	None	None	None
1920	None	None	None

[988]

48. In the course of the year 1926, Mr. Arthur Curtiss James and certain corporations, practically all the stock of which was, and is, owned by Mr. James, acquired by purchase in the open market and now own the following shares of Preferred and Common Stock of the Western Pacific Railroad Corporation, the sole stockholder of the Debtor:

Owner	No. of Shares Preferred	No. of Shares Common	Total
Arthur Curtiss James	1,000	1,000	2,000
Curtiss Southwestern Corporation	2,000	310,690	312,690
Curtiss Southwestern Company	30,400	40,700	71,100
Total	33,400	351,398	385,790

As of January 1, 1939, said 385,790 shares constituted 40.36% of the 955,663 shares of outstanding capital stock of the Western Pacific Railroad Corporation.

49. The number of holders of common stock and preferred stock, respectively, of the Western Pacific Railroad Corporation and the number of shares held in the respective amounts set forth below are as follows:

Number of Shares Held from	Number Common Stockholders	Number Preferred Stockholders
1 to 50 Inc.	1532	2314
50 to 100 "	570	667
100 to 200 "	191	246
200 to 300 "	49	77
300 to 500 "	54	79
500 to 1000 "	38	50
Over 1000	22	41
Total	2456	3474

[989]

50. Upon a survey of operating properties of the Debtor made in 1927, after Mr. James acquired his interest in the parent company of the Debtor, it appeared that large expenditures were necessary for the rehabilitation of the Debtor's property. Dividend payments were therefore stopped and an Improvement Program initiated which contemplated the expenditure of approximately $18,000,000 to rehabilitate the Debtor's property. Approximately $8,000,000 was spent on this program before the rapid reduction in gross revenues commencing in the summer of 1929 and continuing during the subsequent depression years made the discontinuance of the Improvement Program necessary, and it was abandoned in 1931.

51. Meanwhile the Debtor had commenced the construction of the so-called Northern California

Extension, designed to connect the main line of the Western Pacific at or near Keddie, California, with the Great Northern Railway Company at or near Bieber, California. Construction of the Northern California Extension was commenced on August 16, 1930. The cost of constructing, to May 31, 1932, the Northern California Extension was $10,183,641.90. The details of the financing of the construction of said Extension are hereinafter more fully set forth.

52. The Refunding Mortgage was executed on February 29, 1932, as of January 1, 1932, with The Chase National Bank as Trustee. On November 13, 1936, Irving Trust Company was substituted as such Trustee in the manner provided for in the Refunding Mortgage. Said Mortgage authorized the issue for various purposes therein set forth of not to exceed $100,000,000 of Refunding Mortgage Bonds at any one time outstanding. [990]

53. As of January 1, 1939, $18,999,500, principal amount, of Refunding Mortgage Bonds were held as collateral to secure promissory notes of the Debtor held by A. C. James Co., Reconstruction Finance Corporation and The Railroad Credit Corporation.

54. The dates of the notes held by A. C. James Co., the dates of maturity thereof, the amount thereof and the disposition of the proceeds thereof, are as follows:

Date of Note	Date Due	Amount	Disposition of Proceeds
March 28, 1932	March 28, 1935	$4,504,000	To refund $4,504,000 of Debentures hereinafter mentioned, the proceeds of which Debentures were applied to costs of construction of Northern California Extension.
March 28, 1932	March 28, 1935	347,000	To refund $347,000 of Debentures hereinafter mentioned, the proceeds of which Debentures were applied to costs of construction of Northern California Extension.
May 31, 1932	May 31, 1935	148,800	To refund $148,800 of Debentures hereinafter mentioned, the proceeds of which Debentures were applied to costs of construction of Northern California Extension.
	TOTAL	$ 4,999,800	

I.C.C. Exhibits Nos. 9-3(a), 9-3(b) and 9-3(c) are true copies of said respective notes.

55. The dates of the Notes held by Reconstruction Finance Corporation, the dates of maturity thereof, the amount thereof and the disposition of the proceeds thereof are as follows: [991]

Date of Note	Maturity Date	Amount	Disposition of Proceeds
March 1, 1932	March 1, 1935	$799,000*	$375,000 principal installment Equipment Trust Certificates, Series B, due March 1, 1932.
			$259,000 applied to costs of construction Northern California Extension.
			$165,000 advances to subsidiary railroad companies to meet obligations due March 1, 1932.
June 29, 1932	June 29, 1935	$734,584	$14,947 interest due July 7, 1932, on Baldwin Locomotive Works contract.
			$60,637 quarterly interest due July 1, 1932, on Notes to A. C. James Co.
			$268,061 applied to costs of construction of Northern California Extension.
			$70,846 miscellaneous capital expenditures.
			$31,466 principal due July 7, 1932, on Baldwin Locomotive Works contract.
			$264,027 miscellaneous materials and supplies including fuel oil.
			$24,600 advances to subsidiary railroad companies.

*Reduced to $699,000 through the redemption at par of $100,000 First Mortgage 5% Bonds of Tidewater Southern Railway Company pledged with Reconstruction Finance Corporation as collateral. [992]

Date of Note	Maturity Date	Amount	Disposition of Proceeds
Aug. 1, 1932	Aug. 1, 1935	$ 136,045	$103,698 payment of first instalment of California gross earnings tax.
			$32,347 applied to costs of construction of Northern California Extension.
Aug. 30, 1932	Aug. 30, 1935	$1,293,440	$1,232,252.50 semi-annual interest due Sept. 1, 1932, on First Mortgage Bonds.
			$61,187.50 semi-annual interest due Sept. 1, 1932, on equipment Trust Certificates, Series B.
Mar. 25, 1933	Mar. 25, 1936	99,931	$39,294 semi-annual interest due on Equipment Trust Certificates, Series C.
			$60,637 quarterly interest due on Notes to A. C. James Co.
Total (less $100,000 payment; see footnote page 32		$2,963,000	

I.C.C. Exhibits Nos. 9-1(a), 9-1(b), 9-1(c), 9-1(d) and 9-1(e) are true copies of said respective notes.

56. The dates of the Notes held by The Railroad Credit Corporation, the dates of maturity thereof, the amounts thereof and the disposition of the proceeds thereof are as follows: [993]

Date of Note	Maturity	Amount	Disposition of Proceeds
June 29, 1932	Feb. 28, 1934	$1,303,000.00*	$1,231,500 semi-annual interest due Mar. 1, 1932 on First Mortgage Bonds.
			$71,500 semi-annual interest due Mar. 1, 1932, on Equipment Trust Certificates, Series B.
Mar. 25, 1933	March 24, 1935	$1,293,439.00	$1,232,252 semi-annual interest due Mar. 1, 1933, on First Mortgage Bonds.
			$61,187 semi-annual interest due Mar. 1, 1933, on Equipment Trust Certificates, Series B.
Total at December 31, 1938 (Less credits under the Marshalling and Distributing Plan; see footnote)		$2,445,609.88	

I.C.C. Exhibits Nos. 9-2(a) and 9-2(b) are true copies of said respective notes. Annexed hereto and made a part hereof, marked Exhibit B, is a statement of the Debtor's account under the Marshalling and Distributing Plan, 1931, showing credits in the amount of $150,829.12. Said Exhibit also sets forth

*Reduced by $150,829.12 of distributions under the Marshalling and Distributing Plan and other collateral income and proceeds (see Exhibit B hereto).

the undistributed balance of the Debtor and its subsidiaries in the Marshalling and Distributing Plan, 1931, as shown by the Books of the Railroad Credit Corporation. [994]

57. On October 4, 1929, the Interstate Commerce Commission, pursuant to Section 19(a) of the Interstate Commerce Act (49 U.S.C.A. 19 (a)), found the final valuation of the properties of the Debtor to be $63,321,000 as of June 30, 1914. (I.C.C. Exhibit No. 104; 29 I.C.C. Val. Rep 239)

58. In other proceedings (46 I.C.C. Val. Rep. 586; 46 I.C.C. Val. Rep. 540; 43 I.C.C. Val. Rep. 40) the Interstate Commerce Commission, pursuant to Section 19(a) of the Interstate Commerce Act (49 U.S.C.A. 19(a)), found the final valuation of the properties of the Debtor's wholly owned subsidiaries, Sacramento Northern Railway, Tidewater Southern Railway Company and Deep Creek Railroad Company, to be $18,123,283 as of their respective valuation dates (230 I.C.C. Val. Rep. 61, at page 76) i.e., December 31, 1927 with respect to the Tidewater Southern Railroad Company and the Deep Creek Railroad Company, and December 31, 1928 with respect to Sacramento Northern Railway.

59. On October 10, 1938, the Interstate Commerce Commission, in its report in the instant proceeding, stated that

> "If there be added to the above amounts i.e., the valuations of the properties of the Western Pacific Railroad Company and its wholly owned subsidiaries) the net costs of

additions and retirements between valuation dates and December 31, 1935, the total would be $139,600,455." (230 I.C.C. 67, at p. 76)

60. On August 2, 1937, the Bureau of Finance of the Interstate Commerce Commission, in the instant proceeding (Proposed Report of the Bureau of Finance, pp. 22 and 23), stated that the final valuation of the properties of the Debtor, as determined by the Interstate Commerce Commission [995] pursuant to the provisions of Section 19(a) of the Interstate Commerce Act (49 U.S.C.A. 19(a) as of June 30, 1914, was $63,321,000, and that in similar proceedings the Commission found the value under said Section 19(a) of the properties of the wholly owned subsidiaries of the Debtor, i.e., Sacramento Northern Railway, Tidewater Southern Railway Company and Deep Creek Railroad Company, to be $18,336,529 as of their respective valuation dates, and that

"If there be added to the above amounts capital expenditures between valuation dates and December 31, 1935, the total would be $144,619,851." (Proposed Report of Bureau of Finance, pp. 22 and 23.)

61. On August 2, 1937, the Bureau of Finance of the Interstate Commerce Commission, in the instant proceeding (Proposed Report of Bureau of Finance, p. 44), stated:

"The debtor's assets, consisting of real and personal property, have been described and its

investment in such property has been stated" i.e. $144,619,851. (Proposed Report of Bureau of Finance, p. 23.)

Which includes values of wholly owned subsidiaries of the Debtor—Sacramento Northern Railway, Tidewater Southern Railway Company and Deep Creek Railroad Company as mentioned in previous paragraph No. 60.

62. On August 2, 1937, the Bureau of Finance of the Interstate Commerce Commission, in the instant proceeding, stated the book value of the assets of the Debtor to be $171,096,992.80 as of November 30, 1936. (Proposed Report of Bureau of Finance, p. 6.)

63. On October 10, 1938, the Interstate Commerce Commission stated that the balance sheet as of June 30, 1938, of the Debtor's Trustees showed total assets of $173,650,980.19 (Commission's Report in this proceeding, p. 8.)

64. On February 27, 1932, the Interstate Commerce Commission, in its report authorizing the issuance of $15,000,000 in principal amount of general and refunding mortgage gold bonds, Series A, of the Debtor (180 I.C.C. 652; I.C.C. Exhibit No. 92, p. 4) found that the total capital [996] assets of the Debtor and affiliated companies, as of December 31, 1931, were $147,056,283.31.

65. On December 9, 1932, the Interstate Commerce Commission, in its report authorizing the issuance of $4,000,000 in principal amount of general and refunding mortgage gold bonds, Series B,

of the Debtor, found the "total capital assets (to be) $148,796,047.60" as of May 31, 1932 (189 I.C.C. 207; I.C.C. Exhibit No. 92).

66. On November 10, 1938, the Interstate Commerce Commission in its reports authorizing the borrowing of $10,000,000.00 by the Debtor's Trustees to be evidenced by Trustees Certificates stated:

> "The general balance sheet of August 31, 1938, of the Debtor and Trustees combined shows assets in the amount of $174,936,239.***" (228 I. C. C. 632).

67. On November 21, 1939, the Interstate Commerce Commission in its supplemental report authorizing an extension of payment of Trustees Certificates in the amount of $10,000,000, stated that the general balance sheet of the Debtor of August 31, 1939 "shows assets as follows*** a total of $175,263,531." (Corrected report Interstate Commerce Commission, Finance Docket No. 12213).

68. The valuation of the property of the Debtor and its subsidiaries (excluding Deep Creek Railroad Company, which was abandoned in 1939), as found by the Interstate Commerce Commission under Section 19 (a) of the Interstate Commerce Act (49 U. S. C. A. 19 (a), with additions and betterments, new lines and extensions, subsequent to date of valuation, plus non-operating properties, (all as shown by the books of the Debtor's Trustees) is as follows as of December 31, 1938: [997]

The Western Pacific Railroad Company:	
I. C. C. Valuation as of June 30, 1914, with additions and betterments, new lines and extensions, and non-operating property to December 31, 1938	$129,589,367.77
Sacramento Northern Railway, including San Francisco and Sacramento Railroad Co.:	
I. C. C. valuation as of December 31, 1928, with additions and betterments, new lines and extensions and non-operating property to December 31, 1938	19,657,709.38
Tidewater Southern Railway Company:	
I. C. C. valuation as of December 31, 1927, with additions and betterments, new lines and extensions, and non-operating property to December 31, 1938	1,660,546.34
Total Western Pacific System—December 31, 1938	$150,907,623.49

69. The total assets of the Debtor as shown upon its balance sheet, prepared in accordance with the accounting rules of the Interstate Commerce Commission, was $166,960,037.15 as of December 31, 1935. (I. C. C. Exhibit No. 10).

70. The investment made by the Debtor between June 30, 1914 (the date of its final valuation by the Interstate Commerce Commission under 19 (a) and December 31, 1935, was $77,609,391 (I. C. C. Exhibit No. 12) and if said investment is added to the said final valuation the resulting total investment is $140,930,391 as of December 31, 1935.

71. The investment in road and equipment of the Debtor and its subsidiaries (excluding Deep Creek

Railroad Company) less accrued equipment depreciation, that is, system book value less depreciation, as of [998] December 31, 1938, is as follows:

The Western Pacific Railroad Company:		
Total investment in road and equipment	$143,937,425	
Less accrued depreciation—equipment	11,084,691	$132,852,734
Sacramento Northern Railway:		
Total investment in road and equipment	9,830,709	
Less accrued depreciation—equipment	535,737	9,294,972
Tidewater Southern Railway Company:		
Total investment in road and equipment	2,874,387	
Less accrued depreciation—equipment	43,534	2,830,853
Total System investment in road and equipment (book value) less equipment depreciation		$144,978,559

72. Annexed hereto as Exhibit C is a statement of the charges for maintenance during the years 1927 to 1938, inclusive, showing the amounts charged for ordinary operating expenses and for improvement or rehabilitation program expenses.

73. As the result of the 1936-1938 rehabilitation program, there is no deferred maintenance in the Debtor's properties. Its facilities and equipment are sufficient to handle expeditiously and efficiently all traffic reasonably to be anticipated in the immediate future. [999]

74. The reported Railway Operating Revenues of the Debtor's system for the years 1922-1938, inclusive, and the first nine months of 1939, classified as between freight passenger and other revenues, respectively, are:

Year	Freight	Passenger	Other	Total
1922	$ 9,667,960	$2,184,093	$ 884,511	$12,736,564
1923	10,751,276	2,455,420	1,208,116	14,414,812
1924	11,241,579	2,106,656	1,331,078	14,669,313
1925	12,634,074	2,900,817	1,263,657	15,898,548
1926	14,259,651	2,319,151	1,372,666	17,951,468
1927	14,764,690	2,090,480	1,451,505	18,306,675
1928	15,974,137	1,870,790	1,576,924	19,421,851
1929	16,358,041	2,187,700	1,550,816	20,096,557
1930	15,450,051	1,795,834	1,573,177	18,819,062
1931	12,342,041	1,315,283	1,195,614	14,852,938
1932	10,662,430	764,977	823,664	12,251,071
1933	10,950,948	595,268	656,273	12,202,489
1934	12,338,085	629,720	811,433	13,779,238
1935	13,254,572	730,957	421,929	14,407,458
1936	15,264,675	805,673	476,996	16,547,344
1937	16,588,843	814,632	515,010	17,918,485
1938	14,934,497	680,382	442,572	16,057,451
1939	11,684,495	794,633	357,857	12,836,985
(First 9 months)				

75. The reported consolidated earnings available for interest of the Debtor and its subsidiaries for the years 1922-1938, inclusive, and the first ten months of 1939, are as follows: [1000]

1922	$2,306,124
1923	3,313,976
1924	3,144,124
1925	4,454,352
1926	4,759,282
1927	2,674,494
1928	2,964,379

1929	2,529,846
1930	1,552,487
1931	186,708 (D)
1932	252,706
1933	674,007
1934	1,084,244
1935	805,589
1936	181,102
1937	903,113 (D)
1938	1,243,916 (D)
1939 (first 10 months)	

(D) means deficit.

76. If the reported consolidated earnings available for interest for the years 1922-1938, inclusive, and the first ten months of 1939 be adjusted to take into account (a) rehabilitation expenditures in the years 1927-1931 and 1934-1938, (b) amortization of discount on First Mortgage Bonds of the Debtor in the years 1922-1938, and (c) deductions and credits in the years 1931-1934 made by the Commission to accord with its Accounting Rules and Regulations, such earnings would have been: [1001]

1922	$2,404,890
1923	4,412,234
1924	3,241,823
1925	4,557,798
1926	4,868,390
1927	3,470,861
1928	4,376,972
1929	3,718,436
1930	2,381,529
1931	220,494 (D)
1932	283,912
1933	474,365
1934	1,396,353
1935	1,377,026
1936	1,901,423

1937	1,077,407
1938	225,431
1939 (first ten months)	

(D) means deficit.

77. On July 14, 1916, the Debtor executed and delivered to First Federal Trust Company and Henry E. Cooper, as Trustees, its First Mortgage dated June 26, 1916, providing for an issue of First Mortgage Gold Bonds of the Debtor limited to $50,000,000 in aggregate principal amount at any one time outstanding. Crocker First National Bank of San Francisco and Samuel Armstrong are now the Trustees under the First Mortgage.

78. The First Mortgage was recorded in the following counties in the States of California, Nevada and Utah on the following dates:

CALIFORNIA

County	Date
San Francisco	July 17, 1916
Alameda	July 17, 1916
San Joaquin	July 17, 1916

[1002]

Sacramento	July 17, 1916
Sutter	July 17, 1916
Yuba	July 17, 1916
Butte	July 17, 1916
Plumas	July 17, 1916
Lassen	July 17, 1916
Sierra	Dec. 7, 1916
Santa Clara	Nov. 13, 1917

NEVADA

Washoe	July 17, 1916

Pershing (created from Humboldt)	

UTAH

Tooele	July 18, 1916
Salt Lake	July 18, 1916
Box Elder	July 19, 1916

79. The granting clauses of said First Mortgage are annexed hereto marked Exhibit D.

80. On February 29, 1932, the Debtor executed and delivered to The Chase National Bank of the City of New York, as Trustee, its General and Refunding Mortgage dated as of January 1, 1932, providing for an issue of General and Refunding Mortgage Gold Bonds of the Debtor limited to $100,000,000 in aggregate principal amount at any one time outstanding. Irving Trust Company is now the Trustee under the Refunding Mortgage.

81. The Refunding Mortgage was recorded in the following counties in the States of California, Nevada and Utah on the following dates: [1003]

CALIFORNIA

County	Date
Alameda	March 15, 1932
Butte	March 17, 1932
Lassen	March 14, 1932
Plumas	March 12, 1932

Tooele	April 12, 1932
Box Elder	March 18, 1932

82. The granting clauses of the Refunding Mortgage are annexed hereto, marked Exhibit E.

83. At the date of the execution of the Refunding Mortgage and at the date of the institution of this proceeding equipment trust obligations of the Debtor were outstanding under the following equipment trusts:

1. Lease and Agreement dated March 1, 1923 (I. C. C. Exhibit No. 108) under which The Chase National Bank of the City of New York was the trustee under which $5,600,000 principal amount of 5½% Equipment Trust Certificates, Series B, were originally issued, maturing serially in instalments of $375,000 each on March 1 of each [1004] year beginning

March 1, 1924, and ending March 1, 1937, with a final instalment of $350,000 maturing March 1, 1938.

2. Lease and Agreement dated March 15, 1924, under which The Chase National Bank of the City of New York was the trustee, under which $3,105,000 principal amount of 5½% Equipment Trust Certificates, Series C, were originally issued, maturing serially in instalments of $207,000 each on December 1 of each year beginning December 1, 1924, and ending December 1, 1938.

3. Lease and Agreement dated May 1, 1929, under which The Chase National Bank of the City of New York is the trustee, under which $1,095,000 principal amount of 5% Equipment Trust Certificates, Series D, were originally issued, maturing serially in instalments of $73,000 on November 1 of each year beginning November 1, 1929, and ending November 1, 1943.

4. Lease of Locomotives dated June 5, 1931, from The Baldwin Locomotive Works to the Debtor (J. C. C. Exhibit No. 109—hereinafter called the "Baldwin Lease") providing for a payment by the Debtor of $11,606.43 for each locomotive upon the delivery of two of the leased locomotives, a payment of $11,678.14 for each locomotive upon the delivery of four of the leased locomotives, and semi-annual payments over a period of ten years, dating from

the average weighted delivery dates of all the leased locomotives, in the following amounts:

[1005]

84. The Lease and Agreement dated March 1, 1923 (I. C. C. Exhibit No. 108), the Lease and Agreement dated March 15, 1924, and the Lease and Agreement dated May 1, 1929, were each in the usual Philadelphia Plan forms and provided that the equipment was let and leased to the Debtor but that title thereto was vested in the respective trustees thereunder. Each provided for the payment to the Trustee thereunder of cash equal to the difference between the cost of the equipment delivered and the principal amount of Equipment Trust Certificates issuable in respect of such equipment.

85. The average weighted delivery dates of the locomotives covered by the Baldwin Lease are set forth in I. C. C. Exhibit No. 110.

86. The equipment originally subject to said equipment trusts, and the estimated cost thereof, as set forth in the respective instruments of lease, are as follows: [1006]

(1) Lease Dated March 1, 1923

6 Heavy Mikado Locomotives, lettered W. P. and numbered 316 to 321 both inclusive.

2,000 Steel Underframe Refrigerator Cars, 146 thereof lettered W. R. L. and numbered 7001 to 7146 both inclusive (to be re-lettered P. F. E. and re-numbered 50,001 to 50,146 both inclusive); 1,854 thereof to be lettered P. F. E. and numbered 50,147 to 52,000 both inclusive.

100 Logging Cars, lettered W. P. and numbered 2601 to 2700, both inclusive;

100 Steel Underframe Automobile Cars lettered W. P. and numbered 14,001 to 14,100 both inclusive;

20 Steel Baggage Cars lettered W. P. and numbered 101 to 120 both inclusive;

20 Steel Passenger Coaches lettered W. P. and numbered 301 to 320 both inclusive;

8 Steel Dining Cars named and marked "California", "San Francisco", "Oakland", "Stockton", "Sacramento", "Pacific", "Humboldt" and "Nevada."

Estimated cost—$6,996,000.

(2) Lease Dated March 15, 1924.

5 Heavy Mikado Locomotives, lettered W. P. and numbered 322 to 326 both inclusive;

5 Mallet Locomotives, lettered W. P. and numbered 206 to 210 both inclusive;

775 Steel Underframe Refrigerator Cars, lettered P. F. E. and numbered 52001 to 52775 both inclusive;

100 Logging Cars, lettered W. P. and numbered 2701 to 2800 both inclusive;

200 Steel Underframe Automobile Cars lettered W. P. and numbered 14101 to 14300 both inclusive;

1 Jordan Spreader, equipped with composite ditching and spreading wings, lettered W. P. and numbered 9.

Estimated cost—$3,881,250.

(3) Lease Dated May 1, 1929

5 Heavy Mikado Locomotives, lettered W. P. and numbered 332 to 336 both inclusive;

50 Fifty-foot Flat Cars, lettered W. P. and numbered 2301 to 2350 both inclusive;

[1007]

50 Steel Tank Cars, lettered W. P. and numbered 1201 to 1250 both inclusive;

150 Automobile Cars with steel ends, lettered W. P. and numbered 12,001 to 12,150 both inclusive; and

100 Automobile Cars with end doors one end and steel end other end, lettered W. P. and numbered 13,001 to 13,100 both inclusive.

Estimated cost—$1,369,827.30.

(4) Baldwin Lease

Six 2-8-8-2 type simple articulated steam locomotives with separate tenders, Lessor's classification 20 46/46 1/4 EE 1 to 6, Lessee's Road Numbers 251 to 256, built as Lessor's specification 31 D 40, including modifications subsequently agreed upon.

The lease does not contain a statement as to the estimated cost.

87. In 1933 and thereafter in each year the Debtor furnished to the Refunding Mortgage Trustee, pursuant to the requirements of Section 16 of Article Five of the Refunding Mortgage, a statement purporting to be a statement of the equipment upon which the Refunding Mortgage was a lien. These statements set forth in paragraph (1) a list of equipment stated to be "not covered by any form of Equipment Trust". Paragraphs (2) to (5) of said statements contain a list of the equipment subject to the four leases last above mentioned.

88. The total principal amount of the equipment trust obligations outstanding under the above-mentioned equipment trusts as of December 31, 1935, was $2,682,598. The initial payments and all subsequent payments under the above-mentioned equipment trusts were made out of free funds or out of proceeds of loans evidenced by notes which are secured by pledge of [1008] Refunding Mortgage Bonds. No part of the cost of said equipment was financed with proceeds of First Mortgage Bonds

or cash deposited under the First Mortgage. Additional payments under said equipment trusts have been made by the Trustees of the Debtor since December 31, 1935, and since that date the Agreement dated March 1, 1923, and the Agreement dated March 15, 1924, have been satisfied.

89. The aggregate ledger value of the equipment subject to the above-mentioned equipment trusts, the accrued depreciation thereon, the depreciated ledger value, the principal amount of outstanding obligations and the book value of the equity therein as of December 31, 1935 (the nearest date to August 2, 1935, for which computations are available) are as follows:

Ledger value	$12,933,666.13
Accrued depreciation	4,087,229.69
Depreciated ledger value	8,846,436.44
Outstanding obligations	2,682,598.00
Value of equity in said equipment	$ 6,163,838.44

90. [Eliminated by agreement of the parties.]

91. The Debtor's applications dated September 30, [1909] 1930, and December 21, 1931, submitted to the New York Stock Exchange in connection with issues of First Mortgage Bonds contain an enumeration of items of equipment on which the applications state the First Mortgage constitutes a first lien. This is followed by a statement that "The foregoing equipment does not include additional unmortgaged equipment covered by Equipment Trust Agreements, Series 'B', Series 'C', and Series 'D', as follows:", the statements quoted be-

ing followed by an enumeration of certain items of equipment.

92. All of the equipment subject to the above-mentioned equipment trusts was acquired for use on all of the Debtor's lines of railroad, including those specifically described in the granting clauses of the First Mortgage and was in fact so used.

93. A schedule is being prepared showing:

(1) the number (classified as to types of equipment) of units of equipment owned by the Debtor at the date of the execution and delivery of the First Mortgage and the depreciated book value of such equipment as of that date;

(2) the number (similarly classified as to types of equipment) of units of equipment acquired by the Debtor since the date of the execution and delivery of the First Mortgage which were made the basis of the authentication and delivery of First Mortgage Bonds of the withdrawal of deposited cash (including equipment acquired under equipment trusts as to which First Mortgage Bonds or deposited cash were used to refund outstanding equipment trust certificates), and the book value of such equipment at the date of acquisition; and

(3) the following data, as of (March 1, 1923, (b) March 15, 1924, (c) May 1, 1929, (d) August 1, 1931, (e) the date of the execution and delivery of the Refunding Mortgage, (f) the date of the institution of this proceeding, and (g) January 1, 1939:

(a) The number (classified as above) of [1010] units of equipment referred to in paragraph 1 above which had been destroyed, dismantled or otherwise disposed of;

(b) The number (classified as above) of units of equipment referred to in paragraph 2 above which had been destroyed, dismantled or otherwise disposed of; and

(c) The number (classified as above) of units of equipment acquired subsequent to the date of the execution and delivery of the First Mortgage by the use of free funds or under equipment trusts and not financed with First Mortgage Bonds or deposited cash, and the book value of such equipment at the time of acquisition.

When said schedule has been identified by signature of counsel for the Debtor's Trustees, for the First Mortgage Trustees, and for the Refunding Mortgage Trustee, it may be filed with the Court and when so filed shall constitute a part of this stipulation as Exhibit G. [1011]

94. The Northern California Extension connects with the main line of the Debtor at Keddie, Plumas County, California, and extends to a connection with the Great Northern Railroad at Bieber, Lassen County, California, a distance of approximately 112 miles. It is situate entirely within the counties of Plumas and Lassen, California.

95. The original Certificate of Incorporation of the Debtor contains no specific description of or

specific reference to the Northern California Extension. On June 17, 1929, an amendment to the Certificate of Incorporation was filed which included a specific description of the Northern California Extension.

96. Construction of the Northern California Extension was commenced on August 16, 1930, and by December 31, 1930, there had been completed 32% of the grading, 16% of the tunneling, practically all of the clearing, and a large percentage of the culvert installation; construction of concrete bridge foundations was largely under way. Connection with the Great Northern Railway at Bieber was made on November 10, 1931, and freight service was then inaugurated under the jurisdiction of the construction department. Owing to the approach of the winter season, complete ballasting of the line, as well as the completion of certain other facilities was deferred until 1932. Ballasting was practically completed in 1932, and on June 1, 1932, the line was placed in full commercial operation for freight service.

97. No supplemental indenture was ever executed in terms subjecting to the lien of the First Mortgage the Northern California Extension or any part thereof. [1012]

98. The Northern California Extension has been a substantial contributor of traffic to the Debtor since its completion. Gross revenues received by the Debtor from freight originated and terminated on, and passing over the Northern California Exten-

sion as a bridge line, from 1932 to 1938, inclusive, and for the first 9 months of 1939, were as follows:

1932	$1,098,016
1933	1,491,466
1934	2,119,427
1935	2,289,858
1936	3,151,734
1937	3,425,601
1938	3,993,674
1939 (first 9 months)	2,463,489

99. The cost of construction of the Northern California Extension to May 31, 1932, was $10,183,641.90. The cost of construction was financed (1) by the sale at 97½ to The Western Pacific Railroad Corporation of $5,000,000 principal amount of First Mortgage Bonds, (2) by the sale at par to the A. C. James Company of $5,000,000 principal amount of Debentures issued under an Indenture dated July 1, 1930, executed and delivered by the Debtor to The Chase National Bank of the City of New York, as Trustee, which were in turn refunded by notes secured by the pledge of Refunding Mortgage Bonds, and (3) by loans obtained by the Debtor from the Reconstruction Finance Corporation aggregating $559,408, evidenced by notes secured by the pledge of Refunding Mortgage Bonds. [1013]

100. Under date of May 14, 1929, while the original application of the Debtor to the Interstate Commerce Commission for a certificate of public convenience and necessity for the construction of the Northern California Extension was still pending before the Commission, the A. C. James Com-

pany wrote a letter to the Debtor of which I. C. C. Exhibit No. 45 is a true copy.

101. This financing was not carried out on the basis outlined in I. C. C. Exhibit 45, but, under date of June 19, 1929, the A. C. James Company wrote another letter to the Debtor of which I. C. C. Exhibit No. 46 is a true copy.

102. The Executive Committee of the Debtor at a meeting held June 19, 1929, adopted certain resolutions, true copies of which are set forth in Exhibit VII to I. C. C. Exhibit No. 80, Mr. A. C. James being present but not voting.

103. The issue of $5,000,000 principal amount of First Mortgage Bonds to finance in part the construction of the Northern California Extension was authorized by the Interstate Commerce Commission in an order entered October 6, 1930, of which I. C. C. Exhibit No. 51 is a true copy, pursuant to an application of the Debtor dated September 9, 1930, of which I. C. C. Exhibit No. 81 is a true copy.

104. The bonds were offered from time to time at public sale to the highest bidder in blocks of $1,000,000 principal amount or less, all of them being purchased by The Western Pacific Railroad Corporation at 97½% and accrued interest. The notice, dated January 8, 1931, of which I. C. C. Exhibit No. 93, sheet 1, is a true copy, calling for bids on the first block of $1,000,000 principal amount, referred to the specifications, form of proposals and form of contract on file with the Debtor, [1014] of which I. C. C. Exhibit No. 93, sheet 2, is a true

copy. The notices, specifications and bids in connection with the sale of the remainder of the bonds were substantially identical with those contained in I. C. C. Exhibit No. 93.

105. Mr. A. C. James was then a director of The Western Pacific Railroad Corporation.

106. The bonds were authenticated and delivered by the First Mortgage Trustees pursuant to paragraph B of Section 2 of Article Second of the First Mortgage, which provides for the authentication and delivery of bonds against the deposit with the Trustees of the cash proceeds of their sale. The dates of authentication and delivery, the principal amounts of bonds authenticated and delivered, the amounts of cash proceeds deposited, and the numbers of the I. C. C. Exhibits containing true copies of the application papers furnished to the First Mortgage Trustees, are as follows:

Date	Principal Amount of Bonds	Amount of Cash Proceeds	I. C. C. Exhibit No.
Feb. 11, 1931	$1,000,000	$975,000	61
June 25, 1931	1,000,000	975,000	63
July 23, 1931	900,000	877,500	65
Nov. 25, 1931	750,000	731,250	68
Jan. 8, 1932	350,000	341,250	70
Jan. 29, 1932	1,000,000	975,000	72

107. The deposited cash was withdrawn by the Debtor on requisitions filed with the First Mortgage Trustees, pursuant to Section 2 of Article Second of the First Mortgage, to reimburse the Debtor for expenditures made in the construction of the Northern California Extension, the expenditures certi-

fied being equal to the principal amount of the bonds represented by the deposited cash, as required by the provisions of the First Mortgage. The expenditures so certified did [1015] not constitute the entire amount of expenditures on the Northern California Extension.

108. The resolutions authorizing the withdrawal of the deposited cash were adopted by the Executive Committee of the Debtor at its meetings held on February 11, June 25, July 23, October 15, November 17, and December 21, 1931, and January 29, 1932. I. C. C. Exhibit No. 86 is a true copy of said resolutions. Mr. A. C. James was present at each of those meetings.

109. The dates and amounts of the withdrawals of deposited cash, and the numbers of the requisitions and the I. C. C. exhibit numbers of true copies of the requisition papers are as follows:

Requisition No.	Date	Amount	I. C. C. Exhibit No.
244	Feb. 11, 1931	$975,000.00	62
246	June 25, 1931	975,000.00	64
247	July 23, 1931	812,571.03	66
248	Oct. 24, 1931	64,928.97	67
250	Nov. 25, 1931	731,250.00	69
251	Jan. 8, 1932	341,250.00	71
252	Jan. 29, 1932	975,000.00	73

110. The amounts and dates of the expenditures and the itemization of the expenditures, as set forth in the officers' certificates contained in these requisitions, are as follows:

Req. No. 244 Amount $999,998.98 Date Feb. 1, 1929 to November 30, 1930

Engineering	$244,777.82
Land for Transportation Purposes	121,377.67
Grading	589,393.37
Tunnels and Subways	44,450.12
Total Expenditure	$999,998.98

Req. No. 246 Amount $1,000,000.00 Date January 1, 1931 to April 30, 1931.

Engineering	$ 25,001.21
Land for Transportation Purposes	16,965.14
Grading	358,532.33
Tunnels and Subways	298,589.02

[1016]

Bridges, Trestles and Culverts	$ 286,163.05
Ties	2,014.38
Rails	3,021.57
Track Laying and Surfacing	130.00
Right of Way Fences	3,198.56
Crossings and Signs	3,040.97
Station and Office Buildings	990.26
Water Stations	717.55
Other Expenditures—Road	1,635.96
Total Expenditure	$1,000,000.00

Req. No. 247 Amount $833,406.18 Date May 1, 1931 to June 30, 1931

Engineering	$ 27,108.10
Land for Transportation Purposes	58,732.93
Grading	346,349.05
Tunnels and Subways	67,990.50

Track Laying and Surfacing	139,660.60
Water Stations	5,594.37
	$750,000.00

Req. No. 251 Amount $350,000.00 Date September 1, 1931 to October 31, 1931.

Engineering	$ 31,703.24
Tunnels and Subways	100,386.60
Bridges, Trestles and Culverts	217,910.16
	$350,000.00

[1017]

Req. No. 252 Amount $1,000,000.00 Date June 1, 1931, to Nov. 30, 1931.

Grading	$1,000,000.00

111. The total amount spent from all sources for land for transportation purposes in connection with the Northern California Extension was $504,590.66.

112. I. C. C. Exhibits Nos. 50, 47 and 80 are true copies, respectively of (a) the Indenture under which $5,000,000, principal amount, of Debentures were issued by the Debtor in 1931 and 1932 for the purpose of providing a portion of the money required for the construction of the Northern California Extension, (b) the order of the Interstate Commerce Commission authorizing their issue, and (c) the application of the Debtor to the Commission for authority to issue and sell the same. I. C. C. Exhibits Nos. 48 (sheets 5 and 14) and 49 are true copies, respectively, of the Debtor's published notice of January 8, 1931, calling for bids for the purchase of said Debentures, the specifications referred to in said notice, and the bid of A. C. James Co. made pursuant to said notice.

113. Mr. A. C. James was the President and a director of the A. C. James Company throughout 1931 and 1932.

114. The Debentures were authenticated and delivered pursuant to Article II of the Indenture dated July 1, 1930.

115. Said $5,000,000 of Debentures were sold to A. C. James Co. for cash at par. The dates on which the Debentures were authenticated and delivered and the respective principal amounts thereof are as follows: [1018]

Date	Amount
February 27, 1931	$1,000,000
March 26, 1931	600,000
May 25, 1931	530,000
June 20, 1931	995,000
August 25, 1931	309,000
October 20, 1931	600,000
November 25, 1931	120,000
January 28, 1932	350,000
March 28, 1932	347,000
May 31, 1932	149,000

In each case the cash was drawn down on the date the Debentures were authenticated against certificates showing expenditures made or liabilities incurred in twice the amount of the cash drawn down.

116. On March 1, 1932, contemporaneously with the delivery of the Refunding Mortgage and the authentication and delivery of the initial issue of $14,380,000, principal amount, of Refunding Mortgage Bonds, A. C. James Co. surrendered to the Trustee under the Indenture dated July 1, 1930, for cancellation $4,504,000, principal amount of Debentures, being all of the Debentures then outstanding. These Debentures were surrendered for cancellation by A. C. James Co. in exchange for a note of the Debtor in the principal amount of $4,504,000 secured by the pledge of $5,630,000, principal amount, of Refunding Mortgage Bonds, Series A.

117. The $347,000, principal amount, of Debentures authenticated and delivered on March 28, 1932, were simultaneously surrendered to the Trustee under the Indenture dated July 1, 1930, for cancellation, in exchange for the delivery to the A.

C. James Co. of a note of the Debtor in like principal amount secured by the pledge of $433,500, principal amount, of Refunding Mortgage Bonds, Series A. A similar procedure was followed in the case of the $149,000, [1019] principal amount, of Debentures authenticated and delivered on May 31, 1932, the principal amount of Refunding Mortgage Bonds, Series A, then pledged being $186,000.

118. The aggregate principal amount of bonds authenticated and delivered under the Refunding Mortgage is $18,999,500. The dates on which these bonds were authenticated and delivered to the Debtor and the respective principal amounts thereof are as follows:

Date	Amount
March 1, 1932	$14,380,000
March 28, 1932	433,500
May 31, 1932	186,000
February 27, 1933	4,000,000

All of the bonds were bonds of Series A, except the $4,000,000, principal amount authenticated and delivered on February 27, 1933, which were of Series B.

119. The issue by way of pledge of the Series A bonds was authorized by the Interstate Commerce Commission in an order entered February 27, 1932, of which I. C. C. Exhibit No. 53 is a true copy, pursuant to an application of the Debtor dated February 11, 1932, of which I. C. C. Exhibit No. 85 is a true copy. A total of $15,000,000 principal amount of bonds were authorized by said order. The issue by way of pledge of the $4,000,000 of Series B

bonds was authorized by the Commission in an order entered December 9, 1932, and a supplemental order entered February 25, 1933, of which I. C. C. Exhibit No. 92 is a true copy, pursuant to an application of the Debtor dated August 1, 1932, of which I. C. C. Exhibit No. 90 is a true copy, and a supplemental application dated January 12, 1933, of which I. C. C. Exhibit No. 91 is a true copy. All of the bonds were pledged with [1020] A. C. James Co., the Reconstruction Finance Corporation, and The Railroad Credit Corporation.

120. The Series A bonds were authenticated and delivered to the Debtor pursuant to Section 1 of Article Two of the Refunding Mortgage, which provides for an initial issue of $15,000,000, principal amount, of bonds upon the furnishing by the Debtor to the Refunding Mortgage Trustee of a certified copy of resolutions of the Board of Directors of the Debtor requesting the authentication and delivery of the bonds, together with an opinion of counsel with respect to the due authorization of the issue of the bonds by any governmental bodies having jurisdiction.

121. The Series B bonds were authenticated and delivered to the Debtor pursuant to Sections 1 and 2 of Article Two of the Refunding Mortgage. Under Section 2, $5,000,000, principal amount of Refunding Mortgage Bonds was required to be reserved for the purpose of refunding the $5,000,000 of Debentures issued under the Indenture dated July 1, 1930, but it was provided that bonds re-

served under Section 2 for the purpose of refunding Debentures could be released from reservation by a resolution of the Board of Directors of the Debtor declaring them to be no longer needed for that purpose, in which event such reserved bonds might be authenticated and delivered in accordance with the provisions of either Section 1 or Section 3 of Article Two. The Board of Directors of the Debtor, at a meeting held on July 14, 1932, adopted resolutions declaring that the $5,000,000 principal amount of Refunding Mortgage Bonds reserved under Section 2 for the purpose of refunding the $5,000,000, principal amount of Debentures need no longer [1021] be held or reserved for that purpose, and the Series B bonds were accordingly authenticated and delivered in accordance with the provisions of Section 1 of Article Two. Exhibit II annexed to I.C.C. Exhibit No. 90 is a true copy of said resolutions.

122. The construction of the Northern California extension was financed in part with funds advanced by the Reconstruction Finance Corporation on the following dates and in the following amounts:

Date	Amount
March 1, 1932	$259,000
June 29, 1932	268,061
August 1, 1932	32,347

These advances formed part of loans of larger amounts made by the Reconstruction Finance Corporation to the Debtor, which were secured by the

pledge of Refunding Mortgage Bonds and other collateral. These loans were authorized by the Interstate Commerce Commission in a certificate of approval issued February 29, 1932, of which I.C.C. Exhibit No. 52 is a true copy, a certificate of approval issued June 23, 1932, and an order entered February 25, 1933, of which I.C.C. Exhibit No. 60 is a true copy.

123. I.C.C. Exhibit No. 82 is a true copy of extracts from the Debtor's application of February 5, 1932, to Reconstruction Finance Corporation for a loan which included the first advance of $259,000 by Reconstruction Finance Corporation on account of the Northern California Extension.

I.C.C. Exhibit No. 87 is a true copy of extracts from the Debtor's application of May 23, 1932, to Reconstruction Finance Corporation for the loans which included the remainder of the advances made for the construction of the [1022] Northern California Extension. I.C.C. Exhibit No. 52 is a true copy of the report and certificate dated February 29, 1932, of the Interstate Commerce Commission approving the making of a loan to the Debtor by Reconstruction Finance Corporation.

124. Between July 14 and December 31, 1916, the average mileage operated by the Debtor was 942.98 miles. At the date of the execution of the Refunding Mortgage there were 1099.20 miles of track operated by the Debtor, exclusive of the Northern California Extension.

125. The Debtor at the date of execution of the First Mortgage owned substantial amounts of real

estate. I.C.C. Exhibit No. 113 contains an itemized statement of physical property held by the Debtor as an investment at the close of the year 1934 and carried on its books in the account entitled "Miscellaneous Physical Property"; the aggregate amount thereof being $3,854,072.54.

126. I.C.C. Exhibit No. 114 contains in more condensed form a statement of substantially the same property carried on the Debtor's books in the account entitled "Miscellaneous Physical Property", at the close of the year 1935. The aggregate amount at which this property was carried on the books of the Debtor at the close of the year 1935 was $3,856,128. Of this latter amount $1,643,114.13 represents cash outlays for additions and betterments, $325,346.71 represents track material for lease transferred from stock of material on hand, $256.80 represents donations, $324,499.97 represents credits for property sold or abandoned, and $2,211,910.32 represents adjustments. The latter amount represents items formerly included in Account 701 [1023] entitled "Investment in Road and Equipment", as follows: $1,919,821.29, land for transportation purposes (representing principally acreage in Islais Creek District of San Francisco acquired as sites for industrial plants); $252,236.21, assessments for public improvements; $27,453, shops and engine houses; $9,733.20, station and office buildings; and $2,666.62, engineering.

127. A schedule is being prepared showing an analysis of certain items appearing in Debtor's account entitled "Miscellaneous Physical Prop-

erty" at the close of the year 1935, which the Refunding Mortgage Trustee claims are not subject to the lien of the First Mortgage, together with certain facts respecting said items. When said schedule has been identified by signature of counsel for the Debtor's Trustees, for the First Mortgage Trustees, and for the Refunding Mortgage Trustee, it may be filed with the Court and when so filed shall constitute a part of this stipulation, as Exhibit H.

128. I.C.C. Exhibits Nos. 113 and 114 and said Exhibit H include items of property described as being for "non-carrier purposes". As shown by said exhibits certain of the items of property described as being "for non-carrier purposes" were transferred from the Account entitled "Investment in Road and Equipment".

129. The amount of cash of the Debtor on hand as of July 31, 1935, was $949,803.31, of which $38,120.89 represented interest paid by Tidewater Southern Railway Company to the Debtor after default on the notes secured by Refunding Mortgage Bonds. Receivables, as of said date, aggregated $1,336,664.53. The amount of cash on hand as of [1024] November 13, 1935, the date of the qualification of the Trustees of the Debtor was $1,327,456.46; and receivables totaled $1,328,561.68. The amounts of cash and receivables as of January 1, 1939, were $2,094,199.56 and $1,136,968.06, respectively. The receivables mentioned in this paragraph exclude the receivables mentioned in paragraphs 30, 32, 33 and 34 of the stipulation.

130. In 1934, the holders of 86.58% in principal amount of the outstanding First Mortgage Bonds executed instruments by which such holders agreed to the extension to January 1, 1937, of the March 1, 1934, and September 1, 1934, interest installments on the First Mortgage Bonds held by them. The aggregate amount of the Interest installments so extended was $2,133,800.

In connection with the extension of such interest installments, the Chairman of the Board of Reconstruction Finance Corporation addressed to the Debtor a letter dated June 23, 1934, of which I.C.C. Exhibit No. 117 is a true copy.

131. I.C.C. Exhibits Nos. 117 and 119 are true copies of letters received by the Debtor from A. C. James Co., The Railroad Credit Corporation and The Western Pacific Railroad Corporation in connection with the extension of interest falling due in 1934 on the First Mortgage Bonds.

132. Subsequent to the institution of this proceeding, the Trustees of the Debtor issued, pursuant to orders of the Court, their certificates of indebtedness in the aggregate principal amount of $10,000,000 for the purpose of financing expenditures in connection with the Debtor's three-year rehabilitation program. Said certificates of indebtedness were refunded at their [1025] respective maturity dates by the issue of new certificates of indebtedness of equal principal amount, and the aggregate principal amount of such certificates of indebtedness now outstanding is $10,000,000. All of said certificates of indebtedness are owned by

Reconstruction Finance Corporation and are secured by a lien prior to the respective liens of the First Mortgage and the Refunding Mortgage.

133. From time to time, pursuant to orders of the Court, funds representing the proceeds of various property of the Debtor have been deposited in escrow with Crocker First National Bank of San Francisco pending agreement or judicial determination as to which mortgage constituted the first lien thereon. As of January 1, 1939, Crocker First National Bank of San Francisco held $165,314.26 of such funds, as follows:

$ 93,202.00	representing the proceeds of property in the Islais Creek Region of San Francisco, containing approximately 186,404 square feet, sold to Federated Metals Corporation. (Order dated Sept. 23, 1937). Funds deposited October 23, 1937.
65,816.30	representing the proceeds of property in the Islais Creek Region of San Francisco, containing approximately 77,431 square feet, sold to Safeway Stores Incorporated. (Order dated Nov. 8, 1937). Funds deposited December 16, 1937.
350.00	representing the proceeds of a parcel of land in Plumas County, California, containing approximately 3½ acres, sold to Keddie Resort Incorporated. (Order dated Feb. 7, 1938). Funds deposited May 4, 1938.
5,945.96	representing the proceeds of certain property in the City of Oakland, County of Alameda, California, sold to Heafey-Moore Company. (Order dated Feb. 7, 1938). Funds deposited June 6, 1938.
$165,314.26	

[1026]

Under the same circumstances and conditions, funds amounting to $38,745.62 have been deposited in escrow since January 1, 1939, as follows:

$ 7,200.00	representing the proceeds of 96 obsolete logging flat cars, sold to Fred E. Barnett Company. (Order dated March 8, 1939.) Funds deposited May 12, 1939.
2,749.92	representing the proceeds of 2 parcels of land in San Francisco, California, sold to San Francisco Housing Authority. (Order dated May 15, 1939.) Funds deposited July 17, 1939.
12,539.45	representing the proceeds of 6 parcels of land in San Francisco, California, sold to San Francisco Housing Authority. (Order dated May 15, 1939). Funds deposited July 29, 1939.
16,256.25	representing the proceeds of 2 parcels of land in the City of Sacramento, California, sold to W. E. Hibbitt and Frances M. Hibbitt. (Order dated May 1, 1939). Funds deposited November 27, 1939.
$38,745.62	

134. As of the close of business on December 16, 1939, cash held by Crocker First National Bank of San Francisco as Trustee under the First Mortgage amounted to $317,934.91. As of January 1, 1939, said cash amounted to $292,804.22.

135. At the date of the institution of the above entitled proceeding, the following collateral was physically pledged with the Refunding Mortgage Trustee:

4,653 shares of stock of Alameda Belt Line of par value of $100 per share.

2,642-2/3 shares of preferred stock of Central California Traction Company of par value of $100 per share.

965-2/3 shares of common stock of Central [1027] California Traction Company of par value of $100 per share.

1,147,955 shares of common stock of Tidewater Southern Railway Company of par value of $1 per share.

$280,000 aggregate principal amount of Central California Traction Company First Mortgage 5% Bonds due April 1, 1936.

6% demand note of Deep Creek Railroad Company dated October 10, 1921, in principal amount of $45,000.

Note of Standard Realty and Development Company in principal amount of $251,273.07, dated March 22, 1932, payable one day after date, without interest.

5% note of Tidewater Southern Railway Company in principal amount of $508,278.61; dated June 26, 1933, payable on or before March 1, 1945.

Deposited cash in amount of $52,316.81.

136. As of January 1, 1939, the Refunding Mortgage Trustee held the same collateral except that $10,000 principal amount of Central California Traction Company First Mortgage Bonds had been redeemed, reducing the principal amount thereof physically pledged with the Refunding Mortgage

Trustee to $270,000. The deposited cash, which amounted to $52,316.81 at the date of the institution of this proceeding, amounted to $223,732.32 at the close of business on January 1, 1939, and to $275,353.21 at the close of business on December 16, 1939.

137. It is not disputed that all of the collateral in the foregoing paragraphs 135 and 136 is subject to the Refunding Mortgage as a first lien, with the exception of the above described notes of Deep Creek Railroad Company and Standard Realty and Development Company, as to which the First Mortgage Trustees contend that the lien of the Refunding Mortgage is subordinate to the lien [1028] of the First Mortgage.

138. All of the stock (except directors' shares) of Standard Realty and Development Company and all of the stock of Deep Creek Railroad Company are physically pledged with the First Mortgage Trustees. Deposited cash was withdrawn under the First Mortgage on the basis of the acquisition by the Debtor of said stock of Deep Creek Railroad Company. [1029]

139. Tidewater Southern Railway Company owns and operates approximately 61.4 miles of main and branch line standard gauge railroad extending from Ortega, San Joaquin County, to Hilmar, Merced County, California. As of December 31, 1935, it owned three locomotives, two freight cars and one piece of work equipment. At December 31, 1935, it had 1,176,782 shares of capital stock out-

standing, par value $1 per share. More than 97% of such capital stock is owned by the Debtor.

140. The Refunding Mortgage Trustee holds as pledgee a note of Tidewater Southern payable to the Debtor dated June 26, 1933 maturing March 1, 1945, in the amount of $508,278.61, representing the unpaid advances made by the Debtor in each of the years 1927 to 1931, inclusive, totalling face amount of note and used for Additions and Betterments and Miscellaneous Physical Property. Interest at the rate of 5% per annum is currently paid on said note and deposited with the Trustee under the Refunding Mortgage.

141. In the years 1927 to 1933, inclusive, advances totaling $638,200.00 were made by the Debtor to Tidewater Southern. $508,278.61 of such advances were used for the acquisition or construction of Additions and Betterments and Miscellaneous Physical Property by Tidewater Southern in the years 1927 to 1931. $129,921.39 of such advances were made in the years 1931 to 1933 to reimburse Tidewater Southern's general cash and represented the amounts necessary for application to income deficits, etc., and this amount was repaid in years 1934 and 1935.

142. As of December 31, 1935, Tidewater Southern had current assets of $192,283.94, including [1036] $153,192.06 of cash. As of the same date total current liabilities aggregated $82,289.92. Corporate surplus aggregated $909,697.15. As of January 1, 1939, Tidewater Southern had current as-

sets of $358,974.49, including $321,434.38 of cash. As of the same date current liabilities aggregated $65,450.61 and corporate surplus aggregated $1,102,290.72.

143. The earnings available for interest of the Tidewater Southern for the years 1922 to 1938 and for the first 10 months of 1939 were:

1922	$ 17,656	1931	4,899
1923	35,475	1932	50,846
1924	31,949	1933	59,461
1925	77,629	1934	113,967
1926	93,043	1935	114,512
1927	74,137	1936	101,000
1928	74,921	1937	96,213
1929	9,296	1938	102,532
1930	94,263	1939 (First 10 months)	143,295

144. The Debtor's proportion of revenues on traffic interchanged with Tidewater Southern for the years 1922-1938 and the first nine months of 1939 were:

1922	$313,461	1933	422,892
1923	388,857	1934	549,069
1924	406,266	1935	544,748
1925	507,208	1936	499,347
1926	575,183	1937	517,467
1927	629,232	1938	538,632
1928	686,818	1939	211,848
1929	546,663	(First 9 months)	
1930	756,303	Average 1929-1938	529,902
1931	474,557		
1932	449,353		

[1031]

145. Central California Traction Company owns and operates 53.78 miles of main and branch lines standard gauge electric railroad between Stockton

and Sacramento. It was incorporated in 1905 and was operated independently until 1927 when all of its outstanding stock was acquired in equal parts by the Debtor, the Santa Fe and the Southern Pacific. Southern Pacific Company having applied to the Interstate Commerce Commission in or about August 4, 1925, for authority to acquire the capital stock and a majority of the bonds of the Traction Company, the Atchison, Topeka and Santa Fe Railway Company and the Debtor intervened in the proceeding, and opposed the merger, the Santa Fe petitioning to acquire control itself if the Commission found that the public interest would be served by a merger of the Traction Company's line with a larger railway system capable of efficiently maintaining and operating the property, and the Debtor petitioning to construct a line of railroad in the event that the Traction Company became other than an independent line. The Commission, on August 5, 1927, authorized Southern Pacific Company to acquire the Traction Company's stock and bonds, provided that it should within 60 days admit the Debtor and the Santa Fe to participation equally in joint control upon payment of proportionate shares of the cost of the securities to be acquired. Both Santa Fe and the Debtor requested and were granted participation in control upon the conditions above mentioned. [1032]

146. The Traction Company has outstanding $810,000 principal amount of 5% First Mortgage Bonds, all of which are owned by the three parent

companies. Payment of the principal of said bonds was deferred upon their maturity on April 1, 1936, the three owning companies agreeing to forbear presentation of the bonds for payment, and the Traction Company agreeing to continue to pay interest at the rate of five per cent per annum on said bonds during such forbearance. The parent companies have agreed to share equally any operating deficits or profits as well as advances for bond interest, sinking fund or additions and betterments. Its operating income or loss for the years 1928-1938 and the first ten months of 1939 were:

1928	$ 7,370 (Loss)
1929	76,810 (Loss)
1930	13,225
1931	100,523 (Loss)
1932	66,022 (Loss)
1933	30,643 (Loss)
1934	14,405
1935	260
1936	28,295
1937	583 (Loss)
1938	16,502
1939 (First 10 months)	48,923

Its operating losses during the eleven years 1928-1938 exceeded its operating income by $209,264 or an average of $19,000 per year. Its average income for the five years 1934-1938 was $11,775.

147. The Debtor's Trustees in their petition to the Court of September 3, 1935, requesting authority to make advances to affiliates of the Debtor, stated:

> "As Central California Traction Company is a feeder to said trunk lines (Debtor, Santa

Fe, Southern Pacific) and does not itself produce [1033] sufficient revenue to pay all costs of operation, necessary capital expenditures, interest on its outstanding First Mortgage Bonds, or the payments into the sinking fund required by its First Mortgage, it is necessary for each of said three parent companies to advance to Traction Company one-third of additional funds required for such purposes."

The Income and Profit and Loss deficits of Central California Traction Company to be made up by the parent companies for the years 1929-1938 and the first 10 months of 1939 were:

1929	$169,366
1930	86,458
1931	195,925
1932	160,705
1933	89,991
1934	91,637
1935	61,373
1936	19,096
1937	55,745
1938	27,287
1939 (first 10 months)	None

The total Income and Profit and Loss deficits of the Central California Traction Company to be contributed by the three proprietary companies during the ten year period 1929-1938 aggregated $957,583 or an average of $95,758 per year. The portion of such deficits absorbed by the Debtor amounted to $319,194 or an average of $31,919 per year.

STATEMENT OF ACTUAL CASH ADVANCES TO CENTRAL CALIFORNIA TRACTION COMPANY BY THE THREE PARENT COMPANIES

January 1, 1929 to October 31, 1939

	Advances Account Operation	Advances for payments into Sinking Fund for Retirement of First Mortgage Bonds	Advances to Retire First Mortgage Bonds in hands of public at maturity April 1, 1936	Total Advances
1929	$ —	$ —	$ —	$ —
1930	—	—	—	—
1931	—	409,999.41	—	409,999.41
1932	660,589.99	31,410.00	—	691,999.99
1933	45,300.00	30,300.00	—	75,600.00
1934	30,150.00	29,250.00	—	59,400.00

1939 (first 10 months)	56,250.00	—	—	56,250.00
Totals	$1,067,659.99	$529,039.41	$96,000.00	$1,692,699.40
W. P. Propn.	$ 355,886.66	$176,346.47	$32,000.00	$ 564,233.13

148. The Traction Company has a value to the Debtor as a feeder and would be of value to any corporation which might succeed to its properties. The Debtor's Trustees, in their management of the Debtor's property, have considered it important that default not be permitted in the payment of interest on the outstanding bonds of the Traction Company or of the Debtor's share of other advances to the Traction Company. Annexed hereto and made a part hereof, marked Exhibit I is a true copy of a letter dated March 26, 1937, from Charles Elsey, President of the Debtor, [1034] to the Refunding Mortgage Trustee. The Debtor's proportion of revenues

from the traffic interchanged with the Traction Company during the period 1928 to 1938 and for the first 9 months of 1939 were:

1928	$257,511	1934	216,253
1929	203,706	1935	216,522
1930	286,632	1936	226,530
1931	194,263	1937	246,322
1932	219,208	1938	233,735
1933	207,638	1939 (First 9 months)	139,069

149. Alameda Belt Line owns 16.08 miles and operates 17.85 miles of standard guage belt line railroad in the City of Alameda. It has an authorized capital stock of 10,000 shares of the par value of $100 each of which 9,422 are now outstanding. Except for directors' qualifying shares, the stock is owned in equal proportions by the Debtor and the Santa Fe. The parent companies have agreed to share equally in operating deficits or profits as well as advances for additions and betterments or other requirements. At no time since its organization in 1925 has the Belt Line earned operating expenses. Its railway operating income or loss for 1928-1938 and for the first 10 months of 1939 was:

1928	$36,977 (Loss)
1929	60,417 (Loss)
1930	20,307 (Loss)
1931	25,674 (Loss)
1932	20,014 (Loss)
1933	5,699 (Loss)
1934	3,767 (Loss)
1935	9,268 (Loss)
1936	24,839 (Loss)
1937	40,147 (Loss)
1938	43,034 (Loss)
1939 (first 10 months)	44,433 (Loss)

[1035]

Railway operating losses over the period 1928-1938 aggregate $290,143 or an average of $26,376 per year.

150. The Debtor's Trustees in their petition to the Court, dated September 3, 1935, requesting authority to make advances to affiliates of the Debtor, stated in part:

> "This belt line railroad (Alameda Belt) is a feeder to said two trunk line carriers (Debtor, Santa Fe), being the contact between said trunk line carriers and the industrial district of Alameda, and its revenues are not sufficient to pay all of its expenses. The two parent companies advance to said Belt Line one-half of all such sums as are required to enable Belt Line to pay its necessary expenses of maintaining and operating its railroad, necessary capital expenditures, taxes and interest, if any, to the extent that it has not sufficient resources itself to pay said expenses. * * *"

The Income and Profit and Loss deficits of Alameda Belt Line to be made up by the parent companies for the years 1928-1938 and the first 10 months of 1939 were:

1928	$72,014
1929	59,745
1930	53,175
1931	29,925
1932	32,335
1933	18,100
1934	18,305
1935	27,727
1936	43,425
1937	60,302
1938	71,014
1939 (first 10 months)	57,195

Such deficits aggregated $486,069 during the eleven year period 1928-1938, or an average of $44,188 per year. The proportion of the deficits absorbed by the Debtor aggregated $243,035 or an average of $22,095 per year.

STATEMENT OF ACTUAL CASH ADVANCES TO ALAMEDA BELT LINE BY THE TWO PARENT COMPANIES

January 1, 1927 to October 31, 1939

(Also shows capital stock issued by Alameda Belt Line in Refund of Cash Advances)

Totals	5,086	4,872	4,811	4,450

152. Standard Realty and Development Company was formed as a wholly owned subsidiary of the Debtor's predecessor, Western Pacific Railway Company, primarily for the purpose of handling land purchases and sales in connection with non-operating property. It has no bonded debt. Its income for the years 1922 to 1938 and for the first 10 months of 1939 was:

1922	$ 26
1923	3,111
1924	650 (Loss)
1925	47
1926	5,417
1927	1,772 (Loss)
1928	4,681

1937	5,673 (Loss)
1938	6,183 (Loss)
1939 (First 10 months)	6,694 (Loss)

[1037]

The aggregate deficits during the 1922-1938 period exceed the aggregate income of the Development Company by $57,593, the average annual deficits during such period being $3,200.

153. As of December 31, 1935, the Debtor had advanced to the Development Company amounts aggregating $426,710 most of which was advanced between 1926 and 1928 for the acquisition of additional property. In 1935 the advances amounted to $17,612 of which $2,400 represented cash and the balance represented property transferred by the Debtor to the Realty Company. As of January 1, 1939, the aggregate advances had been reduced to $363,311 by the transfer of properties in Oakland and elsewhere to the Debtor. In addition to such advances, the Development Company is indebted to the Debtor in the amount of $251,273.07 represented by a note at present physically pledged with the Refunding Mortgage Trustee but on which the First Mortgage Trustee claims a first lien. The Development Company is also indebted to The Western Pacific Railroad Corporation, parent of the Debtor, in the amount of $110,000 on account of advances made to it by The Western Pacific Railroad Corporation. Such advances, aggregating $120,000 at June 29, 1932, were pledged with The Railroad Credit Corporation by The Western Pacific Railroad Corporation on June 29, 1932, but the First Mortgage Trustee claims a first lien thereon. Since that date, such advance has been reduced by the payment on October 8, 1935 of $2,000 and on April 9, 1936 of $8,000. In addition, the Development Company, since May 24, 1935, has currently paid interest on such advance to The Western Pacific Railroad Corporation, which latter [1038] corpora-

tion has paid them over to The Railroad Credit Corporation. The aggregate amount of interest so paid aggregates $24,019.15. It has never paid any dividends on its stock nor has it paid any interest on the advances made to it by the Debtor nor on the note held by the Debtor.

154. The balance sheet of the Development Company as of October 31, 1939 is annexed hereto as Exhibit J.

155. Annexed hereto, as Exhibit K, is a statement showing the high and low prices of First Mortgage 5% Bonds on the New York Stock Exchange during each six months period from Jan. 1, 1923 to Dec. 31, 1929; the total principal amount of First Mortgage 5% Bonds sold on the New York Exchange during each such six months period; the high and low prices of First Mortgage 5% Bonds on the New York Stock Exchange for each month from Jan. 1, 1930 to December 1, 1939; and the total principal amount of First Mortgage 5% Bonds sold on the New York Stock Exchange during each such month. The figures and data appearing in Exhibit K were copied from quotations appearing in The Commercial and Financial Chronicle. Any party to this proceeding may use in brief or argument similar data from the same publication as to market quotations of the stocks of The Western Pacific Railroad Corporation, or stocks and bonds of other railway corporations, with like force and effect.

156. The institutions of which the members of the Institutional Bondholders Committee are of-

ficers, namely, Metropolitan Life Insurance Company, The Prudential Insurance Company of America and The Chase National Bank [1039] of the City of New York, would not purchase at any price approximating par the proposed new First Mortgage bonds to be issued by the reorganized company today. Nor would they have purchased them at any price approximating par at any time since the issuance of the Commission Plan dated October 16, 1938.

157. Annexed hereto as Exhibit L is a schedule showing the ratios of annual gross revenues of the Debtor and its subsidiaries for the years 1923 to 1938, inclusive, and the annual gross revenues of Class I Carriers of the United States for the same years, with their respective average gross revenues for the years 1923 to 1927, inclusive, and showing the effect of the construction of the Northern California Extension, as prepared by the officers of the Debtor's Trustees from data obtained from the records of the Interstate Commerce Commission and from the records of the Debtor's Trustees.

158. A schedule is being prepared showing the ratios of the annual net railway operating income of the Debtor and its subsidiaries for the years 1923 to 1938, inclusive, and the annual net railway operating income of the Class I Carriers of the United States for the same years, with their respective average net railway operating income for the years 1923 to 1927, inclusive, and showing the effect of the construction of the Northern California Extension, as prepared by officers of the Debtor's Trustees from data obtained from the records of the Inter-

state Commerce Commission and from the records of the Debtor's Trustees. When said schedule has been [1040] identified by signature of counsel for the Debtor's Trustees, the Institutional Bondholders Committee, and The Western Pacific Railroad Corporation, it may be filed with the Court and when so filed shall constitute a part of this stipulation as Exhibit M.

159. The balance sheet and income statements of the Debtor's Trustees for the year 1939, when available, shall be part of the record of this proceeding.

Dated: San Francisco, California, December 20th, 1939.

Western Pacific Railway Company

PLAN AND AGREEMENT FOR REORGANIZATION

Introductory Statement.

(Not part of Plan or Agreement.)

In order to enable the holders of certificates of deposit issued under the Western Pacific Railway Company First Mortgage Five Per Cent. Thirty Year Gold Bonds Protective Agreement, dated May 1, 1915, and holders of Western Pacific Railway Company First Mortgage Five Per Cent. Thirty Year Gold Bonds not deposited under said agreement, to judge of the propriety and expediency of the annexed Plan of Reorganization of Western Pacific Railway Company, the Protective Committee acting under said Protective Agreement has thought it best, in explanation of the Plan, to review in this introductory statement, the history of that Company and of the relations between it and The Denver and Rio Grande Railroad Company.

The Existing Road, Its History, Location and Cost.

The Western Pacific Railway Company, a California corporation, was organized in the year 1903.

In the year 1911, it completed the construction of a single track line of railway extending from Salt Lake City, Utah, to San Francisco, California, the total length of the road being 926* miles. The road is well located and is constructed on a grade which in no place exceeds one per cent. The character of the construction and the location and alignment of the road are such that the Railway is a first-class instrument of transportation.

The actual cash cost of constructing the road, including no expenditure not discharged by payment of cash and allowed by the rules of the Inter-State Commerce Commission, amounted to approximately $77,800,000.

Sources From Which Funds for Construction Were Derived.

The monies with which the Western Pacific Railway Company was constructed were obtained from the following sources:

Proceeds of sale of First Mortgage Bonds	$46,243,120.00
Proceeds of sale of Second Mortgage Bonds	18,750,000.00
Proceeds of sale of capital stock	163,000.00
Interest on trust funds deposited during construction	1,870,146.00
Accrued interest on Second Mortgage Bonds	52,905.00
Monies borrowed	16,408,650.00
Income from operation pending construction used for construction	754,353.00
Total	†$84,242,174.00

*This is the length of the main line. The Western Pacific Company owns in addition lines of about 20 miles in length.

†The difference between this sum and the

Substantially all monies expended by the Western Pacific, except those derived from the sale of First Mortgage Bonds, interest on mortgage funds deposited in trust and operating income were derived from The Denver & Rio Grande Railroad Company (the owner of five-sixths of the stock of the Western Pacific Company); either through the purchase by the Denver Company of Western Pacific Second Mortgage Bonds or through loans made directly to the Western Pacific Railway Company by the Denver Company or its subsidiaries.

Status of Accounts Between the Western Pacific Company and the Denver Company.

In round figures the indebtedness now owing by the Western Pacific Company to The Denver and Rio Grande Railroad Company and its subsidiaries computing interest to February 28th, 1916, is as follows:

Debt due Denver Company by Western Pacific Railway Company:	
Second Mortgage Bonds (all being owned by Denver Company)	
Principal amount	$25,000,000
Interest accrued and unpaid	8,200,000
Monies advanced by Denver Company upon promissory notes or open account	
Principal amount	17,500,000
Interest accrued and unpaid on notes and balances	4,800,000
Total	$55,500,000

amount of the monies spent for construction was expended in paying interest on First Mortgage Bonds accruing after the period of construction. [1043]

The monies owed the Denver Company exceed the monies advanced not only because interest has accumulated but for the reason that the Second Mortgage Bonds were purchased at a discount.

Condition of Denver Company After Completion of Western Pacific Line.

When the Western Pacific Railway was completed in the year 1911, the credit of The Denver and Rio Grande Railroad Company, the principal stockholder of the Western Pacific Company, was practically exhausted and neither corporation was able to finance the construction of feeders or extensions, although it was recognized that in the absence of advantageous traffic arrangements with other railroads in California such feeders and extensions were essential to make the Western Pacific self-supporting. Prior to the completion of the Western Pacific line such conditions with respect to transcontinental traffic had become established in California that the Western Pacific has never been able to obtain a division of interline charges yielding an adequate return for the service performed in transporting freight originating upon other transcontinental lines from the Pacific Coast to Salt Lake.

Obligations Assumed by Denver Company to Western Pacific Company and Its First Mortgage Bondholders.

The Western Pacific Railway was constructed at the instance of the Denver Company, which lent its credit to the enterprise, not only in advancing mon-

ies as above outlined but also in guaranteeing (in effect) payment of the interest on the First Mortgage Bonds of the Western Pacific. In order to facilitate the sale of the First Mortgage Bonds of the Western Pacific Company, The Denver and Rio Grande Railroad Company (of Colorado) and the Rio Grande Western Railway Company, parties of the first part, (since consolidated into the existing The Denver and Rio Grande Railroad Company, of Colorado and Utah), the Western Pacific Railway Company, party of the second part, and the Bowling Green Trust Company, Trustee under the Western Pacific First Mortgage, party of the third part, entered into an agreement dated June 23, 1905 (commonly known and herein referred to as "Contract B") by the provisions of which The Denver and Rio Grande Railroad Company and the Rio Grande Western Railway Company, parties of the first part, undertook and agreed to loan to the Western Pacific Railway Company sums which, together with the earnings of that corporation, would be sufficient to enable it to meet its operating expenses and taxes and to make the payments of interest and sinking fund monies called for by the First Mortgage Bonds of the Western Pacific Railway Company and the Mortgage securing the same. This contract contained provisions by which The Denver and Rio Grande Railroad Company and the Rio Grande Western Railway Company undertook to pay to the Trustee of the mortgage securing the First Mortgage Bonds of the Western Pacific Rail-

way Company a sum which, together with the amount actually appropriated and paid over by the Western Pacific Railway Company for that purpose, would be sufficient to discharge as the same accrued the interest payable upon the First Mortgage Bonds of the Western Pacific Railway Company. The Denver and Rio Grande Railroad Company in 1908 assumed the obligations of its predecessors under Contract B and also guaranteed the payment of interest upon many of the then outstanding Western Pacific First Mortgage Bonds by endorsement on the bonds themselves. Bonds in the principal amount of about thirty-seven million dollars are thus endorsed. The Committee, however, is advised by counsel that this endorsement does not add materially to the obligation assumed by Contract B.

Defaults in Payment of Interest.

On March 1, 1915, the Western Pacific Company defaulted in the payment of the interest then due on its First Mortgage Bonds and the Denver Company failed to perform its obligations with respect thereto. Shortly thereafter The Equitable Trust Company of New York, as substituted Trustee under the mortgage securing Western Pacific First Mortgage Bonds, commenced proceedings for the foreclosure of the First Mortgage in the United States District Court for the Northern District of California and Mr. Frank G. Drum and Mr. Warren Onley, Jr., were appointed Receivers of the Western Pacific Railway Company. On September 1, 1915, default again occurred in the payment of the interest which

on that day became due upon Western Pacific First Mortgage Bonds. Another like default must occur on March 1, 1916. The principal of the $50,000,000 of bonds has been declared due and payable forthwith. The total amount of interest which will be due and unpaid March 1, 1916, is $3,750,000.

Effect of Foreclosure Upon Rights Arising Under Contract B.

The effect of the sale of the properties of the Western Pacific Company on foreclosure will be to free the Western Pacific property in the hands of the purchaser from obligations of the Western Pacific Company to the Denver Company. In other words, foreclosure will result (unless the Denver Company purchase the Western Pacific property at foreclosure sale or some other person or corporation purchase it for more than the amount due upon the Western Pacific First Mortgage bonds) in a direct loss to the Denver Company of its entire investment in the property, an investment which is now represented by a debt of about $55,500,000. On the other hand, the Committee is [1044] advised that the foreclosure sale will not operate to discharge the obligations of the Denver Company to the Western Pacific bondholders except to the extent that monies realized from the sale are applied to the payment of the bonds or bonds are used to pay the purchase price.

Situation of Western Pacific Bondholders.

The situation, therefore, of the Western Pacific Bondholder is peculiar. He has a claim against the

Western Pacific Company and has the right to have the property of that Company sold and the proceeds applied, so far as the same will go, in discharge of his claim. He has also a claim against the Denver Company for unpaid interest and will have a claim for interest to accrue on the portion of his debt not discharged by application of the proceeds of the sale of the properties of the Western Pacific Company. Probably, moreover, the Trustee under the Western Pacific First Mortgage, if it elect to adopt that alternative, may recover judgment against the Denver Company for all of the damages suffered by the First Mortgage bondholders by reason of the Denver Company's breach of its obligation under Contract B, considered as an entirety. This makes the question of the financial responsibility of the Denver Company a matter of interest and importance to the Western Pacific bondholders.

Indebtedness and Earnings of The Denver & Rio Grande Railroad Company.

The secured debt of the Denver Company as the same now exists (it has substantially no floating debt) is substantially the following:

Bonds secured by the First Consolidated Mortgage of The Denver and Rio Grande Railroad Company (of Colorado) dated, June 15, 1886	$40,507,000
Bonds secured by the Improvement Mortgage of The Denver and Rio Grande Railroad Company (of Colorado), dated June 1, 1888	8,335,000
Bonds secured by First Trust Mortgage of The Rio Grande Western Railway Company, dated July 1, 1889	15,190,000
Bonds secured by First Consolidated Mortgage of Rio Grande Western Railway Company, dated April 1, 1889	15,080,000
Bonds secured by First Mortgage of Utah Central Railroad Company, dated January 1, 1898	390,000
Bonds secured by First and Refunding Mortgage of The Denver and Rio Grande Railroad Company (of Colorado and Utah), dated Aug. 1, 1908	*33,292,000
Bonds secured by Adjustment Mortgage of The Denver and Rio Grande Railroad Company (of Colorado and Utah), dated May 1, 1912	10,000,000
Equipment Trust Obligations secured by Equipment Trust Mortgage, dated September 1, 1907	300,000
Total	$123,094,000

*This amount does not include $7,005,000 bonds of this issue which are pledged under the Denver Company's Adjustment Mortgage.

The net income of the Denver Company for the past four years (after deducting its bond interest and taxes) is shown by the following table compiled from the records of that Company:

For year ended June 30th,	1912	1913	1914	1915
Net Income	$1,144,763.33	$2,094,179.66	$1,400,375.29	$1,418,730.58
Appropriations from Income,				
For Sinking & Renewal Funds	137,843.81	247,807.92	263,888.82	273,044.89
For Additions & Betterments		389,000.00	80,927.52	211,045.46
Total Appropriations	137,843.81	636,807.92	344,816.34	484,090.35
Balance of Income Transferred to credit of Profit & Loss	$1,006,919.52	$1,457,371.74	$1,055,558.95	$ 934,640.23

The net earnings of the Denver Company during the five months of the current year—July to November inclusive—have substantially increased as compared with the earnings of the corresponding months of 1914. The Company's business during these months has, however, been favorably affected to some extent, by special and temporary conditions.

Present Condition and Prospects of the Western Pacific Railway Company.

The assests of the Western Pacific Railway Company now in the hands of receivers consist, principally, of physical properties, the reproduction value of which your Committee believes to be at least $75,000,000. It is estimated that the receivers will have on hand at the date of sale at least $600,000 in cash or its equivalent for the purposes of the proposed reorganization. Since the completion of the line in 1911 the Western Pacific Railway Company has reported earnings over and above the cost of operation, maintenance and taxes as follows:

June 30, 1912	$ 564,214.06
June 30, 1913	1,040,330.07
June 30, 1914	321,506.95

The Receivers' report for the year ending June 30, 1915, showed a net income of $617,258.44.

The earnings of the Western Pacific for the past five months are considerably larger than those for the corresponding period of 1914, but cannot be considered an absolutely fair criterion of the present earning power of the corporation. During those

months conditions, the character of which are temporary (such as travel incident to the Panama-Pacific Exposition) have contributed to the earnings of the Company.

The Protective Committee has taken the advice of expert engineers and railroad operators with respect to the problem of rendering the Western Pacific enterprise self-supporting. It has consulted, particularly, Mr. Joseph H. Young, now President of the Norfolk Southern Railroad, who is thoroughly familiar with operating and traffic conditions in Western Pacific territory. It has also had the benefit of two reports dealing with the earnings and properties of the Western Pacific Company and the proper development of those properties, both of which were prepared prior to the organization of the Protective Committee—one (by Mr. B. F. Bush and Mr. E. L. Brown) having been prepared at the instance of the Denver Company and the other (by Mr. John F. Stevens) at [1045] the instance of the bankers who originally marketed the Western Pacific First Mortgage Bonds. The conclusions of the Committee with respect to needed improvement, equipment and extension of Western Pacific lines and the results that reasonably may be expected therefrom are based almost wholly upon views in which all of the gentlemen named seem to be in substantial agreement. This is particularly true with respect to the advisablility of constructing lines or otherwise acquiring facilities in the San Joaquin

Valley and Delta and in the Santa Clara Valley in California, also with respect to the larger items of betterments of the existing line and of additional property, particularly equipment, to be acquired for use in connection therewith. Upon the basis of traffic now carried by the Western Pacific (that is to say, without allowance for any additional business), the proposed expenditures for new equipment and for betterments of existing facilities should so increase the net earnings of the Company that they will amply provide for the interest to accrue upon the $20,000,000 principal amount of New Bonds to be issued as provided in the Plan.

Purposes and General Considerations.

The Protective Committee purposes, if it be practicable to do so at a proper price, that the Reorganization Committee, directly or through a nominee or nominees, shall acquire the properties of the Western Pacific Company on behalf of the holders of such of the First Mortgage bonds as shall be subject to the Plan and Agreement of Reorganization, using the bonds under its control, so far as permissible, in payment of the purchase price, that the properties so acquired shall thereupon be transferred to a new corporation (the proposed Operating Company) and securities issued and disposed of by that company and the proposed Holding Company, as set forth in the annexed Plan.

The Protective Committee has at all times kept in view the value attaching to the claims against the

Denver Company to be acquired as contemplated by the Plan and therefore has designed in the Plan and Agreement to provide the Reorganization Committee and later the Holding Company with powers and means to pursue the claims against the Denver Company that shall become subject to the Plan and Agreement in order that as much as possible may be realized (whether by negotiation or suit or both) on the obligations of that Company under Contract B and under its endorsed guaranties. Since the formation of the Protective Committee no negotiations with the Denver Company have taken place and no understanding of any kind with respect to any settlement or adjustment of its obligation exists in any form. The financial condition of the Denver Company is such that it has seemed possible that it may become necessary for the Holding Company to take measures to protect its claim against the Denver Company, and for that reason provision is made in the plan for the raising of funds, if necessary to prevent the extinguishment by means of the possible foreclosure of mortgages upon the Denver Company's property of the claims to be acquired by the Holding Company. The Adjustment Mortgage of the Denver Company, under which there are outstanding $10,000,000, principal amount, of Adjustment Mortgage Bonds, is now in default (although the interest on these bonds has been regularly paid) by reason of the failure to pay interest upon Western Pacific First Mortgage Bonds, and, should this Adjustment Mortgage be foreclosed, the

Refunding Mortgage of the Denver Company securing bonds in the principal amount of more than $33,000,000.00 (exclusive of about $7,000,000 thereof pledged under the Adjustment Mortgage) may come into default. For the same reason and because of the position that the Western Pacific property occupies in relation to other railway properties and the resulting necessity of protecting its traffic relations, the Protective Committee has deemed it extremely important that power shall exist also to make use of a portion of the proceeds of the $20,000,000 of New Bonds in such manner as may seem to the Reorganization Committee prior to the completion of the reorganization and thereafter to the Board of Directors of the Holding Company most advantageous in the interest of the reorganization. Accordingly in clause (b) of Article V of the Plan reasonable latitude in the application of a portion of the moneys to be raised has been provided for.

The necessity of providing for a common agency for the enforcement and protection of the claims against the Denver Company and of raising funds if needed for this purpose is one of the reasons for the formation of the Holding Company. This arrangement is supported also by other reasons, such as: the possibility that after more careful consideration it may be thought necessary or wise to organize separate corporations for the operation of the railway in the states of California, Nevada and Utah respectively, in which event a common ownership of their stocks will be necessary; the fact that

a very burdensome stockholders' liability attaches to stock in any California corporation, a liability which might seriously interfere with the saleability and consequently impair the market value of the stock of the Operating Company, if in the hands of the public; and the further fact that under the laws of California a majority of the directors of the Operating Company must reside in that State, although more than three-quarters of the new stockholders will, at least at the time of the completion of the reorganization, be residents of other sections of the country and be entitled to insist upon direct representation in the determination of the general policies and the management of the financial affairs of the reorganized company. It is possible, nevertheless, that the conditions which call for the creation of a holding company will not be of indefinite duration and that the stock of the Operating Company may within a reasonably short time be distributed among the stockholders of the Holding Company.

Statements Not to be Taken as Representations, and Mistakes and Errors Not to Form Ground for Complaint.

The statements contained in this Introductory Statement, whether of fact or opinion, have been based upon such information and advice as have been available and are believed to be substantially correct, but no such statement is intended or is to be taken to be a representation of fact or law or an inducement to any action or omission to act.

This Introductory Statement does not constitute in any sense a part of the Plan or of the Agreement hereto annexed. No error or misstatement herein of any description shall constitute ground for the withdrawal of any Depositor from the Plan and Agreement or for any complaint with respect to the Plan and Agreement or to any consequences arising from having become a party thereto [1046].

PLAN OF REORGANIZATION

I.

Terminology Used in the Plan and Agreement.

In the following Plan and Agreement certain convenient terms are employed to obviate the repetition of awkward forms of reference. The terms and their respective meanings, except where a different meaning is plainly indicated by the context, are the following:

The "Old Company" signifies the existing Western Pacific Railway Company.

The "Denver Company" signifies the existing The Denver and Rio Grande Railroad Company, a consolidated corporation of Colorado and Utah.

The term "Operating Company" refers to a proposed new corporation to be organized (probably under the laws of the State of California) for the purpose of owning and operating the existing lines of Western Pacific Railway Company and proposed extensions thereof. In the discretion of the Reorganization Committee two or more corporations may be organized for this purpose, as may

seem most advantageous having regard to laws of the states of California, Nevada and Utah, respectively. The term "Operating Company" wherever used in this Plan is to be understood to comprehend whatever corporation or corporations may be employed for the purposes stated, as finally determined by the Reorganization Committee.

The term "Holding Company" refers to a proposed new corporation to be organized under the laws of such state as may be selected by the Reorganization Committee, for the purpose of owning and holding all of the capital stock of the Operating Company (except directors' qualifying shares) and of holding and enforcing or otherwise realizing upon claims against the Denver Company acquired from Depositors as provided in the Plan and Agreement and existing or to arise either under the contract, known as "Contract B" (an agreement dated June 23, 1905, between (a) the former The Denver and Rio Grande Railroad Company and Rio Grande Western Railway Company, predecessors of the Denver Company, and (b) the Old Company and (c) the Trustee under its First Mortgage), which in effect guarantees the payment of interest upon the Old Company's existing First Mortgage Bonds or under formal guaranties stamped upon certain of the Old Company's First Mortgage Bonds.

The term "Contract B" refers to the above-mentioned agreement dated June 23, 1905.

The term "Old Bonds" refers to the existing First Mortgage Five Per Cent Thirty-Year Gold

Bonds of the present Western Pacific Railway Company.

The term "New Bonds" refers to new First Mortgage Five Per Cent. Bonds which it is proposed shall be issued by the Operating Company.

The term "New Mortgage" refers to the mortgage which is to be created to secure the New Bonds.

The term "Protective Committee" refers to the Committee mentioned in the annexed agreement, representing holders of Western Pacific Railway Company First Mortgage [1047] Five Per Cent. Thirty-Year Gold Bonds; which is acting under an agreement dated May 1, 1915.

The term "Protective Agreement" refers to the last-mentioned agreement of May 1, 1915.

The term "Plan and Agreement" refers to this Plan of Reorganization and the annexed Agreement, the same being taken together as a single instrument.

The term "Reorganization Committee" refers to the Committee constituted by the Plan and Agreement, as the same may be constituted at the time referred to.

The term "Depositary" refers to the depositary that shall be acting hereunder at the time referred to.

The term "Depositors" signifies holders at the time referred to of certificates of deposit issued under the Protective Agreement or under the Plan and Agreement and all holders of Old Bonds which shall be subject to the Plan and Agreement and the

term shall be construed to include not only persons acting in their own right, but also trustees, guardians, committees, agents and all persons acting in a representative or fiduciary capacity, and those represented by or claiming under them, and partnerships, associations, joint-stock companies and corporations as well as individuals.

The term "Deposited Bonds" refers to all Old Bonds that shall at the time referred to be subject to the Plan and Agreement.

The phrase "claims against the Denver Company" or any expression of like import, unless inconsistent with the context, shall be deemed to refer to and comprehend all claims, demands and choses in action and all rights of every description, susceptible of transfer (whether in law or in equity) as contemplated by the Plan and Agreement, against or enforceable against or with respect to The Denver and Rio Grande Railroad Company or any predecessor or successor corporation or any of the property or estate of said Company or of any such predecessor or successor corporation, which have arisen or exist or may arise or exist in favor of or be enforceable by or on behalf or for the benefit of holders, past, present or future, of Deposited Bonds or coupons, whether under or by virtue of Contract B or any guaranty or guaranties of payment of interest endorsed upon any of such Deposited Bonds or under or by virtue of any provision of the Mortgage securing the Old Bonds or otherwise by virtue of ownership of or any interest in the Deposited Bonds or coupons.

The term "Underwriting Syndicate" refers to a Syndicate which has been organized to purchase such of the New Bonds as shall not be purchased by Depositors, together with shares of stock in the Holding Company, as provided in subdivision (B) of Article IX of this Plan.

II.

The Reorganization Committee—Depositary.

Inasmuch as the Protective Committee already represents a very large majority of the Old Bonds—the only securities of the Old Company which are expected to participate in the benefits or execution of the Plan—that Committee is to be continued with its present membership as the Reorganization Committee which will be charged with the supervision and direction of the proceedings for the execution of the Plan and Agreement, with the powers more specifically set forth in the annexed Agreement. Pending the completion of the reorganization, if in its judgment occasion shall require, it may exercise, but only upon the affirmative vote of three fourths of all of its members, any of the powers which the Plan contemplates shall be exercised by the Holding Company or by the Operating Company; but any compromise or settlement of claims against the Denver Company made by the Reorganization Committee under the power last conferred, shall be made, and shall be, subject to the condition that such compromise or settlement shall be submitted to the Depositors as provided in the annexed Agreement and

shall not be disapproved in the manner therein provided by more than one-third in amount thereof.

The Reorganization Committee is to be composed of the following persons:

A. M. Hunt
James D. Phelan
George Whittell
David R. Forgan
I. de Bruyn
C. Ledyard Blair
Frederick H. Ecker
Alvin W. Krech
Starr J. Murphy
William A. Read
William Salomon
Richard B. Young

Members may be added to this Committee and substitutes for any of the members of the Committee who may die, resign or become incapacitated to act may be appointed—all as provided in the annexed Agreement.

The Reorganization Committee is empowered to delegate the execution of the Plan to a sub-committee or Board of Managers, which in its discretion may be appointed by the Reorganization Committee.

Subject to the power of the Reorganization Committee to make a different arrangement, The Equitable Trust Company of New York will act as Depositary under the Plan and Agreement.

III.

New Corporations—Foreclosure and Purchase of Property.

The reorganization of the old Company is to be effected, subject to the power of the Reorganization Committee, in its absolute discretion, to vary details of method, through the agency of:

(a) A new corporation or several corporations (called hereafter, whether eventually one or more, the "Operating Company") which when the reorganization is complete will be vested with the title to and will operate the Western Pacific property, (providing the Reorganization Committee shall be able to purchase or arrange for the purchase of the same at a proper price), and as well all additions thereto and extensions thereof. It is expected that the Operating Company will receive and expend

[1048]

the new moneys provided for in this plan except such as are required for expenses of foreclosure and reorganization and for the payment of the distributive shares of non-assenting bondholders. It will issue the New Bonds provided for in the plan and create the New Mortgage securing them.

(b) A corporation (called herein the "Holding Company") which upon completion of the reorganization will own (1) all of the stock of the Operating Company, except directors' qualifying shares, (2) the interest in any deficiency judgment against the Old Company apportionable to Deposited Bonds and (3) the claims against the Denver Company

arising under Contract B with respect to interest upon Deposited Bonds or under any guaranties endorsed on Deposited Bonds It will issue to the Reorganization Committee or its nominees its preferred and common stock to be exchanged for Deposited Bonds or sold with new bonds to an Underwriting Syndicate or disposed of otherwise as hereinafter provided.

The instrumentalities and methods to be employed to effect the reorganization are to be determined by the Reorganization Committee in its absolute discretion, provided that in substance the results contemplated by the Plan and Agreement shall be accomplished.

In effecting the purchase of the property of the old Company the Reorganization Committee will use, to such extent and in such manner as may be necessary and practicable, the Deposited Bonds and money to be provided by calls upon purchasers of new bonds, whether Depositors or members of the Underwriting Syndicate.

IV.

Securities and Obligations of Old Company.

The stock, bonds and other obligations of the Old Company are substantially the following and are to be refunded, paid and eliminated by foreclosure as indicated:

To be Refunded:	
First Mortgage 5% Gold Bonds	$50,000,000.00
Coupons appertaining to the same in default (as of March 1, 1916)	3,750,000.00
Paid or to be paid in cash as audited by the Receivers:	
Unsecured obligations of Old Company as heretofore ascertained by the Receivers (other than obligations owing to the Denver Company), to be paid by the Receivers pursuant to order of court, about (net)	163,625.54
Equipment obligations of Receivers of Old Company (authorized but not yet issued)	600,000.00
To be eliminated by Foreclosure:	
Second Mortgage 5% Bonds (owned by Denver Company and pledged under its Refunding and Adjustment Mortgages)	25,900,000.00
Claims for interest on Second Mortgage Bonds in default (owned by Denver Company and pledged under its Adjustment Mortgage) and unsecured debt (owned by Denver Company—and in small part by its subsidiary, the Utah Fuel Company—and in part pledged under the Denver Company's Adjustment Mortgage), as of date of appointment of Receivers, about	26,800,000.00
Capital stock (5/6 owned by Denver Company and pledged under its Refunding and Adjustment Mortgages)	75,000,000.00

In addition to the foregoing there are certain unliquidated tort claims against the Old Company of relatively small amounts which are the subject of pending actions. There may also be claims as yet unknown. Probably none of the claims remaining in existence (other than the $163,625.54 of claims above provided for) is entitled to preference in the receivership proceedings. It is expected that all remaining claims will be eliminated by foreclosure.

These claims are in substance those owned by the Denver Company as stated above. The Reorganization Committee will have power, to be exercised, if at all, in its absolute discretion to consent to or arrange for the payment, settlement or purchase of any such claims, other than claims belonging to the Denver Company or its subsidiaries. [1049]

V.

CASH REQUIREMENTS.

The estimated cash requirements of the Plan are the following:

Total amount estimated to be required	$18,600,000

It is expected that this amount will be applied as follows:

(a) To the purposes indicated below in this clause (a), in the amounts so estimated or in different proportions as the Reorganization Committee, prior to the completion of the reorganization, or the Board of Directors of the Holding Company, thereafter, may determine or approve; the unexpended balance if any to be employed as specified below in clause (b)		8,093,750
To the distributive shares of non-assenting bondholders, underwriting commission, expenses of foreclosure and reorganization, including court costs, compensation and allowances of the Receivers and their counsel, the Mortgage Trustee and its counsel, taxes on creation and issuance of new securities, compensation and expenses of the Protective and Reorganization committees, their depositaries and counsel, fees of engineering, accounting and other experts, engraving, printing and miscellaneous requirements	$2,000,000	
To betterments of existing road	2,579,750	
To acquisition of new passenger and freight equipment for Operating Company	3,514,000	
	$8,093,750	

(b) To the acquisition by purchase, construction or otherwise of extensions and feeders, including payment of interest during construction; the acquisition of additional new property other than extensions, including floating equipment; payment of the Receivers' car trust obligations; provision of working capital for the Operating Company; and supplying for any of the purposes mentioned in clause (a) any amount required therefor in excess of the amount there specified; (moneys to be applied in such amounts severally as the Reorganization Committee, prior to the completion of the reorganization, or the Board of Directors of the Holding Company, thereafter, may determine or approve); and, if the Board of Directors of the Holding Company and the Board of Directors of the Operating Company—or the Reorganization Committee prior to the completion of the reorganization—shall so determine, (in every case by vote of three-fourths of all members and subject to the approval and upon such conditions, if any, as may be imposed by the Railroad Commission of the State of California), to the protection of the claims against the Denver Company to be acquired as contemplated by the Plan and of the Operating Company's situation with respect to its traffic relations $10,506,250

Total $18,600,000*

*See Note, p. 7.

VI.

Provision For Cash Requirements.

Provision for meeting the cash requirements of the Plan has been made as follows:

It is estimated that on March 1, 1916, the Receivers should have on hand available for use by the Operating Company, in cash or its equivalent for the purposes of the Plan, not less than	$600,000
New Bonds of the Operating Company are to be sold either to Depositors or to an Underwriting Syndicate which has been formed and has underwritten the sale of $20,000,000 of New Bonds together with certain stock of the Holding Company, as set forth in Article IX of this Plan, realizing	18,000,000
Total to be provided	$18,600,000*

VII.

Securities To Be Issued By The New Companies.

Securities are to be issued by the Operating Company and the Holding Company, respectively, as follows:

---

*The above statements of Cash Requirements and of the Provision made therefor are merely estimates and not to be deemed to limit the amount that may be raised or expended to effect the reorganization. The Reorganization Committee shall have power to accomplish the purposes proposed, if necessary, by somewhat increasing or diminishing the amount of bonds to be sold (but without varying the consideration or terms of sale) or by disposing of stock of the Holding Company freed for use by reason of the failure of holders of Old Bonds to become Depositors (see page 9). [1050]

By the Operating Company:

(Subject to the approval of the Railroad Commission of the State of California and any other public officials having jurisdiction.)

First Mortgage Gold Bonds (the New Bonds), authorized issue, $50,000,000

To be secured by first mortgage upon all of the existing railway properties of the Old Company and all property hereafter acquired by the Operating Company integrally connected therewith and all property acquired by means of the use of proceeds of the New Bonds or against which New Bonds shall be issued.

To be sold forthwith to the Depositors or to members of the Underwriting Syndicate, of said authorized issue, bonds of the principal amount of 20,000,000

To be dated March 1, 1916 (or otherwise as the Reorganization Committee may determine); to bear interest at the rate of 5% per annum, payable March 1 and September 1; to mature March 1, 1946, and to be redeemable, in whole or in part, at principal amount and accrued interest, after published notice, upon any interest payment date.

To be issued thereafter 30,000,000

for or against betterments, additions and extensions, under safeguards to be prescribed in the New Mortgage, at not exceeding the rate of $1,000, principal amount of bonds, for $1,000 of money actually invested in additional physical property subject to the New Mortgage or in securities subject to the New Mortgage representing the entire interest in physical property; to bear interest at a rate or rates not in any instance exceeding 6%; by their terms to be redeemable;—rates of interest, dates of maturity and redemption prices to be fixed by the Board of Directors of the Operating Company with the approval of the Board of Directors of the Holding Company, from time to time as bonds shall be issued.

Capital Stock (to be issued forthwith):

Preferred, 6% non-cumulative; preferred both as to dividends and in liquidation; to be redeemable at 105 and accrued dividends, if any, for the then current year and to be convertible into Common Stock at any time prior to any date fixed for redemption at the rate of dollar for dollar 27,500,000

Common 47,500,000

In its discretion and with the approval of the Railroad Commission of the State of California, the Reorganization Committee may cause the Operating Company to issue its obligations bearing interest at the rate of at least six per cent. per annum in place of the Preferred Stock of the Operating Company provided for in the Plan and, in its discretion and with the approval of said Commission, may cause obligations, junior to said obligations last mentioned, to be issued in place of such part as it may specify of the Common Stock of the Operating Company provided for in the Plan, and either of said issues or any part of either thereof may be fixed obligations or income obligations and may or may not have fixed dates of maturity and said obligations may be of such character otherwise as the Reorganization Committee may determine consistently herewith.

All of the shares of such stock, preferred and common, or such substituted obligations, will upon completion of the reorganization pass into the ownership of and be held by the Holding Company.

By the Holding Company:

Capital Stock (to be issued forthwith):

Preferred, 6% non-cumulative; preferred both as to dividends and in liquidation; to be redeemable at 105 and accrued dividends, if any, for the then current year and to be convertible into Common Stock at any time prior to any date fixed for redemption at the rate of dollar for dollar	27,500,000
Common	47,500,000

VIII.

Securities To Be Outstanding In Hands Of The Public.

It is expected that after the completion of the Reorganization, securities will be outstanding in the hands of Depositors and purchasers of New Bonds as follows:

First Mortgage bonds of the Operating Company (the New Bonds)	$20,000,000
Preferred Stock of the Holding Company	27,500,000
Common Stock of the Holding Company	47,500,000

except that Preferred Stock to the extent of $500 for every $1,000 of such Old Bonds as shall not become subject to the Plan and Agreement and Common Stock to the extent of $750 for every $1,000 of such Old Bonds, unless otherwise employed by the Reorganization Committee for the purposes of the reorganization, will be returned to the Treasury of the Holding Company. [1051]

IX.

Disposition Of New Securities.

(A) Exchange of Old Bonds for Stock of the Holding Company and Purchase of New Bonds by Depositors.

Depositors, including transferees of certificates of deposit, will be entitled to receive in exchange for their Old Bonds and their claims against the Denver Company (all whereof by virtue of becoming subject to the Plan and Agreement will pass to the Reorgan-

ization Committee to be used for the purposes of the reorganization as authorized by the Plan and Agreement), stock (preferred and common) in the Holding Company, either in connection with or without the purchase by them of First Mortgage Bonds of the Operating Company upon the following basis:

A Depositor will be entitled to purchase at 90 and accrued interest New Bonds equal in principal amount to 40 per cent. of the principal amount of his Deposited Bonds and if any Depositor shall so purchase New Bonds he will be entitled to receive, in addition to the New Bonds so purchased and in exchange for his Deposited Bonds, Preferred Stock of the Holding Company to an amount, par value, equal to 55% of the principal amount of his Deposited Bonds and Common Stock thereof to an amount, par value equal to 95% of the principal amount of such Deposited Bonds.

If a Depositor shall not exercise his said privilege to purchase New Bonds he will be entitled to receive, in exchange for his Deposited Bonds, Preferred Stock of the Holding Company of an amount, par value, equal to 50% of the principal amount of his Deposited Bonds and Common Stock thereof to an amount, par value, equal to 75% of the principal amount of such Deposited Bonds.

TABLE EXHIBITING PRIVILEGES AVAILABLE TO DEPOSITORS

Assumes as Basis a Deposit of $1,000 Principal Amount of Old Bonds.

In Event of	Consideration to be given by Depositor	Per Cent. of Holding of Old Bonds	Securities to be Received: New Bonds Principal Amount	Per Cent. of Holding of Old Bonds	Preferred Stock of Holding Company, Par Value	Per Cent. of Holding of Old Bonds	Common Stock of Holding Company, Par Value	Per Cent. of Holding of Old Bonds
Purchase of New Bonds	(a) Cash $360, and accrued interest upon $400 of New Bonds (b) $1,000 principal amount of Old Bonds and coupon of March 1, 1915, and subsequent coupons (c) Transfer of claims against Denver Company	36	$400	40	$550	55	$950	95
Exchange of Old Bonds for stock without purchase of New Bonds	(a) $1,000 principal amount of Old Bonds and coupon of March 1, 1915, and subsequent coupons (b) Transfer of claims against Denver Company	No cash to be paid.	None		$500	50	$750	75

Any Depositor desiring to avail himself of the privilege of purchasing New Bonds must signify his election so to do by executing and delivering to the Reorganization Committee or its nominees a contract of purchase in form prescribed by the Committee, on or prior to the 15th day of February, 1916, unless the time therefor shall be extended by the Reorganization Committee. In the event that a later date be fixed, Depositors will be notified as promptly as practicable, as provided in the annexed Agreement, of the action of the Reorganization Committee.

The cash payable on account of the purchase price of bonds so purchased is to be paid in instalments as follows:

An amount not exceeding 50% of such cash purchase price, after February 15, 1916, and prior to the completion of the reorganization, upon call by the Reorganization Committee. [1052]

The uncalled balance of such 50% (i. e. such part of such first 50% as shall not have been called by the Reorganization Committee) to the Operating Company, at any time upon call by its Board of Directors.

An amount not exceeding an additional 25% to the Operating Company, at any time after January 1st, 1917, upon call by its Board of Directors.

The entire balance of the cash purchase price to

the Operating Company, at any time after June 1st, 1917, upon call by its Board of Directors.

In final adjustment of the purchase-price, accrued interest upon bonds purchased will be charged and interest will be allowed upon instalments previously paid at the coupon-rate.

Any Depositor, upon any instalment-payment-date may anticipate payment of all, but not part, of the instalments of the purchase price of the New Bonds purchased by him then remaining unpaid.

Upon payment by any Depositor of the first instalment payable upon his contract to purchase New Bonds and the surrender of his certificate of deposit, duly endorsed, he will be entitled to receive a new certificate evidencing such payment and also his rights with respect to the New Bonds and the stock which he is to receive hereunder. Payment of further instalments will be receipted for by endorsement upon such certificate upon presentation thereof for the purpose. The bonds and certificates for stock to which a Depositor may be entitled will be delivered only upon payment in full of the amount payable upon his contract of purchase.

Every Depositor who shall elect, as herein provided, to purchase New Bonds and at the date fixed for the payment of the first instalment of the purchase price, shall pay the entire purchase price of the Bonds to be taken by him, will be entitled to borrow from the Underwriting Syndicate or lend-

ers to be provided by said Syndicate (through the agency of the Depositary, The Equtable Trust Company of New York, 37 Wall Street, New York City) any amount not exceeding 90 per cent. of the purchase price of the New Bonds to be taken by him (exclusive of accrued interest upon Bonds purchased); such loan to be repaid, with interest at the rate of six per cent. per annum, on or before one year from the date so fixed for the payment of such first instalment of the purchase price and to be secured by all of the Bonds and Certificates of Stock to which the Depositor shall be entitled hereunder upon the making of such payment in full—the Underwriting Syndicate or its representatives to possess upon default such power of sale, for account of the borrower, as is customary in cases of collateral loans by banks in New York City.

Any Depositor who shall elect to purchase New Bonds as provided herein and shall default in making any payment as required by the Plan and Agreement will, unless the Reorganization Committee shall otherwise determine, forfeit any and all payments that he may have already made and all right to which he would otherwise have been entitled to acquire securities, receive benefits or enforce rights hereunder; and in such event the Reorganization Committee in its discretion may cause all of the bonds, claims, shares of stock and benefits to which such Depositor otherwise would have been entitled

hereunder to be sold for his account to satisfy the amount remaining due from such defaulting depositor and all amounts chargeable hereunder against the securities, rights and benefits so sold. But the Reorganization Committee may, in general or in particular instances, enlarge or extend the time for making any of the payments required by the Plan and impose conditions in respect of any payments the time wherefor shall be so extended.

Unpaid coupons (appertaining to Old Bonds) which became due September 1, 1914, and theretofore will be paid in cash by the Trustee under the Mortgage securing the Old Bonds, The Equitable Trust Company of New York.

(B) Sale of New Bonds and Stock to Underwriting Syndicate.

Such of the New Bonds as shall not be purchased by Depositors are to be taken by an Underwriting Syndicate which has been formed for the purpose and has underwritten the sale, at 90 and accrued interest, of all of the $20,000,000 principal amount of New Bonds to be issued forthwith, and is to receive $1,000 principal amount of New Bonds, $125 par value of Preferred Stock and $500 par value of Common Stock of the Holding Company for each $900 of cash (and accrued interest upon $1,000 principal amount of New Bonds) paid by it. The securities received by an Underwriter in consideration of any given payment are to be the same in char-

acter and amount as those that will be forfeited by Desopitors who fail to exercise their privilege of purchasing New Bonds by payment of an equal amount. [1053]

TABLE EXHIBITING CONSIDERATION TO BE PAID BY UNDERWRITERS AND SECURITIES TO BE RECEIVED THEREFOR

Assuming Purchase of $400, Principal Amount, of New Bonds

	Securities to Be Received		
Cash to be paid.	New Bonds, principal amount	Preferred Stock in Holding Company, par value	Common Stock in Holding Company, par value.
$360 and accrued interest upon $400, principal amount, of New Bonds	$400	$50	$200

Assuming Purchase of $1,000, Principal Amount, of New Bonds.

$900 and accrued interest upon $1,000, principal amount, of New Bonds	$1,000	$125	$500

The Underwriting Syndicate, if the Plan shall be declared operative, is to be paid for its agreement to underwrite the sale of the entire $20,000,000, principal amount, of New Bonds and to loan monies to Depositors as above provided, a cash commission of two per cent, thereof (i. e., $400,000). The Equitable Trust Company of New York and Messrs. Blair & Co., William Salomon & Co., and E. H. Rollins & Sons, at the request of the Protective Committee having undertaken, by firm commitment, to form the syndicate above referred to (the subscribers and the amounts of their subscriptions severally to be satisfactory to the Protective Committee) and having discharged such engagement, are to be paid therefor, if the Plan shall be declared operative, a compensation of one-half of one per cent. of the

principal amount of bonds the sale whereof has been underwritten (i. e., $100,000).

The amounts payable by the Underwriting Syndicate will be subject to call upon ten days' notice at any time after February 15, 1916, by the Reorganization Committee and such amounts as are not so called prior to completion of the reorganization will be subject to call upon like notice by the Board of Directors of the Operating Company.

Upon delivery of bonds to the Underwriting Syndicate, accrued interest upon the bonds so delivered will be charged and interest will be allowed at the coupon-rate upon payments, if any, previously made upon account of the purchase price.

The Underwriting Syndicate may, on the date fixed for the making of the first payment to be made by it, or at any time thereafter, anticipate payment of all or any part of the purchase price of the securities to be taken by it.

X.

Comparative Table of Capitalization and Fixed Charges of Old Company and of the Combined New Companies at Completion of Reorganization.

The following table exhibits the indebtedness, stock and interest charges of the Old Company on the one hand and of the Operating Company and Holding Company (consolidated) on the other:

Obligations and Stock Outstanding.	Old Company.	New Company.
First Mortgage Bonds	$50,000,000	*$20,000,000
Second Mortgage Bonds	25,000,000	None
Unsecured debt (including notes, open accounts, traffic and car service balances and claims for interest in default, owing to the Denver Company as of date of appointment of Receivers), about	26,800,000	None
Miscellaneous claims as ascertained by Receivers (not including claims of considerable amount paid just prior to Receivership)	163,625.54	None
Capital Stock	75,000,000	75,000,000† Preferred 27,500,000† Common 47,500,000†
Interest Charges:		
First Mortgage Bond Interest	2,500,000	$1,000,000
Other interest (as of date of appointment of Receivers), about	$2,200,000†† (accruing, but in principal part never paid.)	None

*The Operating Company, when the proceeds of the New Bonds have been expended should possess physical property, securties and cash resources approximately of the value of $17,500,000, in addition to the property possessed by the Old Company prior to the Receivership, which should add materially to its earning capacity as compared with that of the Old Company.

†These amounts may be somewhat diminished as explained on p. 9.

††Does not include interest on several million dollars of intebtedness to the Denver Company and Utah Fuel Company upon which payment of interest was not regularly accrued upon the Western Pacific books prior to the Receivership.

[1054]

XI.

Claims Against The Denver Company To Be Transferred To The Holding Company.

The Articles of Incorporation of the Holding Company shall provide that the Board of Directors of the Holding Company shall have power to enforce against the Denver Company the claims against the latter company to be acquired by the Holding Company as herein provided or to compromise such claims or to enter into any arrangement in satisfaction thereof, but only upon the condition that their action shall be authorized or ratified by the vote of the holders of two-thirds of such shares of the capital stock of the Holding Company (preferred and common stock voting together) as shall be represented in person or by proxy at a special meeting of the stockholders to be called upon not less than thirty days' notice for the purpose of considering such settlement, compromise or other adjustment, which vote shall represent not less than a majority in amount of the outstanding capital stock of the Holding Company.

It shall be provided by some effectual means that the net proceeds realized by the Holding Company from the enforcement or compromise of claims against the Denver Company and all avails thereof in the form of securities or property shall be paid over or transferred to the Operating Company, and the Holding Company, in the discretion of its Board

of Directors, may transfer said claims to the Operating Company, which may if it shall so determine, cause the same to be subjected to the New Mortgage; provided that if such transfer be made no settlement, compromise or other adjustment of said claims shall be effective without the assent of the stockholders of the Holding Company as above required, or if the Holding Company be dissolved, then a like assent of the stockholders of the Operating Company; and provided, further, that if any expense or liability shall have been incurred by the Holding Company in realizing upon or protecting such claims, the payment or transfer shall be made only after such expense has been reimbursed and such liability discharged out of such proceeds or avails or discharged or assumed by the Operating Company.

XII.

Restrictions Upon The Sale Or Pledge Of Property And The Creation Of Indebtedness.

The Articles of Incorporation of the Holding Company shall provide that the Holding Company shall not (a) sell, pledge, or in any manner dispose of any part of the stock of the Operating Company, or (b) create any indebtedness of the Holding Company, other than such as the Board of Directors shall deem to be essential to the ordinary conduct of the business of the Company, unless such sale, pledge or other disposition of the stock of the Operating

Company or the creation of such indebtedness, as the case may be, shall be approved by the affirmative vote of the holders of two-thirds of such shares of the capital stock of the Holding Company as shall be represented in person or by proxy at a stockholders' meeting of that Company called upon not less than thirty days' notice for the purpose of passing upon the matter in question—which affirmative vote shall in no case be less than a majority in amount of all of the outstanding capital stock of the Holding Company.

The Articles of Incorporation of the Holding Company shall, however, provide that the Board of Directors may, pursuant to the affirmative vote of the holders of two-thirds of such shares of the capital stock of the Company as shall be represented in person or by proxy at a stockholders' meeting called upon not less than thirty days' notice, for the purpose of passing upon the question, (which affirmative vote shall be not less than a majority in amount of all of the outstanding capital stock of the Holding Company), but not otherwise, pledge the assets of the Company, or any thereof, for the purpose of raising money in order to protect the claims against the Denver Company to be acquired by the Holding Company as provided in the Plan from loss or impairment of value by reason of the foreclosure of any of the mortgages upon the property of the Denver Company or otherwise.

The Articles of Incorporation of the Holding Company and of the Operating Company shall be so formulated as to permit a sale of the property and assets of the Operating Company as an entirety, either for cash or partly for cash and partly upon credit, or in exchange for bonds or stock or both of any other corporation or corporations, provided (but not otherwise) such sale or disposition and the consideration to be received therefor, shall be approved both by the affirmative vote of holders of two-thirds in amount of the outstanding capital stock of the Operating Company and by the affirmative vote of holders of two-thirds of such shares of the capital stock of the Holding Company as shall be represented in person or by proxy at a stockholders' meeting called, upon not less than thirty days' notice, for the purpose of passing upon the question (which affirmative vote shall be not less than a majority in amount of all of the outstanding capital stock of the Holding Company).

XIII.

Distribution Of The Assets Of The Holding Company In Case Of Dissolution.

The Articles of Incorporation of the Holding Company shall provide that in the event of the dissolution or other liquidation of the Holding Company, no stockholder shall be entitled to have the assets of the Company converted into cash, or to

share in the same generally, but that if proper proceedings shall be taken for the purpose of dissolving or liquidating the Holding Company and if the Board of Directors of the Company shall determine that the assets of the Campany shall be distributed in kind and such decision shall be approved by the affirmative vote of a majority in amount of the stockholders of the Company at a meeting thereof duly called for the purpose of considering said matter or of considering the dissolution or liquidation of the Holding Company, the preferred stockholders of the Holding Company shall be entitled and required to receive amounts of Preferred Stock (or obligations issued in lieu of Preferred Stock as permitted hereby) of the Operating Company equal at par value to their respective holdings of the Preferred Stock of the Holding Company, and the common stockholders of the [1055] Holding Company shall be entitled and required to receive pro rata Common Stock of the Operating Company and such other securities and cash, if any, as may properly be apportionable to Common Stock of the Holding Company.

The Articles of Incorporation of the Operating Company shall provide that, in the event of the dissolution or other liquidation of the Operating Company, (subsequently to the dissolution or liquidation of the Holding Company), if the Board of Directors of the company shall provide by resolu-

tion approved by the affirmative vote of eighty per cent. in amount of the outstanding Preferred Stock and eighty per cent. in amount of the outstanding Common Stock of the Operating Company that the assets of the company shall be distributed in kind and for the apportionment of said assets, for the purposes of such distribution, as between the Preferred Stock and the Common Stock of the company, the provision for the distribution and apportionment of assets made by any resolution so adopted and approved shall be effective and binding upon all of the stockholders of the Operating Company.

XIV.

Boards Of Directors Of The Holding Company and Operating Company.

The first Board of Directors of the Holding Company shall be:

A. M. Hunt,	Frederick H. Ecker,
James D. Phelan,	Alvin W. Krech,
George Whittell,	Starr J. Murphy,
David R. Forgan,	William A. Read,
I. DeBruyn,	William Salomon,
C. Ledyard Blair,	Richard B. Young,

Their successors shall be elected at the annual meeting of the Stockholders of the Holding Company to occur during the year 1917, in accordance with the provisions regulating the holding of stockholders' meetings to be contained in the Articles of Association.

The first Board of Directors of the Operating Company shall be named by the Reorganization Committee, but members of said Board will at all times be subject to removal and their successors will be elected by the Holding Company, which will be substantially the sole stockholder of the Operating Company.

XV.

Holders Of Second Mortgage Bonds, Unsecured Creditors And Stockholders Of The Old Company.

No provision is made in the Plan for the allotment of any property or any of the securities or money provided by the Plan to holders of Second Mortgage Bonds, to unsecured creditors, or to stockholders of the Old Company.

XVI.

Non-Assenting Holders Of Old Bonds.

Bondholders who shall have withdrawn their bonds from the operation of the Protective Agreement and the holders of Old Bonds who shall not have deposited their bonds under the Protective Agreement or hereunder will not be entitled to participate in the Plan or the benefits thereof to any extent, and will receive only their distributive shares of any balance of the proceeds derived from the sale of the mortgaged property of the Old Company that may remain after the discharge of obligations

and liabilities entitled to prior payment under the terms of the foreclosure decree and orders of Court.

XVII.

Terms And Effect Of Participation

The Plan and Agreement having been prepared by, and adopted by the unanimous vote or concurrent action of the members of, the Protective Committee and filed with the depositary named in the Protective Agreement, the Plan and Agreement, after the the Protective Committee shall have published notice of its preparation, adoption and filing as required by the Protective Agreement, will be binding upon all holders of certificates of deposit issued pursuant to provisions of the Protective Agreement by the Equitable Trust Company of New York, depositary thereunder, or any of its agents who, within the time limited in the Protective Agreement, do not surrender their certificates of deposit, withdraw the amount of deposited bonds represented thereby and pay their pro rata shares of the indebtedness, compensation, expenses and liabilities of the Protective Committee as fixed by that Committee, all in compliance with the conditions and provisions of the Protective Agreement. All holders of certificates of deposit issued under the Protective Agreement who shall fail so to surrender their certificates of deposit, withdraw their bonds and pay their pro rata share of the indebted-

ness, compensation, expenses and liabilities of the Protective Committee, as provided in the Protective Agreement, shall be conclusively and finally deemed for all purposes to have assented to the Plan and Agreement and all the terms thereof, and, immediately upon the Plan and Agreement's being declared operative by the Reorganization Committee, such holders of certificates of deposit shall be irrevocably bound and concluded thereby.

Holders of Old Bonds who have not already deposited their bonds under the Protective Agreement and who desire to participate in the benefits of the Plan and Agreement must deposit their bonds, accompanied by all coupons maturing on or after March 1, 1915, with The Equitable Trust Company of New York (or some duly authorized agent thereof), as Depositary of the Reorganization Committee on or before February 7th, 1916, receiving therefor certificates of deposit in such form as shall be prescribed by the Reorganization Committee; and the holders of Old Bonds so depositing the same and all holders of certificates of deposit issued to evidence deposits thereof shall be conclusively deemed to be subject to and irrevocably bound by the Plan and Agreement.

Every holder of any of the certificates of deposit issued under the Protective Agreement who, by failure so to withdraw his bonds from the operation of the Protective [1056] Agreement as permitted

thereby, and every holder of Old Bonds, who by deposit of his bonds or coupons with the Reorganization Committee or otherwise as herein provided, shall become bound by the Plan and Agreement and every successor in interest of any such certificate holder or bondholder shall be deemed; if the Plan and Agreement shall be declared operative by the Reorganization Committee, irrevocably to have assigned and transferred to the Reorganization Committee all of the said bonds and coupons so deposited or left upon deposit and all of the claims against the Denver Company susceptible of assignment or transfer (whether in law or in equity) by such Depositor that shall have arisen or exist or that shall arise or exist in favor of such certificateholder or bondholder or any predecessor or successor in interest of either thereof; and the Reorganization Committee is hereby irrevocably authorized by every such certificate-holder and bondholder and every successor in interest of either thereof to transfer, whether directly or through the medium of mesne transfers, all such bonds and claims to any corporation or corporations utilized by it for the purpose, or in the course, of the reorganization, or to transfer a part of the same or an interest therein to one such corporation and another part or interest to another or others, and thereby to vest every such transferee with the full legal title to the bonds or claims or interest so transferred to it and the entire beneficial interest therein.

The Reorganization Committee, if it deem it desirable or convenient so to do, may require holders of certificates of deposit issued by the Protective Committee who shall not withdraw their bonds as aforesaid to present their said certificates of deposit to the Depositary hereunder or some agent thereof in order that there may be noted thereon the assent of the holders thereof to the Plan and Agreement and the said holders of such certificates of deposit may be further required to execute and deliver assignments, either to the Reorganization Committee or to its nominee or nominees, of all their claims against the Denver Company, but neither any such notation of assent nor any such assignment shall be necessary to give binding effect to any of the foregoing provisions of this Article or to the Plan and Agreement in any particular.

XVIII.

Failure To Declare Plan Operative—Abandonment Thereof.

If the Plan and Agreement either in its original form, or as it may be modified pursuant to the provisions of the annexed Agreement, shall not be declared operative prior to March 15, 1916, or in the event that the Reorganization Committee shall wholly abandon the plan of reorganization, the Old Bonds deposited, or the avails thereof then under the control of the Reorganization Committee, shall

be delivered to the Depositors in amounts representing either respective interests, upon surrender of their several certificates of deposit properly endorsed and payment of their respective shares of compensation, disbursements, expenses, and liabilities of the Reorganization Committee and of the Protective Committee, as fixed by the Reorganization Committee. In such case any moneys paid by a Depositor pursuant to any of the provisions of the Plan or the proceeds thereof remaining after deducting therefrom his share of the compensation, disbursements, expenses and liabilities of the Reorganization Committee and Protective Committee payable by said Depositor and not already reimbursed, shall be returned, but without interest, to the Depositor entitled thereto.

XIX.

Statements Contained In Plan.

This Plan has been adopted by the Protective Committee, acting under the Protective Agreement. The statements contained in the Plan have been compiled from sources believed to be reliable and accurate, but certain of them are necessarily approximate and none is to be construed as a representation or as an inducement to any action or to any omission to act upon the part of anyone. No error or misstatement of any description in the Plan shall constitute ground for the withdrawal of any

Depositor from the Plan and Agreement nor for any complaint with respect to the same or with respect to any consequences arising from having become a party thereto.

XX.

Agreement Of Reorganization.

In order to enable the Plan to be carried out and to give effect to the same the annexed Agreement of Reorganization has been prepared. Whenever the word "Plan" is used herein it shall be deemed to include said Agreement and the provisions thereof, and every depositor who shall assent to the Plan in any manner thereby will become a party to the Agreement, the provisions of which shall govern in any case of conflict between the Plan and the Agreement.

Dated, December 15, 1915. [1057]

AGREEMENT.

Agreement made as of December 15, 1915, between (a) A. M. Hunt, James D. Phelan, George Whittell, David R. Forgan, I. de Bruyn, C. Ledyard Blair, Frederick H. Ecker, Alvin W. Krech, Starr J. Murphy, William A. Read, William Salomon and Richard B. Young, as the Reorganization Committee provided for and named in the foregoing Plan of Reorganization, parties of the first part;

(b) Holders of Certificates of Deposit issued under a Protective Agreement, dated May 1, 1915,

which represent First Mortgage Five Per Cent. Thirty Year Gold Bonds of Western Pacific Railway Company issued under the First Mortgage of said Railway Company dated September 1, 1903, who shall become parties hereto in the manner set forth in the Plan of Reorganization to which this Agreement is annexed or as prescribed herein;

(c) Holders of such First Mortgage Five Per Cent. Thirty Year Gold Bonds who shall become parties hereto in the manner so set forth or prescribed;

Such holders of said certificates of deposit and said bonds constituting the parties of the second part; and

(d) Alvin W. Krech, C. Ledyard Blair, I. de Bruyn, Frederick H. Ecker, David R. Forgan, A. M. Hunt, Starr J. Murphy, James D. Phelan, William A. Read, William Salomon, George Whitrell and Richard B. Young, as the Committee acting under said Western Pacific Railway Company First Mortgage Bondholders' Protective Agreement dated May 1, 1915, parties of the third part:

Witnesseth:

The parties hereto for and in consideration of the conditions and promises hereinafter set forth and for the purpose of mutually assuring the carrying out the foregoing Plan of Reorganization (herein referred to as the "Plan") have mutually agreed and hereby do severally agree, each of the Depos-

itors and the Protective Committee agreeing with the Reorganization Committee and the Depositors agreeing with one another, but each of them agreeing for himself and not for any of the others, as follows:

First.—The terminology adopted in the Plan, as set forth in Article I thereof, is adopted also for the purposes of this Agreement.

Second.—The Plan is hereby adopted and approved and is to be taken as a part of this Agreement with the same effect as though it were embodied herein and the Plan and this Agreement shall be read as parts of one and the same instrument, but in case of conflict between the Plan and this Agreement the provisions of this Agreement shall control. No statement, recital, explanation, estimate, opinion, suggestion or anything else contained in the Plan or Agreement or in the Introductory Statement prefixed to the Plan or in any circular issued or which may hereafter be issued, whether by advertisement or otherwise by or on behalf of the Reorganization Committee, the Protective Committee, or by any of the members of said Committees or by any depositary, sub-depositary or agent of a depositary under the Plan and Agreement or the Protective Agreement or by the Western Pacific Railway Company (the Old Company) or by either or both of the Receivers of the Old Company, or by any other corporation, body or person, is intended or is

to be taken as a representation or warranty or as a condition of or inducement to any deposit under or assent to the Plan and Agreement and no omission, defect, error or misstatement therein shall constitute cause for any complaint or shall release any deposit under the Plan and Agreement or affect or release any assent thereto or anything done thereunder or in connection therewith, except by virtue of the written consent to such release of the Reorganization Committee.

Third.—Participation in the Plan in any respect whatsoever is dependent upon the holders of the certificates of deposit and bonds hereinbefore mentioned becoming parties to the Plan and Agreement in manner as follows:

The Plan and Agreement having been prepared by and adopted by the unanimous vote of the members of the Protective Committee and filed with the depositary named in the Protective Agreement, shall, after the Protective Committee shall have published notices of its preparation, adoption and filing as required by the Protective Agreement, be binding upon all holders of certificates of deposit issued pursuant to provisions of the Protective Agreement and all parties whose Old Bonds shall have become subject thereto, who, within the time limited in the Protective Agreement, shall not surrender their certificates of deposit, withdraw the amount of deposited bonds represented thereby and

pay their pro rata shares of the indebtedness, compensation, expenses and liabilities of the Protective Committee as fixed by said Committee, complying in all respects with the conditions and provisions of the Protective Agreement in that behalf; and all holders of certificates of deposit issued under the Protective Agreement and all parties whose Old Bonds shall have become subject thereto, who shall fail so to surrender their certificates of deposit, withdraw their bonds and pay their pro rata share of the indebtedness, compensation, expenses and liabilities of the Protective Committee and all of their successors in interest shall be conclusively and finally deemed for all purposes to have assented and become parties to the Plan and Agreement, and immediately upon the Plan and Agreements being declared operative by the Reorganization Committee, such holders of certificates of deposit and parties whose Old Bonds shall have become subject to the Protective Agreement shall be irrevocably bound and concluded thereby.

Holders of Old Bonds who have not already deposited their bonds under the Protective Agreement and who desire to participate in the benefits of the Plan and Agreement shall deposit their bonds, accompanied by all coupons maturing on or after March 1, 1915, with The Equitable Trust Company of New York (or some duly authorized agent thereof), as the Depositary under the Plan and Agree-

ment, on or before February 7th, 1916, receiving therefor certificates of deposit in such form as shall be prescribed by the Reorganization Committee; and the holders of Old Bonds so depositing the same and all holders of certificates of deposit issued to evidence such deposits shall be conclusively deemed to be subject to and irrevocably bound by and to have become parties to the Plan and Agreement.

The Reorganization Committee may in its discretion, permit the holders of Deposited Bonds to become parties to the Plan and Agreement without the actual deposit of their bonds, and all bondholders so becoming parties shall be embraced within the term "Depositors" whenever used in the Plan or in this Agreement. The Reorganization Committee may authorize the acceptance for deposit under the Plan and Agreement of Old Bonds without such of the interest coupons appertaining thereto as the Committee may specify, and also may authorize the acceptance for deposit under the Plan and Agreement, upon such terms and conditions as the Reorganization Committee in its absolute [1058] discretion may prescribe, of interest coupons without the bonds to which they appertain.

Every holder of any of the certificates of deposit issued under the Protective Agreement and every party whose Old Bonds or coupons shall have become subject thereto, who by failure to withdraw his bonds or coupons from the operation of the Pro-

tective Agreement as permitted thereby, and every holder of Old Bonds or coupons, who by deposit of his bonds or coupons or otherwise as herein provided, shall become a party to the Plan and Agreement and every successor in interest of any such Depositor shall be deemed, if the Plan and Agreement shall be declared operative by the Reorganization Committee, irrevocably to have assigned and transferred to the Reorganization Committee all of the bonds and coupons so deposited or left upon deposit and all of the claims against the Denver Company susceptible of assignment or transfer (whether in law or in equity) by such Depositor that shall have arisen or exist or shall arise or exist in favor of or be enforceable by or on behalf or for the benefit of such Depositor or any predecessor or successor in the interest thereof; and in such event the Reorganization Committee are hereby vested as trustees of an express trust with the legal title to all of the Deposited Bonds and coupons and all claims against the Denver Company deemed to be transfered as aforesaid; and the Reorganization Committee is hereby irrevocably authorized by every such Depositor to utilize all or any of such bonds and of the coupons appertaining thereto and other deposited coupons and any part of any amount payable upon any thereof in satisfying the purchase price to be paid for any of the property of the Old Company purchased by or at the instance of the Reor-

ganization Committee for the purposes of the reorganization and to transfer, whether directly or through the medium of any mesne transfers, all such bonds and coupons (or any interest therein or claims based thereon remaining after the same shall have been utilized in payment of such purchase price) and all such claims against the Denver Company to any corporation or corporations used by the Reorganization Committee for the purpose or in the course of the reorganization provided for in the Plan, or to transfer the same in part to one such corporation and in part to another or others, and thereby to vest every such transferee with the full legal title to the bonds or claims or interest in bonds or claims so transferred to it and the beneficial interest therein.

Certificates of Deposit issued under the Protective Agreement and representing Old Bonds which shall become subject to the Plan and Agreement as herein provided, shall entitle the holders thereof to the same rights and render them subject to the same obligations as if the Old Bonds represented thereby had been deposited under the Plan and Agreement and certificates of deposit had been issued therefor hereunder. The Reorganization Committee, if it deem it desirable or convenient so to do, may require holders of certificates of deposit issued under the Protective Agreement who shall not withdraw their bonds as aforesaid to present their said certificates

of deposit to the Depositary hereunder in order that there may be noted thereon the assent of the holders thereof to the Plan and Agreement and the said holders of such certificates of deposit may be further required to execute and deliver to said Depositary assignments, either to the Reorganization Committee or to its nominee or nominees, of all claims against the Denver Company arising or to arise as aforesaid.

Certificates of deposit issued for Deposited Bonds under the Protective Agreement or hereunder and all interests and rights represented thereby, shall be transferable, but only subject to the terms and conditions of the Plan and Agreement and in such manner as the Reorganization Committee shall prescribe or approve. Upon any such transfer all rights of the transferor evidenced by such certificates, and as well all amounts paid upon the purchase price of New Bonds purchased by virtue of the interest in Deposited Bonds represented by such certificate of deposit, shall pass to the transferee and the transferees and subsequent holders of any such certificate of deposit shall for all purposes be substituted in place of prior holders subject to this Agreement and the acts of the original Depositor shall be binding upon and be deemed the acts of every such transferee. By accepting or holding any certificate of deposit, every recipient or holder thereof (whether the same be issued in his name or otherwise) shall become thereby a party to the Plan and Agreement with the same force and effect as though an actual

subscriber thereof and shall thereby authorize the Reorganization Committee to affix his signature thereto.

The certificates of deposit and any interim, or other certificates or receipts issued by or for the Reorganization Committee or the Protective Committee or any depositary of either may be treated by the Reorganization Committee and the Depositary as negotiable instruments, and the bearer or, if registered, the registered holder for the time being, may be deemed by the Reorganization Committee and the Depositary to be the absolute owner thereof and of all of the rights of the original depositor and of every holder, and neither the Reorganization Committee nor the Depositary shall be affected by any notice to the contrary.

All Depositors agree to execute from time to time on demand of the Reorganization Committee any and all such powers of attorney as said Committee in its discretion shall deem necessary or advisable, and also to execute from time to time on demand of the Reorganization Committee any and all such transfers and assignments or writings required for vesting or evidencing the complete ownership of the Old Bonds represented by certificates of deposit and the claims against the Denver Company as the Reorganization Committee may determine.

Fourth.—February 7, 1916, shall be the limit of time within which bondholders shall have the right to deposit their Old Bonds and within which they

may become parties to the Plan and Agreement, but the Reorganization Committee in its descretion either generally or in special instances, may extend such time or renew the period or periods fixed or limited for such deposit, such extension of time to be upon such terms and conditions, if any, as the Reorganization Committee may see fit to prescribe. Holders of Old Bonds who do not deposit the same or become parties hereto in the manner herein provided within the periods respectively limited or fixed therefor, as aforesaid, and holders of certificates of deposit issued under the Protective Agreement who shall exercise their right of withdrawal as provided in the Protective Agreement, will not be entitled to deposit their bonds or to become parties to this Agreement or to share in the benefits of the Plan and Agreement and shall acquire no rights hereunder, except upon obtaining the express consent in writing to such deposit and participation of the Reorganization Committee, which may, in its absolute discretion, and upon such terms and conditions as it may see fit, withhold or give such consent.

Fifth.—The Reorganization Committee shall be the sole and final judge as to when and whether sufficient Old Bonds shall have become subject to the Plan and Agreement to and whether other conditions do warrant it in declaring the Plan operative and in attempting to carry the same into effect, and it shall have power whenever it shall deem proper

(notwithstanding anything that may have been done), to abandon the Plan or any part thereof. The Reorganization Committee by the affirmative vote of three-fourths of its members may modify the Plan in whole or in part (and even if such modification shall amount to the substitution of a new Plan therefor) and any such modification or any modi- [1059] fied plan may deal with and provide for any or all matters that under the Protective Agreement might have been dealt with or provided for in the Plan and Agreement. After any modification by a like vote the Reorganization Committee may restore to the Plan any abandoned part or parts thereof or discard any such modification and the Committee thereafter may seek to carry the Plan into effect as fully as if such part or parts had not been abandoned or such modification made. It may attempt to carry the Plan into effect rather than abandon or modify the same, even though it be manifest that in attempting to carry out the Plan it must depart from the original Plan or some part thereof. Any modification, when made by the Reorganization Committee as above provided, shall thereupon become and be part of the Plan and Agreement, but in case of any intentional modification of the Plan a statement of such modification shall be filed with the Depositary; and in case of any such intentional modification which shall alter the Plan in any substantial respect, a statement of such modification shall be filed with

the Depositary and notice of the fact of such filing shall be given as hereinafter provided in Article Fifteenth and within four weeks after the first publication of such notice, all Depositors may surrender their respective certificates of deposit, in negotiable form, to the Depositary and may withdraw their Deposited Bonds or the avails thereof then under the control of the Reorganization Committee, to the amounts properly apportionable to such certificates, respectively; provided, however, in every case of such withdrawal the Depositor shall make payment of his share of the compensation, disbursements, expenses and liabilities of the Reorganization Committee and the Protective Committee, as fixed by the Reorganization Committee. Every such Depositor so withdrawing shall thereupon, without any further act, be released from the Plan and Agreement and shall cease to have any rights hereunder, and the Deposited Bonds represented by the certificates of deposit so surrendered, or the avails thereof then under the control of the Reorganization Committee, as the case may be, shall thereupon be released therefrom, and the exercise of such right of withdrawal shall release and discharge the Reorganization Committee and the Depositary from all liability of every character to every such withdrawing Depositor, except so far as provision is hereinafter made in regard to cases where money has been paid in under the Plan. Every Depositor not so withdrawing with-

in such four weeks after the first publication of said notice shall be deemed to have assented to the proposed modification and whether or not otherwise objecting shall be bound thereby as fully and effectively as if he had actually assented thereto. Any modifications made as herein provided shall be part of the Plan and Agreement, and all provisions hereof concerning and references herein to the Plan shall apply to the Plan as so changed and modified. If, nevertheless, the Plan shall be modified and in consequence thereof Deposited Bonds shall be withdrawn as permitted hereby and thereafter the Plan shall again be modified so as to restore it to the form or so that it shall have substantially the effect of the Plan as it existed immediately prior to such first modification, the Reorganization Committee shall provide that all bonds that have been so withwithdrawn may again be deposited hereunder within some reasonable period to be prescribed by the Committee.

The Reorganization Committee may construe the Plan and Agreement and its construction thereof or action thereunder in good faith shall be final and conclusive. It may supply any defect or omission or reconcile any inconsistency in such manner and to such extent as shall be deemed by it expedient to carry out the Plan properly and effectively, and it shall be the sole judge of such expediency. This agreement is in all respects to be liberally construed

to enable the Reorganization Committee to carry into effect the Plan, whether in the form hereto attached or as changed or modified pursuant to the provisions hereof. The Reorganization Committee may at any time, and from time to time, file with the Depositary a statement or statements specifying the amount of securities which any company utilized in the reorganization may or shall issue for the purpose of carrying out the Plan and Agreement or specifying in detail the terms upon which any holders of claims against the Old Company not provided for in the Plan may become parties to the Plan and Agreement or specifying the amount of cash or securities which shall be deliverable to any person or corporation for the purpose of carrying out the Plan and Agreement, the amount of which is not now expressly specified therein, and any other statement expresing authority to do anything which is its opinion is expressly or impliedly authorized by the Plan; and such statement or statements shall, when filed and without further notice, be a part of the Plan and Agreement as if contained in the original Plan or in this Agreement.

In case the Reorganization Committee shall not prior to March 15, 1916, declare the Plan operative (either as originally filed or as the same shall be modified pursuant to the provisions hereof), or in case the Reorganization Committee shall abandon the entire plan of reorganization, the Deposited Bonds or the avails thereof then under the con-

trol of the Reorganization Committee shall be delivered to the several Depositors in amounts representing their respective interests hereunder, upon surrender of their several certificates of deposit in negotiable form, and payment of their respective shares of the compensation, disbursements, expenses and liabilities of the Reorganization Committee and of the Protective Committee, as fixed by the Reorganization Committee:

The Reorganization Committee may, whenever and upon such terms as it shall deem proper, accept from any Depositor the surrender of any certificate of deposit and, upon receipt thereof and payment of such Depositor's share of the compensation, disbursements, expenses and liabilities of the Reorganization Committee and of the Protective Committee, as fixed by the Reorganization Committee, it may surrender and deliver Deposited Bonds of the amount in such certificate stated (or the avails thereof then under its control) which thereupon shall be deemed to be released and discharged from and no longer to be entitled to any of the benefits of the Plan and Agreement.

In every case of withdrawal or release from the Plan and Agreement of Old Bonds or their avails, or of final abandonment of the entire plan, the Reorganization Committee shall apportion to the Deposited Bonds the shares of the compensation, disbursements, expenses and liabilities of the Reorganization Committee and of the Protective Committee, in the opinion of the Reorganization Com-

mittee fairly chargeable thereto, and any such apportionment made by the Reorganization Committee shall be binding upon all Depositors and shall be a charge upon the Deposited Bonds and the avails thereof. The word "liabilities" when used in this Agreement shall be deemed to include any sums due to any Syndicate or Syndicates organized as contemplated by the Plan and Agreement in repayment of sums theretofore paid or advanced by it or them for the purposes of the reorganization, and also all sums of money, securities or other property borrowed or owed or advanced by the Reorganization Committee and all sums as security for the payment of which the Reorganization Committee shall have pledged or charged securities or property under its control as authorized hereby. In case a Depositor, as a condition of the withdrawal of securities, shall be required to contribute toward any advances made or the repayment of any amounts invested in property or securities, he shall be entitled to receive from the Reorganization Committee a certificate evidencing his interest in such advances or investment. In any case of such withdrawal, release or abandonment of the entire plan moneys paid by any withdrawing [1060] Depositor pursuant to the provisions of the Plan and Agreement or the proceeds thereof remaining after deducting therefrom the share of compensation, disbursements, expenses and liabilities incurred by the Reorganization Committee and of the Protective Committee payable by such Depositor and not

already reimbursed, shall be returned, but without interest, to the Depositor entitled thereto. In every such case, any moneys actually collected by the Reorganization Committee on account of Deposited Bonds or coupons or claims against the Denver Company shall be accounted for by the Reorganization Committee. The Reorganization Committee shall not, however, be held responsible for loss of any money disbursed or expended by it for the purposes of the Plan and Agreement nor for any depreciation in value of any Old Bonds, property or securities, and Depositors shall have no claim for the return of any Old Bonds or any moneys except to the extent of their equitable shares of such bonds or moneys or the avails thereof at the time remaining in the hands of, or under the control of, the Reorganization Committee. Notwithstanding any provisions of this agreement to the contrary, the pecuniary liability of the Depositors shall in every case (except with respect to payment for New Bonds purchased by them) be confined to a charge upon the Deposited Bonds or their avails and the claims and other property and securities, if any, under the control of the Reorganization Committee and no liability in excess thereof shall be assessed against the Depositors, but the Reorganization Committee, its successors and assigns, shall have a lien upon the Deposited Bonds and their avails and the claims and other property and securities and the moneys, if any, under the control of the Reorganization Committee for its compen-

sation and the compensation of the Protective Committee and for all expenditures and advances made and liabilities incurred by it or by the Protective Committee.

Sixth.—Upon the consummation of the Plan, Depositors shall be entitled, upon compliance with all of the terms and conditions of the Plan and Agreement, including payment of such sums of money, if any, as may be required to be paid pursuant thereto, and upon surrender of their certificates of deposit in negotiable form, to receive the new securities to which they shall respectively be entitled under the Plan and Agreement, but only as and when the same shall be issued and ready for delivery.

Seventh.—Subject to the provisions in that behalf contained in the Plan, the times within which the cash payable by Depositors must be paid for New Bonds shall be fixed by the Reorganization Committee; and, enter generally or in special instances and on such terms and conditions, if any, as it may see fit, the Reorganization Committee may extend or may renew any period or periods so fixed or limited. The cash so payable by Depositors must be paid to the Depositary, or some duly authorized agent thereof, for account of the Reorganization Committee, and must be receipted for by the Depositary, or some such duly authorized agent on the certificates of deposit in respect of which such cash is paid, upon presentation of said certificates of deposit to the Depositary or such agent or on new

certificates of deposit to be issued in exchange for certificates so presented. All Depositors who shall elect to purchase New Bonds as permitted by the Plan and Agreement severally and respectively agree that prompt payment of the cash payable by them, respectively, on the terms of the Plan and Agreement, is an essential condition to their acquisition, respectively, of New Bonds or stock under the Plan, and that any such Depositor who shall fail to make prompt payment of any cash so payable, as provided in the Plan or in this Agreement, within any period fixed or limited for such payment in the Plan or this Agreement or by the Reorganization Committee, forthwith and without other notice or action shall cease to be entitled to receive any of the new securities provided for in the Plan or any benefits hereunder, and that so such Depositor shall be entitled to the return of any Deposited Bonds or the repayment of any cash theretofore paid by him; and that in such event the Reorganization Committee, in its discretion, without any proceedings either at law or in equity and without demand or notice, and in such manner and on such terms as it shall deem expedient, may at public or private sale or sales, for the account of such defaulting Depositor, dispose of any or all of the interests or rights to which such defaulting Depositor would otherwise have been entitled, including all of the New Bonds and all shares of stock in the Holding Company to which such Depositor would otherwise have been entitled and also

all Old Bonds and claims against the Denver Company, or the avails thereof, represented by his certificate of deposit, and may apply the proceeds of such sale or sales to payment of the costs and expenses thereof and of any proceeding looking thereto and to the satisfaction of the obligation of such defaulting Depositor hereunder and under his agreement to purchase New Bonds (paying the over-plus if any to such Depositor), and thereupon all interest and right of such Depositor in any of the securities or any property or rights so disposed of or any avails thereof shall cease and determine. At any public sale hereunder of any securities or of any such interests or rights, the Reorganization Committee or any other party hereto or anyone in any manner connected with said Committee or any such party may become the purchaser thereof for their or his own benefit without accountability. The Reorganization Committee, however, in its discretion, may waive such default, may accept payments of overdue instalments due from any Depositor at any time with or without penalty, and may also waive or limit any penalty prescribed either in the Plan or Agreement or in pursuance thereof.

Eighth.—If and when the Plan shall be declared operative by the Reorganization Committee, the Depositors, each for himself, hereby make, constitute and appoint, the parties of the first part and their successors, constituting the Reorganization Committee for the time being as herein provided, or a ma-

jority of them, the true and lawful attorneys of them and each of them for the purposes herein set forth, with full power and authority to act for and in the name, place and stead of each of them, and with full power of substitution, from time to time, and of revocation. The Depositors hereby irrevocably request the Reorganization Committee to endeavor to carry the Plan into practical operation in its entirety, or with changes therein as hereinbefore provided, or with such additions, exceptions and modifications as shall be adopted as herein provided, and the Depositors hereby agree that the Reorganization Committee shall be, and it hereby is, vested with all the rights, powers and authority necessary or proper to enable it to carry out the Plan and Agreement in its entirety, or with such additions, exceptions and modifications.

Ninth.—The Reorganization Committee is authorized in its discretion to demand, receive and collect all amounts that may at any time be due or owing or payable in respect of the Deposited Bonds, any claims against the Denver Company or other securities or claims acquired by the Reorganization Committee as permitted hereby and whether such sums be payable for principal, interest or otherwise; to elect or cause any trustee or trustees under the mortgage securing the Old Bonds or any other mortgage or trust indenture, if the foreclosure of such mortgage or indenture shall in its judgment be advisable for the purposes of the reorganization, to

elect to have the [1061] principal of the Old Bonds or of the obligations secured by any such other mortgage or trust indenture become due and payable and at pleasure revoke or withdraw such election or cause the same to be revoked or withdrawn; to request or instruct any such trustee or trustees to prosecute or foreclose or to take any other proceedings for the enforcement of the Old Mortgage or the Old Bonds or any such mortgage or trust indenture or any bonds or obligations secured thereby, or to exercise the powers or any of them conferred by the Old Mortgage or any such mortgage or indenture and generally to make any such requests and demands and give any such instructions upon or to any such trustee or trustees and to confirm and give to such trustee or trustees all such powers as in the judgment of the Reorganization Committee may be advantageous in carrying out the Plan; to enforce or cause to be enforced the claims against the Denver Company under Contract B or any guaranties endorsed upon Deposited Bonds or in favor of the Old Company; to institute or to become parties to or to dismiss or cause to be dismissed any legal proceedings; to compromise any litigation now or at any time existing or threatening, in whole or in part (except that claims against the Denver Company under Contract B or guaranties endorsed upon any of the Old Bonds shall not be compromised by virtue of such power to compromise litigation), with plenary power to enter into any agreement tending to or deemed by it in

its discretion likely to promote the consummation of the Plan and Agreement; to give all agreements or bonds of indemnity or other bonds, and therewith to charge the Deposited Bonds and their avails, any property purchased or new securities to be issued hereunder or any or any part of any thereof; to acquire, upon such terms and conditions and at such prices as it may deem fit, any property deem by it expedient for the purposes or requirements of the Plan; to do whatever in the judgment of the Reorganization Committee may be expedient to promote or procure the sale or purchase as an entirety, or sale or purchase at separate sales or in separate parcels, of any property of the Old Company and to sell and dispose of, upon such terms and for such consideration as the Reorganization Committee may deem fit, any portion of the property of the Old Company or of any property acquired by the Committee or in its behalf that it shall deem unnecessary for the purposes of the reorganization; to bid or to cause anyone else to bid or to refrain from bidding at any sale, either public or private, of any property whatever, whether owned or controlled by the Old Company or otherwise, to adjourn or consent to the adjournment of any sale or sales, and at, before or after any sale or purchase to arrange and agree for the resale of any portion of the property which it may decide to sell rather than to retain; to make any offer; to to cause or permit anyone else to offer, to purchase all or any portion of the property of the Old Company or any other property, and, as part of any such offer or otherwise, to offer

to pay and to pay, or to cause or permit to be offered or paid, any amounts in cash or otherwise to any bondholders, creditors or other person or persons; to hold any property purchased either in its name or in the name of any person or corporation approved by it, and to apply Old Bonds held by it hereunder or their avails in satisfaction of any bid or pursuant to any offer or contract, whether made by it or any other person or corporation approved by it, or towards obtaining funds for the satisfaction or performance thereof. The amount to be paid or offered or bid by the Reorganization Committee, or which it may cause to be paid or offered or bid, for any property shall be absolutely discretionary with it and in case of a sale to others of any property, the Reorganization Committee may receive out of the proceeds of such sale or otherwise any distributive shares payable on account of Deposited Bonds. The Reorganization Committee may enter into any agreement or arrangement for decrees or orders for facilitating or hastening the course of litigation or tending towards or deemed by the Committee likely to promote the consummation of the Plan; it may apply for or consent to the appointment or reappointment of any receiver or receivers of the Old Company or of any corporation in which the Depositors as such may be interested or against which it may hold demands, or of the property of any such corporation or the extension of any receivership, or it may apply for or consent to the removal of any receiver or receivers

and the substitution of one or more other receivers or the termination of any receivership and the delivery of the property subject thereto to its owners; it may consent to the issue and sale of receiver's certificates or other obligations and to the securing of any receiver's certificates so issued by such liens or charges upon all or any of the property of the Old Company and having such priorities as it may approve. It may lend money to the Receivers of the Old Company or to the Holding Company or the Operating Company and loan money in its discretion for any of the purposes of the Plan and Agreement.

The Reorganization Committee may also borrow and use such sums of money on such terms and subject to such conditions as in its discretion it may deem wise or necessary in order to carry out the Plan or to protect the interests of the Depositors and for that purpose and to secure such sums as may be so borrowed with interest it may pledge, hypothecate or otherwise create charges upon any or all of the Deposited Bonds or their avails, property purchased or the new securities to be created as contemplated by the Plan and all moneys paid by the Depositors or by any Underwriting Syndicate. In case of any such borrowing, whether upon pledge or not, the Reorganization Committee may give to the lender for the sum so borrowed the promissory note or notes of the Reorganization Committee signed on behalf of such Committee by its Chair-

man or otherwise as may be authorized by the Committee.

The Reorganization Committee shall have the sole control, discretion and management of the Plan and its execution. It may make such expenditures and incur such obligations and liabilities, and do such acts as in its absolute discretion it may deem judicious and proper in order to carry out fully and effectively the purposes of the Plan and of this Agreement, and it may, or the Protective Committee with its consent may, exercise any powers of the Protective Committee under the Protective Agreement. Statements in the Plan and Agreement of the intended arrangements or as to the methods to be employed in effecting the details of the proposed reorganization shall not limit the discretion of the Reorganization Committee, but may be modified or changed or departed from or entirely abandoned as often as the Committee shall deem advisable, it being intended that the Reorganization Committee shall have full discretion and power to use whatever means it shall deem most convenient and advisable for accomplishing the reorganization, the acquisition of any property, directly or indirectly, and the issue and disposition of the new securities and the other objects contemplated by the Plan and Agreement. Anything which anywhere in the Plan and Agreement it is provided the Reorganization Committee may do or allow to be done it may do or allow to be done by or through such agents or agencies as it may determine, or by or through others

with its approval or consent or acquiescence, or it may contract with any other person or corporation that any such thing shall be done or permitted to be done.

The Reorganization Committee in carrying out the Plan may organize or procure to be organized one or more companies or it may adopt or use any companies whether now existing or not. It may make or cause to be made consolidations, mergers, sales, purchases, leases, guaranties or other arrangements by or between any such companies, any of the companies mentioned in the Plan or any companies thereby permitted to be employed in connection with the reorganization; it may make or cause to be made conveyances and transfers of the property or securities acquired by it or with its appro- [1062] val, and may cause the ownership of all or any property by the Operating Company or the Holding Company to be either direct ownership or ownership through the ownership of bonds or stocks or both of any other company, and may cause the New Mortgage to be either a direct lien upon any particular property or a lien upon the bonds or stocks or both of any company owning such property; and all of the provisions of the Plan and Agreement shall equally apply to and in respect of any physical properties embraced in the reorganization and to and in respect of securities representing any such property, it being intended that for all purposes of the Plan and Agreement any such property and any securities representing such property may be treated

or accepted by the Reorganization Committee in its discretion as substantially identical. It may take or allow to be taken such other proceedings as it may deem proper for the purpose of the creation of the new securities provided for in the Plan and Agreement and the carrying out of any of the provisions thereof. The Reorganization Committee may pay the expense of listing certificates of deposit or any new securities to be issued under the Plan and Agreement upon the New York Stock Exchange or elsewhere, and any taxes, fees or charges payable in connection therewith, and as well any taxes, fees or charges imposed by any public authority wherever situated in respect of the authorization, creation, issue, transfer or distribution of all or any of the new securities or other securities under the control of the Reorganization Committee, as provided or permitted by the Plan and Agreement, and it may pay or discharge any taxes, fees or governmental charges payable in connection with the deposit, use, assignment or transfer of Old Bonds under or in pursuance of the Plan and Agreement.

The Reorganization Committee may prescribe or approve the form and terms of all charters and by-laws of the Operating Company and of the Holding Company and of any other corporations that shall be utilized in the reorganization, and all certificates of stock and bonds at any time to be issued and the New Mortgage and all other instruments to be executed, and may make contracts with regard to the form thereof. The Reorganization Committee may

create and provide for all necessary trusts and may appoint trustees thereunder. The Reorganization Committee may in its discretion set apart and hold in trust or permit or cause to be set apart and held in trust with any trust company or otherwise any part of the new securities to be issued and any cash which may be received from the Depositors or any syndicate or from sales of New Bonds or stock or otherwise as it may deem suitable for the purpose of securing the application thereof to any of the purposes of the Plan and Agreement.

It may make or cause to be made any underwriting agreement with any syndicate or otherwise which it may deem advisable to insure or promote the carrying out of the Plan and Agreement or any portion thereof, including not only any agreement or arrangement for the sale or the underwriting of the sale of New Bonds and of stock to be issued pursuant to the Plan and Agreement, but as well any agreement or arrangement for the purpose of obtaining money for the purposes of the Plan whereby the new stock to which holders of such Old Bonds who shall not be Depositors would have been entitled if they had become parties to the Plan and Agreement or any other new securities authorized by the Plan and Agreement and not otherwise appropriated or all such securities shall be sold or the sale thereof shall be underwritten, and they may provide for the payment to any such syndicate or any syndicate organized pursuant to the authority contained or as stated in the Plan and Agree-

ment of reasonable compensation and likewise for the payment of compensation to bankers or managers whom the Protective Committee has procured or the Reorganization Committee may procure to organize or with whom they may agree for the organization of any such syndicate; and for the performance of any agreement entered into by the Protective Committee or by it, the Reorganization Committee may charge the Deposited Bonds, the property purchased and the new securities to be issued hereunder.

The Reorganization Committee may dispose of or consent to the disposition of any of the new securities not required for delivery to Depositors or to the Underwriting Syndicate, or the securities of any company which shall be utilized in the reorganization not reserved under the Plan for specific uses; and it may use, or allow to be used, the proceeds thereof, if required for the purpose of carrying out the reorganization, in such manner as it may deem expedient and advisable for the purposes of the Plan.

The Reorganization Committee shall have power to make equitable provision for any case of lost or destroyed bonds, certificates of stock, certificates of deposit or other securities and to provide for and make such issues of scrip or convertible securities as it shall deem expedient properly to represent any fractional interest in the New Bonds or the stock to be issued under the Plan, and it may in its discretion settle for and adjust any such fractional interest in cash. In case it shall deem it ad-

visable for any reason it may issue or authorize the issue of temporary or interim certificates to represent new securities.

All moneys at any time held under the Plan and Agreement shall be subject to the order of the Reorganization Committee, which shall apply the same or cause or permit the same to be applied for any of the purposes of the Plan as from time to time may be determined by it; its determination as to the propriety and purpose of any such application shall be final, and nothing in the Plan shall be understood as limiting or requiring the application of specific moneys to specific purposes. The Reorganization Committee may, if in its judgment such course shall be in the interest of the Operating Company or the Holding Company, abandon any particular purpose or purposes for which money is appropriated in the Plan and, within the limitations and subject to the conditions expressly prescribed in Article V. of the Plan, may provide for the application of any of the moneys, to be raised as contemplated by the Plan, to any of the purposes mentioned in said Article V. and in such amounts or proportions, respectively, as may be determined by the Committee.

The Reorganization Committee may acquire, pay, compromise, settle, surrender or release any obligations or indebtedness of, or claims against, the Old Company, or any claims or demands against or liens or charges upon any property of the Old Company, or upon any other property which the Reorganization Committee may deem it ad-

visable for the Operating Company or the Holding Company to acquire, or any claims or demands whereby, or by reason whereof, any such property may be encumbered or the title thereto affected, or any Receiver's certificates or other obligations or liabilities incurred or which may be issued or incurred by the Receivers of the Old Company, and for such purpose may use any cash provided by the Plan or any new securities which it is provided in the Plan may be issued in the course of the reorganization and which are not otherwise appropriated in the Plan. It may surrender or cancel, or consent to the surrender or cancellation of or may adopt or consent to the adoption or renounce or consent to the renunciation of any agreement to which the Old Company is a party or the Receivers of the Old Company are parties. It may compromise, settle, surrender or release or consent to the compromise, settlement, surrender or release of any claims of the Old Company or of its Receivers (but claims against the Denver Company under Contract B or guaranties endorsed on Old Bonds acquired from the Depositors under the Plan and Agreement may be compromised or settled by the Reorganization Committee, if at all [1063] only by virtue of the power conferred and within the limitations prescribed in Article II. of the Plan and as provided hereinafter in this Article Ninth).

Generally the Reorganization Committee may make or ratify or permit to be made or ratified contracts with any person, syndicate, committee or

corporation in respect of any matter connected with the Plan and Agreement.

The reorganization Committee may employ counsel, depositaries, agents and all necessary assistants and may incur, agree with respect to and discharge any and all expenses and obligations which it deems reasonable for the purposes of the Plan or for carrying out or attempting to carry out the same, all expenses in connection with the preparation of the Plan and Agreement, the issue of certificates, all expenses of organizing the Operating Company and the Holding Company and any other company or companies utilized in connection with the reorganization, the issue and transfer of property and securities, legal expenses, expenses for advertising and printing, all expenses of or incident to the receivership of the Old Company and the foreclosure of the mortgage securing the Old Bonds, all expenses incurred hereunder or under the Protective Agreement the compensation and obligations and liabilities of the Protective Committee, and all other expenses in any manner connected with the Plan and Agreement or which the Committee may deem it expedient to incur or pay in undertaking to promote or in effecting any of the purposes thereof. The Committee shall be the sole judge of the propriety of any and all expenses and of the amount thereof.

The Reorganization Committee may proceed under the Plan and Agreement or any part thereof with or without judicial sale, and in case of judicial sale it may exercise any power either before or after sale. Any action contemplated in the Plan and

Agreement may be performed before or after reorganization, and any such action may be taken by the Reorganization Committee or by anyone approved by it at any time when it shall deem the reorganization advanced sufficiently to justify such course and as it may deem necessary the Reorganization Committee may defer or permit to be deferred the performance of any provision of the Plan or Agreement or may commit such performance to the Operating Company or the Holding Company or such other person, persons or corporation as it shall determine and may cause any such company to pay any indebtedness authorized or incurred by the Reorganization Committee or otherwise in furtherance of the Plan and to assume any obligations which in its judgment may be necessary or proper to carry out the Plan and Agreement; and pending the completion of the reorganization, if in its judgment occasion shall require, the Reorganization Committee notwithstanding any other provision of this Agreement, may exercise, but only upon the affirmative vote or concurrent action of three-fouths of all its members, any of the powers which by the terms of the Plan are to be vested in or may be exercised by the Holding Company or by the Operating Company.

In the event that any agreement or arrangement providing for compromise or settlement of claims against the Denver Company shall be made in the exercise of the power last conferred, the same shall be made, and shall be subject to, the condition that such compromise or settlement shall be submitted to

the Depositors, registered as such upon the books of the Depositary, and shall not be disapproved by more than one-third in amount thereof. In the event of the making of any such agreement or arrangement, a statement of the proposed compromise or settlement, setting forth the terms thereof, shall be filed with the Depositary and with each of its agents then authorized to accept deposits under the Plan and Agreement, which statement shall be subject to inspection by Depositors, and notice of the filing thereof shall be published as provided in Article Fifteenth hereof. Any Depositor desiring to disapprove such compromise or settlement may within four weeks from the date of the first publication of said notice, file with the Depositary or with any of its said authorized agents, a writing stating that he disapproves the same. Any Depositor who shall fail so to file such written disapproval within the time so limited shall be conclusively deemed to have consented to such compromise or settlement notwithstanding any objection thereto that he may make in any other manner; and such compromise or settlement shall be binding upon all the Depositors as fully as if every Depositor had expressly consented thereto unless more than one-third in amount of all of the Depositors, registered as such upon the books of the Depositary, shall in writing disapprove the same in the manner and within the period aforesaid. In case more than one-third in amount of said Depositors shall so disapprove such compromise or settlement, the same shall be without any force

whatsoever and shall not be consummated by the Reorganization Committee.

Tenth.—The Protective Committee and the Depositary under the Protective Agreement, upon notice from the Reorganization Committee that the Plan has become operative, will deliver to or hold subject to the order of the Reorganization Committee, and will assign, transfer and deliver as shall be directed by any such order, all of the Deposited Bonds and coupons subject to the Protective Agreement, the holders whereof or of certificates of deposit wherefor shall have become bound by the Plan and Agreement, all claims against the Denver Company that may have been subject to the Protective Agreement and all avails of any such bonds or claims and all other securities and benefits whatsoever subject to the control of the Protective Committee; and the Protective Committee, with respect to all such Deposited Bonds and coupons, claims, securities and benefits, shall at any time exercise any or all of its powers or rights under the Protective Agreement, as may be requested by the Reorganization Committee, for the purpose of carrying out any of the provisions of the Plan and Agreement or the intent or any of the purposes thereof.

Eleventh.—The Reorganization Committee undertakes in good faith to endeavor to execute the Plan, either in its original form or as the same shall be modified as provided herein, but neither the Reorganization Committee nor the Protective Committee assumes any personal responsibility for the execution thereof or for the result of any steps

taken or acts done for the purposes thereof. The Reorganization Committee may act by any sub-committee or Board of Managers or by other agents, and may delegate authority to any such sub-committee Board of Managers or agents to carry out the provisions of the Plan, and the members of any such sub-committee or Board of Managers or any such agent may be allowed reasonable compensation for services. Neither the Reorganization Committee nor the Protective Committee nor any member of either of said committees, nor the Depositary, shall be personally liable for any act or omission of any agent or employee selected by them, or any of them, nor for any action taken or not taken in good faith in the belief that any Deposited Bond or New Bond or certificate of stock or of deposit or other instrument or any signature is genuine or effective, nor for anything done or not done under the advice of counsel, nor for any error of judgment nor mistake of law or fact, nor for anything except its or his own individual wilful misconduct or bad faith, and neither the Reorganization Committee nor the Protective Committee nor any member of either of said committees nor the Depositary shall be personally liable for the acts or defaults of any other person or body.

The accounts of the Reorganization Committee are to be filed with the Board of Directors of the Holding Company. The accounts when approved by

[1064]

disinterested public accountants to be designated and employed by said Board of Directors shall be final, binding and conclusive upon all parties having

any interest therein, and upon such approval whenever given the Reorganization Committee shall be discharged and any liability upon its part shall cease. The acceptance of new securities by any Depositor shall estop the person accepting the same from questioning the conformity of such securities in any particular with any of the provisions of the Plan, and the acceptance of new securities by the holders of a majority in amount of the Depositors shall so estop all Depositors and constitute full ratification of all of the accounts, acts and proceedings of the Reorganization Committee and the Protective Committee and a release and discharge of the Reorganization Committee and the Protective Committee and all of the members of each thereof and the Depositary from all liability and accountability of every kind, character and description whatsoever.

Twelfth.—The Reorganization Committee, by vote of three-fourths of its members as the Committee shall then be constituted, may at any time increase the number of members constituting the Reorganization Committee and appoint additional members, and the member or members so elected shall have all the powers of, and, together with those herein named and their successors repectively, shall constitute the Reorganization Committee, with like force and effect as if they were specially named herein, and the Reorganization Committee may by like vote fill any vacancy, but need not necessarily do so, and the Committee as at any time constituted, notwithstanding any vacancy, shall have all the pow-

ers, rights, property and interests of the Committee as originally formed or theretofore existing. Any member of the Reorganization Committee may resign by giving notice of his resignation in writing to the chairman of the Reorganization Committee or to a majority of the other members. The Reorganization Committee may settle any account or transaction with any member who shall have resigned or be under other disability to act or with the representatives of any deceased member, and give or receive a full release and discharge with reference thereto. The Reorganization Committee may elect one of its members to be Chairman of the Committee, may appoint a Secretary, who need not be a member of the Committee, may prescribe regulations for its meetings and the convening thereof, and may keep a record of its acts and proceedings. Except as herein otherwise provided, the affirmative vote of a majority of the members of the Reorganization Committee, as at any time constituted, shall be necessary and sufficient for the passage of any resolution or the taking of any other action (but a member may vote by proxy—who may or may not be another member of the Committee—at any meeting of the Reorganization Committee), and such affirmative vote of the majority, except as aforesaid, shall be binding upon the Reorganization Committee and the Depositors. It shall not be necessary for the members of the Reorganization Committee formally to meet in order to take any action provided they agree on any matter and embody such

agreement in any form of writing signed by every member of the Reorganization Committee.

All members of the Reorganization Committee shall be entitled to compensation for their services.

The Reorganization Committee and any member thereof and the Depositary and any officer or director thereof and anyone connected with the Reorganization Committee or with any of the members thereof or with the Depositary or with the Operating Company or the Holding Company or with any other company mentioned or referred to herein (whether as member, incorporator, stockholder, director, officer or in any capacity) and any Depositor or any transferee of any Depositor and any partnership or corporation with which any person above mentioned may be connected in any manner may be or become pecuniarily interested, without accountability in respect thereof, in any contract, transaction, property or matter with which the Plan or Agreement or the Operating Company or the Holding Company or any other Company or any committee mentioned or referred to herein are concerned, including participation in any syndicate agreement whether or not mentioned in the Plan. Any such person or corporation may also become a Depositor under the Plan and Agreement, and in such event shall have the same rights, benefits and obligations hereunder and in respect of all Old Bonds deposited, all claims transferred, all property purchased, all securities of the Operating Company or the Holding Company to be issued or re-

ceived, and all payments to be made, as other Depositors in like case, and may buy and sell certificates of deposit and undeposited Old Bonds in the same manner and with the same rights as any one not a Depositor.

The Reorganization Committee may form or procure the formation of any syndicate or syndicates which it may deem necessary or advantageous for carrying out the purposes of the Plan or of this Agreement and any of the members of the Reorganization Committee may act as members or managers of any such syndicate or syndicates. The terms of any agreement forming and of all agreements with any such syndicate may be fixed by the Reorganization Committee, and as so fixed shall be binding and conclusive upon the Depositors. The syndicate managers, whether or not members of the Reorganization Committee may receive compensation as such syndicate managers, and syndicate managers who may be members of the Reorganization Committee may receive also compensation as members of the Reorganization Committee.

The Reorganization Committee may remove and in such event or in the event of its resignation or incapacity may appoint a successor to the Depositary. Any direction given by the Reorganization Committee, evidenced by a writing signed by the Chairman or certified by the Secretary thereof, shall be full and sufficient authority for any action of the Depositary or of any other custodian or of any committee or agent. The Depositary shall in-

cur no liability for anything done or permitted at the request or direction of the Reorganization Committee.

Thirteenth.—The enumeration of specific powers hereby conferred shall not be construed to limit or to restrict the general powers herein conferred or intended so to be, and it is hereby declared that it is intended to confer on the Reorganization Committee in all respects any and all powers which the Reorganization Committee may deem necessary or expedient in or towards carrying out or promoting in any respect the purposes of the Plan and Agreement as now existing or as the same may be modified as herein provided, even though any such power be apparently of a character not now contemplated, and the Reorganization Committee may exercise any and every such power as fully and effectively as if the same were herein specified and as often as for any cause or reason it may deem expedient.

Fourteenth.—No right is conferred or created hereby nor is any trust, liability or obligation (except the agreements herein contained in favor of Depositors and of the Reorganization Committee, the Protective Committee and the Depositary) created by the Plan and Agreement or assumed hereunder by or for the Operating Company or the Holding Company, or in favor of any creditor or of any holder of any claim whatsoever against the Old Company or in favor of any other company now existing or to be formed hereafter or in favor of any person or corporation whatsoever, with respect

to any Deposited Bonds or coupons or any claims against the Denver Company or any moneys paid to or received by the Reorganization Committee or by the Depositary [1065] hereunder or with respect to any property acquired by purchase at any sale or otherwise acquired or with respect to any new securities to be issued under the Plan or with respect to any other matter or thing, but this Agreement shall be construed as strictly an agreement between the parties and as solely affecting and relating to the Reorganization Committee, the Protective Committee, the Depositary and Depositors hereunder. The Deposited Bonds and claims against the Denver Company and all property, securities, claims, demands and rights acquired pursuant to the Plan and Agreement shall remain in full force and effect for all purposes and shall not be deemed merged, satisfied or discharged, and no legal right or lien shall be deemed released or waived unless the same shall be specifically provided for by affirmative action of the Reorganization Committee as permitted hereby; and all such claims, demands and rights may be enforced by the Reorganization Committee or by anyone to whom the same may be assigned, as provided herein, with authority conferred by the Reorganization Committee for the enforcement thereof.

Fifteenth.—All calls for payments to be made under the Plan or for the surrender or presentation of certificates of deposit issued hereunder or under the Protective Agreement, all notices fixing or

limiting any period for the deposit or withdrawal of securities or for the taking of any action or for payments and all other calls and notices hereunder shall be inserted in at least two daily newspapers published in the City of New York and in at least one daily newspaper published in the City and County of San Francisco, twice in each week for two successive calendar weeks in each case on any days of the week. Any call or notice whatsoever when so published by the Committee shall be taken and considered as though personally served upon all parties to be bound thereby as of the respective dates of insertion thereof, and such publication shall be the only notice required to be given under any provision of the Plan and Agreement.

Sixteenth.—The Plan and this Agreement shall bind and benefit the several parties and their and each of their survivors, successors, executors, administrators and assigns.

A printed copy of this Agreement signed by the members of the Protective Committee or three-fourths of them and by the members of the Reorganization Committee or a majority of them and lodged with The Equitable Trust Company of New York shall be held and taken to be the original Agreement. This Agreement may, however, be executed in any number of counterparts with the same effect as if all of the parties executing the same had executed but one instrument.

In witness whereof, the undersigned members of the Protective Committee and of the Reorganization Committee have caused these presents to be

duly executed the day and year first above written and the parties of the second part have become parties hereto in the manner herein provided.

Office of President,
The Western Pacific R. R. Co.,
San Francisco, California,
December 18, 1939.

EXHIBIT D.

GRANTING CLAUSES OF FIRST MORTGAGE.

Granting clauses.

Grant and conveyance.

Now, therefore, this indenture Witnesseth, that, in order to secure the payment of all of said bonds (which are hereinafter called "First Mortgage Bonds") at any time issued and outstanding under this indenture according to their tenor, purport and effect, as well the interest as the principal thereof, and to secure the performance and observance of all of the covenants and conditions therein and herein contained and to declare the terms and conditions upon which the First Mortgage Bonds are to be executed, authenticated, delivered and received, the Company, in consideration of the premises and of the acceptance or purchase of said bonds by the holders thereof and of the sum of One hundred Dollars, lawful money of the United States of America, to it duly paid by the Trustees at or before the ensealing and delivery of these presents, the receipt whereof is hereby acknowledged, hath granted, bargained, sold, aliened, remised, released, conveyed, confirmed, mortgaged, pledged, assigned, transferred and set over, and by these presents doth grant, bargain, sell, alien, remise, release, convey, confirm, assign, mortgage, pledge, transfer and set over unto the Trustees, their successors in the trust and their assigns forever, all of the following described railways, franchises and other properties

(which collectively are hereinafter called the "trust estate"), to wit:

Property formerly of Western Pacific Railway Company of its receivers:

First.—All and singular the following described lines of railroad, terminals, lands, equipment, shares of stock and other real and personal property and interests and rights in property owned by the Company or to which it may be entitled, formerly the property of or belonging to Western Pacific Railway Company, a corporation of the State of California, or its receivers:

—Main line from San Francisco to Salt Lake City;

I.—A main line of railroad commencing in the City and County of San Francisco, running thence in and through said City and County to certain slips, piers and landing places upon San Francisco Bay in said City and County; thence by ferry and barge to the City of Oakland, in the County of Alameda; thence in and through said City of Oakland; thence in a southeasterly, easterly, northeasterly and northerly direction through the Counties of Alameda and San Joaquin, passing in and through the City of Stockton in said County of San Joaquin; thence in a general northerly direction through the County of Sacramento, passing in and through the City of Sacramento in said county; thence in a general northerly direction through the Counties of Sutter and Yuba, passing in and through the City of Marysville in said County of

Yuba; thence in a general northerly direction through the County of Butte, passing through the City of Oroville in said County; thence in a general northeasterly, easterly and southeasterly direction through the County of Plumas; thence in a general northerly and easterly direction through the County of Lassen to a point on the boundary line between the States of California and Nevada; thence in a general easterly and northeasterly direction through the Counties of Washoe, Humboldt, Lander, Eureka and Elko, in the State of Nevada, to a point on the boundary line between the States of Nevada and Utah; thence in a general easterly direction through the Counties of Tooele and Salt Lake, in the State of Utah, to and into Salt Lake City, in said State of Utah—said line of railroad being about 927.3 miles in length.

—branch line from Carbona to Tesla;

II.—A branch line of railroad, having its initial point and connection with said main line at or near Carbona in San Joaquin County, California, and extending thence in a southwesterly and westerly direction to a point near Tesla, Alameda County, California—being about 13 miles in length.

—terminals, telegraph lines, etc.;

II.—A branch line of railroad, having its initial in lands, easements therein and improvements thereon, including, among other things, yards, station and depot grounds, sheds, station houses, freight houses, warehouses, elevators, stock-yards, car-

houses, engine houses, oil tanks, water tanks, water supply, shops, hotels, boarding houses, hospitals, docks, wharves, piers, slips, telephone and telegraph lines and other structures and erections and the appurtenances of all and every of the foregoing, whether or not for use in connection with said or any lines of railroad.

—equipment;

IV.—All locomotives, motor cars, express cars, dining cars, freight cars, passenger cars, combination cars, work cars and other rolling stock; all ferries, tugs, barges, transfers, lighters, harbor craft and other floating equipment; all machinery, tools and appliances, all electrical generating and transmission and other electrical apparatus and all other equipment, apparatus, appliances and facilities.

—shares of stock;

V.—The following shares of stock in other corporations, which are hereby assigned to and simultaneously with the execution hereof are deposited with the Trustees:

995 shares of the par value of $100 each of the capital stock of The Salt Lake City Union Depot and Railroad Company, a Utah corporation, all of the other shares of stock wherein (except 9 shares held by directors) —to wit, 996 shares—are owned or controlled by The Denver and Rio Grande Railroad Company, a consolidated corporation existing under the laws of Colorado and Utah.

4000 shares of the par value of $100 each of the capital stock of Standard Realty and Development Company, a California Corporation, being all of the capital stock thereof except 5 shares held by directors.

—leases and agreements;

V—The estates, interests and rights of the Company under any and all leases, leaseholds, rights under leases or contracts, trackage agreements, traffic agreements, and operating agreements, and particularly the interests and rights of the Company heretofore possessed by Western Pacific Railway Company (but not including any of the claims or rights against, or with respect to the property of, The Denver and Rio Grande Railroad Company or any predecessor or successor corporation of, or which originally arose in favor of, holders of the First Mortgage Five Per Cent. Thirty-year Gold Bonds of said Western Pacific Railway Company or of coupons belonging thereto nor any of the proceeds or avails of any such claims or rights whether or not such proceeds or avails shall [1071] have been collected or obtained otherwise, in whole or in part, by the use of First Mortgage Bonds or the proceeds thereof unless the the same or any part thereof shall hereafter be subjected to the lien hereof by an instrument executed expressly for such purpose) under (1) an agreement, bearing date June 23, 1905, between The Denver and Rio Grande Railroad Company, The Rio Grande Western Railway Company, Western Pacific Railway Company and Bowling Green Trust

Company (The Equitable Trust Company of New York being successor thereto), as trustee under the First Mortgage of Western Pacific Railway Company, and (2) an agreement bearing date said last-mentioned day between Missouri Pacific Railway Company and The Denver and Rio Grande Railroad Company; provided, however, that any now existing interest or right of the Company under any lease, agreement or other instrument or contract, which by the terms of a decree of foreclosure and sale entered in a cause pending in the United States District Court for the Northern District of California, wherein The Equitable Trust Company of New York was plaintiff and Western Pacific Railway Company and others were defendants, the Company is entitled to renounce or disaffirm and which pursuant to the provisions of said decree it shall so renounce or disaffirm, shall not be deemed to have been assigned, mortgaged, pledged or otherwise encumbered by this indenture.

—other property.

VII.—All and singular the property, interests and rights, (except cash, accounts and bills receivable, traffic and other operating balances and other cash items) not comprised in the descriptions contained in the foregoing subdivisions of this clause First of these granting clauses, which belong to the Company or to which it may be entitled in any manner and which heretofore were owned by Western Pacific Railway Company or to which said company was or its receivers were entitled.

Special Master's deed.

The lines of railroad, terminals, lands, structures, equipment, shares of stock and other property, interests and rights hereinabove in this clause First of these granting clauses described, were formerly the properties, interests and rights of Western Pacific Railway Company or its receivers and were conveyed and assigned to the Company by deed dated July 1, 1916, wherein Francis Krull as Special Master appointed in and by said above mentioned decree of foreclosure and sale is named as party of the first part, said Western Pacific Railway Company as party of the second part, F. G. Drum and Warren Olney, Junior, as receivers of said Western Pacific Railway Company, as parties of the third part, The Equitable Trust Company, of New York, as trustee under the First Mortgage of said Western Pacific Railway Company executed to the Bowling Green Trust Company, trustee, as of date September 1, 1903, as party of the fourth part, Central Trust Company of New York, as trustee under the Second Mortgage of Western Pacific Railway Company executed to said Central Trust Company of New York, trustee, and dated July 1, 1908, as party of the fifth part, Franklin V. Spooner, Robert R. Pardow and John C. Rued, as parties of the sixth part, and the Company as party of the seventh part; which deed was executed and delivered to the Company before the execution of this indenture.

Other property presently owned.

Second.—All other lines of railroad, extensions, branches, terminals, lands, structures, equipment, shares of stock, bonds, notes and other securities, claims, franchises, privileges and immunities and other property and estates, interests and rights (whether legal or equitable) now owned by or belonging to the Company, notwithstanding the same or any thereof may not be particularly set forth in these granting clauses.

After-acquired property.

Third.—Any and all property and facilities of any and every kind and description, including among other things lines of railroad, extensions and branches, telegraph and telephone lines, lines and instrumentalities of water transportation, terminal facilities, equipment, lands, buildings, machinery and tools, stocks, bonds, notes and other obligations and securities and any and all right, title and interest in any of such properties or facilities which may from time to time hereafter be acquired or constructed by or belong to the Company or any successor or purchasing corporation if

(a) acquired or constructed by the use of First Mortgage Bonds or proceeds thereof or cash deposited hereunder (except bonds delivered or cash paid out under any of the provisions of this indenture in reimbursement of previous expenditures certified as hereinafter provided) or on account of the purchase, acqui-

sition or construction thereof or work thereon First Mortgage Bonds shall hereafter be authenticated and delivered or the proceeds of First Mortgage Bonds or other cash deposited hereunder shall hereafter be paid out under any of the provisions of this indenture; or

(b) consisting of or, if securities, representing property or facilities constituting an integral part or parts of lines of railroad, extensions, branches, or other property subject to the lien of this indenture or some other integral portion whereof is or integral portions whereof are subject to the lien hereof or represented by securities subject to the lien hereof; or

(c) consisting of or, if securities, representing property or facilities used or acquired for use in or for the maintenance or operation of or appertaining to any of the lines of railroad, extensions, branches or other property subject, or represented by securities subject, to the lien of this indenture; or

(d) consisting of shares of stock in or other securities of said The Salt Lake City Union Depot and Railroad Company or said Standard Realty and Development Company or any subsidiary company or any right, title or interest which the Company or any successor or purchasing corporation may hereafter acquire in or to any of the property of either of said companies or in or to any line of railroad or other property of any corporation which shall

then be or immediately prior thereto shall have been a subsidiary company, as the term "subsidiary company" is defined in Section 2 of Article Second hereof.

Property hereafter conveyed in trust.

Fourth.—Any and all lines of railroad and other property of whatsoever kind or description, which may include, among other things, stocks, bonds, notes and other obligations and securities and also claims, demands and choses in action of whatsoever kind, from time to time hereafter by delivery or by writing of any kind, for any of the purposes hereof, conveyed, assigned, transferred, mortgaged or pledged by the Company or by any successor or purchasing corporation or by any person or corporation on behalf of any of them or with the written consent of any of them to the Trustees, who are hereby authorized to receive any such property at any and all times as and for additional security hereunder and also when and as hereinafter provided as substituted security hereunder and, except as hereinafter otherwise expressly provided and except with respect to anything which by or under any other of the provisions of this indenture is mortgaged or pledged or agreed to be mortgaged or pledged or to be subjected to the lien hereof as security hereunder, any such conveyance, assignment, transfer, mortgage or pledge may be made subject to any conditions, reservations, limitations and provisions which shall be set forth in an instru-

ment in writing then to be executed by the Company or the person or corporation making such conveyance, assignment, transfer, mortgage or pledge respecting the use, management and disposi- [1072] tion of the property constituting such additional security and the proceeds thereof.

Appurtenances, etc.

Franchises.

Replacements.

Fifth.—All rights of way and other easements; all tunnels, roadbeds, main tracks, double tracks and other additional tracks, spurs, side tracks, turnouts, switches, turntables; all superstructures, bridges, viaducts, stringers, ties, rails, frogs and bolts; all fences, telegraph and telephone lines, poles, wires, block signals and instruments; all terminal facilities; all wharves, docks, slips, piers, floats, loading and unloading apparatus and landings; all steamships, tugs, ferries, barges, lighters and other floating equipment; all passenger stations, freight houses, warehouses, elevators, power houses, coal houses, oil tanks, car houses, engine houses, machine shops and other shops and structures; all water stations, water tanks and water supplies; all locomotives, tenders, motor cars, express cars, postal cars, dining cars, baggage cars, passenger cars, combination cars, work cars, freight cars and other rolling stock and equipment; all machinery, apparatus, tools, implements, appliances, furniture, material and supplies; all land used or designed for

way-grounds, terminals, yards, stations, depots, warehouses or other structures or facilities; all other property of every description and all rights and interests in or with respect to the use of property; provided that the foregoing or any thereof, whether now owned by the Company or at any time hereafter acquired by it or any grantee, successor or purchasing corporation, shall be appurtenant to or used or held for use as, or as a part or as parts of, or to facilitate or safeguard the maintenance or operation of, any lines of railroad, extensions, branches, telegraph or telephone lines, lines of water transportation, terminal facilities or other properties now or at any time hereafter subject to the lien of this indenture—whether the same exclusively appertain to or be used as parts of or in or for the maintenance or operation of lines of railway or other properties subject to the lien hereof or appertain to or be so used as parts of or in or for the maintenance or operation of such lines of railroad or other properties in common with lines of railroad or property not subject to the lien hereof; also all corporate and other rights, franchises, privileges and immunities now appertaining or hereafter to appertain to or used or held for use in or for the maintenance or operation of any such lines of railroad or other property now or at any time hereafter subject to the lien of this indenture, whether the Company now owns or it or any successor or purchasing corporation hereafter shall acquire any such rights, franchises, privileges or immunities;

also any and all replacements, renewals, improvements and betterments of and additions to any such lines of railroad or any property or rights of whatsoever description now or at any time hereafter subject to the lien of this indenture, whensoever and by whomsoever such replacements, renewals, improvements, betterments or additions may be made.

Estates.
Rents.

Sixth.—All and singular the estates, rights, titles, interests, possession, claims and demands, whatsoever, as well at law as in equity, of the Company and of any successor or purchasing corporation of, in or to any of the lines of railroad, extensions, branches, telegraph and telephone lines, lines of water transportation, terminal facilities, equipment, lands and other properties, hereditaments, appurtenances, rights, franchises, privileges and immunities hereby conveyed, assigned, mortgaged or pledged or intended to be conveyed, assigned, mortgaged or pledged or now or at any time hereafter subject to the lien of this indenture and every part and parcel thereof, and all and singular the rents, issues, tolls, profits and other income of all and every part of the property of whatsoever kind or description hereby conveyed, assigned, mortgaged or pledged or intended to be conveyed, assigned, mortgaged or pledged or now or at any time hereafter subject to the lien of this indenture.

Company may acquire property free of lien hereof.

But nothing express or implied in this indenture shall be construed to limit the right or power of the Company or any successor or purchasing corporation, which right and power is hereby expressly reserved, by the use of its credit or free funds or by the use of First Mortgage Bonds delivered to the Company or any successor or purchasing corporation as in this indenture provided to reimburse the Company or any such successor or purchasing corporation for expenditures theretofore actually made out of its free funds, to construct or acquire free from the lien hereof lines of railroad, extensions or branches or interests therein, equipment, stocks, bonds or other securities or other property, rights, franchises, immunities or privileges provided the same shall not be lines of railroad, extensions, or branches or interests therein, equipment, stocks, bonds or other securities, or other property, rights, franchises, immunities or privileges (a) on account of the purchase, acquisition or construction whereof or work whereon First Mortgage Bonds shall be authenticated and delivered or their proceeds or other cash deposited hereunder shall be paid out as herein provided; or (b) consisting of, or if securities representing, property or facilities constituting an integral part or parts of lines of railroad, extensions, branches or other property subject to the lien of this indenture or some other integral portion whereof is or integral portions whereof are subject to the lien hereof or

represented by securities subject to the lien hereof; or (c) consisting of or, if securities, representing property or facilities used or acquired for use in or for the maintenance or operation of or appertaining to any of the lines of railroad, extensions, branches or other property subject, or represented by securities subject, to the lien of this indenture; or (d) consisting of shares of stock in or other securities of said The Salt Lake City Union Depot and Railroad Company or said Standard Realty and Development Company or any subsidiary company or of any right, title or interest which the Company or any successor or purchasing corporation may acquire in or to any of the property of either of the companies above named or in or to any line of railroad or other property of any corporation which shall then be or immediately prior thereto shall have been a subsidiary company as the term subsidiary company is defined in Section 2 of Article Second hereof; and the Company may, unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same, purchase and acquire equipment, free from the lien hereof, by lease, conditional sale agreement or under any form of equipment trust, or purchase such equipment and issue obligations therefor secured by mortgage or pledge of such equipment superior to the lien of this indenture.

Habendum.

To Have and to Hold the premises, railways, properties, securities, rights, franchises, estates and appurtenances hereby conveyed or assigned or intended to be conveyed or assigned unto the Trustees, their successors in the trust and assigns forever:

Subject, However, as to all equipment now owned to the equipment trust or conditional sale agreements secured thereon, and as to equipment hereafter acquired, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby, and as to any property hereafter acquired by the Company or by any successor or purchasing corporation and becoming subject to the lien of this indenture, to any liens thereon existing at the time of such acquisition and not expressly prohibited by the terms of this indenture.

Grant in trust.

But in Trust Nevertheless for the equal and proportionate benefit and security of all present and future holders of the First Mortgage Bonds and coupons and for the enforcement of the payment of said bonds and coupons when payable and the performance and observance of and compliance with the covenants and conditions of this indenture, without prefer- [1073] ence, priority or distinction as to lien or otherwise of one bond over any other bond by reason of priority in the issue, sale or negotiation thereof, or the purpose of its issue, so that each and every bond hereby secured shall have the

same right, lien and privilege under and by virtue of this indenture and, subject to the terms hereof, be equally and proportionately secured hereby, as if all of the First Mortgage Bonds had been made, executed, authenticated, delivered and negotiated simultaneously with the execution and delivery of this indenture, it being intended that the lien and security of this indenture shall take effect from the date of the execution and delivery hereof without regard to the time of the actual issue, sale or negotiation of said bonds and as though upon said date all of said bonds were actually authenticated, issued, sold and delivered and were in the hands of holders in due course. [1074]

EXHIBIT E
GRANTING CLAUSES OF GENERAL AND REFUNDING MORTGAGE

Now, Therefore, This Indenture Witnesseth:

That in order to secure the payment of all of the General and Refunding Bonds at any time issued and outstanding under this indenture according to their tenor, purport and effect, as well the interest as the principal thereof, and to secure the performance and observance of all the covenants and conditions therein and herein contained, and to declare the terms and conditions upon which the General and Refunding Bonds are to be issued, received and held, and for and in consideration of the premises and of the acceptance or purchase of the General and Refunding Bonds by the holders

thereof, and of the sum of One Hundred dollars ($100), lawful money of the United States of America to the Company duly paid by the Trustee at or before the ensealing and delivery of this indenture, the receipt whereof is hereby acknowledged, the Company has executed and delivered this indenture and has granted, bargained, sold, aliened, remised, released, conveyed, confirmed, assigned, transferred and set over, and by these presents does grant, bargain, sell, alien, remise, release, convey, confirm, assign, transfer and set over unto the Trustee, its successors in the trust and its and their assigns, all of the Company's right, title and interest in and to:

First: All and singular the following described lines of railroad and other property and all other lines of railroad at the time of the execution of this indenture owned by the Company and all right, title and interest of the Company in and to any other lines of railroad in or to which at said date the Company has any right, title or interest:

A. The following lines of railroad are now constructed and operated:

I.—A main line of railroad commencing in the City and County of San Francisco, running thence in and through said City and County to certain slips, piers and landing places upon San Francisco Bay in said City and County; thence by ferry and barge to the City of Oakland, in the County of Alameda; thence in and through said City of Oakland; thence in a southeasterly,

easterly, northeasterly and northerly direction through the Counties of Alameda and San Joaquin, passing in and through the City of Stockton in said County of San Joaquin; thence in a general northerly direction through the County of Sacramento, passing in and through the City of Sacramento in said County; thence in a general northerly direction through the Counties of Sutter and Yuba, passing in and through the City of Marysville in said County of Yuba; thence in a general northerly direction through the County of Butte, passing through the City of Oroville in said County; thence in a general northeasterly, easterly and southeasterly direction through the County of Plumas; thence in a general northerly and easterly direction through the County of Lassen to a point on the boundary line between the States of California and Nevada; thence in a general easterly and northeasterly direction through the Counties of Washoe, Pershing, Humboldt, Lander, Eureka and Elko, in the State of Nevada, to a point on the boundary line between the States of Nevada and Utah; thence in a general easterly direction through the Counties of Tooele and Salt Lake, in the State of Utah, to and into Salt Lake City, in said State of Utah—said line of railroad being about 929.9 miles in length.

II.

Branch—Niles to San Jose

A branch line of railroad, having its initial point and connection with said main line at or near Niles in Alameda County, California and extending thence in a southerly direction to and into the City of San Jose in Santa Clara County, California, being about 23.9 miles in length.

Branch—Carbona to Moy

A branch line of railroad having its initial point and connection with said main line at or near Carbona in San Joaquin County, California, and extending thence in a southwesterly direction to a point near Moy, San Joaquin County, California, being about 4.4 miles in length.

Branch—North of Stockton to Stockton

A branch line of railroad having its initial point and connection with said main line at or near Stockton, San Joaquin County, California and extending thence in a westerly, southerly and easterly direction to a point in the City of Stockton, San Joaquin County, California, being about 5.9 miles in length.

Branch—Terminous Junction to Terminous

A branch line of railroad having its initial point and connection with said main line at or near Terminous Junction, San Joaquin County,

California and extending thence in a westerly direction to a point at Terminous, San Joaquin County, California, being about 7.9 miles in length.

Branch—Glannvale to Bradford Winery

A branch line of railroad having its initial point and connection with said main line at or near Glannvale, Sacramento County, California and extending thence in an easterly direction to a point at Bradford Winery, Sacramento County, California, being about 1.6 miles in length.

Branch—Adelaide to Hutchinson's Mill

A branch line of railroad having its initial point and connection with said main line at or near Adelaide, Butte County, California and extending thence in a southwesterly direction to the former site of Hutchinson's Mill, Butte County, California, being about 1.0 mile in length.

Branch—Land to Bidwell Bar

A branch line of railroad having its initial point and connection with said main line at or near Land, Butte County, California, and extending thence in an easterly direction to a point at or near Bidwell Bar, Butte County, California, being about 2.0 miles in length.

Branch—Spanish Creek Spur

A branch line of railroad having its initial point and connection with said main line at or

near Gray's Flat, Plumas County, California, and extending thence in a northerly direction to a point at Spanish Creek Lumber Company's mill, Plumas County, California, being about 0.6 miles in length.

Branch—Keddie to Bieber

A branch line of railroad having its initial point and connection with said main lines at or near Keddie, Plumas County, California, and extending thence in a northerly, northeasterly, northwesterly and northerly direction through Plumas County, California, passing in and through the Towns of [1075] Crescent Mills and Greenville in the said County of Plumas; thence in an easterly, northerly, northwesterly, northeasterly and northerly direction through Lassen County, California, passing in and through the Town of Westwood in the said County of Lassen, to a point near Bieber, Lassen County, California, being about 111.2 miles in length.

Branch—Blairsden to Davies Mill

A branch line of railroad having its initial point and connection with said main line at or near Blairsden, Plumas County, California, and extending thence in a southerly direction to a point at Davies Mill, Plumas County, California, being about 1.0 mile in length.

Branch—Gulling Junction to Gulling

A branch line of railroad having its initial point and connection with said main line at or

near Gulling Junction, Plumas County, California, and extending thence in a general northwesterly direction to a point at Gulling, Plumas County, California, being about 3.0 miles in length.

Branch—Calpine Junction to Calpine

A branch line of railroad having its initial point and connection with said main line at or near Calpine Junction, Plumas County, California, and extending thence in a general southwesterly direction to Calpine in Sierra County, California, being about 12.6 miles in length.

Branch—Hawley to Loyalton

A branch line of railroad having its initial point and connection with said main line at or near Hawley, Plumas County, California, and extending thence in a general southeasterly direction to Loyalton, Sierra County, California, being about 13.0 miles in length.

Branch—Reno Junction to Reno

A branch line of railroad having its initial point and connection with said main line at or near Reno Junction, Lassen County, California, and extending thence in a southeasterly direction through the Counties of Lassen and Sierra to a point on the boundary line between the States of California and Nevada; thence in a southeasterly and southerly direction to the City of Reno in Washoe County, Nevada, being about 33.1 miles in length.

Branch—Gerlach to Connection with Pacific Portland Cement Company's Railroad

A branch line of railroad having its initial point and connection with said main line at or near Gerlach, Washoe County, Nevada, and extending thence in a southeasterly direction to a connection with the railroad of the Pacific Portland Cement Company, Washoe County, Nevada, being about 0.6 miles in length.

Branch—Wells to Connection with O. S. L. R. R.

A branch line of railroad having its initial point and connection with said main line at or near Wells, Elko County, Nevada, and extending thence in a northeasterly direction to a connection with the Oregon Short Line Railroad in Elko County, Nevada, being about 1.2 miles in length.

Branch—Ellerbeck to Dolomite and Flux

A branch line of railroad having its initial point and connection with said main line at or near Ellerbeck, Tooele County, Utah, and extending thence in a southwesterly direction to a junction point; thence westerly to Dolomite, Tooele County, Utah, and also from said junction point southeasterly to Flux, Tooele County, Utah, being about 5.8 miles in length.

Branch—Burmester to Warner

A branch line of railroad having its initial point and connection with said main line at or

near Burmester, Tooele County, Utah, and extending thence in a southeasterly direction to Warner, Tooele County, Utah, being about 15.5 miles in length.

B. The following lines of railroad in which the Company owns an undivided one-half interest:

1. Tracks Owned Jointly with Southern Pacific Company in Oakland, Alameda County, California—Total length—3.92 Miles.
2. Track Owned Jointly with Southern Pacific Company near Niles, Alameda County, California—Total length—0.24 Miles.
3. Tracks Owned Jointly with Southern Pacific Company in San Jose, Santa Clara County, California — Total length — 0.36 Miles.
4. Track Owned Jointly with California Fruit Exchange at Graeagle—Total length—0.01 Miles.
5. Track Owned Jointly with Southern Pacific Company at Reno, Washoe County, Nevada—Total length—0.17 Miles.
6. Track Owned Jointly with Oregon Short Line Railroad in Salt Lake City, Salt Lake County, Utah—Total length—0.30 Miles.

C. The following lines of railroad in which the Company owns an undivided one-third interest:

Tracks Owned Jointly with Southern Pacific Company and Sacramento Northern Railway

in Sacramento County, California — Total length—0.13 Miles.

Second: All property and rights, of every name and nature, owned by the Company at the date of the execution and delivery of this indenture or thereafter acquired by it, held or acquired for use or used upon or in connection with, or appertaining to, every of the lines of railroad which, or any right, title or interest in which, shall at any time be subject to this indenture, to wit:

(a) all lands, rights of way, roadbeds, station and depot grounds, all tunnels, spurs, tracks, turnouts, switches, sidings and turntables, all superstructures, bridges, stringers, ties, rails, frogs, chairs, bolts, tie plates, splices, signals and signal apparatus, interlocking devices and other railroad appurtenances, all telegraph, telephone and electric power transmission lines, including all wires, cables, poles, conduits, ducts, subways, power plants, turbines, flumes, pipes, generators, motors, switchboards and other instruments, all stations or facilities for wireless communication and signalling, all terminals and terminal property and facilities, all station houses, warehouses, elevators, freight houses, engine houses, car houses, tower houses, yard buildings, water stations, water tanks, water supply, water power sites, fuel stations, fuel tanks, fuel supply, machine shops and other structures, all engines, tenders, cars and other rolling stock and equipment, wharves, docks,

[1076]

piers and landings, steamers and steamships, fer-

ries, boats, barges and tugs and other floating and air equipment, all machinery, tools, implements and other railroad appliances, apparatus and facilities, materials and supplies, and all other physical property, held or acquired for use or used upon or in connection with, or appertaining to, any of said lines of railroad; and

(b) all corporate rights, privileges immunities and franchises, powers, licenses, easements, leases of lines of railroad or other property, leasehold rights, trackage, terminal and traffic rights, privileges and contracts, and all other contracts and rights, and all renewals and extensions thereof, held or acquired for use or used upon or in connection with, or appertaining to, any of said lines of railroad or which the Company has, or may have, the right to exercise in respect of any of said lines of railroad.

Third: Any and all extensions, additions, improvements and betterments, to or upon or in connection with any and all lines of railroad, premises and property which, or any right, title or interest in which, shall at any time be subject to this indenture; and all tolls, revenues, earnings, income, rents, issues and profits of such lines of railroad, premises and property and every thereof, and all the estate, right, title, interest, property, possession, claim and demand whatsoever, as well in equity as in law, of the Company of, in and to such lines of railroad, premises and property and every part and parcel thereof and of, in and to the ap-

purtenances and franchises appertaining or hereafter to appertain thereto.

Fourth: The following shares of capital stock now owned by the Company:

Company	Number of Shares
The Salt Lake City Union Depot and Railroad Co.	1,000
Deep Creek Railroad Company	4,500
Sacramento Northern Railway	10,000
Standard Realty & Development Co.	4,005
Tidewater Southern Railway Company	1,147,968
Alameda Belt Line	4,130
Central California Traction Co., Common	967⅔
Central California Traction Co., Preferred	2,642⅔
Western Pacific California R. R. Co.	2,750
Railway Express Agency, Inc.	2

Fifth: The following bonds and other obligations now owned by the Company:

Description	Principal Amount
Sacramento Northern Railroad	
Class A Twenty Year Gold Bonds	$1,904,838.20
Class B Twenty Year Gold Bonds	902,407.05
Class C Twenty Year Gold Bonds	1,203,162.94
Class D Twenty Year Gold Bonds	1,203,067.16
Central California Traction Company First Mortgage 5% Bonds	316,000.00
Sacramento Northern Railway (notes)	2,926,476.72
Deep Creek Railroad Company (notes)	45,000.00
Standard Realty and Development Company (notes)	251,273.07

[1077]

Sixth: Any and all lines of railroad, extensions, branches, terminal facilities, additional track, real property, yards, structures and facilities of every kind, rolling stock and other equipment, additions, improvements and betterments, and all stocks,

bonds and other obligations, and any and all other property of every kind and description (notwithstanding the same is not now particularly described in this indenture) which from time to time shall be constructed or acquired by the Company, in respect of the construction or acquisition whereof General and Refunding Bonds shall be authenticated and delivered or deposited moneys paid out under this indenture.

Seventh: Any and all property of every kind and description, including shares of stock, bonds and other obligations, whether owned by the Company at the date of the execution and delivery of this indenture or thereafter acquired by it, which by any provision of this indenture the Company is required to convey, mortgage, pledge, assign or transfer to the Trustee hereunder.

Eighth: Any and all property of every kind and description, including shares of stock, bonds and other obligations, which from time to time after the date of the execution and delivery of this indenture by delivery or by writing of any kind shall have been conveyed, mortgaged, pledged, assigned or transferred by the Company, or by any one in its behalf, to the Trustee for the purposes hereof, which is hereby authorized to receive at any and all times any property as and for additional security for the payment of the General and Refunding Bonds issued or to be issued under this indenture and to hold and apply any and all such property subject to the terms hereof.

But the Company may, except as otherwise herein expressly provided, by the use of its credit, or in any other manner, unless General and Refunding Bonds shall be authenticated and delivered or deposited moneys paid out hereunder to provide for, or to reimburse the Company for, the acquisition or construction thereof, construct or acquire free from the lien hereof lines of railroad, branches or extensions, or other property or interests in any of the same, of whatsoever name or nature, including shares of stock, bonds and other obligations, but excepting rolling stock and equipment for use or used upon or in connection with, and appurtenances to, the lines of railroad and property now or hereafter subject to this indenture; and unless General and Refunding Bonds shall be authenticated and delivered or deposited moneys paid out hereunder to provide for, or to reimburse the Company for, the acquisition or construction thereof, the Company may purchase and acquire rolling stock or equipment (including floating and air equipment) free from the lien hereof by lease or conditional sale under any form of equipment trust, or may purchase rolling stock or equipment and issue obligations therefor secured by mortgage or pledge of such rolling stock or equipment; provided, however, that, when and as and to the extent that the title to or any interest, legal or equitable, in rolling stock or equipment, however acquired, for use or used upon or in connection with the lines of railroad

[1077] and property now or hereafter subject to this indenture, shall vest in the Company or in any successor company operating said lines of railroad and property free in whole or in part from such trust, mortgage or pledge, then the rolling stock or equipment or such interest therein as it becomes vested in the Company or such successor company shall become subject to the lien of this indenture.

To Have and to Hold the railroads, premises, properties, real and personal, rights, franchises, estates and appurtenances, hereby conveyed and assigned, or intended to be conveyed or assigned (hereinafter sometimes called the "trust estate"), unto the Trustee, its successors in trust and its and their assigns forever;

Subject, However, in so far, but only in so far (in extent, degree of priority or otherwise), as in law the same respectively may attach to any part or parts of the trust estate, to existing liens and charges of record upon and against any part or parts of the trust estate, and specifically, but without prejudice to such general provision, to the following mortgage and deed of trust: the First Mortgage, dated June 26, 1916, made by The Western Pacific Railroad Company to First Federal Trust Company and Henry E. Cooper, as Trustees; and

Subject, as to any property hereafter acquired by the Company and becoming subject to the lien of this indenture, to any liens thereon existing at the time of such acquisition by the Company or created in such acquisition;

In Trust, Nevertheless, for the common and equal use, benefit and security of all and singular the person or persons, firm or firms, bodies politic or corporate, who shall from time to time be holders of any of the General and Refunding Bonds or coupons and without preference of any of said bonds over any other or others of said bonds by reason of priority in the time of issue or negotiation thereof or otherwise howsoever, subject to the terms, provisions and stipulations in the General and Refunding Bonds and in this indenture contained, and for the uses and purposes and upon and subject to the terms, conditions, provisos and agreements hereinafter expressed and declared. [1078]

EXHIBIT F.

(Schedule in process of preparation showing reproduction cost new, less depreciation of equipment subject to certain equipment trusts.)

(Eliminated From This Stipulation by Agreement of the Parties) [1079]

EXHIBIT I.

The Western Pacific Railroad Company
Office of President
Mills Building, 220 Montgomery St.
San Francisco

Charles Elsey
President

March 26, 1937

Irving Trust Company,
Trustee under General and Refunding Mortgage of The Western Pacific Railroad Company, dated January 1, 1932,
1 Wall Street,
New York, N. Y.

Dear Sirs:

Among other collateral securing the Western Pacific General and Refunding Mortgage which you now have in your possession as successor Trustee thereunder, are $270,000 face amount of Central California Traction Company First Mortgage bonds.

These bonds by their terms matured April 1, 1936, and at that time all bonds in the hands of the general public were redeemed, leaving outstanding only $810,000 face amount of such bonds owned by the three parent companies of Central California Traction Company, viz., Southern Pacific Company, The Atchison, Topeka and Santa Fe Railway Company and The Western Pacific Railroad Company, in equal amounts of $270,000 each.

The three parent companies and Central California Traction Company contracted, by agreement dated April 1, 1936, that during the period subsequent to the maturity of said bonds during which the owners thereof forebore to collect the principal of the bonds of said issue owned by them, interest thereon shall be paid to the owners upon the dates and at the same rate as is specified in said bonds for payment prior to maturity.

The Western Pacific Railroad Company entered into such agreement with the authorization of the Federal Court having jurisdiction of its reorganization proceeding, upon the joint petition of its Reorganization Trustees and itself for such authority. I enclose herewith, for your information, copy of such petition to the Federal Court, dated March 27, 1936, and the order of the court pursuant thereto. You no doubt have received with the files of your predecessor as Trustee under the General and Refunding Mortgage, copies of the pleadings in said reorganization proceeding, but I enclose these copies for ready reference. They are self-explanatory and indicate the reason for such arrange-
[1113] ment. Central California Traction Company is a "feeder" railroad and does not operate at a profit, and the three parent companies must make advances to it of such funds as are necessary to meet Traction Company's expenses in excess of Traction Company's available funds. Traction Company did not have funds available with which to pay on April 1, 1936, the principal of the bonds

held by the three parent companies, and The Western Pacific Railroad Company, Debtor, at least could not practicably advance from its cash $270,000, its proportion of the amount necessary to pay at maturity the principal of the outstanding Traction Company bonds held by the three parent companies. The arrangement was also desired by Traction Company, Southern Pacific Company and The Atchison, Topeka and Santa Fe Railway Company.

The interest payment of October 1, 1936, on the Western Pacific holding of Traction bonds was deposited with the then Trustee, The Chase National Bank of the City of New York, on October 8, 1936.

I am writing you to ascertain if you will cooperate, as pledgee of these bonds, on behalf of the Western Pacific, with the other two parent companies and the Traction Company in obtaining a release from the lien of Traction Company's First Mortgage, dated September 1, 1906, of certain property consisting of railway track, including track crossings, overhead transmission and trolley wires, poles and fixtures appertaining thereto. No land is involved, as the tracks and accessories are in city streets, and the underlying land is used under a franchise. The property has been conveyed by Traction Company to Stockton Electric Railroad Company but the lien of the Traction Company's First Mortgage has not yet been released. The pertinent facts affecting this transaction are as follows:

Until 1927, Central California Traction Company was an independent electric railroad, operating a freight and passenger railway between Stockton, San Joaquin County, and Sacramento, Sacramento County, California (with a mileage in excess of 52 miles).

On July 3, 1925, Southern Pacific Company entered into an agreement with Herbert Fleishhacker, of San Francisco, the then owner of all of the outstanding capital stock of Central California Traction Company and of more than 70% of the First Mortgage bonds of Traction Company, for the purchase and sale of said stock and bonds to Southern Pacific Company on the terms specified therein. Thereupon, the Southern Pacific Company applied to the Interstate Commerce Commission (Finance Docket No. 5008) for authority to acquire control of Central California Traction Company by such acquisition of its capital stock, etc. The Atchison, Topeka and Santa Fe Railway Company and The Western Pacific Railroad Company (and its subsidiaries Sacramento Northern Railway and Tidewater Southern Railway Company), all intervened in the proceeding before the Interstate Commerce Commission, opposing the merger of [1114] the Traction Company's line with that of Southern Pacific (the Santa Fe petitioning to itself acquire control of the Traction Company if the Interstate Commerce Commission found the public interest would be served by a merger of the Traction Company's line with a larger railway system capable of

efficiently maintaining and operating the property). The Western Pacific also filed an independent petition to construct a line of railroad in the event that the line of the Traction Company by any means became other than an independent line free of control by any interstate railroad company.

The Interstate Commerce Commission gave its decision on August 5, 1927, authorizing the Southern Pacific Company to acquire control of Central California Traction Company by purchase of stock and bonds, as set forth in the agreement with Mr. Fleishhacker (of July 3, 1925)

> "Provided, however, and the authority herein granted is upon the express condition, that, within 60 days from and after the date hereof, the Southern Pacific Company shall admit the Western Pacific Railroad Company and the Atchison, Topeka & Santa Fe Railway Company, or either of them, as those carriers respectively may thereto consent, to participation equally with said Southern Pacific Company in joint control of said Central California Traction Company upon payment of proportionate shares of the cost of the securities to be acquired; the division of said capital stock of said Central California Traction Company among said Southern Pacific Company, Western Pacific Railroad Company, and Atchison, Topeka & Santa Fe Railway Company to be in equal one-third shares, or, if either of the two carriers last named elect not to participate in such

joint control of said Central California Traction Company, then the division of said stock between the other of said carriers and said Southern Pacific Company to be in equal one-half shares; and said bonds to be divided among, or between, the carriers joining in control of said Central California Traction Company as among, or between, the participants in such joint control may be agreed, or, failing such agreement, then, as nearly as may be according to the division of capital stock herein required."

Both Santa Fe and Western Pacific indicated their intention to participate equally with Southern Pacific Company in joint control of Traction Company upon payment of proportionate shares, etc.

The three trunk lines, however (Southern Pacific, Santa Fe and Western Pacific), while they agreed in principle on the proposition of jointly acquiring control of the Traction Company, were unable to reach an agreement with respect to the value to be assigned in the transaction of the $2,200,000 of Pacific Electric Railway bonds involved in the contract of July 3, 1925 between Southern Pacific and Fleishhacker, above [1115] mentioned (the contract under which Southern Pacific derived its right to acquire control of Traction Company, subject to Interstate Commerce Commission authorization).

It was, therefore, considered advisable that the Southern Pacific and Fleishhacker enter into a

new contract whereunder the point of controversy would be eliminated. Such an agreement was made under date of October 31, 1927, the new contract providing that Fleishhacker would sell to the Southern Pacific, as of December 31, 1927, all the outstanding stock and bonds of Traction Company for a cash sum ($2,650,000), Fleishhacker guaranteeing that Traction Company on that date would have no indebtedness of any character except the principal amount of the outstanding bonds and a proportionate amount of property tax liability, Fleishhacker also agreeing to cure, within a stated time, any defects or encumbrances affecting lands or right of way of the Traction Company. In consideration of the guaranties thus personally assumed by Fleishhacker the Southern Pacific agreed that the Traction Company, prior to the consummation of the transfer of the stock and delivery of the bonds, would convey to Fleishhacker the title to all its electric railway properties in the City of Stockton (with certain exceptions and reservations), Fleishhacker in turn to sell such properties to the Stockton Electric Railroad Company in consideration of the delivery to him of $100,000 of Pacific Electric Railway First Refunding and Mortgage Bonds.

The Western Pacific and Santa Fe concurrently executed an instrument in writing on October 31, 1927, annexed to said agreement of October 31, 1927 between Fleishhacker and Southern Pacific, signifying their intention to participate equally with the

Southern Pacific in joint control of the Traction Company by payment of one-third each of the cash purchase price, and the Southern Pacific Company endorsed on said instrument of the Western Pacific and Santa Fe its approval and agreement therewith. This instrument signifying intention to participate also contained agreements on the part of the Southern Pacific. A copy of the agreement of July 3, 1925, and of the partially superseding agreement of October 31, 1927, and of the annexed instrument of intention to participate, are enclosed herewith.

Said instrument, signifying intention to participate, among other things, provided

> "Southern Company, Atchison Company and Western Company hereby agree that, as soon as all the outstanding bonds of the Traction Company have been delivered to the Atchison company, Western Company and/or Southern Company, the properties agreed to be sold to Stockton Electric Railroad Company by Herbert Fleishhacker under the foregoing agreement, shall be released from the lien of the existing bond issue."

The three trunk lines thereupon applied to the Interstate Commerce Commission for modification of the order of [1116] August 5, 1927, in Finance Docket No. 5008, in the light of their inability to agree on value under the agreement of July 3, 1925, and submitted the partially superseding new agreement of October 31, 1927 and its annexed instru-

ment signifying intention and requested authorization and approval of the Interstate Commerce Commission to the purchase on the terms stated in the agreement of October 31, 1927, the Southern Pacific agreeing that immediately upon acquisition of the carrier's stock and bonds, it would admit the Western Pacific and Santa Fe to participation equally with the Southern Pacific upon payment by each of those carriers of one-third of the cash price ($2,650,000) or such lesser sum as should represent the ultimate cost to the Southern Pacific of acquiring Traction Company's securities.

The Interstate Commerce Commission, by its supplemental Report and Order of November 28, 1927, in Finance Docket No. 5008, recited the provisions of the modifying agreement of October 31, 1927, and approved the terms and conditions so proposed by the three trunk lines for the acquisition of control of Traction Company, and held them just and reasonable in the premises, and authorized the consummation of control on such basis.

The Supplemental Report of the Interstate Commerce Commission recited the proposed conveyance to Fleishhacker by Traction Company of title to all its electric railway properties in the City of Stockton (with certain exceptions and reservations) and the intended sale by Fleishhacker in turn of such properties to the Stockton Electric Railroad Company, and that such transfer by Traction Company was in consideration of the guaranties personally assumed by Fleishhacker, and the consideration for

Fleishhacker's sale thereof to Stockton Electric Railroad Company was the delivery to him of $100,000 of Pacific Electric Railway First Refunding and Mortgage Bonds.

Traction Company did convey the electric railway properties in the City of Stockton to Fleishhacker as provided in the agreement of October 31, 1927, and Mr. Fleishhacker sold such lines to Stockton Electric Railroad Company, but the interests conveyed were not released from Traction Company's First Mortgage. As provided in said agreement of October 31, 1927, an *undivided one-half interest* in certain trackage in the City of Stockton was conveyed to Fleishhacker and by him conveyed to Stockton Electric Railroad Company, where such lines were used jointly by Traction Company and Stockton Electric Railroad Company (including certain trackage on Weber Avenue between Sacramento and El Dorado Streets, the property now under consideration). [1117]

In February, 1933, Traction Company itself discontinued its passenger operations in the City of Stockton, which rendered the one-half interest retained by it in such trackage useless to it, and subsequently, on October 23, 1934, also conveyed its remaining one-half interest therein to Stockton Electric Railroad Company. Neither the one-half interest in said trackage conveyed in 1927, nor the one-half interest conveyed on October 23, 1934, has been released from Traction Company's First Mortgage. Had Traction Company not made the

transfer of the remaining one-half interest in this trackage to Stockton Electric Railroad in 1934, it would have been under the obligation of sharing the expense of maintaining a non-profitable facility or of sharing in the expense of dismantling and removing the trackage and all other equipment, and of restoring the street from which removal had been made, at a cost that would have exceeded its share of the salvage value of all trackage and other property removed. It, therefore, conveyed its remaining one-half interest to Stockton Electric Railroad Company *free of cost*; the consideration moving to Traction Company in the transaction lying in the fact that by such conveyance it was spared expense in the amount of about $6,000 by which its share of the cost of removal and restoration would have exceeded its share of the salvage value realized for all trackage and other property in the trackage in question.

Stockton Electric Railroad Company now requests the release from the lien of Traction Company's First Mortgage of the whole of the track on Weber Avenue, between Sacramento and El Dorado Streets, in the City of Stockton. By the terms of the instrument of October 31, 1927, signifying intention to participate equally in control of Traction Company, both Western Pacific and Santa Fe (along with Southern Pacific Company) stand obligated to see that the Traction Company trackage conveyed pursuant thereto to Stockton Electric Railroad Company is released from the

Traction Company mortgage lien "as soon as all the outstanding bonds of Traction Company have been delivered to" the three trunk lines. This has now occurred, as all publicly owned bonds were redeemed on their maturity on April 1, 1936.

The three parent companies (the Western Pacific, of course, functioning through its Reorganization Trustees) are desirous that this release of trackage from the Traction Company First Mortgage be effected, and caused the Traction Company officers to communicate with its First Mortgage Trustee, for such purpose. Copies of the relevant correspondence are enclosed, which present the complete picture.

The successor Trustee under Traction Company's First Mortgage, Wells Fargo Bank and Union Trust Co. of San Francisco, has outlined certain requirements as a con- [1118] dition to its execution of release of said property from the Traction Company's Mortgage, in view of the fact that no monetary consideration was received by Traction Company on the conveyance, and, therefore, technically Article IV (copy of which is annexed to the correspondence) of the Traction Company Mortgage can not be exactly complied with. However, real and valuable considerations accrued to Traction Company both in 1927 on the conveyance of one-half thereof, when its liens and encumbrances were contracted to be cleared by Fleishhacker (which was done) and its indebtedness was paid, and in 1934 on the conveyance of the remain-

ing one-half thereof when it saved a considerable sum by ceasing to own an interest in the trackage in question.

The Traction Company Mortgage Trustee requests that the three parent companies furnish it a formal request for reconveyance, and that all of the outstanding bonds of Traction Company be presented to its bank correspondent in New York for appropriate endorsement thereon relative to this release (reconveyance). It has notice that the Western Pacific Holdings of Traction Company bonds are pledged under the Western Pacific General and Refunding Mortgage, of which you are successor Trustee. As the letter of January 27, 1937, from the Traction Company's Mortgage Trustee, to Mr. Hayden, Vice-President of the Traction Company, indicates, if the Western Pacific's General and Refunding Mortgage Trustee informs the Wells Fargo Bank that it has no objection to urge to the reconveyance, but that it cannot either request the reconveyance or present the bonds held by it for endorsement, then the Wells Fargo Bank requests as a condition of making the conveyance that it be furnished full indemnity by Santa Fe and Southern Pacific or either of them.

Article Six of the Western Pacific General and Refunding Mortgage, the article dealing with pledged securities, contains no prohibition of the co-operation being requested of you. The last paragraph of Section 5 of Article Six provides: (page 118)

"Subject only to the actual exercise by the Company of rights in respect thereof conferred by this indenture, the Trustee shall have, and may exercise, all the rights of owner in respect of any bonds, obligations or stock or certificates of interest therein, held by the Trustee under this indenture or in any manner whatsoever on the trusts hereof."

Section 6 of Article Six also provides: (page 120)

"The Trustee, with the consent of the Company, [1119] at any time may vote upon any shares of stock that shall be held by the Trustee hereunder, and the Trustee may take such other action as in its discretion it shall deem advisable, to protect its interest and the interests of the holders of the General and Refunding Bonds in respect of any bonds, obligations or stock subject to the lien hereof; * * *"

Section 7 of Article Six provides: (page 122)

"Nothing herein contained shall prevent (1) the renewal or extension, on any terms, of any bond or obligation secured by mortgage upon the property of any controlled company of the Company *or of any other* bond or obligation pledged or assigned hereunder; * * *"

Article Six permits the Trustee (and the Company when not in default) to exercise broad discretion and co-operation as to the companies whose

securities are pledged under the General and Refunding Mortgage, such as participation in reorganizations of such companies, whether "controlled companies" or not, exchange of obligations for substitute obligations, co-operation in merger or consolidation of non-controlled companies, cancellation of obligations of "controlled companies", extension of maturity of obligations, etc., etc.—the spirit of the article being flexible enough to meet unpredictable contingencies affecting the companies whose securities are so pledged under the General and Refunding Mortgage.

I believe a study of these papers will indicate clearly that the Western Pacific assumed a contractual obligation to co-operate to procure the release from Traction Company's mortgage of the one-half interest in this trackage, etc., specified in the agreement of October 31, 1927, and that the conveyance of the other one-half interest was for the *benefit* of the Traction Company (and consequently of its bondholders and its stockholders), and conserved its resources and saved its money,—and that under these circumstances there can be no possible damage or claim by anyone, Traction Company bondholder or otherwise, by releasing the whole of this trackage from the lien of the Traction Company's Mortgage. The General and Refunding Mortgage is a first lien on the Western Pacific's holding of Traction Company capital stock, which, except for directors' qualifying shares, is physically pledged with you as Trustee. The only other stock-

holders (subject to directors' qualifying shares) are the two other parent companies, Southern Pacific and Santa Fe,—each [1120] of the three parent companies having identical stockholdings. That the requested co-operation is not only harmless but desirable is further indicated by the willingness of the other two bondholders (Southern Pacific and Santa Fe) whose Traction bonds are in their own possession, and who presumably are diligent to protect their property and rights, to facilitate the requested release and reconveyance, and to present their Traction bonds for the requested endorsement.

The order of said Federal Court of August 2, 1935, accepting jurisdiction of the reorganization proceeding, enjoined all persons and corporations holding collateral therefore pledged by the debtor as security for its obligations from selling, converting or otherwise disposing of such collateral, or any part thereof, until further order of said court. The proposed presentation for endorsement of the Traction Company bonds, held in pledge by you could not be construed as a sale, conversion, or disposition thereof. I feel reasonably certain the Court would specifically authorized you to make such a presentation for endorsement under these circumstances, if petitioned to do so.

Parity has existed between the three parent companies from the beginning, and has been scrupulously maintained throughout the years of joint ownership. The United States District Court here which has jurisdiction of the Western Pacific

reorganization proceeding made a special order permitting the Western Pacific Reorganization Trustees to make such advances and payments as might be necessary to protect Debtor's interest therein or to meet its contractual pro rata obligation as to Traction Company (and other affiliates with similar situation).

It would in my opinion be not only unfair and unjust to Southern Pacific and/or Santa Fe to compel them to furnish indemnity in this matter because the Western Pacific is unable to co-operate, but would also be most unfortunate and establish a precedent with possibly far-reaching consequences to the future owner of the Western Pacific's Traction Company holdings—for one of the three owners to abandon its participation and parity in all Traction Company dealings—especially as the interest the Western Pacific and Santa Fe acquired in Traction Company was solely because the Interstate Commerce Commission compelled the Southern Pacific to permit the participation.

For this reason I have addressed you very fully in the premises, and I would appreciate receiving from you advice as to whether you are willing to present the Traction Company bonds pledged with you for endorsement, as requested by the Traction Company mortgage Trustee.

Very truly yours,

HPT:PB CHARLES ELSEY

EXHIBIT N

MEMORANDUM OF CORRECTIONS AND CHANGES IN "STIPULATION AS TO FACTS NOT IN DISPUTE".

[Note: This Exhibit has been omitted because corrections listed therein have been made in the "Stipulation as to Facts Not in Dispute" and to set out here would be needless duplication.]

Wednesday, December 20, 1939.

Before Hon. A. F. St. Sure, District Judge.

26591—In re Western Pac. R. R. Co. Dr.

PRE-TRIAL CONFERENCE

The parties being present as heretofore the pre-trial conference was resumed.

Robert T. Swain, Esq. advised the court that the various counsel had agreed on a stipulation as to the facts not in dispute and presented the said stipulation to the Court. Ordered said stipulation filed & made a part of the record.

After hearing the attorneys It is ordered that this case be set for January 22nd, 1940, for hearing, on objections to plan of reorganization certified to the court by the Interstate Commerce Commission.

[1134]

[Title of District Court and Cause.]

ORDER FIXING A DATE FOR HEARING PARTIES IN INTEREST IN SUPPORT OF OR IN OPPOSITION TO OBJECTIONS FILED HEREIN TO THE PLAN OF REORGANIZATION CERTIFIED BY THE INTERSTATE COMMERCE COMMISSION; FIXING A DATE FOR HEARING ON PETITIONS FOR ALLOWANCE OF COMPENSATION OR EXPENSES FILED HEREIN; AND PROVIDING FOR THE GIVING OF DUE NOTICE TO ALL

PARTIES IN INTEREST OF SAID HEARING ON SUCH OBJECTIONS TO THE PLAN OF REORGANIZATION AND OF SAID HEARING ON SAID PETITIONS.

This Court having made and entered its order of November 8, 1939, fixing the time within which objections to the Plan of Reorganization certified to this Court by the Interstate Commerce Commission may be filed herein and fixing the time within which petitions for allowance of compensation and expenses may be filed herein, and [1135]

It Appearing that objections to such Plan of Reorganization and claims for equitable treatment have been filed herein by various parties in interest pursuant to said order of November 8, 1939, and

It Further Appearing that petitions for allowance of compensation for services rendered or expenses (including reasonable attorneys' fees) incurred have been filed herein by various parties pursuant to said order,

Now, Therefore, it is hereby

Ordered:

1. That the hour of 10:00 A. M., on Monday, January 22, 1940, is hereby fixed as the time, and the court room of this Court in the United States Post Office and Court House Building in the City and County of San Francisco, State of California, as the place, for hearing all parties in interest in support of, or in opposition to, any and all objections to said Plan of Reorganization and any and all claims for equitable treatment and any and all

petitions for allowance of compensation and expenses (including reasonable attorneys' fees) that have been filed herein pursuant to said order of November 8, 1939, provided, however, that such hearing may be adjourned from time to time without further notice, if the Court shall so direct.

2. That T. M. Schumacher and Sidney M. Ehrman, the Trustees of the properties of the Debtor herein, shall forthwith give notice of the entry of this order and of the provisions hereof (a) by mailing a copy of this order by registered mail, postage prepaid, to the Debtor, the Interstate Commerce Commission, The Western Pacific Railroad Corporation, each and every party whose appearance has been filed herein [1136] or who is a party of record in this reorganization proceeding, each and every other party to whom notices have heretofore been given, and each and every trustee named in any mortgage or other instrument securing any of the Debtor's bonds, notes, or other obligations, including obligations of guaranty, and (b) by publishing a notice substantially in the form of Schedule A hereto in The Wall Street Journal (Pacific Coast Edition) and The Recorder, two newspapers of general circulation published in the City and County of San Francisco, State of California, and in The New York Times and The New York Sun, two newspapers of general circulation published in New York City, New York, such publications to be made once in each of such four newspapers not later than January 3, 1940.

Said Trustees shall file in these proceedings proper proof of the serving of copies of this order and of the publication of said notice as above directed.

Dated, December 21, 1939.

A. F. ST. SURE,
Judge, United States District Court for the Northern District of California, Southern Division. [1137]

SCHEDULE A.

(Form of Notice.)

[Title of District Court and Cause.]

To Holders of Securities of the Western Pacific Railroad Company and All Parties in Interest in the Above Entitled Proceedings:

Pursuant to an order of the Court entered December 21, 1939, in the above entitled proceeding, notice is hereby given that:

The hour of 10:00 A. M., on Monday, January 22, 1940, has been fixed as the time, and the court room of the Honorable A. F. St. Sure, Judge, of the above entitled court, in the United States Post Office and Court House Building, in the City and County of San Francisco, State of California, as the place, for hearing all parties in interest in support of, or in opposition to, any and all objections

to the Plan of Reorganization certified to the Court by the Interstate Commerce [1138] Commission and any and all claims for equitable treatment that have been filed herein pursuant to the Court's order of November 8, 1939, and any and all petitions for allowance of compensation and expenses (including reasonable attorneys' fees) that have been filed herein pursuant to said order, provided, however, that such hearing may be adjourned from time to time without further notice.

By order of the Court.

Dated: December 21, 1939.

T. M. SCHUMACHER
SIDNEY M. EHRMAN
Trustees of the properties of The Western Pacific Railroad Company.

[Endorsed]: Filed Dec. 21, 1939. [1139]

[Title of District Court and Cause.]

ORDER

It Appearing that objections to the Plan of Reorganization certified to this Court by the Interstate Commerce Commission and claims for equitable treatment were filed herein by various parties pursuant to the Court's order of November 8, 1939, fixing the time within which objections to said Plan of Reorganization may be filed; and

It Further Appearing that thereafter, pursuant to Rule 16 of the Rules of Civil procedure for the District Courts of the United States, this Court directed the attorneys for the parties in interest to appear before it on December 18, 1939, at 10 o'clock A. M. for a Pre-Trial Conference [1140] to consider the following objectives:

(1) The simplification of the issues;

(2) The ascertainment of what material facts exist without substantial controversy and what material facts are actually and in good faith controverted;

(3) The possibility of obtaining admissions of fact and of documents which will avoid unnecessary proof;

(4) The determination of such other matters as may aid in the expedition and disposition of the cause;

And It Further Appearing that at the time so appointed such Pre-Trial Conference was held and that, in the course thereof, there was filed with the Court a written Stipulation as to the facts not in dispute, signed by the attorneys for the Debtor, the Institutional First Mortgage Bondholders' Committee, Samuel Armstrong and Crocker First National Bank of San Francisco, Trustees under the Indenture securing the Debtor's First Mortgage Bonds, The Western Pacific Railroad Corporation, A. C. James Co., Irving Trust Company, Trustee under the Indenture securing the Debtor's General

and Refunding Mortgage Bonds, Reconstruction Finance Corporation, Railroad Credit Corporation, and The Western Realty Company, subject to the provision of said Stipulation that "any party may call witnesses and offer any proof for the purpose of proving such additional facts as such party may see fit, free from the objection that such additional facts tend to limit, control or qualify facts herein set forth";

Now, Therefore, the Court having by its Order of December 21, 1939, fixed January 22, 1940, as the date for hearing all parties in interest in support of, or in opposition to, objections to said Plan of Reorganization and claims for equitable treatment and provided for the giving of due notice to all parties in interest of said hearing, [1141]

It Is Hereby Ordered, pursuant to and in conformity with said Rule 16 of said Civil Rules of Procedure, that the issues for trial at said hearing on January 22, 1940, shall be the issues raised and presented by said objections to said Plan of Reorganization and by said claims for equitable treatment.

Dated December 29, 1939.

A. F. ST. SURE,
Judge.

[Endorsed]: Filed Dec. 29, 1939. [1142]

[Title of District Court and Cause.]

TRANSCRIPT OF TESTIMONY
INTRODUCED ON
MONDAY, JANUARY 22, 1940 [1143]

Counsel Appearing:

For T. M. Schumacher and Sidney M. Ehrman:
Sidney M. Ehrman, Esq.,
Allan P. Matthew, Esq.,
John O. Moran, Esq.

For The Western Pacific Railroad Company:
F. C. Nicodemus, Jr., Esq., of Pierce & Greer,
40 Wall Street, New York.
C. W. Dooling, Esq., Mills Building,
San Francisco.

For Crocker First National Bank of San Francisco and Samuel Armstrong, Trustees of First Mortgage:
Donald M. Gregory, Esq., of Messrs. Chickering & Gregory; Milbank, Tweed, Hope & Webb, by
Orville Wood, Esq., 15 Broad Street, New York.

For Institutional First Mortgage Bondholders Committee:
Herbert Clark, Esq. of Morrison, Hohfeld, Foerster, Shuman & Clark, and
Cravath deGersdorff, Swaine & Wood, by
Littleton Groom, Esq., and
Robert T. Swaine, Esq.,
15 Broad Street, New York.

For Irving Trust Company, Trustee, General and Refunding Mortgage:
Felix T. Smith, Esq., of Pillsbury, Madison & Sutro, and
Davies, Auerbach, Cornell & Hardy,
By H. C. McCollum, Esq.,
1 Wall Street, New York. [1146]

For A. C. James Co.:
Garret W. McEnerney, Esq., and
Andrew F. Burke, Esq., and
Whitman, Ransom, Coulson & Goetz,
by Horace E. Whiteside, Esq., and
Robert E. Coulson, Esq.,
40 Wall Street, New York.

For The Western Pacific Railroad Corporation:
M. C. Sloss, Esq., and E. D. Turner, Jr.,
of Sloss, Turner & Finney.

For Reconstruction Finance Corporation:
James S. Moore, Jr., Esq.,
of Messrs. Brobeck, Phleger & Harrison,
San Francisco, and
Cassius M. Clay, Esq., of Washington, D. C.

For Railroad Credit Corporation:
Edward G. Buckland, Esq.

For The Western Realty Company:
Leroy R. Goodrich, Esq., Oakland, California.

The Court: Gentlemen, I am going to request the Court to call the roll of attorneys this morning, so that the record may show who is here.

The Clerk: Who is appearing for the Trustees?

The Court: The Trustees: Who is appearing for Mr. Schumacher and Mr. Ehrman? Allan P. Matthew and John O. Moran?

Mr. Matthew: Yes, Your Honor.

The Clerk: Is Mr. Ehrman here?

Mr. Matthew: He is.

The Clerk: Western Pacific Railroad Company?

Mr. Nicodemus: F. C. Nicodemus, Jr. and C. W. Dooling.

The Clerk: Crocker First National Bank of San Francisco?

Mr. Wood: Orville W. Wood and Donald M. Gregory.

The Clerk: Institutional First Mortgage Bondholders Committee?

Mr. Swaine: Herbert W. Clark, Littleton Groom and Robert T. Swaine. [1147]

The Clerk: Irving Trust Company?

Mr. Smith: Felix T. Smith and H. C. McCollum.

The Clerk: A. C. James Company?

Mr. Coulson: Robert E. Coulson, Horace E. Whiteside, and Andrew F. Burke.

The Clerk: Western Pacific Railroad Corporation?

Mr. Sloss: M. C. Sloss and E. D. Turner, Jr.

The Clerk: Reconstruction Finance Corporation?

Mr. Clay: C. M. Clay, and James S. Moore.

The Clerk: Railroad Credit Corporation?

Mr. Buckland: Edward G. Buckland.

The Clerk: Western Realty Company?

Mr. Goodrich: Leroy R. Goodrich.

The Clerk: That is all, your Honor.

The Court: You may proceed, gentlemen.

Mr. Nicodemus: Mr. Elsey, please?

CHARLES ELSEY,

Called by the Debtor; Sworn.

The Clerk: State your name to the Court, please.

The Witness: Charles Elsey.

Mr. Nicodemus: Q. Mr. Elsey, are you President of the Western Pacific Railroad Company?

A. Yes, sir.

Q. And you have testified in these proceedings when the case was pending in the Interstate Commerce Commission? A. Yes, sir.

Q. How long have you been connected with the Western Pacific Railroad Company?

A. Since 1907.

Q. 1907. At the Pre-trial Conference in December, Mr. Elsey, a stipulation of facts was signed by counsel representing all of the parties to the proceeding. Did you, before that stipulation was signed, arrange to have it checked for accuracy by the or-
[1148] ganization of the Western Pacific Railroad Company? A. Yes, sir.

Q. Will you state what the checking process was?

(Testimony of Charles Elsey.)

A. We were provided with a draft of the stipulation, which we checked. It was then put in final form and filed, with the understanding that it would be checked at a later date.

Q. That is, you checked the preliminary draft of the stipulation? A. Yes, sir.

Q. Then, after the stipulation was signed and filed, you re-checked it? A. Yes, sir.

Q. What was the result of the re-check?

A. The re-check—a few minor corrections were found, and we have a memorandum to present here of the corrections.

Q. I understand that the stipulation was turned over to the various departments and the figures used in the stipulation were checked against your corporate records; is that correct? A. Yes, sir.

Q. And your organization were instructed to check the entire stipulation for accuracy?

A. Yes, sir.

Q. Now, you say you have a memorandum of certain corrections that were made after the original stipulation was filed? A. Yes, sir.

Q. Are you now prepared to adopt the stipulation of fact as part of your evidence to be certified back to the Interstate Commerce Commission?

A. Yes, sir.

Q. Subject to the corrections set forth in the memorandum that you just mentioned?

A. That is correct.

(Testimony of Charles Elsey.)

Mr. Nicodemus: If the Court please, we would like to offer the stipulation in evidence as part of Mr. Elsey's testimony, and also the memorandum of corrections which he now submits to the Court.

The Court: Is there any objection? So ordered. That will be Petitioner's Exhibit 1.

(The documents referred to were marked "Petitioner's Exhibit [1149] 1."

Mr. Nicodemus: Q. Did you, at our request, Mr. Elsey, have photostatic copies made of the tabulated statement showing the existing capitalization of the Debtor company as of January 1, 1939, and the revised capitalizations proposed by the Interstate Commerce Commission in its plan, and the revised capitalizations proposed by certain of the parties to this proceeding?

A. Yes, I had that statement checked.

Q. You had that checked by the same process?

A. Yes, sir.

Q. Have you a photostatic copy of that available? A. Yes, sir.

Mr. Nicodemus: I should like to offer the tabulated statement referred to by the witness. We have copies available for disposition to counsel. I may say, that was done originally by a process that cannot be used in evidence, because it is not durable, so we had it photostated.

The Clerk: Petitioner's Exhibit No. 2.

The Court: Petitioner's Exhibit No. 2?

(Testimony of Charles Elsey.)

The Clerk: Yes, your Honor.

The Court: Have you got an extra one?

Mr. Nicodemus: Yes, indeed, I have an extra one for the Court.

(The document referred to was marked "Petitioner's Exhibit 2.")

Mr. Nicodemus: I will have occasion, your Honor, to refer to this very frequently, and I think maybe this larger copy will be more useful to the Court.

Q. Mr. Elsey, at the time of the oral argument before the Interstate Commerce Commission in January, Commissioner Meyer inquired about the paired track operation in Nevada; that is the joint operation of the Southern Pacific and Western Pacific over the paired track. There was nothing in the record at that time on that subject, and I therefore would like to supplement the record by inquiring what the character of that operation is. Will you [1150] make a brief statement?

A. The tracks of the Southern Pacific and Western Pacific in Nevada are paired for a distance of approximately 178 miles. The Southern Pacific and Western Pacific use the Western Pacific tracks for all eastbound traffic, and the Southern Pacific and Western Pacific use the Southern Pacific tracks for all westbound business.

Q. How are the expenses of operation divided?

A. The expenses of operation are diveded on a car-mile basis.

Q. Will you explain precisely what you mean by "car-mile basis"?

(Testimony of Charles Elsey.)

A. The expenses are divided as to number of cars of the two companies operating over the paired track.

Q. Can you give us approximately how the costs have been divided over a reasonable period of time as between the two companies?

A. As a general proposition, about 75-25.

Q. Can you break that up by years?

A. Yes, sir.

Q. Between 1924 and 1939? A. Yes, sir.

Q. Will you read that rapidly into the record?

A. Would you like all of the years?

Q. Yes.

A. The year 1924, Southern Pacific 77.17; Western Pacific 22.83. 1925, Southern Pacific 77.40; Western Pacific 22.60. 1926, Southern Pacific 77; Western Pacific 23. 1927, Southern Pacific 77.03; Western Pacific 22.97. 1928, Southern Pacific 77.48; Western Pacific 22.52. 1929, Southern Pacific 75.92; Western Pacific 24.08. 1930, Southern Pacific 73.20; Western Pacific 26.80. 1931, Southern Pacific 72.61; Western Pacific 27.39. 1933, Southern Pacific 72.29; Western Pacific 27.71. 1934, Southern Pacific 72.78; Western Pacific 27.22. 1935, Southern Pacific 71.43; Western Pacific 28.57. 1936, Southern Pacific 72.39; Western Pacific 27.61. 1937, Southern Pacific 72.46; Western Pacific 27.54. [1151] 1938, Southern Pacific 72.69; Western Pacific 27.31. 1939, Southern Pacific 72.78; Western Pacific 27.22.

Mr. Nicodemus: Q. Now, Mr. Elsey, from the figures, as I understand them, the Southern Pa-

(Testimony of Charles Elsey.)

cific started out with approximately 77 per cent. of the business against 22 per cent. for the Western Pacific, and over that 15-year period, the percentage of the Southern Pacific has progressively decreased, and the percentage of the Western Pacific has progressively increased, is that correct?

A. Yes, sir.

Q. But even to-day, the Southern Pacific is moving approximately three cars to one car of the Western Pacific? A. Yes, sir.

Q. Mr. Elsey, the Commission's plan that is under consideration here to-day provides for mandatory capital fund of $500,000. Do you think it necessary, year in and year out, to spend $500,000 on capital account? A. Yes, sir.

Q. You do? A. What is that?

Q. You do? A. Yes, sir.

Q. That is based on your past experience?

A. Yes, sir.

Q. What is the present condition of the Western Pacific with reference to its ability to efficiently handle the traffic tendered to it, or to handle a substantially increased traffic?

A. The physical condition of the property is better than it has ever been in its history.

Q. Better than it has ever been in its history?

A. Yes, sir.

Mr. Nicodemus: That is all I require from Mr. Elsey.

(Testimony of Charles Elsey.)

Mr. Swaine: May I ask a question on cross-examination?

Mr. Nicodemus: You certainly may.

Cross Examination

Mr. Swaine: Q. Mr. Elsey, paragraph 157 of the Stipulation says: "Annexed hereto as Exhibit L is a schedule showing ratios of annual gross revenues of Debtor and its subsidiaries for the [1152] years 1923 to 1938, inclusive, and annual gross revenues of Class 1 carriers of the United States for the same years, with their respective average gross revenues for the years 1923 to 1937, inclusive and" —and this is the language I particularly want to call your attention to—"and showing the effect of the construction of the Northern California extension, as prepared by officers of the Debtor's Trustees;" and so forth.

That exhibit, your remember, do you? You remember the exhibit that is referred—this is Exhibit L. A. Yes, sir.

Q. That was prepared under your supervision?

A. That is correct.

Q. Now, that does not attempt separately to state gross revenues arising from the Northern California extension, does it?

A. It shows the revenues separately.

Q. Shows what?

A. It shows the revenues separately.

Q. It shows gross receipts?

(Testimony of Charles Elsey.)

A. Yes, sir.

Q. What are those receipts that are there shown? How did you arrive at that figure?

A. The auditor prepared the figures.

Q. Yes, but you say "add for Northern California extension." How did you arrive at the figure which you there added for Northern California extension?

A. The auditor simply took all of the waybills showing the cars that went over the Northern California extension and computed the revenues on those particular cars.

Q. Did you take the entire revenue on a car that was on the Northern California extension, or did your pro-rate it in some way?

A. As I understand it, he took the entire revenues; not only the revenues that were added on that particular car while it was on the Northern California extension, but also the main line of the system.

Q. That is what I wanted to get at. So that if the car went 20 miles on the Northern California extension, and had gone all the way from Salt Lake City down to the junction point, the entire [1153] revenue from that car, on these figures, is under that "add for Northern California extension"?

A. That is correct.

Q. I just wanted to make that clear, because I was afraid there was a little misdescription. Now, the stipulation, in the next succeeding paragraph,

(Testimony of Charles Elsey.)

says: "A schedule is being prepared showing ratios of annual net operating income of Debtor and its subsidiaries for the years 1923 to 1938, inclusive, and the annual net railway operating income of Class 1 carriers of the United States for the same period, with their respective average net railway operating income for the years 1923 to 1937, inclusive." You have previously had some language pointed out to you referring to showing the effect, of construction of the Northern California extension, as prepared by officers, and now have you prepared a study of the annual net railway operating income of the Debtor and its subsidiaries for the year 1923 to 1938, inclusive, and also a statement of the annual net railway operating income of the Class 1 carriers of the United States for the same years, with their respective average net railway operating income for the years 1923 to 1937, inclusive? A. Yes, sir.

Q. Not giving any effect to Northern California extension? A. That is true.

Q. Is it true that the reason you could not literally do so, as stated in the stipulation, is that there is no way of separately determining what the net railway operating income of the Northern California extension is without going into very elaborate accounting? A. That is correct.

Q. I show you a document marked Exhibit M, and ask you whether that is a correct statement of the annual net railway operating income of the Debtor and its subsidiaries for the years 1923 to

(Testimony of Charles Elsey.)

1938, inclusive, and also a correct statement of the annual net railway operating income of Class 1 carriers of the United States [1154] for the same years, with their respective average net railway operating income for the years 1923 to 1937, inclusive? A. Yes, sir.

Q. And does that exhibit also state the percentages of the later period and earlier period in each case, that is, in the case of Western Pacific and in the case of all Class 1 carriers?

A. That is correct.

Mr. Nicodeums: I would like to offer this study in lieu of the study that was contemplated by the stipulation, that exact study having become impossible because of the accounting difficulty that Mr. Elsey has testified to.

Mr. Coulson: May I ask a question on the schedule?

Mr. Nicodemus: Yes.

Mr. Coulson: Q. Mr. Elsey, in this document marked Exhibit M, that you have been looking at, this comparison—it is characterized as a comparison of net railway operating income. Is the net operating income, as shown for Class 1 carriers, generaliy on a comparable basis with the net railway operating income of Western Pacific System?

A. We have been figuring on that, Mr. Coulson, for the last three or four days, but we have not as yet completed that study.

(Testimony of Charles Elsey.)

Q. You testified, as to Exhibit L, which covers "Gross Revenues of the Western Pacific in comparison with the Gross Revenues of Class 1 Carriers." Now, those were, I take it, on a comparable basis, from the testimony you gave here?

A. Yes, sir.

Q. What different factor goes into this Exhibit M, so-called, which Mr. Swaine has tendered, that does not exist as to the others which have been the subject of your present study?

A. Well, there is a matter of hire of equipment, and also of joint facility rents. There is a question there as to whether they are on a comparable basis; as I said before, we have not completed [1155] that study yet.

Q. Can you explain to the Court just how this item of joint facility rents and equipment rents affects the comparability of the figures?

A. So far as joint facility rents and so far as the matter of Class 1 railroads are concerned, they are payable to one another, and what we are figuring on is as to whether those that wash themselves out, so far as the Class 1 railroads of the United States are concerned, where, so far as the Western Pacific figures are concerned, they are included in that figure that arrives at net railroad operating income. And the same way for per diem. The per diem paid between various Class 1 carriers would have a tendency to wash itself out, while they are still shown in the figures of the Western Pacific,

(Testimony of Charles Elsey.)

but, as I said before, we have not completed our study on it, and as to just whether or not that is a correct statement on it, I am not prepared to state at this time.

Q. Then you are not prepared to state with any definiteness to the Court that the Class 1 carrier figures are comparable to Western Pacific figures as to this net railway operating income item?

A. Yes, sir.

Mr. Swaine: Q. Now, just one second, you have stated to the Court, and you do state to the Court, that those figures are the net operating income as stated in the reports of the Class 1 carriers to the Interstate Commerce Commission? A. Yes.

Q. Your only question is whether there may not be some different equipment situations in the different roads than there are in your road, and some joint facility rentals, and one thing and another? In other words, the operating situation of those railroads, may be slightly different from yours. Nevertheless, the income is that stated to the Interstate Commerce Commission for all the Class 1 roads, isn't it? A. Yes, sir.

Mr. Coulson: Q. Mr. Elsey, is the problem which you are still [1156] studying one connected merely with differences in situation between the railroads, as Mr. Swaine has indicated, or the basic question of whether, in the consolidation of all the Class 1 railroads, these inter-company items of equipment rent and joint facility rents, have been eliminated? Which is the question?

(Testimony of Charles Elsey.)

A. The question is whether they are on a comparable basis.

Mr. Coulson: Your Honor, I object to the admission of this schedule at this time, and until we know whether the figures are comparable. We don't regard this comparison of net operating railway income as significant for any issue before the Court in the sense that the movement of gross traffic on this railroad, in COMPARISON to other railroads of the country, is significant, but we do object to this statement of any railway operating income going into the record until it is quite clear that the comparison is based on comparable figures. You could get a comparison of net revenues from railway operations which would leave out equipment rents and joint facility rents, and we would be glad to see that admitted without our objection, but we do object to this statement in its present form.

Mr. Swaine: Your Honor, if this is not to be admitted, then the schedule, Exhibit M, should come out—Exhibit L—I should say—was attached to the stipulation at Mr. Coulson's request, as showing the ratio of Western Pacific's gross revenues and gross revenues of Class 1 carriers, and there is the same possibility of discrepancy there. Oh, yes, you have got questions of equipment that may be among—

The Court (Interrupting): I suppose those discrepancies will be slight, and as you said, Colonel, not significant anyway.

(Testimony of Charles Elsey.)

Mr. Coulson: The whole exhibit, to us, looks significant.

The Court: Why take up time arguing about it? Let the objection be overruled. [1157]

Mr. Coulson: With Mr. Elsey's explanation on the record.

Mr. Swaine: You may call it the same exhibit.

The Court: Do I understand that you are now making a study of some kind, Mr. Elsey?

The Witness: Yes, we are making a study now.

Q. Do you propose to prepare another exhibit to be introduced in evidence?

A. Well, that remains to be seen, depending upon what the result of this study is, Judge.

Q. Well, if you can throw any further light upon the situation, please do it, will you.

A. Yes, sir.

Mr. Swaine: Q. Mr. Elsey, in paragraph 93 of the stipulation of facts, there is a provision—

The Court (interrupting): Just one minute; the Clerk seems in a quandry; he doesn't know what to call this exhibit M. Intervenor'? Petitioner's? Who offered it?

Mr. Swaine: I take it we are all intervenors, here, aren't we, except the Debtor, so it would be Institutional Bondholders Committee Exhibit 1.

The Court: Now, is that true as to the other exhibit? I have them marked already, Petitioner's Exhibit 1 and Petitioner's Exhibit No. 2.

(Testimony of Charles Elsey.)

Mrs. Swaine: Those are Debtor's exhibits. I take it that everybody but the debtor is an intervenor here, and there are numerous intervenors, and it may be that there will be exhibits offered by other intervenors, so I suggest that this be the Institutional Bondholders Committee Exhibit No. 1. It is, I think, described as Exhibit M in the stipulation, with the modification which I brought out in the examination of Mr. Elsey.

The Court: We will call it Committee's Exhibit No. 1 and Committee's Exhibit No. 2.

The Clerk: Yes, your Honor. [1158]

(The documents referred to were marked Committee's Exhibits Nos. 1 and 2.)

Mr. Wood: Q. Mr. Elsey, paragraph 93 of the

Mr. Swaine: Those are Debtor's exhibits. I take stipulation recites that a schedule is being prepared relating to equipment, and that when that schedule has been identified by the signature of counsel for the Debtor's Trustees, for the first mortgage trustees, and for the refunding mortgage trustee, it may be filed with the Court, and when so filed, shall constitute part of this stipulation, as Exhibit G. I have in my hand a document which purports to be Exhibit G to the stipulation, which has been signed by Mr. Matthew, for the Debtor's Trustees, and by counsel for the respective Mortgage Trustees; was that document prepared in your office under your supervision?

A. Yes, sir, prepared in the accounting department of our office.

(Testimony of Charles Elsey.)

Q. Are you prepared to state that the facts and data contained in that document are correct, according to the records of Western Pacific?

A. Yes, sir.

Mr. Wood: I should like to offer this as Exhibit G to the stipulation, your Honor.

The Court: Exhibit G to the stipulation?

Mr. Wood: I may say that other copies of this are available and will be distributed later.

The Court: Who is offering this?

Mr. Wood: This is First Mortgage Trustees', your Honor; it is a part of the stipulation.

The Court: Very well.

(The document was marked "Exhibit G of the First Mortgage Trustees to the Stipulation.")

Mr. Wood: In paragraph 127 of the stipulation, it is recited that a schedule is being prepared relating to certain items in the Debtor's miscellaneous physical property account, and that [1159] when that schedule has been identified in a similar manner, it may be filed with the Court, and, when so filed, shall constitute a part of the stipulation as Exhibit H.

Q. I show you a document marked Exhibit H, with schedules and maps annexed, which has been signed by Mr. Matthew, and by counsel for the mortgage trustees; was that prepared in your office under your supervision?

A. It was prepared in the office of our Chief Engineer.

(Testimony of Charles Elsey.)

Q. Are you prepared to say that the data and facts contained in that document are correct according to the records?

A. I have been advised of that by our chief engineer, yes, sir.

Q. So far as you, personally, know, everything in there is correct? A. Yes, sir.

Mr. Wood: I offer this as Exhibit H to the stipulation, First Mortgage Trustees'.

The Clerk: First Mortgage Trustees' Exhibit H to the stipulation.

(The document was marked "First Mortgage Trustees' Exhibit H to the stipulation.")

Mr. Wood: Q. Mr. Elsey, I would like to ask you a question regarding two parcels which are shown on Map B annexed to Exhibit H. To refresh your recollection, I will show you the map. They are marked "Parcel 253-A and Parcel 261-A," in the area between Illinois street on the east, Iowa street on the west, Army street on the north, and Tulare on the south. You are familiar with the circumstances under which those parcels were required, and the purpose for which they were acquired?

A. Yes, sir.

Q. Schedule B, sheet 1 of the exhibit, and Schedule D, sheet 2 of the exhibit, shows that these parcels were purchased in 1932, one from M. L. and J. A. Bergero, and the other from Robert and Gertrude Ellis, and that they were not financed with deposits of [1160] cash under the First Mortgage. Mr. Elsey,

(Testimony of Charles Elsey.)

at the time these parcels were acquired in 1932, for what purpose was the land owned by the railroad company in that adjacent area being held by the railroad company? A. That is, in 1932?

Q. In 1932. For what purpose were they held, the lands in that immediate area?

A. Held for industrial purposes.

Q. Had your Engineering Department, about that time, prepared maps or drawings showing a projected lay-out for industrial tracks in that area?

A. We worked out several track lay-outs to serve that particular district.

Q. Now, at the time that you acquired these parcels in 1932, for what purpose were they intended to be used? A. For industrial purposes.

Q. You mean for the same purpose as the other land in the same vicinity, adjacent?

A. In that particular area, yes sir.

Mr. Wood: Thank you.

Mr. McCollum: At my request, have you prepared, or had prepared, certain exhibits, showing complete figures for the year 1939, eleven months actual, plus an estimate for December, showing various facts to which I will later refer?

A. You mean as to gross operating revenues of the Western Pacific System?

Q. That and various other items to which I will call your specific attention in a moment.

A. Yes, sir.

(Testimony of Charles Elsey.)

Q. And have those statements been prepared, and to the best of your knowledge are they correct?

A. Yes, sir.

Q. I show you a statement entitled "Combined Railway Operating Revenues," which has the heading at the top, "1-a", Exhibit 1 of the papers to which I have referred.

A. You refer to the statement headed "Combined Railway Operating Revenues"?

Q. Yes. A. Yes.

Mr. McCollum: May I have that marked as Irving Trust Company [1161] Exhibit 1-A?

The Clerk: 1-A.

(The document was marked "Irving Trust Company Exhibit 1-A.")

(Testimony of Charles Elsey.)

IRVING TRUST CO. EXHIBIT NO. 1-A.

The Western Pacific Railroad Company

INFORMATION REQUESTED BY PILLSBURY, MADISON AND SUTRO IN THEIR LETTER DATED DECEMBER 20, 1939 ADDRESSED TO MR. C. L. DROIT, SECTARY.

1. (a)—Combined Railway Operating Revenues
The Western Pacific Railroad Company
– Sacramento Northern Railway
Tidewater Southern Railway Company
Deep Creek Railroad Company
(All Inter-Company Items Eliminated.)

Period January 1 to November 30, 1939 and estimate for the month of December, 1939.

Period	Freight	Passenger	Other	Total
Jan. 1 to Nov. 30, 1939	$15,467,873	$ 958,584	$440,355	$16,866,812
Dec. 1939 Est.	1,348,300	53,700	30,600	1,432,600
Total Year	$16,816,173	$1,012,284	$470,955	$18,299,412

[Endorsed]: United States District Court. No. 26519 Western Pac. R. R. Co., Irving Trust Co., Exhibit No. 1-A. Filed 4-22-1940. Walter B. Maling, Clerk.

Mr. Swaine: May we have copies of those? We haven't seen them.

Mr. McCollum: I will give them to you later. Do you want to see them before they go in?

Mr. Swaine: Yes, I would like to see whether I have any objecteion to their going in.

(Testimony of Charles Elsey.)

The Court: What did you mark them?

The Clerk: He asked to have it marked Irving Trust Company's Exhibit 1-A.

The Court: 1-A? Is that to be a part of the stipulation of facts?

Mr. McCollum: No, sir, this is a court exhibit.

The Court: I was wondering why you asked to have it marked 1-A.

Mr. McCollum: Really, because it is a part of various answers to the question on my memorandum, which is called "1", and it also has a heading "1-A".

The Court: Very well.

Mr. McCollum: Q. Have you also a copy of a statement listed as "1-B", entitled "Combined Income Available for Interest Charges"?

A. Yes, sir.

Mr. McCollum: I should like to have that introduced as Irving Trust Company's Exhibit 1-B.

Mr. Swaine: May I ask, Mr. McCollum, what you are doing? Merely taking the ten months attached to the stipulation and carrying it through 1939 by adding November actual and an estimate for December?

Mr. McCollum: Yes.

Mr. Swaine: I have no objection to that. [1162]

(The document was marked "Irving Trust Company's Exhibit 1-B.")

(Testimony of Charles Elsey.)

1. (i)—The Western Pacific Railroad Company Proportion of Revenues from Traffic Interchanged with Central California Traction Company

Period January 1 to November 30, 1939	$263,014
Month of December 1939—Estimated	5,470
Total Year	$268,484

[Endorsed]: United States District Court. No. 26591. Western Pac. R. R. Co. Irving Trust Co. Exhibit No. 1-I. Filed 1/22/1940. Walter B. Maling, Clerk.

Mr. McCollum: Q. The next is marked 1-J, "Railway Operating Income, Alameda Belt Line." Is that one of the statements to which you have referred? A. Yes, sir.

Mr. McCollum: I should like to have that marked Irving Trust Company's Exhibit 1-J.

(Testimony of Charles Elsey.)

(The document was marked "Irving Trust Company's Exhibit 1-J.")

Mr. McCollum: Q. Next is marked 1-K, "Income and Profit and Loss Deficit of Alameda Belt Line," and so forth. Is that one of the statements to which you have referred? A. Yes, sir.

Mr. McCollum: I should like to have that marked Irving Trust Company's Exhibit 1-K. [1164]

(The document was marked "Irving Trust Company's Exhibit 1-K.")

Mr. McCollum: Q. The next is marked "1-L," "Income of Standard Realty & Development Company." Is that one of the statements to which you have referred? A. Yes, sir.

Mr. McCollum: I should like to have that marked Irving Trust Company Exhibit 1-L.

(The document was marked "Irving Trust Company's Exhibit 1-L.")

Q. What was the average revenue car received by the Debtor on traffic delivered to or received from Alameda Belt Line in 1935, '36, '37 and '38, listed in paragraph 151 of the stipulation, if you know?

A. I only have the averages of 1935 and 1938.

Q. And what were those?

A. The revenue in 1935 was approximately $62 a car, and in 1938, $74 a car.

Q. Those are averages? A. Yes.

Q. What would this indicate as the approximate total revenues of the Debtor from traffic delivered

(Testimony of Charles Elsey.)

to or received from the Belt Line in the years 1935 and 1938?

A. $315,365 in 1935, and $331,240 in 1938.

Q. Will you please describe the nature of the operations of the Alameda Belt Line and its usefulness to the Debtor?

A. The Alameda Belt Line is a switching line which furnishes the sole access for Western Pacific to the industrial district of Alameda. The Debtor acquired participation at the request of the City of Alameda in 1926, and numerous industries have since located in the Alameda Industrial section on the faith of having services through the Alameda Belt Line over the Western Pacific and Santa Fe, as well as over the Southern Pacific, which had previously been the only line having direct connection with any part of the District. In addition to the traffic which the Western Pacific derives directly from the Alameda Belt Line, it had acquired considerable good will, which is valuable to the entire system in obtaining traffic. [1165]

Q. Have you had prepared in your office a statement showing the Interstate Commerce valuation of the Alameda Belt Line property as of December 31, 1935, and also as of December 31, 1938, and also the balance sheets of the Alameda Belt Line as of said dates? A. Yes, sir.

Q. And is that statement, to the best of your belief, correct? A. Yes, sir.

(Testimony of Charles Elsey.)

Mr. McCollum: I offer in evidence that statement as Irving Trust Company's Exhibit 2.

(The document was marked "Irving Trust Company's Exhibit 2.")

IRVING TRUST CO. EXHIBIT No. 2

Alameda Belt Line

STATEMENT OF VALUATION

AS OF DECEMBER 31, 1935 AND DECEMBER 31, 1938

	As of Dec. 31, 1935	As of Dec. 31, 1938
Interstate Commerce Commission's final value, for rate making purposes, as of December 31, 1928, of property owned and used for Common Carrier purposes and property owned but not used, excluding working capital	$720,500.00	$720,500.00
Additions and Betterments subsequent to December 31, 1928	247,411.49	264,550.54
Total Interstate Commerce Commission valuation adjusted by subsequent Additions and Betterments	$967,911.49	$985,050.54
Non-operating physical property, not included in above investment, as shown by books	$156,540.32	$156,500.38

Copies of General Balance Sheets of Alameda Belt Line as of December 31, 1935 and December 31, 1938 follow.

[Endorsed]: United States District Court. No. 26591. Western Pac. R. R. Co. Irving Trust Co. Exhibit No. 2. Filed 1/22/1940. Walter B. Maling, Clerk. By [Illegible], Deputy Clerk.

(Testimony of Charles Elsey.)

Mr. McCollum: Q. As I understand it, there was no I.C.C. valuation as to those dates for Central California Traction Company, is that correct?

A. No, sir, there was not.

Q. But you have had prepared the balance sheets of the Central California Traction Company as of December 31, 1935, and December 31, 1938?

A. Yes, sir.

Q. Is that statement true and correct to the best of your knowledge? A. Yes, sir.

Mr. McCollum: I offer the statement in evidence as Irving Trust Company Exhibit 3.

(The document was marked "Irving Trust Company Exhibit 3.")

Mr. McCollum: Q. Can you state in general what you consider to be the prospects for continued earnings of the Central California Traction Corporation?

A. The territory which the Central California Traction serves is a rich grape-growing and wine-producing territory, and I see no reason why the earnings since 1933 should not continue, although the results of any one particular year depend on the size and quality of the crop, and also the general market conditions.

Q. Is it your best judgment that the benefit derived by the Debtor from retaining its participation in the Alameda Belt Line and the [1166] Central California Traction Company is greater than any loss through having to make advances to those companies? A. Yes, sir.

(Testimony of Charles Elsey.)

Q. How much of the traffic which originates or terminates on the Debtor's Northern California Extension is now traffic which it would not have except for the existence of the extension?

A. Practically all.

Q. Have you had prepared in your office an exhibit showing the amount of cash and receivables in the hands of the Debtor's Trustees on March 4, 1936? A. Yes, sir.

Q. Is that statement true and correct, to the best of your belief? A. Yes, sir.

Mr. McCollum: I offer that statement in evidence as Irving Trust Company's Exhibit 4.

(The document was marked "Irving Trust Company's Exhibit 4.")

[Endorsed]: United States District Court. No. 26591. Western Pac. R. R. Co. Irving Trust Co. Exhibit No. 4. Filed 1/22/1940. Walter B. Maling, Clerk.

Mr. McCollum: Q. Have you had prepared in your office a statement of equipment acquired between August 1, 1935 and December 31, 1939, showing the number of units remaining in service, and their ledger value as of December 31, 1939, and the Western Pacific Railroad Company's equity as of December 31, 1939 in such of the equipment as was acquired under Equipment Trust Agreements and Conditional Sales Contracts? A. Yes, sir.

Q. Is that statement true and correct, to the best of your belief? A. Yes, sir.

(Testimony of Charles Elsey.)

Q. Now, this statement is designed, is it not, to show the equipment or equity in equipment which was acquired during the course of the reorganization proceedings, by the Debtor's Trustees, either with cash or under equipment trust or similar agreements entered into after the inception of the reorganization proceeding? A. Yes, sir.

Q. And that shows, generally speaking, does it not, that the ledger value of the units acquired other than under equipment [1167] trusts was $432,842, approximately? A. Yes, sir.

Q. And that the ledger value of the equity acquired under equipment trusts and similar agreements was $1,059,368? A. Yes, sir.

Mr. McCollum: I offer in evidence the statement which has been referred to, as Irving Trust Company Exhibit 5.

(The document was marked "Irving Trust Company's Exhibit 5.")

(Testimony of Charles Elsey.)

IRVING TRUST CO. EXHIBIT No. 5

The Western Pacific Railroad Company

STATEMENT OF EQUIPMENT ACQUIRED BETWEEN AUGUST 1, 1935 AND DECEMBER 31, 1939, SHOWING NUMBER OF UNITS REMAINING IN SERVICE AND THEIR LEDGER VALUE AS OF DECEMBER 31, 1939, AND THE WESTERN PACIFIC RAILROAD COMPANY'S EQUITY AS OF DECEMBER 31, 1939 IN SUCH OF THE EQUIPMENT AS WAS ACQUIRED UNDER EQUIPMENT TRUST AGREEMENTS AND CONDITIONAL SALES CONTRACTS.

[Endorsed]: United States District Court, No. 26591. Western Pac. R. R. Co., Irving Trust Co. Exhibit No. 5. Filed 1/22/1940. Walter B. Maling, Clerk.

(Testimony of Charles Elsey.)

The Court: We will take a brief recess at this time.

(After recess:)

Mr. McCollum: If the Court please, I have no further questions of Mr. Elsey.

I have just a few exhibits which I would like to introduce through Mr. Curry.

The Court: Does counsel wish to ask Mr. Elsey any question?

Mr. Wood: I should like to ask one question.

Q. On the Irving Trust Company Exhibit 5, Mr. Elsey——

A. Will you talk a little louder, please?

Q. On Irving Trust Company Exhibit 5, which has just been offered by Mr. McCollum, in the first heading the legend is "Number of Units in Service, December 31, 1939, acquired by the use of free funds between August 1, 1935 and December 1, 1939, and the ledger value of such units as of December 1, 1939."

Do the words "free funds" there refer to revenues of the railroad company during the trusteeship—revenues from operations?

A. My No. 5 is not the statement that you are speaking of.

Q. Perhaps I have it marked wrong. It is the statement of equipment acquired between August 1, 1935 and December 31, 1939, showing the number of units remaining in service and their ledger value as of December 31, 1939. Is that the one that you have in your hand?

(Testimony of Charles Elsey.)

A. The first portion of the statement has the amount of $432,842.66?

Q. Yes.

A. Yes; that is the amount of equipment acquired by the use of free funds between August 1, 1935 and December 31, 1939. [1168]

Q. My question has to do with the meaning of the words "free funds." That represents the revenues from the operations of the railroad during the trusteeship? A. Yes, sir.

Q. It does not represent the sale of any unmortgaged assets?

A. In a broad sense it means any funds other than derived from the sale of securities.

Q. It is the income of the trustees during the trusteeship? A. Yes, sir.

Q. During that period was any interest paid on the first mortgage bonds? A. No, sir.

The Court: Anything further of Mr. Elsey?

Mr. McCollum: If the Court please, if I could call Mr. Curry for a moment, I could put in a few remaining Irving Trust Company exhibits.

M. J. CURRY,

Called by the Irving Trust Company; Sworn.

The Clerk: Will you state your name to the Court, please?

A. M. J. Curry.

Direct Examination

Mr. McCollum: If the Court please, there is in the Interstate Commerce Commission record one of the later listing statements for first mortgage bonds as of some date at the end of 1931, I think, and I would like to introduce through this witness certain earlier listing statements of the same character.

Q. Mr. Curry, have you with you copies of certain listing statements which you supplied from your file to my partner, Mr. Judd?

A. I have.

Q. And are those listing statements relating to first mortgage bonds and dated July 16, 1925——

A. Yes. [1169]

(Testimony of M. J. Curry.)

IRVING TRUST CO. EXHIBIT No. 6

Francis E. Fitch (Inc.) 138 Pearl St. New York.

A—6800

COMMITTEE ON STOCK LIST, NEW YORK STOCK EXCHANGE

The Western Pacific Railroad Company:
(Organized under the laws of California)

First Mortgage Five Per Cent. Bonds, Series A.
Due March 1, 1946.

Additional Listing, Series A Bonds	$ 4,000,000
Authorized First Mortgage Bonds	50,000,000
Amount issued:	
Series A, 5% Bonds	28,180,000
Series B, 6% Bonds	3,000,000
Total Listing applied for:	
Series A	28,180,000
Series B	3,000,000

This additional issue:

Indenture authorized by stockholders. July 13,1946
Authorized by Board of Directors Dec. 15, 1924.
Approved by Interstate Commerce Commission by its order March 17, 1925, I.C.C. Docket No. 4681, and by California Railroad Commission by its order April 7, 1925, Application No. 14758. No other authority necessary.

(Testimony of M. J. Curry.)

New York, July 16, 1925.

Referring to its previous applications, especially to A-4667, dated May 10, 1922, The Western Pacific Railroad Company (hereinafter called the "Railroad Company") hereby applies for the listing on the New York Stock Exchange of $4,000,000 additional (of a total authorized issue of $50,000,000) of its First Mortgage 5% Gold Bonds, Series A, due March 1, 1946, consisting of Nos. M23297 to M27296, both inclusive, for $1,000 each (and such fully registered bonds as may be issued in exchange for coupon bonds), on official notice of distribution and sale to the public, making the total amount of Series A Bonds issued and applied for $28,180,000. The bonds of Series A and Series B rank equally under the mortgage.

All of the bonds secured by the mortgage previously issued have been listed, pursuant to action on the following applications:

A-4747, dated Mar. 13, 1917 ($20,000,000) Series A,
A-5478, dated June 30, 1921 ($4,180,000) Series A,
A-5667, dated May 10, 1922 ($3,000,000) Series B.

Authority for Issue

The issuance of said $4,000,000 Series A Bonds of the Railroad Company, covered by this application, was authorized by resolution of the Board of Direc-

(Testimony of M. J. Curry.)

tors of the Railroad Company adopted December 15, 1924, and their authentication was authorized by a further resolution adopted by the Board of Directors on June 1, 1925. No action by the stockholders of the Railroad Company is required by the provisions of the First Mortgage of the Railroad Company, dated June 26, 1916, hereinafter mentioned, or by any laws or regulations applicable to the issuance and sale of any bonds secured by said First Mortgage. The issuance and sale of said $4,000,000 Series A Bonds at not less than ninety per cent. of their face amount and accrued interest and for the purposes hereinafter stated were approved by order of the California Railroad Commission dated April 7, 1925, on application No. 14,758, and by order of the Interstate Commerce Commission dated March 17, 1925, in Finance Docket No. 4681. No further authority is required.

Description

The First Mortgage Bonds are secured by the Railroad Company's First Mortgage, dated June 26, 1916, to First Federal Trust Company (of San Francisco, California), and Henry E. Cooper (37 Wall Street, New York City), Trustees. The bonds covered by this application are an additional issue of Series A Bonds of $4,000,000 principal amount, all bearing interest at the rate of five per cent. per annum, dated June 26, 1916, and maturing March 1, 1946.

(Testimony of M. J. Curry.)

The principal of the bonds is payable at the office or agency of the Railroad Company in the Borough of Manhattan, City of New York, N. Y., and the interest thereon is payable at its said office or agency, or at the option of the holder at its office or agency in the City and County of San Francisco, semi-annually, on March 1st and September 1st. Both principal of and interest upon each bond are payable in gold coin of the United States of America of or equal to the standard of weight and fineness as it existed June 26, 1916, without deduction for any tax, assessment or other governmental charge (except the Federal Income Tax imposed by the Act of Congress approved October 3, 1913, with respect to income derived from interest paid thereon), which the Railroad Company or the Trustees under the mortgage securing the bonds, or either of them, may be required to pay thereon or to retain therefrom under any present or future law or ordinance of the United States of America, or of any State, territory, municipality, or other taxing authority therein; and the Railroad Company assumes the payment of all such taxes, assessments and charges with the exception aforesaid.

The bonds are in coupon form of the denominations of $1,000, and $500 and $100 and are registerable as to principal only. Coupon bonds for $1,000 are interchangeable with registered bonds of the denominations of $1,000, $5,000, and $10,000, or multiples of $10,000. Coupon bonds for $1,000, $500, and

(Testimony of M. J. Curry.)

$100 are also interchangeable in equal principal amounts. For any such exchange and for any transfer of registered bonds or of coupon bonds registered as to principal, the Company, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge and except in case of coupon bonds registered as to principal an additional amount not exceeding $1 for each new bond issued upon such exchange or transfer.

Sinking Fund

The Mortgage securing the bonds provides for the creation of a sinking fund to be especially applied to the purchase or redemption of bonds, and requires the Railroad Company for that purpose to pay, out of any income lawfully applicable thereto, after payment of operating expenses of every description, taxes and interest upon the bonds, the sum of $50,000 on January 1st of each year, commencing with the year 1919. Series A Bonds are redeemable through the Sinking Fund at par and accrued interest on at least sixty days' previous published notice, as described under redemption. All bonds purchased or redeemed by the Sinking Fund are to be cancelled and delivered to the Railroad Company. These provisions have been fully complied with.

(Testimony of M. J. Curry.)

Redemption

The Railroad Company may redeem all or any part of said Series A Bonds on any semi-annual interest payment date, at par and accrued interest, on notice published once in each calendar week for eight successive weeks in two newspapers of general circulation published in the Borough of Manhattan, New York, N. Y., and one newspaper of general circulation published in San Francisco, California, one such publication to be not less than sixty nor more than ninety days before the date of redemption. The Company may elect to redeem the bonds of one or more series.

All bonds redeemed are to be cancelled or indelibly stamped with a statement that they have been redeemed: In the case, however, of bonds hereafter refunded with, or exchanged for, or the payment, redemption or retirement otherwise whereof shall be provided for by means of, refunding bonds or other obligations of the Railroad Company issued under a mortgage or other instrument providing that bonds redeemed pursuant to the provisions of the First Mortgage, notwithstanding that they shall have been cancelled or marked "Cancelled," shall be deposited with the Trustees under such new mortgage or other instrument, as security for such refunding bonds or other obligations, the bonds so redeemed and deposited shall be deemed to remain alive and unextinguished in the hands of the Trus-

(Testimony of M. J. Curry.)

tees under such new mortgage or other instrument for the security of such refunding bonds or other obligations, to the extent specified in section 2 of Article Third of the Mortgage.

Default

The mortgage provides that in case of default in the payment of interest continuing for the period of three months or default in the payment of principal, or in the observance or performance of any covenants, conditions or agreements on the part of the Railroad Company in the bonds or in the mortgage contained continuing for the period of three months after written notice from the Trustees, or in case an order be made for the appointment of a Receiver, the Trustees may, and upon the written request of the holders of twenty-five per cent. in amount of the bonds then outstanding shall, by notice in writing, declare the principal of all of the outstanding bonds to be due and payable immediately. The mortgage provides that the holders of a majority in amount of the bonds then outstanding may waive any default that shall have happened and its consequences upon the remedying of such default. It gives the holders of a majority in amount of bonds outstanding the right to direct and to control the action of the Trustees, and the exercise of the remedies provided by the mortgage.

(Testimony of M. J. Curry.)

Sale and Purpose of Issue

The Railroad Company has sold said bonds for cash at the price of 94¼% of their face amount together with accrued interest thereon and the proceeds are to be applied to reimburse the Railroad Company for capital expenditures and for the cost of certain proposed construction, completion, extension and improvement of facilities; all of such expenditures made or proposed to be made having been of a character with respect to which bonds may be issued and the proceeds of bonds paid out under the terms of Section 2 of Article Second of said First Mortgage and having been set forth in detail in the application of the Railroad Company to the Interstate Commerce Commission upon which the above mentioned order of March 17, 1925 was based.

Changes in Capitalization

Since the previous application A-5667, dated May 10, 1922, there has been no change in the amount of capital stock or funded debt of the Railroad Company authorized and outstanding except the issuance of the $4,000,000 of Series A bonds covered by this application and the purchase of $119,900 face amount of the Series A bonds and $50,000 face amount of the Series B bonds for the sinking fund (making the total amount so purchased $1,086,200 face amount), and the creation of an Equipment Trust Agreement and Lease between the Railroad Company and The Equitable Trust Company of

(Testimony of M. J. Curry.)

New York, as Trustee, dated March 1, 1923, securing an issue of 5½% Equipment Trust Certificates, Series B, of the aggregate face amount of $5,600,000, of which $750,000 aggregate principal amount have been paid off, and also a certain Equipment Trust Agreement and Lease between the Railroad Company and The Equitable Trust Company of New York, as Trustee, dated March 15, 1924, securing an issue of 5½% Equipment Trust Certificates, Series C, of the aggregate face amount of $3,105,000, of which $207,000 aggregate principal amount have been paid off.

Properties

The properties of the Railroad Company are described in the original application for listing of Series A Bonds, No. A-4747, dated March 13, 1917, and in the subsequent applications No. A-5478, dated June 30, 1921, and A-5667, dated May 10, 1922.

Since December 31, 1921, the following important changes in mileage have occurred:

Completion of the Belt Line within the city of San Jose, Calif., operation commenced May 1, 1922.

Branch line Bidwell Junction to Bidwell Bar, Calif., 2.02 miles, operation commenced May 15, 1922.

Completion of 39.16 miles additional main line yard, industry and side tracks, the operation of which commenced on various dates between December 31, 1921 and 1924.

(Testimony of M. J. Curry.)

Completion of 4.26 miles additional branch line sidings and spurs. The operation of which commenced on various dates between December 31, 1921 and 1924.

Abandonment of 2.81 miles of branch line from Bridge E to Loyalton, Calif., 1.99 miles December 1922 and .82 miles December, 1923.

Acquisition of joint interest with other carriers in 2.39 miles of yard tracks and sidings, operation of which commenced on various dates between December 31, 1921 and 1924.

Since December 31, 1921 the Railroad Company has made the following net additions to equipment:

		Subject to Equipment Trusts	
	Units	Series B	Series C
Locomotives:			
Mallett (80,000 pounds tractive power)	5		5
Mikado, heavy type (60,300 pounds tractive power)	11	6	5

Total units added December 31, 1921 to December 31, 1924 3,303

*Leased to Pacific Fruit Express Company.

Lien

Reference is made to the previous listing applications, Nos. A-4747, A-5478 and A-5667, for a description of the property subject to the lien of the mortgage prior to December 31, 1921. The property on which the mortgage constitutes a first lien includes the following:

(Testimony of M. J. Curry.)

Mileage:

Main line mileage, San Francisco to Salt Lake City	926.41 miles
Branch lines, main track	115.98 miles
Second main track	6.06 miles
Yard tracks and sidings	251.96 miles
Total track miles	1,300.41 miles

Equipment:

Locomotives	139
Passenger cars	8
Freight cars	5,873
Service cars	329
Floating equipment	5
Total	6,354

The foregoing does not include additional unmortgaged equipment covered by Equipment Trust Agreements, Series B and Series C, as follows:

Locomotives	16
Passenger cars	48
Freight cars	3,275

Securities:

1,000 shares Capital Stock (50% of outstanding) of the Salt Lake City, Union Depot & Railroad Company, operating the passenger terminal, at Salt Lake City, leased to the Railroad Company and the Denver and Rio Grande Western Railroad Company;

4,500 shares of the Capital Stock (entire issue) of the Deep Creek Railroad Company, operating a line of railroad in Western Utah, 46 miles;

4,005 shares of the Capital Stock (entire issue) of Standard Realty and Development Company, organized to acquire and hold real estate in connection with the construction of the Railroad Company

Deposited Cash in the hands of Mortgage Trustees, as of July, 1925, including unwithdrawn proceeds of $4,000,000 bonds covered by this application, $4,405,430.17.

(Testimony of M. J. Curry.)

The First Mortgage contains a provision subjecting to its lien after acquired property purchased with bonds or their proceeds and property directly appurtenant to or forming an integral part of the mortgaged railroad, or securities representing the same, also additional securities of subsidiary companies as defined in the Mortgage, but the First Mortgage permits the Railroad Company to acquire with free funds, free from the lien of the Mortgage; additional lines of railroad, branches and extensions, equipment and securities.

From January 1, 1922, to December 31, 1924, inclusive, the Railroad Company has expended for road and equipment (including the above described additional equipment) the following amounts:

Road and structures	$4,933,452.07
Equipment	11,284,889.42
General expense	6,737.07
Total	$16,225,078.56

Dividends

All of the authorized Capital Stock consisting of $47,500,000 par value of Common Stock and $27,500,000 par value of Preferred Stock is issued and outstanding, and all of such stock except Directors' qualifying shares of Comnion Stock is held by The Western Pacific Railroad Corporation, a Delaware corporation.

The following dividends have been paid on the Preferred and Common Stocks:

(Testimony of M. J. Curry.)

DIVIDENDS—PREFERRED STOCK

Year	Rate	Amount Paid
1917	7½%	$2,062,500
1918	None

Policy as to Depreciation

No specific amount is set aside either monthly or annually on account of depreciation of roadway or structures, but all such property is fully maintained and when retired or replaced is written out of capital account by charges to operating expenses.

(Testimony of M. J. Curry.)

With respect to equipment, charges are made monthly to operating expenses and corresponding amounts credited to "Accrued Depreciation Equipment," at a general rate of 2¼% per annum on the original cost of the equipment.

Agreements

The Western Pacific Railroad Company agrees with the New York Stock Exchange as follows:

Not to dispose of an integral asset or its stock interest in any constituent, subsidiary, owned or controlled company, or allow any of said constituent, subsidiary, owned or controlled companies to dispose of an integral asset or stock interest in other companies unless for retirement and cancellation, without notice to the Stock Exchange.

To publish statement of earnings monthly and annually.

To publish once in each year and submit to the stockholders, at least fifteen days in advance of the annual meeting of the Corporation, a statement of its financial condition, a consolidated income account covering the previous fiscal year; and a consolidated balance sheet showing assets and liabilities at the end of the year; or an income account and balance sheet of the parent company and all constituent, subsidiary, owned or controlled companies, subject to I. C. C. regulations.

To maintain, in accordance with the rules of the Stock Exchange, a transfer office or agency in the

(Testimony of M. J. Curry.)

Borough of Manhattan, City of New York, where all listed securities shall be directly transferable, and the principal of all listed securities with interest or dividends thereon shall be payable; also a registry office in the Borough of Manhattan, City of New York, other than its transfer office or agency in said city, where all listed securities shall be registered.

To notify the Stock Exchange thirty days in advance of the effective date of any change in the authorized amounts of listed securities.

Not to make any change in listed securities or of a trustee of its bonds or other securities, without the approval of the Committee on Stock List, and not to select as a trustee an officer or director of the Company.

To notify the Stock Exchange in the event of the issuance or creation in any form or manner of any rights to subscribe to, or to be allotted, its securities, or of any other rights or benefits pertaining to ownership in its listed securities, so as to afford the holders of its listed securities a proper period within which to record their interests, and that all such rights to subscribe or to receive allotments and all other such rights and benefits shall be transferable; and shall be transferable, payable and deliverable in the Borough of Manhattan, City of New York.

To notify the Stock Exchange of the issuance of additional amounts of listed securities, and make immediate application for the listing thereof.

(Testimony of M. J. Curry.)

To publish promptly to holders of listed bonds and stocks any action in respect to interest on bonds, dividends on shares, or allotment of rights for subscription to securities, notices thereof to be sent to the Stock Exchange, and to give to the Stock Exchange at least ten days' notice in advance of the closing of the transfer books or extensions, or the taking of a record of holders for any purpose.

To redeem Preferred Stock in accordance with the requirements.

To notify the Stock Exchange if deposited collateral is changed or removed.

To have on hand at all times a sufficient supply of bonds to meet the demands for transfer.

General

The fiscal year of the Railroad Company ends on the 31st day of December.

The principal office of the Company is in the Mills Building, San Francisco, California.

The annual meeting of stockholders is held on the last Wednesday in March at the principal office of the Railroad Company in San Francisco, California.

The names and addresses of the Directors, whose terms expire March 31, 1926, are: A. W. Krech, John B. Dennis, Frederick H. Ecker, Andrew M. Hunt, G. W. Murray, and A. R. Baldwin of New York, N. Y., C. M. Levey, William Fries, F. H. Angelotti, J. G. Hooper, Campbell McGregor and

(Testimony of M. J. Curry.)

Wellington T. Smith, of San Francisco, California, John L. Nagle of Sacramento, California, Thomas F. Baxter, of Stockton, California, and C. M. Nibley of Salt Lake City, Utah.

The Executive Committee is: A. W. Krech, J. P. Dennis, F. H. Ecker, A. M. Hunt, G. W. Murray, A. R. Baldwin and C. M. Levey.

The Officers of the Railroad Company are: Chairman of the Board, A. W. Krech, President, C. M. Levey, Vice-Presidents, F. W. M. Cutcheon, A. R. Baldwin, E. W. Mason, and Charles Elsey; Secretary, W. G. Bruen; Treasurer, Charles Elsey; Assistant Secretary and Assistant Treasurer, S. C. Matthews.

The bonds may be transferred and registered at The Equitable Trust Company of New York, 37 Wall Street, New York, N. Y.

The agent for the payment of interest is The Equitable Trust Company of New York.

The places for the payment of the principal are at the office of The Equitable Trust Company of New York, or of the First Federal Trust Company of San Francisco, California.

THE WESTERN PACIFIC RAILROAD COMPANY,
By S. C. MATTHEWS,
Assistant Secretary.

This Committee recommends that the above-mentioned $4,000,000 additional First Mortgage Five per Cent. Bonds, Series A, due March 1, 1946, Nos.

(Testimony of M. J. Curry.)

M-23,297 to M-27,296, inclusive, for $1,000 each (and registered bonds issued in exchange for coupon bonds) be added to the list on official notice of distribution and sale to the public, in accordance with the terms of this application, making the total amount of Series A Bonds authorized to be listed $28,180,000.

ROBERT GIBSON,
Chairman.

Adopted by the Governing Committee, August 26, 1925.

HARRISON S. MARTIN,
First Assistant Secretary.

Mr. McCollum: I should like to offer the statement of September 30, 1926 as Irving Trust Company Exhibit 7.

(The document was marked "Irving Trust Company's Exhibit 7.")

(Testimony of M. J. Curry.)

New York, September 30, 1926.

Referring to its previous applications, especially to A-6800, dated July 16, 1925, The Western Pacific Railroad Company (hereinafter called the "Railroad Company") hereby makes application for the listing on the New York Stock Exchange of $2,600,000 additional (of a total authorized issue of $50,000,000) of its First Mortgage Five per Cent. Gold Bonds, Series A, due March 1, 1946, consisting of Nos. M 27327 to M. 29926 both inclusive, for $1,000 each (and such fully registered bonds as may be issued in exchange for coupon bonds), on official notice of issuance and distribution for sale to the public, making the total amount of Series A Bonds issued and applied for $30,780,000. There are also $3,000,000 Series B Bonds issued and listed. The Bonds of Series A and Series B rank equally under the Mortgage.

Authority for and Purpose of Issue

The issuance of said $2,600,000 Series A Bonds of the Railroad Company, covered by this application, was authorized by resolutions of the Board of Directors of the Railroad Company adopted March 1, 1926 and July 6, 1926, and their authentication was authorized by a further resolution adopted by the Board of Directors on August 2, 1926. No action by the stockholders of the Railroad Company is required by the provisions of the First Mortgage of the Railroad Company, dated June 26, 1916, herein-

(Testimony of M. J. Curry.)

after mentioned, or by any laws or regulations applicable to the issuance and sale of any bonds secured by said First Mortgage. The issuance and sale of said $2,600,000 Series A Bonds at not less than ninety-two per cent. of their face amount and accrued interest and for the purposes hereinafter stated were approved by decision No. 17,046 of the California Railroad Commission dated July 2, 1926, and by order of the Interstate Commerce Commission, dated June 15, 1926, in Finance Docket No. 5503. No further authority is required.

The Railroad Company has contracted for the sale of said bonds for cash at the price of 99¾% of their face amount together with accrued interest thereon and the proceeds are to be applied to reimburse the Railroad Company for capital expenditures and for the cost of certain proposed construction, completion, extension and improvement of facilities; all of such expenditures made or proposed to be made having been of a character with respect to which bonds may be issued and the proceeds of bonds paid out under the terms of Section 2 of Article Second of said First Mortgage and having been set forth in detail in the application of the Railroad Company to the Interstate Commerce Commission upon which the above mentioned order of June 15, 1926, was based.

Description

The First Mortgage Bonds are secured by the Railroad Company's First Mortgage, dated June

(Testimony of M. J. Curry.)

26, 1916, to First Federal Trust Company (now Crocker First Federal Trust Company) (of San Francisco, California), and Henry E. Cooper (37 Wall Street, New York City), Trustees. The bonds covered by this application are an additional issue of Series A Bonds of $2,600,000 principal amount, all bearing interest at the rate of five per cent. per annum, dated June 26, 1916, and maturing March 1, 1946.

The principal of the bonds is payable at the office or agency of the Railroad Company in the Borough of Manhattan, City of New York, N. Y., and the interest thereon is payable at its said office or agency, or at the option of the holder at its office or agency in the City and County of San Francisco, semi-annually, on March 1st and September 1st. Both principal of and interest upon each bond are payable in gold coin of the United States of America of or equal to the standard of weight and fineness as it existed June 26, 1916, without deduction for any tax, assessment or other governmental charge (except the Federal Income Tax imposed by the Act of Congress approved October 3, 1913, with respect to income derived from interest paid thereon), which the Railroad Company or the Trustees under the mortgage securing the bonds, or either of them, may be required to pay thereon or to retain therefrom under any present or future law or ordinance of the United States of America, or of any State, territory, municipality, or other taxing

(Testimony of M. J. Curry.)

authority therein; and the Railroad Company assumes the payment of all such taxes, assessments and charges with the exception aforesaid.

The bonds are in coupon form of the denominations of $1,000, and $500 and $100 and are registerable as to principal only. Coupon bonds for $1,000 are interchangeable with registered bonds of the denominations of $1,000, $5,000 and $10,000, or multiples of $10,000. Coupon bonds for $1,000, $500 and $100 are also interchangeable in equal principal amounts. For any such exchange and for any transfer of registered bonds or of coupon bonds registered as to principal, the Company, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge and except in case of coupon bonds registered as to principal an additional amount not exceeding $1 for each new bond issued upon such exchange or transfer.

Sinking Fund

The Mortgage securing the bonds provides for the creation of a sinking fund, to be especially applied to the purchase or redemption of bonds, and requires the Railroad Company for that purpose to pay, out of any income lawfully applicable thereto, after payment of operating expenses of every description, taxes and interest upon the bonds, the sum of $50,000 on January 1st of each year, commencing with the year 1919. Series A Bonds are re-

(Testimony of M. J. Curry.).

deemable through the sinking fund at par and accrued interest on at least sixty days' previous published notice, as described under redemption. All bonds purchased or redeemed by the sinking fund are to be cancelled and delivered to the Railroad Company. These provisions have been fully complied with.

Redemption

The Railroad Company may redeeem all or any part of said Series A Bonds on any semi-annual interest payment date, at par and accrued interest, on notice published once in each calendar week for eight successive weeks in two newspapers of general circulation published in the Borough of Manhattan, New York, N. Y., and one newspaper of general circulation published in San Francisco, California, one such publication to be not less than sixty nor more than ninety days before the date of redemption. The Company may elect to redeem the bonds of one or more series.

All bonds redeemed are to be cancelled or indelibly stamped with a statement that they have been redeemed. In the case, however, of bonds hereafter refunded with, or exchanged for, or the payment, redemption or retirement otherwise, whereof shall be provided for by means of, refunding bonds or other obligations of the Railroad Company issued under a mortgage or other instrument providing that bonds redeemed pursuant to the provisions of the First Mortgage, notwithstanding that they shall

(Testimony of M. J. Curry.)

have been cancelled or marked "Cancelled," shall be deposited with the Trustees under such new mortgage or other instrument, as security for such refunding bonds or other obligations, the bonds so redeemed and deposited shall be deemed to remain alive and unextinguished in the hands of the Trustees under such new mortgage or other instrument for the security of such refunding bonds or other obligations, to the extent specified in section 2 of Article Third of the Mortgage.

Default

The Mortgage provides that in case of default in the payment of interest continuing for the period of three months or default in the payment of principal, or in the observance or performance of any covenants, conditions or agreements on the part of the Railroad Company in the bonds or in the Mortgage contained continuing for the period of three months after written notice from the Trustees, or in case an order be made for the appointment of a Receiver, the Trustees may, and upon the written request of the holders of twenty-five per cent. in amount of the bonds then outstanding shall, by notice in writing, declare the principal of all of the outstanding bonds to be due and payable immediately. The mortgage provides that the holders of a majority in amount of the bonds then outstanding may waive any default that shall have happened and its consequences upon the remedying of such default. It gives the holders of a majority in

(Testimony of M. J. Curry.)

amount of bonds outstanding the right to direct and to control the action of the Trustees, and the exercise of the remedies provided by the Mortgage.

Changes in Capitalization

Since December 31, 1924 (the date as of which the consolidated balance sheet contained in said previous application A-6800 was made) there has been no change in the amount of Capital Stock or funded debt of the Railroad Company authorized and outstanding except

First: The issuance of the $4,000,000 of Series A 5% Bonds covered by said application A-6800, and

Second: The purchase of $72,000 face amount of the Series "A" 5% Bonds, and $30,000 face amount of the Series "B" 6% Bonds for the sinking fund (making the total amount so purchased $455,600); and

Third: The retirement of $750,000 (face amount) of its 5½% Equipment Trust Certificates, Series "B" and $207,000 (face amount) of its 5½% Equipment Trust Cetificates, Series "C."

Properties

The properties of the Railroad Company are described in the original application for listing of Series "A" Bonds, No. A-4747, dated March 13, 1917, and in the subsequent applications No. A-5478, dated

(Testimony of M. J. Curry.)

June 30, 1921; A-5667, dated May 10, 1922; and A-6800, dated July 16, 1925.

Since December 31, 1924, the following important changes in mileage have occurred:

Completion of 20.98 miles additional main line yard, industry and side tracks, the operation of which commenced on various dates between December 31, 1924, and June 30, 1926.

Completion of .29 miles additional branch line spur and connecting tracks, the operation of which commenced on various dates in year 1925.

Abandonment of 2.94 miles of second main track at Arnold's Loop, between Arnold and Proctor, Nevada, November 5, 1925.

Acquisition of joint interest with other carriers in .90 miles of yard tracks, operation of which commenced on various dates in year 1925.

Since December 31, 1924, the Railroad Company has made the following net additions to equipment:

Locomotives:	
Mikado, heavy type (60,300 pounds tractive power)	5
Passenger train cars:	
Combination coach and baggage car	1
Freight train cars:	
Box	12
Stock	76
Total	88

(Testimony of M. J. Curry.)

Less cars destroyed and converted:		
Automobile	2	
Box	13	
Flat	6	
Stock	47	
Clay	9	
Tank	1	
Refrigerator	4	
	—	82
Total		6
Construction and maintenance equipment:

Supply car		1
Total		2
Less cars destroyed:		
Outfit car		1
Total		1
Total units added December 31, 1924, to June 30, 1926		13

Lien

Reference is made to the previous listing applications, Nos. A-4747, A-5478, A-5667, and A-6800, for a description of the property subject to the lien of the Mortgage prior to December 31, 1924. The property on which the Mortgage constitutes a first lien includes the following:

Mileage:

	Miles
Main line mileage, San Francisco to Salt Lake City	926.41
Branch lines, main track	115.98
Second main track	3.12
Yard tracks and sidings, etc.	273.23
Total track miles	1,318.74

(Testimony of M. J. Curry.)

Equipment:

Locomotives	144
Passenger cars	9
Freight cars	5,885
Service cars	329
Floating equipment	5
Total	6,372

The foregoing equipment does not include additional unmortgaged equipment covered by Equipment Trust Agreements, Series B and C, as follows:

Locomotives	16
Passenger cars	48
Freight cars	3,269
Service cars	1

Securities:

1,000 shares Capital Stock (50% of outstanding) of The Salt Lake City Union Depot and Railroad Company, operating the the passenger terminal at Salt Lake City, leased to the Railroad Company and the Denver and Rio Grande Western Railroad Company.

4,500 shares of the Capital Stock (entire issue) of the Deep Creek Railroad Company, operating a line of railroad in Western Utah, 46 miles.

4,005 shares of the Capital Stock (entire issue) of Standard Realty and Development Company, organized to acquire and hold real estate in connection with the construction of the Railroad Company.

10,000 shares of the Capital Stock (entire issue) of Sacramento Northern Railway, operating 165.65 miles of main line of railroad in California.

(Testimony of M. J. Curry.)

$5,196,204.46 par value First Mortgage 5% Twenty-Year Gold Bonds and Bond Participation Certificates of Sacramento Northern Railroad.

Deposited cash in the hands of Mortgage Trustees, as of June 30, 1926 ..... $42,941.46

The First Mortgage contains a provision subjecting to its lien after acquired property purchased with bonds or their proceeds and property directly appurtenant to or forming an integral part of the mortgaged railroad, or securities representing the same, also additional securities of subsidiary companies as defined in the Mortgage, but the First Mortgage permits the Railroad Company to acquire with free funds, free from the lien of the Mortgage, additional lines of railroad, branches and extension, equipment and securities.

From January 1, 1925, to June 30, 1926, inclusive, the Railroad Company has expended for road and equipment (including the above described additional equipment) the following amounts:

Road and structures and general expenses	$1,975,622.53
Equipment	593,608.61
Total	$2,569,231.14

Dividends

All of the authorized Capital Stock, consisting of $47,500,000 par value of Common Stock and $27,500,000 par value of Preferred Stock, is issued and outstanding, and all of such stock except Directors' qualifying shares of Common Stock is held by The

(Testimony of M. J. Curry.)

Western Pacific Railroad Corporation, a Delaware corporation.

The following dividends have been paid on the Preferred and Common Stocks since 1922:

DIVIDENDS—PREFERRED STOCK

Year	Rate	Amount paid
1923	6%	$1,650,000
1924	6%	1,650,000
1925	7.558%	2,078,450
1926 (to June 30)	3%	825,000

DIVIDENDS—COMMON STOCK

Year	Rate	Amount paid
1925	5%	$2,374,970

Prior to 1925, Railroad Company paid no dividends on its Common Stock.

(Testimony of M. J. Curry.)

Policy as to Depreciation

No specific amount is set aside either monthly or annually on account of depreciation of roadway or structures, but all such property is fully maintained and when retired or replaced is written out of capital account.

With respect to equipment, charges are made monthly to operating expenses and corresponding amounts credited to "Accrued depreciation equipment," at a general rate of 2¼% per annum on the original cost of the equipment.

Agreements

The Western Pacific Railroad Company agrees with the New York Stock Exchange as follows:

Not to dispose of an integral assets or its stock interest in any constituent, subsidiary, owned or controlled company, or allow any of said constituent, subsidiary, owned or controlled companies to dispose of an integral asset or stock interest in other companies unless for retirement and cancellation, without notice to the Stock Exchange.

To publish statement of earnings monthly and annually.

To publish once in each year and submit to the stockholders, at least fifteen days in advance of the annual meeting of the Corporation, a statement of its financial condition, a consolidated income account covering the previous fiscal year; and a consolidated balance sheet showing assets and liabilities at the end of the year; or an income account

(Testimony of M. J. Curry.)

and balance sheet of the parent company and all constituent, subsidiary, owner or controlled companies, subject to I. C. C. regulations.

To maintain, in accordance with the rules of the Stock Exchange, a transfer office or agency in the Borough of Manhattan, City of New York, where all listed securities shall be directly transferable, and the principal of all listed securities with interest or dividends thereon shall be payable; also a registry office in the Borough of Manhattan, City of New York, other than its transfer office or agency in said city, where all listed securities shall be registered.

To notify the Stock Exchange thirty days in advance of the effective date of any change in the authorized amounts of listed securities.

Not to make any change in listed securities or of a trustee of its bonds or other securities, without the approval of the Committee on Stock List, and not to select as a trustee an officer or director of the Company.

To notify the Stock Exchange in the event of the issuance or creation in any form or manner of any rights to subscribe to, or to be allotted, its securities, or of any other rights or benefits pertaining to ownership in its listed securities, so as to afford the holders of its listed securities a proper period within which to record their interests, and that all such rights to subscribe or to receive allotments and all other such rights and benefits shall be transferable; and shall be transferable, payable and deliv-

(Testimony of M. J. Curry.)

erable in the Borough of Manhattan, City of New York.

To notify the Stock Exchange of the issuance of additional amounts of listed securities, and make immediate application for the listing thereof.

To publish promptly to holders of listed bonds and stocks any action in respect to interest on bonds, dividends on shares, or allotment of rights for subscription to securities, notices thereof to be sent to the Stock Exchange, and to give to the Stock Exchange at least ten days' notice in advance of the closing of the transfer books or extensions, or the taking of a record of holders for any purpose.

To redeem Preferred Stock in accordance with the requirements.

To notify the Stock Exchange if deposited collateral is changed or removed.

To have on hand at all times a sufficient supply of bonds to meet the demands for transfer.

General

The fiscal year of the Railroad Company ends on the 31st day of December.

The principal office of the Company is in the Mills Building, San Francisco, California.

The annual meeting of stockholders is held on the last Wednesday in March at the principal office of the Railroad Company in San Francisco, California.

The names and addresses of the Directors, whose terms expire March 30, 1927, are: Arthur Curtiss

(Testimony of M. J. Curry.)

James, Thomas M. Schumacher, Alvin W. Krech and Winthrop W. Aldrich, of New York, N. Y.; C. M. Levey, William Fries, J. G. Hooper, Campbell McGregor, R. R. Pardow, Wellington T. Smith, F. M. Angellotti and A. R. Baldwin, of San Francisco, California; John L. Nagle, of Sacramento, California; Thomas F. Baxter, of Stockton, California; Andrew M. Hunt, of San Francisco, California; Hale Holden and James E. Gorman, of Chicago, Illinois; L. W. Baldwin, of St. Louis, Missouri; and C. M. Nibley, of Salt Lake City, Utah.

The places for the payment of the principal are at the office of The Equitable Trust Company of

(Testimony of M. J. Curry:)

New York, or of the Crocker First Federal Trust Company of San Francisco, California.

THE WESTERN PACIFIC
RAILROAD COMPANY,
By S. C. MATTHEWS,
Assistant Secretary.

This Committee recommends that the above-mentioned $2,600,000 First Mortgage Five per Cent. Gold Bonds, Series A, due March 1, 1946, Nos. M27327 to M29926, inclusive, for $1,000 each (and registered bonds issued in exchange for coupon bonds) be added to the list, on official notice of issuance and distribution for sale to the public, in accordance with the terms of this application, making the total amounts authorized to be listed

$30,780,000 Series A Bonds, and
3,000,000 Series B Bonds.

ROBERT GIBSON,
Chairman.

Adopted by the Governing Committee, October 15, 1926.

E. V. D. COX,
Secretary.

[Endorsed]: United States District Court. No. 26591 Western Pac. R. R. Co. vs. Irving Trust Co. Exhibit No. 7 Filed 1/22/1940. Walter B. Maling, Clerk

---

Mr. McCollum: I should like to offer the statement of October 31, 1927 as Irving Trust Company Exhibit 8.

(The document was marked "Irving Trust Company's Exhibit 8.")

(Testimony of M. J. Curry.)

New York, October 31, 1927.

Referring to its previous applications, especially to A-7277, dated September 30, 1926, The Western Pacific Railroad Company (hereinafter called the "Railroad Company") hereby makes application for the listing on the New York Stock Exchange of $2,950,000 additional (of a total authorized issue of $50,000,000) of its First Mortgage Five per Cent. Gold Bonds, Series A, due March 1, 1946, consisting of Nos. M. 29942 to M-32877, both inclusive, for $1,000 each, of Nos. D-1074 to D-1103, both inclusive, for $500 each, and of Nos. C-5375 to C-5394, both inclusive for $100 each (and such fully registered bonds as may be issued in exchange for coupon bonds), on official notice of issuance and distribution for sale to the public, making the total amount of Series A Bonds issued and applied for $33,730,000. The $3,000,000 Series B Bonds issued and listed have all been surrendered to the Trustees under the mortgage for cancellation or redeemed, all as of September 1, 1927. (See Infra).

Authority

The issuance of said $2,950,000 Series A Bonds of the Railroad Company, covered by this application, was authorized by resolutions of the Board of Directors of the Railroad Company adopted March 2, 1927, and their authentication was authorized by a further resolution adopted by the Board of Directors on May 10, 1927. No action by the

(Testimony of M. J. Curry.)

stockholders of the Railroad Company is required by the provisions of the First Mortgage of the Railroad Company, dated June 26, 1916, hereinafter mentioned, or by any laws or regulations applicable to the issuance and sale of any bonds secured by said First Mortgage. The issuance and sale and/or exchange of said $2,950,000 Series A Bonds at not less than ninety-nine and one-half per cent. of their face amount and accrued interest and for the purposes hereinafter stated were approved by orders of the Interstate Commerce Commission, dated March 29, 1927 and September 2, 1927, in Finance Docket No. 6183. No further authority is required.

All of said outstanding Series B Six per Cent. Bonds were duly called for redemption as of September 1, 1927. Under the authorization therefor given by the aforesaid resolutions of the Board of Directors of Railroad Company and the aforesaid orders of the Interstate Commerce Commission, holders of $271,500 face amount of said Series B Bonds elected to receive in lieu of the redemption price of such bonds, Series A Five per Cent. Bonds of said new $2,950,000 issue of the same face amount ($271,500) together with a cash premium of three per cent. and accordingly $271,500 face amount of said Series A Bonds were, on September 1, 1927, delivered to effectuate said exchange, and the said $271,500 face amount of said Series B Six per Cent. Bonds received in exchange therefor were thereupon delivered by Railroad Company to the Trustees

(Testimony of M. J. Curry.)

under its First Mortgage of June 26, 1916, for cancellation, and were cancelled.

Purpose of Issue

The purpose of the issue of said bonds was to provide for the substitution of the same for all of the Series B Six per Cent. Bonds of the Railroad Company outstanding, the same then being of the aggregate face amount of $2,950,000.

Description

The First Mortgage Bonds are secured by the Railroad Company's First Mortgage, dated June 26, 1916, to First Federal Trust Company (now Crocker First Federal Trust Company) of San Francisco, California, and Henry E. Cooper (37 Wall Street, New York City), Trustees. The Bonds covered by this application are an additional issue of Series A Bonds of $2,950,000 principal amount, all bearing interest at the rate of five per cent. per annum, dated June 26, 1916, and maturing March 1, 1946.

The principal of the bonds is payable at the office or agency of the Railroad Company in the Borough of Manhattan, City of New York, N. Y., and the interest thereon is payable at its said office or agency, or at the option of the holder at its office or agency in the City and County of San Francisco, semi-annually, on March 1st and September 1st. Both principal of and interest upon each bond are payable in gold coin of the United States of Ameri-

(Testimony of M. J. Curry.)

ca of or equal to the standard of weight and fineness as it existed June 26, 1916, without deduction for any tax, assessment or other governmental charge (except the Federal Income Tax imposed by the Act of Congress approved October 3, 1913, with respect to income derived from interest paid thereon), which the Railroad Company or the Trustees under the mortgage securing the bonds, or either of them may be required to pay thereon or to retain therefrom under any present or future law or ordinance of the United States of America, or of any State, Territory, Municipality, or other taxing authority therein; and the Railroad Company assumes the payment of all such taxes, assessments and charges with the exception aforesaid.

The Bonds are in coupon form of the denominations of $1,000, and $500 and $100 and are registerable as to principal only. Coupon bonds for $1,000 are interchangeable with registered bonds of the denominations of $1,000, $5,000 and $10,000, or multiples of $10,000. Coupon bonds for $1,000, $500 and $100 are also interchangeable in equal principal amounts. For any such exchange and for any transfer of registered bonds or of coupon bonds registered as to principal, the Company, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge and except in case of coupon bonds registered as to principal an additional amount not exceeding $1 for each new bond issued upon such exchange or transfer.

(Testimony of M. J. Curry.)

Sinking Fund

The Mortgage securing the bonds provides for the creation of a sinking fund, to be especially applied to the purchase or redemption of bonds, and requires the Railroad Company for that purpose to pay, out of any income lawfully applicable thereto, after payment of operating expenses of every description, taxes and interest upon the bonds, the sum of $50,000 on January 1st of each year, commencing with the year 1919. Series A Bonds are redeemable through the sinking fund at par and accrued interest on at least sixty days' previous published notice, as described under redemption. All bonds purchased or redeemed by the sinking fund are to be cancelled and delivered to the Railroad Company. These provisions have been fully complied with.

Redemption

The Railroad Company may redeem all or any part of said Series A Bonds on any semi-annual interest payment date, at par and accrued interest, on notice published once in each calendar week for eight successive weeks in two newspapers of general circulation published in the Borough of Manhattan, New York, N. Y., and one newspaper of general circulation published in San Francisco, California, one such publication to be not less than sixty nor more than ninety days before the date of redemption. The Company may elect to redeem the bonds of one or more series. Serial numbers of

(Testimony of M. J. Curry.)

bonds drawn by lot for redemption are required to be stated in publications of notice of redemption.

All bonds redeemed are to be cancelled or indelibly stamped with a statement that they have been redeemed. In the case, howver, of bonds hereafter refunded with, or exchanged for, or the payment, redemption or retirement otherwise whereof shall be provided for by means of, refunding bonds or other obligations of the Railroad Company issued under a mortgage or other instrument providing that bonds redeemed pursuant to the provisions of the First Mortgage, notwithstanding that they shall have been cancelled or marked "Cancelled," shall be deposited with the Trustees under such new mortgage or other instrument, as security for such refunding bonds or other obligations, the bonds so redeemed and deposited shall be deemed to remain alive and unextinguished in the hands of the Trustees under such new mortgage or other instrument for the security of such refunding bonds or other obligations, to the extent specified in section 2 of Article Third of the Mortgage.

Default

The Mortgage provides that in case of default in the payment of interest continuing for the period of three months or default in the payment of principal, or in the observance or performance of any covenants, conditions or agreements on the part of the Railroad Company in the bonds or in

(Testimony of M. J. Curry.)

the Mortgage contained continuing for the period of three months after written notice from the Trustees, or in case an order be made for the appointment of a Receiver, the Trustee may, and upon the written request of the holders of twenty-five per cent. in amount of the bonds then outstanding shall, by notice in writing, declare the principal of all of the outstanding bonds to be due and payable immediately. The mortgage provides that the holders of a majority in amount of the bonds then outstanding may waive any default that shall have happened and its consequences upon the remedying of such default. It gives the holders of a majority in amount of bonds outstanding the right to direct and to control the action of the Trustees, and the exercise of the remedies provided by the Mortgage.

Additional Bonds

The mortgage provides, subject to the limitation that the aggregate amount of bonds outstanding shall not exceed fifty million dollars, for the issuance of additional bonds to pay, or reimburse the Railroad Company for, the cost of the construction or purchase of extensions to or additional lines of railroad and for the betterment, improvement and equipment of the railroads and other property owned by the Railroad Company or its subsidiary companies and subject to the lien of the mortgage, or securities representing the same, at the rate of one thousand dollars principal amount of bonds for

(Testimony of M. J. Curry.)

each one thousand dollars of authorized expenditures for the purposes aforesaid, or liabilities incurred therefor. The mortgage also provides for the issuance of bonds sold for cash, against the deposit of the net cash proceeds with the Mortgage Trustees, subject to being withdrawn by the Railroad Company for the purposes above stated to the extent of the net proceeds of each one thousand dollars principal amount of bonds so sold for each one thousand dollars principal amount of bonds which might have been authenticated against such expenditures or liabilities.

The mortgage also provides that bonds of any series outstanding may be replaced by bonds of another series to a like aggregate principal amount, either upon surrender of the outstanding series for cancellation or upon redemption thereof. The mortgage further provides for the issuance of new bonds to replace bonds mutilated, lost or destroyed upon proper proof and satisfactory indemnity.

Changes in Capitalization

Since June 30, 1926 (the date as of which the consolidated balance sheet contained in said previous application A-7277 was made) there has been no change in the amount of Capital Stock or funded debt of the Railroad Company authorized and outstanding except

First: The issuance of the $2,600,000 of Series A 5% Bonds covered by said application A-7277, and

(Testimony of M. J. Curry.)

Second: The purchase of $50,100 face amount of the Series "A" 5% Bonds, for the sinking fund (making the total amount so purchased $505,700); and

Third: The retirement by surrender and cancellation, and by redemption as aforesaid of $2,950,000 face amount of Series B Six per Cent. Bonds on September 1, 1927, being all of the Series "B" Six per Cent. Bonds outstanding on said date; and

Fourth: The retirement of $375,000 (face amount) of its 5½% Equipment Trust Certificates, Series "B" and $207,000 (face amount) of its 5½% Equipment Trust Certificates Series "C."

Properties

The properties of the Railroad Company are described in the original application for listing of Series "A" Bonds, No. A-4747, dated March 13, 1917, and in the subsequent applications Nos. A-5478, dated June 30, 1921; A-5667, dated May 10, 1922; A-6800, dated July 16, 1925, and A-7277, dated September 30, 1926.

Since June 30, 1926, the following important changes in mileage have occurred:

Completion of 9.53 miles additional main line yard, industry and side tracks, the operation of which commenced on various dates between July 1, 1926 and June 30, 1927.

(Testimony of M. J. Curry.)

Completion of .57 miles additional branch line side and spur tracks, the operation of which commenced on various dates between July 1, 1926 and June 30, 1927.

Acquisition of joint interest with other carriers in .04 miles of yard tracks, operation of which commenced on various dates between July 1, 1926 and June 30, 1927.

Since June 30, 1926, the Railroad Company has made the following net additions to equipment:

Freight train cars:		
Stock		1
Refrigerator		4
Other freight train		100
Caboose		8
Construction and maintenance equipment:		
Officer's car		1
Dump cars		30
Outfit cars		4
Spreader car		1
Total		149
Less cars destroyed and converted:		
Automobile	3	
Box	15	
Flat	5	
Stock	8	
Coal	1	
Refrigerator	6	
Caboose	1	
Construction and maintenance equipment		
Outfit car	1	
Total		35
Total units added June 30, 1926, to June 30, 1927		114

(Testimony of M. J. Curry.)

Lien

Reference is made to the previous listing applications, Nos. A-4747, A-5478, A-5667, A-6800 and A-7277, for a description of the property subject to the lien of the Mortgage prior to July 1, 1926. The property on which the Mortgage constitutes a first lien includes the following:

	Miles
Mileage:	
Main line mileage, San Francisco to Salt Lake City	926.41
Branch lines, main track	115.98
Second main track	3.12
Yard tracks and sidings, etc.	283.33
Total track miles	1,328.84
Equipment:	
Locomotives	144
Passenger cars	9
Freight cars	5,962
Service cars	371
Floating equipment	5
Total	6,491

The foregoing equipment does not include additional unmortgaged equipment covered by Equipment Trust Agreements, Series B and Series C, as follows:

Locomotives	16
Passenger cars	48
Freight cars	3,264
Service cars	1

Securities:

1,000 shares Capital Stock (50% of outstanding) of The Salt Lake City Union Depot and Railroad Company, operating the passenger terminal at Salt Lake City, leased to the Railroad Company and the Denver and Rio Grande Western Railroad Company.

(Testimony of M. J. Curry.)

4,500 shares of the Capital Stock (entire issue) of the Deep Creek Railroad Company, operating a line of railroad in Western Utah, 46 miles.

4,005 shares of the Capital Stock (entire issue) of Standard Realty and Development Company, organized to acquire and hold real estate in connection with the construction of the Railroad Company.

10,000 shares of the Capital Stock (entire issue) of Sacramento Northern Railway, operating 165.65 miles of main line of railroad in California.

$5,196,204.46 par value First Mortgage 5% Twenty-Year Gold Bonds and Bond Participation Certificates of Sacramento Northern Railroad.

Deposited cash in the hands of Mortgage Trustees, as of June 30, 1927	$438,652.70

The First Mortgage contains a provision subjecting to its lien after acquired property purchased with bonds or their proceeds and property directly appurtenant to or forming an integral part of the mortgaged railroad, or securities representing the same, also additional securities of subsidiary companies as defined in the Mortgage, but the First Mortgage permits the Railroad Company to acquire with free funds, free from the lien of the Mortgage, additional lines of railroad, branches and extension, equipment and securities.

From July 1, 1926 to June 30, 1927, inclusive, the Railroad Company has expended for road and equipment (including the above described additional equipment) the following amounts:

Road and structures and general expenses	$966,922.84
Equipment	503,175.05
Total	$1,470,097.89

(Testimony of M. J. Curry.)

Dividends

All of the authorized Capital Stock, consisting of $47,500,000 par value of Common Stock and $27,500,000 par value of Preferred Stock, is issued and outstanding, and all of such stock except Directors' qualifying shares of Common Stock is held by The Western Pacific Railroad Corporation, a Delaware corporation.

The following dividends have been paid on the Preferred and Common Stocks since 1922:

DIVIDENDS—PREFERRED STOCK

Year	Rate	Amount paid
1923	6%	$1,650,000
1924	6%	1,650,000
1925	7.558%	2,078,450
1926	6%	1,650,000
1927 (to June 30)	1½%	412,500

DIVIDENDS—COMMON STOCK

Year	Rate	Amount paid
1925	5%	$2,374,970

Prior to 1925, Railroad Company paid no dividends on its Common Stock.

Financial Statements

There follow statements:

(1) The Western Pacific Railroad Company and subsidiary companies Consolidated Income Account for year ending December 31, 1926 and six months ended June 30, 1927;

(Testimony of M. J. Curry.)

Policy as to Depreciation

No specific amount is set aside either monthly or annually on account of depreciation of roadway or structures, but all such property is fully maintained and when retired or replaced is written off out of capital account.

With respect to equipment, charges are made monthly to operating expenses and corresponding

(Testimony of M. J. Curry.)

amounts credited to "Accrued depreciation equipment," at a general rate of 3% per annum on the original cost of the equipment.

Agreements

The Western Pacific Railroad Company agrees with the New York Stock Exchange as follows:

Not to dispose of an integral asset or its stock interest in any constituent, subsidiary, owned or controlled company, or allow any of said constituent, subsidiary, owned or controlled companies to dispose of an integral asset or stock interest in other companies unless for retirement and cancellation, without notice to the Stock Exchange.

To publish statement of earnings monthly.

To publish once in each year and submit to the stockholders, at least fifteen days in advance of the annual meeting of the Corporation, a statement of its financial condition; a consolidated income account covering the previous fiscal year; and a consolidated balance sheet showing assets and liabilities at the end of the year; or an income account and balance sheet of the parent company and all constituent, subsidiary, owned or controlled companies, subject to I. C. C. regulations.

To maintain, in accordance with the rules of the Stock Exchange, a transfer office or agency in the Borough of Manhattan, City of New York, where all listed securities shall be directly transferable, and the principal of all listed securities with inter-

(Testimony of M. J. Curry.)

est or dividends thereon shall be payable; also a registry office in the Borough of Manhattan, City of New York, other than its transfer office or agency in said city, where all listed securities shall be registered.

To notify the Stock Exchange thirty days in advance of the effective date of any change in the authorized amounts of listed securities.

Not to make any change in listed securities or of a trustee of its bonds or other securities, without the approval of the Committee on Stock List, and not to select as a trustee an officer or director of the Company.

To notify the Stock Exchange in the event of the issuance or creation in any form or manner of any rights to subscribe to, or to be allotted, its securities, or of any other rights or benefits pertaining to ownership in its listed securities, so as to afford the holders of its listed securities a proper period within which to record their interests, and that all such rights to subscribe or to receive allotments and all other such rights and benefits shall be transferable; and shall be transferable, payable and deliverable in the Borough of Manhattan, City of New York.

To notify the Stock Exchange of the issuance of additional amounts of listed securities, and make immediate application for the listing thereof.

To publish promptly to holders of listed bonds and stocks any action in respect to interest on bonds, dividends on shares, or allotment of rights

(Testimony of M. J. Curry.)

for subscription to securities, notices thereof to be sent to the Stock Exchange, and to give to the Stock Exchange at least ten days' notice in advance of the closing of the transfer books or extensions, or the taking of a record of holders for any purpose.

To redeem Preferred Stock in accordance with the requirements.

To notify the Stock Exchange if deposited collateral is changed or removed.

To have on hand at all times a sufficient supply of bonds to meet the demands for transfer.

General

The fiscal year of the Railroad Company ends on the 31st day of December.

The principal office of the Company is in the Mills Building, San Francisco, California.

The annual meeting of stockholders is held on the last Wednesday in March at the principal office of the Railroad Company in San Francisco, California.

The names and addresses of the Directors, whose terms expire March 28, 1928 are: Arthur Curtiss James, Thomas M. Schumacher, Alvin W. Krech and Winthrop W. Aldrich, of New York, N. Y.; C. M. Levey, William Fries, J. G. Hooper, Campbell MeGregor, Wellington T. Smith, W. L. Hughson, H. M. Adams, A. R. Baldwin and F. M. Angellotti, of San Francisco, California; John L. Nagle, of Sacramento, California; Charles Elsey of Oakland, California; Hale Holden and James

(Testimony of M. J. Curry.)

E. Gorman, of Chicago, Illinois; L. W. Baldwin, of St. Louis, Missouri; and C. M. Nibley, of Salt Lake City, Utah.

The Executive Committee is: Arthur Curtiss James, A. W. Krech, Winthrop W. Aldrich and Thomas M. Schumacher, Chairman, and H. M. Adams President ex-officio.

(Testimony of M. J. Curry.)

New York, N. Y., May 16, 1929.

Referring to its previous applications, especially to A-7722, dated October 31, 1927, The Western Pacific Railroad Company (hereinafter called the "Railroad Company") hereby makes application for the listing on the New York Exchange of $5,000,000 additional (of a total authorized issue of $50,000,000) of its First Mortgage Five per Cent. Gold Bonds, Series A, due March 1, 1946, consisting of Nos. M-32966 to M-37965 both inclusive, for $1,000 each (and such fully registered bonds as may be issued in exchange for coupon bonds), on official notice of issuance and distribution for sale to the public, making the total amount of Series A Bonds issued and applied for $38,730,000.

Authority

The issuance of said $5,000,000 Series A Bonds of the Railroad Company, covered by this application, was authorized by resolutions of the Board of Directors of the Railroad Company adopted May 21, 1928, and their authentication was authorized by a resolution adopted by the Executive Committee on April 26, 1929. No action by the stockholders of the Railroad Company is required by the provisions of the First Mortgage of the Railroad Company, dated June 26, 1916, hereinafter mentioned, or by any laws or regulations applicable to the issuance and sale of any bonds secured by said First Mortgage. The issuance and sale of said $5,000,000 Series

(Testimony of M. J. Curry.)

A Bonds at not less than 97½% of their face amount and accrued interest and for the purposes hereinafter stated was approved by order of the Interstate Commerce Commission, dated December 21, 1928, in Finance Docket No. 7055. No further authority is required. The Railroad Company has sold and delivered said bonds on April 26, 1929, for cash at the price of 97½% of their face amount, together with accrued interest thereon, and the proceeds have been applied to the purposes for which the bonds were issued.

Purpose of Issue

The purpose of the issue of said bonds was to provide proceeds to be applied to the reimbursement of the Railroad Company for expenditures and for the cost of certain proposed construction, completion, extension and improvement of facilities and for the acquisition of equipment; all of such expenditures made or proposed to be made having been of a character with respect to which bonds may be issued and the proceeds of bonds paid out under the terms of Section 2 of Article Second of said First Mortgage, and having been set forth in detail in the application of the Railroad Company to the Interstate Commerce Commission upon which the above-mentioned order of December 31, 1928, was based.

Description

The First Mortgage Bonds are secured by the Railroad Company's First Mortgage, dated June

(Testimony of M. J. Curry.)

26, 1916, to First Federal Trust Company (now Crocker First Federal Trust Company of San Francisco, California), and Henry E. Cooper (37 Wall Street, New York City), Trustees. The bonds covered by this application are an additional issue of Series A Bonds of $5,000,000 principal amount, all bearing interest at the rate of five per cent. per annum, dated June 26, 1916, and maturing March 1, 1946.

The principal of the bonds is payable at the office or agency of the Railroad Company in the Borough of Manhattan, City of New York, N. Y., and the interest thereon is payable at its said office or agency, or at the option of the holder at its office or agency in the City and County of San Francisco, semi-annually, on March 1st and September 1st. Both principal of and interest upon each bond are payable in gold coin of the United States of America of or equal to the standard of weight and fineness as it existed June 26, 1916, without deduction for any tax, assessment or other governmental charge (except the Federal Income Tax imposed by the Act of Congress approved October 3, 1913, with respect to income derived from interest paid thereon), which the Railroad Company or the Trustees under the mortgage securing the bonds, or either of them may be required to pay thereon or to retain therefrom under any present or future law or ordinance of the United States of America, or of any State, territory, municipality, or other

(Testimony of M. J. Curry.)

taxing authority therein; and the Railroad Company assumes the payment of all such taxes, assessments and charges with the exception aforesaid.

The bonds are in coupon form of the denominations of $1,000, and $500 and $100 and are registerable as to principal only. Coupon bonds for $1,000 are interchangeable with registered bonds of the denominations of $1,000, $5,000 and $10,000, or multiples of $10,000. Coupon bonds for $1,000, $500 and $100 are also interchangeable in equal principal amounts. For any such exchange and for any transfer of registered bonds or of coupon bonds registered as to principal, the Company, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge and except in case of coupon bonds registered as to principal an additional amount not exceeding $1 for each new bond issued upon such exchange or transfer.

Sinking Fund

The Mortgage securing the bonds provides for the creation of a sinking fund, to be especially applied to the purchase or redemption of bonds, and requires the Railroad Company for that purpose to pay, out of any income lawfully applicable thereto, after payment of operating expenses of every description, taxes and interest upon the bonds, the sum of $50,000 on January 1st of each year, commencing with the year 1919. Series A bonds are redeemable through the sinking fund at par and

(Testimony of M. J. Curry.)

accrued interest on at least sixty days' previous published notice, as described under redemption. All bonds purchased or redeemed by the sinking fund are to be cancelled and delivered to the Railroad Company. These provisions have been fully complied with.

Redemption

The Railroad Company may redeem all or any part of said Series A Bonds on any semi-annual interest payment date, at par and accrued interest, on notice published once in each calendar week for eight successive weeks, in two newspapers of general circulation published in the Borough of Manhattan, New York, N. Y., and one newspaper of general circulation published in San Francisco, Cal., one such publication to be not less than sixty nor more than ninety days before the date of redemption. The Company may elect to redeem the bonds of one or more series. Serial numbers of bonds drawn by lot for redemption are required to be stated in publications of notice of redemption.

All bonds redeemed are to be cancelled or indelibly stamped with a statement that they have been redeemed. In the case, however, of bonds hereafter refunded with, or exchanged for, or the payment, redemption or retirement otherwise whereof shall be provided for by means of, refunding bonds or other obligations of the Railroad Company issued under a mortgage or other instrument providing that bonds redeemed pursuant to the provisions of the First Mortgage, notwithstanding that they shall

(Testimony of M. J. Curry.)

have been cancelled or marked "Cancelled," shall be deposited with the Trustees under such new mortgage or other instrument, as security for such refunding bonds or other obligations, the bonds so redeemed and deposited shall be deemed to remain alive and unextinguished in the hands of the Trustees under such new mortgage or other instrument for the security of such refunding bonds or other obligations, to the extent specified in Section 2 of Article Third of the Mortgage.

Default

The Mortgage provides that in case of default in the payment of interest continuing for the period of three months or default in the payment of principal, or in the observance or performance of any covenants, conditions or agreements on the part of the Railroad Company in the bonds or in the Mortgage contained continuing for the period of three months after written notice from the Trustees, or in case an order be made for the appointment of a Receiver, the Trustees may, and upon the written request of the holders of twenty-five per cent. in amount of the bonds then outstanding shall, by notice in writing, declare the principal of all of the outstanding bonds to be due and payable immediately. The mortgage provides that the holders of a majority in amount of the bonds then outstanding may waive any default that shall have happened and its consequences upon the remedying of such default. It gives the holders of a ma-

(Testimony of M. J. Curry.)

jority in amount of bonds outstanding the right to direct and to control the action of the Trustees, and the exercise of the remedies provided by the mortgage.

Additional Bonds

The mortgage provides, subject to the limitation that the aggregate amount of bonds outstanding shall not exceed fifty million dollars, for the issuance of additional bonds to pay, or reimburse the Railroad Company for, the cost of the construction or purchase of extensions to or additional lines of railroad and for the betterment, improvement and equipment of the railroads and other property owned by the Railroad Company or its subsidiary companies and subject to the lien of the mortgage, or securities representing the same, at the rate of $1,000 principal amount of bonds for each $1,000 of authorized expenditures for the purposes aforesaid, or liabilities incurred therefor. The mortgage also provides for the issuance of bonds sold for cash, against the deposit of the net cash proceeds with the Mortgage Trustees, subject to being withdrawn by the Railroad Company for the purposes above stated to the extent of the net proceeds of each $1,000 principal amount of bonds so sold for each $1,000 principal amount of bonds which might have been authenticated against such expenditures or liabilities.

The mortgage also provides that bonds of any series outstanding may be replaced by bonds of another series to a like aggregate principal amount,

(Testimony of M. J. Curry.)

either upon surrender of the outstanding series for cancellation or upon redemption thereof. The mortgage further provides for the issuance of new bonds to replace bonds mutilated, lost or destroyed, upon proper proof and satisfactory indemnity.

Changes in Capitalization

Since June 30, 1927 (the date as of which the consolidated balance sheet contained in said previous application A-7722 was made) there has been no change in the amount of Capital Stock or funded debt of the Railroad Company authorized and outstanding, except,

First: The issuance of the $2,950,000 of Series A 5% Bonds covered by said application A-7722, and

Second: The purchase of $100,000 face amount of the Series "A" 5% Bonds, for the sinking fund (making the total amount so purchased $605,700); and

Third: The retirement of $750,000 (face amount) of its 5½% Equipment Trust Certificates, Series "B," and $414,000 (face amount) of its 5½% Equipment Trust Certificates Series "C;" and

Fourth: The increase in authorized capital stock stated in the Railroad Company's Articles of Incorporation from $75,000,000, divided into 275,000 shares of preferred stock and 475,000 shares of common stock, to $100,000,000 divided into 400,000 shares of preferred stock

(Testimony of M. J. Curry.)

and 600,000 shares of common stock, all of the par value of $100 each, by proceedings duly had in accordance with the laws of California on November 15, 1927. None of said authorized increase of $25,000,000 capital stock has been issued, and none thereof is as yet outstanding. Under date of November 21, 1928, Finance Docket 7183, 8,000 additional shares of the preferred stock were authorized to be issued by the Interstate Commerce Commission, but such authorization has not as yet been exercised. By the same order the Interstate Commerce Commission authorized the issue of $572,800 additional of Railroad Company's First Mortgage 5% Bonds, but such authorization has not as yet been exercised; and

Fifth: The issuance of the $5,000,000 of Series A 5% Bonds, listing of which is herein applied for.

Properties

The properties of the Railroad Company are described in the original application for listing of Series "A" Bonds, No. A-4747, dated March 13, 1917, and in the subsequent applications Nos. A-5478, dated June 30, 1921; A-5667, dated May 10, 1922; A-6800, dated July 16, 1925; A-7277, dated September 30, 1926, and A-7722, dated October 31, 1927.

Since June 30, 1927, the following important changes in mileage have occurred:

(Testimony of M. J. Curry.)

Completion of Terminus Branch, 7.92 miles, operation commenced January 4, 1928.

Completion of Connecting Track with Oregon Short Line R. R. at Wells, Nev., 1.18 miles, operation commenced December 7, 1928.

Completion of 20.21 miles additional main line yard, industry and side tracks the operation of which commenced on various dates between July 1, 1927 and December 31, 1928.

Completion of 4.07 miles additional branch line side and spur tracks, the operation of which commenced on various dates between July 1, 1927 and December 31, 1928.

Acquisition of joint interest with other carriers in .64 miles of yard tracks, operation of which commenced on various dates between July 1, 1927 and December 31, 1928.

Abandonment of .39 miles Second Main Track at Williams Loop M. P. 294.14, California, August 29, 1927.

'Since June 30, 1927, the Railroad Company has made the following changes in equipment:

Lien

Reference is made to the previous listing applications, Nos. A-4747, A-5478, A-5667, A-6800, A-7277 and A-7722 for a description of the property subject to the lien of the Mortgage prior to July 1, 1927. The property on which the Mortgage constitutes a first lien includes the following:

	Miles
Mileage:	
Main line mileage, San Francisco to Salt Lake City	926.41
Branch lines, main track	125.08
Second main track	2.73
Yard tracks and sidings, etc.	307.61
Total track miles	1,361.83
Equipment:	
Locomotives	148
Passenger cars	13
Freight cars	5,894
Service cars	391
Floating equipment	6
Total	6,452

The foregoing equipment does not include additional unmortgaged equipment covered by Equipment Trust Agreements, Series B and Series C, as follows:

Locomotives	16
Passenger cars	48
Freight cars	3,251
Service cars	1

Securities:

1,000 shares Capital Stock (50% of outstanding) of The Salt Lake City Union Depot and Railroad

(Testimony of M. J. Curry.)

Company, operating the passenger terminal at Salt Lake City, leased to the Railroad Company and the Denver and Rio Grande Western Railroad Company

4,500 shares of the Capital Stock (entire issue) of the Deep Creek Railroad Company, operating a line of railroad in Western Utah, 46 miles

4,005 shares of the Capital Stock (entire issue) of Standard Realty and Development Company, organized to acquire and hold real estate in connection with the construction of the Railroad Company

10,000 shares of the Capital Stock (entire issue) of Sacramento Northern Railway, operating 251.27 miles of main line of railroad in California

$5,213,475.35 par value First Mortgage 5% Twenty-Year Gold Bonds and Bond Participation Certificates of Sacramento Northern Railroad

Deposited cash in the hands of Mortgage Trustees, as of December 31, 1928—$51,465.58.

The First Mortgage contains a provision subjecting to its lien after acquired property purchased with bonds or their proceeds and property directly appurtenant to or forming an integral part of the mortgaged railroad, or securities representing the same, also additional securities of subsidiary companies as defined in the Mortgage, but the First Mortgage permits the Railroad Company to acquire with free funds, free from the lien of the Mortgage, additional lines of railroad, branches and extension, equipment and securities.

From July 1, 1927 to December 31, 1928, inclusive, the Railroad Company has expended for road

(Testimony of M. J. Curry.)

and equipment (including the above described equipment) the following amounts:

Road and structures and general expenses	$3,695,108.56
Equipment	574,320.36

Policy as to Depreciation

No specific amount is set aside either monthly or annually on account of depreciation of roadway or structures, but all such property is fully maintained and when retired or replaced is written off out of capital account.

(Testimony of M. J. Curry.)

With respect to equipment, charges are made monthly to operating expenses and corresponding amounts credited to "Accrued depreciation equipment," at a general rate of 3% per annum on the original cost of the equipment.

Agreements

The Western Pacific Railroad Company agrees with the New York Stock Exchange as follows:

Not to dispose of an integral asset or its stock interest in any constituent, subsidiary, owned or controlled company, or allow any of said constituent, subsidiary, owned or controlled companies to dispose of an integral asset or stock interest in other companies unless for retirement and cancellation, without notice to the Stock Exchange.

To publish statement of earnings monthly.

To publish once in each year and submit to the stockholders, at least fifteen days in advance of the annual meeting of the Corporation, a statement of its financial condition, a consolidated income account covering the previous fiscal year; and a consolidated balance sheet showing assets and liabilities at the end of the year; or an income account and balance sheet of the parent company and all constituent, subsidiary, owned or controlled companies, subject to I. C. C. regulations.

To maintain, in accordance with the rules of the Stock Exchange, a transfer office or agency in the Borough of Manhattan, City of New York, where all listed securities shall be directly transferable,

and the principal of all listed securities with interest or dividends thereon shall be payable; also a registry office in the Borough of Manhattan, City of New York, other than its transfer office or agency in said city, where all listed securities shall be registered.

To notify the Stock Exchange thirty days in advance of the effective date of any change in the authorized amounts of listed securities.

Not to make any change in listed securities or of a trustee of its bonds or other securities, without the approval of the Committee on Stock List, and not to select as a trustee an officer or director of the Company.

To notify the Stock Exchange in the event of the issuance or creation in any form or manner of any rights to subscribe to, or to be allotted its securities, or of any other rights or benefits pertaining to ownership in its listed securities, so as to afford the holders of its listed securities a proper period within which to record their interests, and that all such rights to subscribe or to receive allotments and all other such rights and benefits shall be transferable; and shall be transferable, payable and deliverable in the Borough of Manhattan, City of New York.

To notify the Stock Exchange of the issuance of additional amounts of listed securities, and make immediate application for the listing thereof.

To publish promptly to holders of listed bonds and stocks any action in respect to interest on bonds, dividends on shares, or allotment of rights for sub-

(Testimony of M. J. Curry.)

scription to securities, notices thereof to be sent to the Stock Exchange, and to give to the Stock Exchange at least ten days' notice in advance of the closing of the transfer books or extensions, or the taking of a record of holders for any purpose.

To redeem Preferred Stock in accordance with the requirements.

To notify the Stock Exchange if deposited collateral is changed or removed.

To have on hand at all times a sufficient supply of bonds to meet the demands for transfer.

General

The fiscal year of the Railroad Company ends on the 31st day of December.

The principal office of the Company is in the Mills Building, San Francisco, Cal.

The annual meeting of stockholders is held on the last Wednesday in March at the principal office of the Railroad Company in San Francisco, Cal.

The names and addresses of the Directors, whose terms expire March 26, 1930, are: Arthur Curtiss James, Thomas M. Schumacher, Arthur W. Loasby and Winthrop W. Aldrich, of New York, N. Y.; Frank E. Sullivan, William Fries, J. G. Hooper, Scott F. Ennis, Wellington T. Smith, W. L. Hughson, H. M. Adams, A. R. Baldwin and F. M. Angellotti, of San Francisco, Cal.; John L. Nagle, of Sacramento, Cal.; Charles Elsey, of Oakland, Cal.; Frederic E. Williamson and James E. Gorman, of

(Testimony of M. J. Curry.)

Chicago, Ill.; L. W. Baldwin, of St. Louis, Mo.; and C. W. Nibley, of Salt Lake City, Utah.

The Executive Committee is: Arthur Curtiss James, Arthur W. Loasby, Winthrop W. Aldrich, and Thomas M. Schumacher, Chairman; and H. M. Adams, President ex-officio.

The Officers of the Railroad Company are: Chairman of the Board, Arthur Curtiss James; Chairman of the Executive Committee, Thomas M. Schumacher; President, H. M. Adams; Vice-Presidents, Charles Elsey, E. W. Mason and M. J. Curry; Secretary, W. G. Bruen; Treasurer, E. C. Bates; Assistant Secretary and Assistant Treasurer, M. J. Curry; Assistant Secretary, Thomas J. Byrne.

The bonds may be transferred and registered at The Equitable Trust Company of New York, 37 Wall Street, New York, N. Y.

The Agents for the payment of interest are The Equitable Trust Company of New York, and Crocker First Federal Trust Company of San Francisco, Cal.

The place for the payment of the principal is at the office of The Equitable Trust Company of New York.

THE WESTERN PACIFIC
RAILROAD COMPANY,
By M. J. CURRY,
Vice-President.

This Committee recommends that the above-mentioned $5,000,000 First Mortgage 5% Gold Bonds,

(Testimony of M. J. Curry.)

Series A, due March 1, 1946; included in Nos. M-32966 to M-37965, for $1,000 each, (and registered bonds issued in exchange for coupon bonds) be added to the list on official notice of issuance for sale and distribution, in accordance with the terms of this application, making the total amount authorized to be listed $38,730,000.

ROBERT GIBSON,
Chairman.

Adopted by the Governing Committee, June 12, 1929.

ASHBEL GREEN,
Secretary.

[Endorsed]: United States District Court, No. 26591. Western Pac. R. R. Co., vs. Irving Trust Co. Exhibit No. 9. Filed 1/22/1940. Walter B. Maling, Clerk.

Mr. McCollum: And the statement of July 1, 1930 as Irving Trust Company Exhibit 10.

(The document was marked "Irving Trust Company's Exhibit 10.")

‡Certificates in amount of $207,000 payable December 1st of each year from 1924 to 1938, inclusive.

**Certificates in amount of $73,000 payable November 1st of each year from 1929 to 1943, inclusive.

(Testimony of M. J. Curry.)

New York, July 1st, 1930.

Referring to its previous applications, especially to A-8696, dated May 16, 1929, The Western Pacific Railroad Company (hereinafter called the "Railroad Company") hereby makes application for the listing on the New York Stock Exchange of $572,800 additional (of a total authorized issue of $50,000,000) of its First Mortgage Five per cent Gold Bonds, Series A, due March 1, 1946, consisting of Nos. M-37976 to M-38547 both inclusive, for $1,000 each, of No. D-1104 for $500 and Nos. C-5395 to C-5397, both inclusive, for $100 each (and such fully registered bonds as may be issued in exchange for coupon bonds), on official notice of issuance and distribution for sale to the public, making the total amount of Series A Bonds issued and applied for $39,302,800.

Authority

The issuance of said $572,800, Series A Bonds of the Railroad Company, covered by this application, was authorized by resolutions of the Board of Directors of the Railroad Company adopted Sept. 4, 1928 and their authentication was authorized by a resolution adopted by the Board of Directors on March 31, 1930. The purpose of said issuance (as more fully hereinafter described) was to finance the acquisition by Sacramento Northern Railway, a subsidiary of Railroad Company, of the lines of railroad of San Francisco-Sacramento Railroad Company, the expenditure in such acquisition amount-

(Testimony of M. J. Curry.)

ing to more than $1,000,000, and therefore, pursuant to sub-paragraph seventh of Section 2 of Article Second of the First Mortgage of Railroad Company, dated June 26, 1916, hereinafter mentioned, a majority in amount of such portion of the capital stock of Railroad Company as was present in person or represented by proxy at a meeting of the stockholders of Railroad Company called for such purpose consented to the authentication and delivery of First Mortgage bonds and/or the payment of deposited cash therefrom with respect to the acquisition by Sacramento Northern Railway of said lines of railroad of said San Francisco-Sacramento Railroad Company, such meeting being held on August 6, 1928, at the principal office of the Railroad Company in San Francisco, California; a tally of the ballots cast by all stockholders present at said meeting disclosed that no share of stock had been voted against said consent and that the number of shares of stock voted for said consent was 275,000 shares of preferred stock and 474,994 shares of common stock of Railroad Company, being more than 99% of all of the capital stock of Railroad Company then issued and outstanding. The issuance and sale of said $572,800 Series A Bonds at not less than ninety nine per cent of their face amount and accrued interest and for the purposes hereinafter stated was approved by order of the Interstate Commerce Commission, dated November 21, 1928, in Finance

(Testimony of M. J. Curry.)

Docket No. 7123. No further authority is required. The Railroad Company has sold and delivered said bonds on April 23, 1930 for cash at the price of 99% of their face amount, together with accrued interest thereon, and the proceeds have been applied to the purposes for which the bonds were issued.

Opinion of Counsel

The opinion of Counsel as to the legality and validity of the issue was rendered by Mr. John B. Marsh, a member of the firm of Taylor, Blanc, Capron & Marsh, 43 Exchange Place, New York, N. Y., Mr. Carl Taylor, of that firm, being Counsel to the Board of Directors of the Railroad Company.

Purpose of Issue

The purpose of the issue of said bonds was to provide proceeds to be applied to the reimbursement of the Railroad Company for cash advances to Sacramento Northern Railway heretofore made to enable Sacramento Northern Railway to effect the purchase of the properties of San Francisco-Sacramento Railroad Company; Sacramento Northern Railway being a subsidiary of Railroad Company within the meaning of that term as defined in said First Mortgage, and the purchase by it of said properties of San Francisco-Sacramento Railroad Company having been an expenditure of a character with respect to which bonds may be issued and the proceeds of bonds paid out under the terms of Section 2 of Article Second of said First Mortgage, and hav-

(Testimony of M. J. Curry.)

ing been set forth in detail in the application of the Railroad Company to the Interstate Commerce Commission upon which the above mentioned order of November 21st, 1928, was based.

Description

The First Mortgage Bonds are secured by the Railroad Company's First Mortgage, dated June 26, 1916, to First Federal Trust Company (now Crocker First Federal Trust Company of San Francisco, California), and Henry E. Cooper (18 Pine Street, New York City), Trustees. The bonds covered by this application are an additional issue of Series A Bonds of $572,800 principal amount, all bearing interest at the rate of five per cent per annum, dated June 26, 1916, and maturing March 1, 1946.

The principal of the bonds is payable at the office or agency of the Railroad Company in the Borough of Manhattan, City of New York, N. Y., and the interest thereon is payable at its said office or agency, or at the option of the holder at its office or agency in the City and County of San Francisco, semi-annually, on March 1st and September 1st. Both principal of and interest upon each bond are payable in gold coin of the United States of America of or equal to the standard of weight and fineness as it existed June 26, 1916, without deduction for any tax, assessment or other governmental charge (except the Federal Income Tax imposed by the Act of Congress approved October 3, 1913, with respect to in-

(Testimony of M. J. Curry.)

come derived from interest paid thereon), which the Railroad Company or the Trustees under the mortgage securing the bonds, or either of them may be required to pay thereon or to retain therefrom under any present or future law or ordinance of the United States of America, or of any State, territory, municipality, or other taxing authority therein; and the Railroad Company assumes the payment of all such taxes, assessments and charges with the exception aforesaid.

The bonds are in coupon form of the denominations of $1,000 and $500 and $100 and are registerable as to principal only. Coupon bonds for $1,000 are interchangeable with registered bonds of the denominations of $1,000, $5,000 and $10,000, or multiples of $10,000. Coupon bonds for $1,000, $500 and $100 are also interchangeable in equal principal amounts. For any such exchange and for any transfer of registered bonds or of coupon bonds registered as to principal, the Company, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge and except in case of coupon bonds registered as to principal an additional amount not exceeding $1 for each new bond issued upon such exchange or transfer.

Sinking Fund

The Mortgage securing the bonds provides for the creation of a sinking fund, to be especially applied

(Testimony of M. J. Curry.)

to the purchase or redemption of bonds, and requires the Railroad Company for that purpose to pay out of any income lawfully applicable thereto, after payment of operating expenses of every description, taxes and interest upon the bonds, the sum of $50,000 on January 1st of each year, commencing with the year 1919. Series A bonds are redeemable through the sinking fund at par and accrued interest on at least sixty days' previous published notice, as described under redemption. All bonds purchased or redeemed by the sinking fund are to be cancelled and delivered to the Railroad Company. These provisions have been fully complied with.

Redemption

The Railroad Company may redeem all or any part of said Series A Bonds on any semi-annual interest payment date, at par and accrued interest, on notice published once in each calendar week for eight successive weeks in two newspapers of general circulation published in the Borough of Manhattan, New York, N. Y., and one newspaper of general circulation published in San Francisco, California, one such publication to be not less than sixty nor more than ninety days before the date of redemption. The Company may elect to redeem the bonds of one or more series. Serial numbers of bonds drawn by lot for redemption are required to be stated in publications of notice of redemption.

All bonds redeemed are to be cancelled or indelibly stamped with a statement that they have been

(Testimony of M. J. Curry.)

redeemed. In the case, however, of bonds hereafter refunded with, or exchanged for, or the payment, redemption or retirement otherwise whereof shall be provided for by means of, refunding bonds or other obligations of the Railroad Company issued under a mortgage or other instrument providing that bonds redeemed pursuant to the provisions of the First Mortgage, notwithstanding that they shall have been cancelled or marked "Cancelled," shall be deposited with the Trustees under such new mortgage or other instrument, as security for such refunding bonds or other obligations, the bonds so redeemed and deposited shall be deemed to remain alive and unextinguished in the hands of the Trustees under such new mortgage or other instrument for the security of such refunding bonds or other obligations, to the extent specified in section 2 of Article Third of the Mortgage.

Default

The Mortgage provides that in case of default in the payment of interest continuing for the period of three months or default in the payment of principal, or in the observance or performance of any covenants, conditions or agreements on the part of the Railroad Company in the bonds or in the Mortgage contained continuing for the period of three months after written notice from the Trustees, or in case an order be made for the appointment of a Receiver, the Trustees may, and upon the written request of the holders of twenty-five percent in amount of the

(Testimony of M. J. Curry.)

bonds then outstanding shall, by notice in writing, declare the principal of all of the outstanding bonds to be due and payable immediately. The mortgage provides that the holders of a majority in amount of the bonds then outstanding may waive any default that shall have happened and its consequences upon the remedying of such default. It gives the holders of a majority in amount of bonds outstanding the right to direct and to control the action of the Trustees, and the exercise of the remedies provided by the Mortgage.

Additional Bonds

The mortgage provides, subject to the limitation that the aggregate amount of bonds outstanding shall not exceed fifty million dollars, for the issuance of additional bonds to pay, or reimburse the Railroad Company for, the cost of the construction or purchase of extensions to or additional lines of railroad and for the betterment, improvement and equipment of the railroads and other property owned by the Railroad Company or its subsidiary companies and subject to the lien of the mortgage, or securities representing the same, at the rate of one thousand dollars principal amount of bonds for each one thousand dollars of authorized expenditures for the purposes aforesaid, or liabilities incurred therefor. The mortgage also provides for the issuance of bonds sold for cash, against the deposit of the net cash proceeds with the Mortgage Trustees, subject to being withdrawn by the Rail-

(Testimony of M. J. Curry.)

road Company for the purposes above stated to the extent of the net proceeds of each one thousand dollars principal amount of bonds so sold for each one thousand dollars principal amount of bonds which might have been authenticated against such expenditures or liabilities.

The mortgage also provides that bonds of any series outstanding may be replaced by bonds of another series to a like aggregate principal amount, either upon surrender of the outstanding series for cancellation or upon redemption thereof. The mortgage further provides for the issuance of new bonds to replace bonds mutilated, lost or destroyed, upon proper proof and satisfactory indemnity.

Changes in Capitalization

Since December 31, 1928 (the date as of which the consolidated balance sheet contained in said previous application A-8696 was made) there has been no change in the amount of Capital Stock or funded debt of the Railroad Company authorized and outstanding except:

First: The issuance of the $5,000,000 of Series A 5% Bonds covered by said application A-8696; and

Second: The purchase of $100,000 face amount of the Series "A" 5% Bonds, for the sinking fund (making the total amount so purchased $655,700); and

(Testimony of M. J. Curry.)

Third: The issuance of $1,095,000 face amount of Equipment Trust Certificates, Series "D"; and

Fourth: The retirement of $750,000 (face amount) of its 5½% Equipment Trust Certificates, Series "B", $207,000 (face amount) of its 5½% Equipment Trust Certificates Series "C" and $73,000 (face amount) of its 5% Equipment Trust Certificates, Series "D"; and

Fifth: The issuance of 8,000 additional shares of the Preferred Stock; and

Sixth: The issuance of the $572,800 of Series A 5% Bonds, listing of which is herein applied for.

Properties

The properties of the Railroad Company are described in the original application for listing of Series A Bonds, No. A-4747, dated March 13, 1917, and in the subsequent applications Nos. A-5478, dated June 30, 1921; A-5667, dated May 10, 1922; A-6800, dated July 16, 1925, A-7277, dated September 30, 1926; A-7722 dated October 31, 1927 and A-8696, dated May 16, 1929.

Since December 31, 1928, the following important changes in mileage have occurred:

Completion of 4.63 miles additional main line yard, industry and side tracks the operation of which commenced on various dates between Jan. 1, 1929 and December 31, 1929.

(Testimony of M. J. Curry.)

Completion of .50 miles additional branch line side and spur tracks, the operation of which commenced on various dates between Jan. 1, 1929 and December 31, 1929.

Acquisition of joint interest with other carriers in .42 miles of yard tracks, operation of which commenced on various dates between Jan. 1, 1929 and December 31, 1929.

Since December 31, 1928, the Railroad Company has made the following changes in equipment:

Additions:	
Locomotives, freight	5
Freight train cars:	
Automobile box	250
Flat	50
Tank	50
Caboose	5
Total additions	360
Retirements:	
Freight train cars destroyed and converted:	
Automobile	1
Box	4
Flat	9
Coal	1
Refrigerator	10
Caboose	1
Construction and maintenance equipment:	
Outfit cars	1
Total deductions	27
Net total units added January 1, 1929 to December 31, 1929	333

(Testimony of M. J. Curry.)

Lien

Reference is made to the previous listing applications, Nos. A-4747, A-5478, A-5667, A-6800, A-7277, and A-7722 and A-8696 for a description of the property subject to the lien of the Mortgage prior to January 1, 1929. The property on which the Mortgage constitutes a first lien includes the following:

Mileage:	Miles
Main line mileage, San Francisco to Salt Lake City	926.41
Branch lines, main track	125.08
Second main track	2.73
Yard tracks and sidings, etc.	312.74
Total track miles	1,366.96

Equipment:	
Locomotives	148
Passenger cars	13
Freight cars	5,880
Service cars	394
Floating equipment	6
Total	6,441

The foregoing equipment does not include additional unmortgaged equipment covered by Equipment Trust Agreements, Series "B," Series "C" and Series "D," as follows:

Locomotives	21
Passenger cars	48
Freight cars	3,590
Service cars	1

(Testimony of M. J. Curry.)

Securities:

1,000 shares Capital Stock (50% of outstanding) of The Salt Lake City Union Depot and Railroad Company, operating the passenger terminal at Salt Lake City, leased to the Railroad Company and The Denver and Rio Grande Western Railroad Company.

4,500 shares of the Capital Stock (entire issue) of the Deep Creek Railroad Company, operating a line of railroad in Western Utah, 46 miles.

4,005 shares of the Capital Stock (entire issue) of Standard Realty and Development Company, organized to acquire and hold real estate in connection with the construction of the Railroad Company.
